Time use survey: 1998

Overview

Type	Other Household Survey [hh/oth]
Identification	DDI-IND-MOSPI-CSO-TUS-1998-99
Version	Production Date: 2012-12-01 V1.0; Re-organised anonymised dataset for public distribution.
Series	Several scholars in India have experimented with small scale time use surveys covering a small number of villages and households. The prominent studies among these are (a) Time Allocation Study in some villages of Rajasthan and West Bengal by Jain and Chand (Jain and Chand 1982), (b) Time Allocation study in Tamil Nadu by Directorate of Economics and Statistics, Tamil Nadu (1996), (c) Time Use Study by NCAER in a few villages in (1980s) (d) a study on the Time Use of children by Ramesh Kanbargi in the survey and classification of activities. The study by Jain and Chand which is the most important of the studies. observed interesting results about the time use of women and showed that their participation in economic activities was higher than what is presented in the Population Census and National Sample Survey Statistics Though these studies made interesting observations about the time use pattern of people in some micro situations, they had several methodological lacunas. Also, they could not present any results relevant at the regional/state/national level due to their small size and, therefore, could not be used either for correcting labour force statistics or national income statistics or for formulating macro policies in the economic and social fields.

Abstract

To take care of the limitations of the earlier Time Use Studies in India and to meet the new emerging data requirements, Ministry of Statistics and Programme Implementation, Government of India, therefore, conducted a pilot Time Use Survey in 18620 households spread over six selected states , namely, Haryana, Madhya Pradesh, Gujarat, Orissa, Tamil Nadu and Meghalaya during the period July, 1998 to June, 1999.

Following were the main objectives of this survey:

1. To develop a conceptual framework and a suitable methodology for designing and conducting time use studies in India on a regular basis. Also, to evolve a methodology to estimate labour force/work force in the country and to estimate the value of unpaid work in the economy in a satellite account.

2. To infer policy/programme implications from the analysis of the data on (a) distribution of paid and unpaid work among men and women in rural and urban areas, (b) nature of unpaid work of women including the drudgery of their work and (c) sharing of household work by men and women for gender equity.

3. To analyze the time use pattern of the individuals to understand the nature of their work so as to draw inference for employment and welfare programmes for them.

4. To analyze the data of the time use pattern of the specific section of the population such as children and women to draw inferences for welfare policies for them.

5. To collect and analyze the time use pattern of people in the selected states in India in order to have a comprehensive information about the time spent by people on marketed and non-marketed economic activities covered under the 1993-SNA, non marketed non-SNA activities covered under the General Production Boundary and on personal care and related activities that cannot be delegated to others.

6. To use the data in generating more reliable estimates on work force and national income as per 1993 SNA, and in computing the value of unpaid work through separate satellite account,

Keeping in view the importance of the survey for India and our specific socio-economic situation similar to other developing countries, this survey was conducted using own financial, technical and manpower resources. Moreover, to ensure capacity building for conducting such surveys on a regular basis, this survey was conducted by utilizing the official statistical system machinery.

Kind of Data	Sample survey data [ssd]
Unit of Analysis	Randomly selected households based on sampling procedure and members of the household

Scope & Coverage

Scope
In this survey information were collected about the household size, possession of agricultural land, religion of the household, structure of the houses, head of households, etc thru Block-1 of the schedule.

Block-2 covered particulars regarding the age, sex, marital status, educational level, industrial and occupational characteristics of the members of the selected households were collected. As the activity pattern of the household members gets affected due to presence of a disabled member in the household. information about the presence of disabled member in the household was also collected. Similarly. on state level no good data are available about the extent of participation of women in the household decision making. With the present day emphasis on empowerment of women, this information is very vital. Therefore, an attempt was also made to enquire from females aged 18 years above whether they were participating in the decision making in the household. The participation was judged by considering"" their involvement in the purchase of durable consumer goods in the household.

Block-3 was devoted entirely for time Disposition of Persons on Selected Days of the Week

After careful consideration interviewing method rather than diary or observation method was adopted for collection of data . A reference period of one week was adopted for collecting the data. With a view to capture the variation in the activity pattern, data were collected for three types of days namely, normal, weekly variant and abnormal. Further, data for each type of these days were collected with a recall lapse of only one-day

Geographic Coverage
Time Use Survey was conducted in 6 selected States namely, Haryana, Madhya Pradesh, Gujarat, Orissa, Tamil Nadu and Meghalaya.

Universe
The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

The sampling design adopted in the survey was three stage stratified design. The first, second and third stages were the district, villages/urban blocks and households. Proper stratification of the districts in the selected states were done using the population density and proportion of tribal population to ensure capturing of the variability in the population. In the villages/urban blocks also sub-stratification was adopted to ensure representation of all types of households in the Survey.

As no previous survey was conducted on this topic and methodologies to be used were not firmed up, it was decided to conduct this survey on a pilot basis. However, to ensure the use of data collected in the pilot survey also, a proper sampling procedure was followed.

Refer the attached document named 'Report' attached under external resource

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

The total number of households covered in the sample was 18.591 as against 18,620 originally planned. 68 % of the households was in rural areas. Therefore, the non-response at 0.1 % was negligible.

Weighting

For generating any estimate, one has to extract relevant portion of the data, and aggregate after applying the weights.

Weights (or multipliers) VARIABLES are given at the end of record of each dataset. The weights (multipliers) are WGT_SS for Sub-sample-wise estimation and WGT_Combined for combined subsample estimates.

All records of a household will have same weight figure. In case of those Blocks/Levels, where Item/Person Sl.No. is not applicable the field is filled up with 00000.

Use of subsample-wise weights (multipliers)

For generating subsample-wise estimates based on data of all subrounds taken together, either Subsample-1 households or Subsample-2 households are to be considered at one time. Subsample code is available in the dataset For generating subsample-combined estimates based on data of all subrounds taken together all households are to be considered.

Data Collection

Data Collection Mode	Face-to-face [f2f]

Data Collection Notes

The pros and cons of getting the survey conducted through a Non-Governmental Organisation (NGO) was deliberated in great details. As the survey was to be conducted in 6 States, the strength of the NGO in terms of skilled manpower was an important consideration. As it was difficult to identify such a NGO, it was decided to involve, Directorate of Economics and Statistics of the respective States in this exercise. These organisations

already conduct large scale surveys and have their offices located at the districts and block level. Moreover, they also have the data processing facilities. The use of these organisations helped in fast training of the already experienced investigators, reduction in the cost of the survey due to short distance travel involved by the investigators, avoidance of the involvement of another agency for the data entry and processing work. The involvement of these agencies also helped in the capacity building in these organisations.

Questionnaires
The final questionnaire used in the survey was evolved after a number of discussion with the academic experts and the practising survey statisticians. The final questionnaire consisted of following three parts:
i. Schedule 0.1: Listing Questionnaire for the Rural Areas
ii. Schedule 0.2: Listing Questionnaire for the Urban Areas
iii. Schedule 0.3: Household Questionnaire which consist of following Blocks

(a) Block 0: Identification of Sample Households
(b) Block 1: Household Characteristics
(c) Block 2: Particulars of Household Members
(d) Block 3: Time Disposition of Persons on Selected Days of the Week

A copy of the questionnaire is attached as external resource

Supervision
To provide technical guidance for various activities in the Survey a Technical Advisory Committee (TAC) was constituted under the Chairmanship of Prof. Indira Hirway, a non-official expert from Centre for Development Alternatives, Ahmedabad. The composition and term of reference of the TAC are given at Annexure-I. A number of meetings of the TAC was held to finalise the questionnaire, sampling design, tabulation plan etc. The members of the TAC also visited the field to see the quality of field work. The officers of the Central Statistical Organization involved with this Survey frequently inspected the field work. For each State participating in the Survey, a Technical Advisory Committee was also constituted which has the representation of non-official members also. These State level
Advisory Committees were also requested to meet every quarter to sort out the local problems and provide the guidance. Each State was also asked to submit regular progress report of the field work. Because of these strict monitoring mechanism, field work of the Survey sas completed, as per schedule in July, 1999.

Data Processing & Appraisal

Data Editing
The date entry and validation work of the Survey was handled by the States for which data entry and validation packages were supplied by the Central Statistical Organization. A Workshop was also organized to sort out the various problems faced by the States in the use of these packages. For evolving the data entry and validation package, the help of Data Processing Division of the National Sample Survey Organization was taken. The validated data was sent by States to the CSO and the final processing of the data was done by the Computer Centre of the Department. In spite of severe problem faced ion the operation of main-frame computer at the Computer Center, data processing work of the Survey completed by the end of November, 99.

Accessibility

Access Authority	Computer Centre (M/O Statistics and Programme Implementation) , http://mospi.nic.in/Mospi_New/site/home.aspx , nssodata@gmail.com
Contact(s)	ADG, SDRD , NSSO (M/O Statistics & PI, G/O India) , http://mospi.gov.in/ DDG, Computer Centre (Ministry of Statistics and Programme Implementation) , http://mospi.nic.in/Mospi_New/site/home.aspx

Access Conditions
Validated unit level data relating to various survey rounds are available on CD-ROMS which can be obtained from the Deputy Director General, Computer Centre, M/O Statistics and PI, East Block No. 10 R.K. Puram, New Delhi-110066 by remitting the price along with packaging and postal charges as well as giving an undertaking

duly signed in a specified format.The amount is to be remitted by way of demand draft drawn in favour of Pay & Accounts Officer, Ministry of Statistics & Programme Implementation, payable at New Delhi.

Files Description

Dataset contains 4 file(s)

Block-0-1-Identification-Household-Characteristics-records

# Cases	18591
# Variable(s)	35
File Structure	Type: relational Key(s): Hhold_key (Key to locate Household)

File Content
This dataset contains identification of sample household and also household characteristics

Producer
SSD,CSO

Notes
In the absence of a copy of the manual on instruction to the field staff detailed description could not be provided in respect of each variables in the dataset.

Block-2-Particulars-Household-members-records

# Cases	77593
# Variable(s)	38
File Structure	Type: relational Key(s): Key_Membno (Key to locate Member no) , Key_hhold (Key to locate Household no)

File Content
This data contains partiulars of household members

Producer
SSD,CSO

Notes
In the absence of a copy of the manual on instruction to the field staff detailed description could not be provided in respect of each variables in the dataset.

Block-3-Time-disposition-selected-days-week-records

# Cases	75690
# Variable(s)	31
File Structure	Type: relational Key(s): KEY_MEMBno (Key to locate member no) , KEY_hhold (Key to locate household)

File Content
This dataset contains data relating to time disposition of persons on selected days of the week (items 1 to 4(b) of Block-3)

Producer
SSD,CSO

Notes

In the absence of a copy of the manual on instruction to the field staff detailed description could not be provided in respect of each variables in the dataset.

Block-3-Item-5-Particulars-activity-selected-days-records

# Cases	3170534
# Variable(s)	33
File Structure	Type: relational Key(s): Key_membno (Key to locate member no) , Key_hhold (key to locate hhold)

File Content
This dataset contains data relating to time disposition of persons and particulars of their activity on selected days of the week (items 5 of Block-3)

Producer
SSD,CSO

Variables List

Dataset contains 137 variable(s)

Variables Description

Dataset contains137 variable(s)

File Block-0-1-Identification-Household-Characteristics-records

#1 **Hhold_key: Key to locate Household**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

#2 **Rec_id: Record identifier**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
01	Block 1 of schedule	18591		100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#3 **Schedule_ID: Schedule ID**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
TUS1	Time use Survey 1	18591		100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#4 **Schedule_No: Schedule No.**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
10	Schedule 1.0	18591		100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#5 **sector: Sector code**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
1	Rural	12750		68.6%
2	Urban	5841		31.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#6 **subround: Sub-round**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
5	5	18591		100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#7 **subsample: Sub –sample**

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

File Block-0-1-Identification-Household-Characteristics-records

#7 subsample: Sub –sample

Value	Label	Cases	Percentage
1	Sub-sample-1	9291	50.0%
2	Sub-sample-2	9300	50.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#8 State: State Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Haryana	1344	7.2%
2	Madhya Pradesh	5061	27.2%
3	Gujarat	3161	17.0%
4	Orissa	2796	15.0%
5	Tamil Nadu	5653	30.4%
6	Meghalaya	576	3.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#9 District: District Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
01	01	768	4.1%
02	02	1962	10.6%
03	03	288	1.5%
04	04	552	3.0%
05	05	816	4.4%
06	06	1764	9.5%
07	07	864	4.6%
08	08	993	5.3%
09	09	192	1.0%
10	10	432	2.3%
11	11	480	2.6%
12	12	1776	9.6%
13	13	1534	8.3%
15	15	1247	6.7%
16	16	192	1.0%
17	17	807	4.3%
19	19	240	1.3%
22	22	336	1.8%
24	24	480	2.6%
28	28	324	1.7%
29	29	192	1.0%
30	30	192	1.0%
31	31	288	1.5%
33	33	624	3.4%

File Block-0-1-Identification-Household-Characteristics-records

#9 District: District Code

Value	Label	Cases	Percentage	
36	36	384		2.1%
38	38	336		1.8%
39	39	528		2.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#10 district_class: Class of district

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
1	1	10241		55.1%
2	2	5446		29.3%
3	3	2904		15.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#11 Tehsil_Town: Tehsil / Town Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Frequency table not shown (45 Modalities)

#12 stratum: Stratum Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
1	1	3051		16.4%
2	2	3552		19.1%
3	3	5389		29.0%
4	4	6599		35.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#13 Vill_Blk: Serial No. of Village / Block

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

#14 sub_blk: Hamlet Group / Sub block No.

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
000	000	718		3.9%
001	001	11453		61.6%
002	002	2428		13.1%
003	003	1118		6.0%
004	004	725		3.9%
005	005	337		1.8%
006	006	338		1.8%
007	007	181		1.0%

File Block-0-1-Identification-Household-Characteristics-records

#14 sub_blk: Hamlet Group / Sub block No.

Value	Label	Cases	Percentage
008	008	252	1.4%
009	009	159	0.9%
010	010	72	0.4%
011	011	128	0.7%

034	034	12	0.1%
190	190	12	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#15 stage2_stratum: Second – stage stratum

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	1	3799	20.4%
2	2	3505	18.9%
3	3	2898	15.6%
4	4	1690	9.1%
5	5	4758	25.6%
6	6	1941	10.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#16 Hholdno: Sample Household No

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
01	01	6259	33.7%
02	02	3231	17.4%
03	03	2239	12.0%
04	04	1655	8.9%

File Block-0-1-Identification-Household-Characteristics-records

#16 Hholdno: Sample Household No

Value	Label	Cases	Percentage
05	05	1218	6.6%
06	06	907	4.9%
07	07	702	3.8%
08	08	575	3.1%
09	09	499	2.7%
10	10	447	2.4%
11	11	434	2.3%
12	12	425	2.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#17 B0_q12: Relation of informant to head of H.H

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Self	12956	69.7%
2	Spouse of Head	4378	23.5%
3	Married Child	278	1.5%
4	Spouse of married Child	119	0.6%
5	unmaried Child	459	2.5%
6	Grand Child	14	0.1%
7	Father/Mother/Father-in-law/mother-in-law	205	1.1%
8	Brother/Sister/Brother-in-Law/otherRelatives	153	0.8%
9	servant/employee/other non-relatives	29	0.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#18 B0_q13: Survey Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	household surveyed: original	18522	99.6%
2	substirute	69	0.4%
3	Casuality	0	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#19 B0_q14: Reason for substitution -

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
0	NA	18522	99.6%
1	Informant buSy'	2	0.0%

File Block-0-1-Identification-Household-Characteristics-records

#19 B0_q14: Reason for substitution -

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#20 B1_q1: Household Size

Information	[Type= continuous] [Format=numeric] [Range= 1-23] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

#21 B1_q2: Principal Industry Occupation Code

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

#22 B1_q3: Type of Employment-recoded

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
11	Self employed professional in non-agricultural (rural area)	788	4.2%
12	Self employed non-professional in non-agricultural (rural area)	616	3.3%
13	Agriculture labour (rural area)	3519	18.9%
14	Other labour (rural area)	1208	6.5%
15	Self employed in agriculture	5202	28.0%
19	Others (rural area)	1417	7.6%
21	Self employed professional (Urban area)	1191	6.4%
22	Self employed non-professional (Urban area)	784	4.2%
23	R,egular wage I salary earner (Urban area)	2040	11.0%
24	casual labour (Urban area)	1072	5.8%
29	Others (Urban area)	754	4.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#23 B1_q4: Religion

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Hinduism	16358	88.0%
2	Islam	1126	6.1%
3	Christianity	685	3.7%
4	Sikhism	153	0.8%
5	Budhism	15	0.1%
6	Zoroastrianism	20	0.1%
7	Jainism	54	0.3%
9	Others	180	1.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#24 B1_q5: Social Group

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Scheduled tribe	2725	14.7%

File Block-0-1-Identification-Household-Characteristics-records

#24 B1_q5: Social Group

Value	Label	Cases	Percentage	
2	Scheduled caste	2993		16.1%
9	Others	12873		69.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#25 B1_q6: Having Homestead

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage	
1	Yes	10709		57.6%
2	No	7882		42.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#26 B1_q7: Land Owned (acres 0.00)

Information	[Type= continuous] [Format=numeric] [Range= 0-250] [Missing=*]
Statistics [NW/ W]	[Valid=18591 /-] [Invalid=0 /-] [Mean=1.487 /-] [StdDev=4.19 /-]
