

Informal Sector and Conditions of Employment in India

NSS 66th ROUND
(July 2009 – June 2010)

National Sample Survey Office
National Statistical Organisation
Ministry of Statistics & Programme Implementation
Government of India

January 2012

प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण (एनएसएस) के परिवार उपभोक्ता व्यय संबंधी सर्वेक्षण राष्ट्रीय तथा राज्य स्तर पर आबादी के अलग-अलग वर्गों के जीवन-स्तर के विभिन्न संकेतकों के बारे में आंकड़ों के बुनियादी स्रोत हैं। इन आंकड़ों का उपयोग नियोजन, नीति निर्माण एवं निर्णय में मदद के लिए किया जाता है तथा विभिन्न सरकारी संगठन, शिक्षाविद्, शोधकर्ता और विद्वान इनका उपयोग सांख्यिकी प्रक्रियाओं में इनपुट के रूप में करते हैं। परिवारों के बड़े प्रतिदर्श आकार के साथ रोजगार एवं बेरोजगारी संबंधी एनएसएस सर्वेक्षण, 27वें दौर (अक्टूबर 1972-सितम्बर 1973) से पंचवार्षिक आधार पर आयोजित किए जा रहे हैं। जुलाई 2009-जून 2010 के दौरान किया गया एनएसएस का 66वें दौर का सर्वेक्षण, इस श्रृंखला का आठवां पंचवार्षिक सर्वेक्षण था। इसमें (i) परिवार उपभोक्ता व्यय तथा (ii) रोजगार तथा बेरोजगारी विषयों को सम्मिलित किया गया था। इस सर्वेक्षण का क्षेत्र कार्य राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा किया गया था जिसमें केन्द्रीय प्रतिदर्शों को सम्मिलित किया गया था। अधिकांश राज्य सरकारों ने भी समान प्रतिदर्श आकार के आधार पर इस सर्वेक्षण में सहभागिता की थी।

केन्द्रीय प्रतिदर्श के आधार पर, एनएसएसओ ने रोजगार एवं बेरोजगारी संबंधी पंचवार्षिक सर्वेक्षणों के निष्कर्ष कई प्रतिवेदनों में प्रकाशित किए हैं। एनएसएसओ ने जून 2011 में भारत में रोजगार एवं बेरोजगारी के मुख्य संकेतक, 2009-10 जारी किए थे। इसके अलावा, एनएसएस के 66वें दौर के सर्वेक्षण आंकड़ों के आधार पर रोजगार एवं बेरोजगारी के विभिन्न पहलुओं पर आठ विस्तृत प्रतिवेदन जारी करने की योजना बनाई गई है। इस श्रृंखला में प्रथम प्रतिवेदन के तौर पर, नवम्बर, 2011 में भारत में रोजगार एवं बेरोजगारी की स्थिति, 2009-2010 जारी किया गया था। वर्तमान प्रतिवेदन "भारत में अनौपचारिक क्षेत्र और रोजगार की स्थिति" इस श्रृंखला का दूसरा प्रतिवेदन है।

इस बात को ध्यान में रखते हुए कि भारत में कामगारों का एक बड़ा हिस्सा अर्थव्यवस्था के अनौपचारिक क्षेत्र में कार्यरत है, गैर कृषिगत क्षेत्र और साथ ही कृषिगत क्षेत्र में कार्यरत सामान्य स्थिति के कामगारों (केवल फसल उगाने, साग-सब्जियों के विपणन, बागवानी और फसल उगाने तथा साथ ही पशुपालन के कार्य में लगे कामगारों को छोड़कर) से गहराई से प्रश्न पूछे गए थे ताकि कामगारों और उद्यमों जिनमें वे कार्य कर रहे थे के बारे में सूचना जुटाई जा सके। इस प्रतिवेदन में, अनौपचारिक क्षेत्र के उद्यमों में कार्यरत कामगारों के विशेष संदर्भ के साथ उन उद्यमों की कुछ विशेषताओं से संबंधित श्रम शक्ति के अनुमान उपलब्ध कराए गए हैं जहां ये कामगार कार्यरत थे तथा प्रतिवेदन में रोजगार हालातों के संदर्भ में कर्मचारियों के अनुमान भी उपलब्ध कराए गए हैं। उद्यमों की विशेषताएं उद्यम के प्रकार, कार्यस्थल की अवस्थिति, उत्पादन के लिए बिजली का उपयोग, कामगारों की संख्या आदि से संबंधित है और कर्मचारियों के नियोजन के हालात, सवेतन अवकाश की पात्रता, सामाजिक सुरक्षा लाभों की पात्रता, लिखित अनुबंध होना आदि से संबंधित है। इस प्रकार, इस प्रतिवेदन में एनएसएस के 66वें दौर के सर्वेक्षण निष्कर्षों के आधार पर रोजगार के कुछ गुणात्मक पहलुओं पर प्रकाश डाला गया है। इस प्रतिवेदन में तीन अध्याय और चार परिशिष्ट हैं। इस प्रतिवेदन में अनुमानों से संबंधित मुख्य निष्कर्ष अध्याय तीन में दिए गए हैं। चूंकि यह प्रतिवेदन काफी बड़ा है, परिशिष्ट तालिकाएं इस प्रतिवेदन के साथ एक सीडी में दी गई हैं।

एनएसएसओ, सर्वेक्षण परिणाम एवं प्रतिवेदन की समय से उपलब्धता के गद्देनजर प्रयोक्ताओं की अपेक्षाओं को पूरा करने के लिए अपने सर्वेक्षण निष्कर्षों और प्रतिवेदनों को शीघ्र प्रकाशित करने का प्रयास कर रहा है। क्षेत्र कार्य समाप्त होने के एक वर्ष के भीतर सर्वेक्षण के मुख्य निष्कर्ष और इकाई स्तर के आंकड़े जारी किए जा चुके हैं। एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किए गए प्रयासों से विभिन्न कार्यकलापों के बेहतरीन नियोजन और निष्पादन तथा एनएसएसओ के सहायक अधिकारियों और स्टॉफ की कठिन मेहनत से यह कार्य संभव हो सका है। प्रतिवेदन की समीक्षा और महत्वपूर्ण टिप्पणियों को उपलब्ध कराने के लिए मैं प्रो. रवि श्रीवास्तव को धन्यवाद देता हूँ।

आशा है कि यह प्रतिवेदन योजनाकारों, नीतिनिर्माताओं, शोधकर्ताओं के लिए उपयोगी सिद्ध होगा। इस प्रतिवेदन की विषय-वस्तु तथा कवरेज के बारे में सुधार हेतु सुझावों का स्वागत है।

PREFACE

The Employment and Unemployment Surveys of National Sample Survey (NSS) are the primary source of data on various indicators of labour force at National and State levels. These are used for planning, policy formulation, decision support and as input for further statistical exercises by various Government organisations, academicians, researchers and scholars. NSS surveys on Employment and Unemployment with large sample size of households have been conducted quinquennially from 27th round (October 1972 – September 1973) onwards. The NSS 66th round carried out during July 2009- June 2010 was the eighth quinquennial round in the series, covering subjects of (i) Household Consumer Expenditure and (ii) Employment and Unemployment. Field work of this survey was carried out by the Field Operations Division (FOD) of National Sample Survey Office (NSSO) in which the central samples were covered. Most of the State Governments also participate in the survey on matching sample size basis.

Based on the central sample, the results of quinquennial surveys of Employment and Unemployment are brought out by NSSO in a number of reports. The NSSO released the *Key Indicators of Employment and Unemployment in India, 2009-10* in June 2011. Apart from this, eight detailed reports are planned to be released on varied aspects of employment and unemployment based on NSS 66th round data. The first report in this series, *Employment and Unemployment Situation in India, 2009-10* was released in November 2011. The present report, *'Informal Sector and Conditions of Employment in India'* is the second in the series.

Keeping in view the significant proportion of workers in India engaged in the informal sector of the economy, a set of probing questions were asked to usual status workers engaged in non-agricultural sectors as well as agricultural sector (except those engaged in only growing of crops, market gardening, horticulture and growing of crops combined with farming of animals) to collect the information on the characteristics of the workers and the enterprises in which they worked. This report provides estimates of workforce in respect of certain characteristics of the enterprise where workers worked, with special reference to those engaged in the *informal sector* enterprises and estimates of employees with respect to their conditions of employment. The characteristics of the enterprises relate to 'type of enterprise', 'location of work place', 'use of electricity for production', 'number of workers', etc., and the conditions of employment of the employees relate to 'eligibility of paid leave', 'eligibility of social security benefits', 'existence of written contract', etc. Thus, this report brings out some qualitative aspects of employment based on the survey findings of NSS 66th round. This report contains three Chapters and four Appendices. The main findings relating to the estimates given in this report are presented in Chapter Three. Since the report is voluminous, the Appendix Tables are given in a CD along with the report.

NSSO has been endeavouring to bring out its survey results and reports, meeting the aspirations of users for their timely availability. The key results of the Survey and unit level data have been released within one year of the completion of the Field work. This was possible because of the efforts made by the officials of different divisions of NSSO for meticulous planning and execution of various activities involved and the hard work done by the supporting officials and staff of NSSO. I thank Prof. Ravi Srivastava for reviewing the report and providing valuable comments.

I hope, this report will be useful to the planners, policy makers and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

National Sample Survey Office

मुख्य बातें

यह रिपोर्ट जुलाई 2009 से जून 2010 के दौरान संचालित रा.प्र.स. के 66वें दौर में रोजगार एवं बेरोजगार पर किये गए आठवें पंचवार्षिक सर्वेक्षण पर आधारित है। यह सर्वेक्षण 7,402 ग्रामों एवं 5,252 नगरीय खंडों के 1,00,957 परिवारों (59,129 ग्रामीण क्षेत्रों में एवं 41,828 नगरीय क्षेत्रों में) में फैला था एवं 4,59,784 व्यक्तियों (2,81,327 ग्रामीण क्षेत्रों में एवं 1,78,457 नगरीय क्षेत्रों) की गणना की गयी।

रा.प्र.स. के 66वें दौर में, अनौपचारिक क्षेत्र के कर्मचारियों के विवरण एवं विभिन्न वर्गों के कार्मिकों के रोजगार की अवस्था (जैसे नियमित मजदूरी/वेतनभोगी कामगारों एवं आकस्मिक श्रमिकों) जो कि रा.औ.व 2004 के विभिन्न उद्योग समूहों/प्रभागों 012, 014, 015, 02, 05, 10 - 99 के लिए इकट्ठा किया गया। इनमें से उद्योग समूहों/प्रभाग 012, 014, 015, 02, 05 (जो आगे ए.जी.ई.जी.सी. क्षेत्र कहा गया है) कृषि क्षेत्र में थे केवल फसल उगाने, उद्यान बाजार, उद्यान कृषि (उद्योग समूह 011) एवं फसल उगाना जिसके साथ जानवरों की फार्मिंग (उद्योग समूह 013) को छोड़कर। उद्योग समूह 011 एवं 013 व्याप्ति के बाहर रखे गए। यह सूचना उनसे इकट्ठी की गयी थी जो सामान्य मुख्य स्तर (पी.एस.) में एवं साथ ही वे जो गौण आर्थिक क्रियाकलाप (एसएस) में वर्गीकृत किए गए थे। अनौपचारिक क्षेत्र एवं रोजगार की स्थितियों पर चर्चा, उन कामगारों से संदर्भित है जो सामान्य स्तर (पीएस+एसएस) ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्रों में कार्यरत थे।

भारत में, करीब 49 प्रतिशत कामगार उद्योग समूह 011 एवं 013 में जिसमें करीब 63 प्रतिशत ग्रामीण क्षेत्रों में एवं 6 प्रतिशत नगरीय क्षेत्रों में कार्यरत थे। इस रिपोर्ट की व्याप्ति ज्यादातर ए.जी.ई.जी.सी. एवं गैर कृषि क्षेत्रों में उस चर्चा तक सीमित है जिसमें अनौपचारिक क्षेत्र एवं कर्मचारियों के रोजगार की स्थितियां बताई जा सकें। फिर भी, युनियन/एसोसियेशन के अस्तित्व पर चर्चा केवल कर्मचारियों तक ही सीमित नहीं है बल्कि उन स्व-कार्यरत कामगारों तक भी जो रा.औ.व.-2004 सभी उद्योगप्रभाग अर्थात्, रा.औ.व.-2004 संकेतांक 01 से 99 में कार्यरत हैं।

अनौपचारिक क्षेत्र (मालिकाना, उद्योग साझेदारी) से जुड़े कामगारों की कुछ मुख्य खोजें जैसे कामगारों के कार्यस्थल की जगह, जो कर्मचारी उन उद्योग में कार्यरत हैं जो बिजली इस्तेमाल करते हैं उनके अनुपात, उद्योग का आकार, कर्मचारियों के मजदूरी दर एवं वेतन एवं उनके रोजगार पर कुछ स्थितियां (नियमित मजदूरी/वेतनभोगी कर्मचारी एवं आकस्मिक श्रमिक), जैसे, जॉब कान्ट्रैक्ट का प्रकार, भुगतान की गयी छुट्टी, रोजगार की प्रकृति (स्थायी/अस्थायी), सामाजिक सुरक्षा लाभों की उपलब्धता, आदि, नीचे दी गई हैं:-

1. अनौपचारिक क्षेत्र के कामगार :-

(a) कामगारों का शेयर (पीएस-एसएस) ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्रों में [पैरा : 3.1.3 एवं 3.1.4]

❖ ग्रामीण क्षेत्रों में, ए.जे.ई.जी.सी. एवं गैर-कृषि क्षेत्रों के सभी कार्मिकों का (पीएस+एसएस) कुल भाग 37 प्रतिशत (ए.जी.ई.जी.सी. : 5 प्रतिशत एवं गैर-कृषि : 32 प्रतिशत)।

❖ नगरीय क्षेत्रों में, ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्रों के सभी कार्मिकों का कुल भाग 94 प्रतिशत (ए.जी.ई.जी.सी. 1.6 प्रतिशत एवं गैर-कृषि : 92.5 प्रतिशत)।

- ❖ ए.जे.ई.जी.सी. एवं गैर-कृषि क्षेत्रों के कामगारों के बीच, ए.जे.ई.जी.सी. ने करीब 8 प्रतिशत को कार्यरत किया एवं शेष बचे 92 प्रतिशत कामगारों को गैर-कृषि क्षेत्र में कार्य पर लिया गया ।
- ❖ ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्रों के कुल कामगारों के बँटवारे में गैर-कृषि क्षेत्र के नगरीय क्षेत्रों में करीब 98 प्रतिशत कामगारों के भागीदारी की, तुलना में ग्रामीण क्षेत्रों में 87 % थे ।

(b) *अनौपचारिक क्षेत्र में कामगारों का शेयर(भाग)* [पैरा 3.2.2 एवं 3.2.5]

- ❖ ए.जे.ई.जी.सी. एवं गैर-कृषि क्षेत्रों के सभी कामगारों में से करीब 71 प्रतिशत अनौपचारिक क्षेत्र में कार्यरत थे (ग्रामीण क्षेत्रों में 74 प्रतिशत एवं नगरीय क्षेत्रों में 67 प्रतिशत) ।
- ❖ ए.जी.ई.जी.सी. में ग्रामीण और नगरीय दोनों क्षेत्रों में 93 प्रतिशत से अधिक कामगार अनौपचारिक क्षेत्र में लगे हुए थे । गैर-कृषि क्षेत्र में करीब 71 प्रतिशत कामगार ग्रामीण क्षेत्र में एवं 67 प्रतिशत नगरीय क्षेत्र के कामगार अनौपचारिक क्षेत्र में कार्यरत थे ।
- ❖ गैर-कृषि क्षेत्र स्वनियोजितों में से करीब 92 प्रतिशत ग्रामीण क्षेत्रों में एवं 95 प्रतिशत नगरीय क्षेत्रों में, अनौपचारिक क्षेत्र में कार्यरत थे ।
- ❖ गैर-कृषि क्षेत्र में आकस्मिक श्रमिकों में, जो कि सार्वजनिक कार्यों के अलावा अन्य कार्यों में कार्यरत थे, ग्रामीण एवं नगरीय दोनों क्षेत्रों में करीब 73 प्रतिशत अनौपचारिक क्षेत्र में कार्यरत थे।
- ❖ गैर-कृषि क्षेत्र के नियमित मजदूरी/वेतनभोगी कर्मचारियों में करीब 39 प्रतिशत ग्रामीण क्षेत्रों एवं 40 प्रतिशत नगरीय क्षेत्रों के अनौपचारिक क्षेत्र में काम करते थे ।

(c) *विस्तृत उद्योग प्रभाग में अनौपचारिक क्षेत्र के कामगार* [पैरा 3.2.7 एवं 3.2.8]

- ❖ निर्माण, विनिर्माण और थोक एवं खुदरा व्यापार क्रियाकलाप एक साथ अनौपचारिक क्षेत्र के उद्यमों एवं सभी उद्यमों में ग्रामीण और नगरीय दोनों के लिए मुख्य रूप से रोजगार उपलब्ध कराने वाला था ।
- ❖ गैर-कृषि अनौपचारिक क्षेत्र के सभी कामगारों में से ग्रामीण क्षेत्रों के 76 प्रतिशत एवं नगरीय क्षेत्र के 72 प्रतिशत निर्माण, विनिर्माण एवं थोक एवं खुदरा व्यापार में थे । गैर कृषि क्षेत्र के ग्रामीण एवं शहरी क्षेत्रों में सभी कामगारों के लिए तदनु रूप आँकड़े क्रमशः करीब 69 प्रतिशत एवं 59 प्रतिशत थे ।
- ❖ क्रियाकलापों में अनौपचारिक क्षेत्र के कामगारों का अनुपात जो अनौपचारिक क्षेत्र में सर्वाधिक रोजगार उपलब्ध कराते हैं :-

उद्योग अनुभाग	ग्रामीण	नगरीय
विनिर्माण	86	78
निर्माण	64	72
थोक व्यापार या खुदरा व्यापार इत्यादि	91	92
परिवहन, भंडारण एवं संचार	82	68

- ❖ अनौपचारिक क्षेत्र के महिला कामगारों में ग्रामीण क्षेत्रों में करीब 53 प्रतिशत एवं नगरीय क्षेत्रों के 47 प्रतिशत विनिर्माण क्रियाकलापों में थे, विनिर्माण क्रियाकलाप में महिला कामगारों का पुरुषों के मुकाबले एक उच्चतर अनुपात में अनौपचारिक क्षेत्र में नियुक्त थे । नगरीय क्षेत्रों में 87 प्रतिशत

महिला कामगारों की तुलना में 75 प्रतिशत पुरुष कामगार एवं ग्रामीण क्षेत्रों में 93 प्रतिशत महिला कामगारों की तुलना में 83 प्रतिशत पुरुष कामगार थे ।

- (d) *अनौपचारिक क्षेत्र के कामगारों के कार्यस्थल की अवस्थिति* [पैरा 3.2.10]
- ❖ ग्रामीण क्षेत्रों के कार्यस्थल पर ग्रामीण महिला कामगारों का अनुपात 93 प्रतिशत एवं पुरुषों के मामले में यह करीब 83 प्रतिशत था ।
 - ❖ नगरीय महिला कामगारों का अनुपात अपने नगरीय कार्यस्थल पर करीब 92 प्रतिशत था एवं पुरुष के मामले में यह करीब 85 प्रतिशत था ।
 - ❖ ग्रामीण क्षेत्रों में निवास करने वाले अनौपचारिक क्षेत्र के कामगारों में करीब 95 प्रतिशत महिलाएं एवं 86 प्रतिशत पुरुषों का कार्यस्थल ग्रामीण क्षेत्रों में था ।
 - ❖ नगरीय क्षेत्रों में निवास करने वाले अनौपचारिक क्षेत्र के कामगारों में करीब 92 प्रतिशत महिलाएं तथा 83 प्रतिशत पुरुषों का कार्यस्थल नगरीय क्षेत्रों में था ।
 - ❖ ग्रामीण क्षेत्रों में निवास करने वाले अनौपचारिक क्षेत्र में करीब 68 प्रतिशत महिलाएं एवं 21 प्रतिशत पुरुष निम्नलिखित किसी भी प्रकार के कार्य स्थलों में कार्य कर रहे थे : (i) स्वयं निवास, (ii) स्वयं का आवास इकाई के साथ जुड़ी संरचना, (iii) स्वयं का आवास इकाई के पास का खुला क्षेत्र एवं (iv) स्वयं की आवास इकाई से अलग संरचना । नगरीय क्षेत्रों में महिलाओं का तदनुरूप अनुपात 15 प्रतिशत पुरुषों की तुलना में करीब 52 प्रतिशत था ।
- (e) *विनिर्माण उद्यमों में अनौपचारिक क्षेत्र के कामगार जिन्होंने बिजली का उपयोग किया* [पैरा 3.2.11]
- ❖ ग्रामीण क्षेत्रों में विनिर्माण में कार्यरत कामगारों का 31 प्रतिशत उन उद्यमों में कार्यरत था जिन्होंने उत्पाद के लिए बिजली का व्यवहार किया एवं अनौपचारिक क्षेत्र के विनिर्माण उद्यमों के मामले में इसका शेयर 27 प्रतिशत था । नगरीय क्षेत्रों में, तदनुरूप अनुपात क्रमशः 58 प्रतिशत एवं 52 प्रतिशत था ।
- (f) *छोटे उद्यमों में अनौपचारिक क्षेत्र के कामगार (जैसे-वह उद्यम जिसमें 6 से कम कामगार थे)* [पैरा 3.2.12]
- ❖ ग्रामीण क्षेत्रों में अनौपचारिक क्षेत्र के 77 प्रतिशत की तुलना में सभी कामगारों का 64 प्रतिशत छोटे उद्यमों में कार्यरत थे । जबकि नगरीय क्षेत्रों में तदनुरूप अनुपात क्रमशः 69 प्रतिशत एवं 53 प्रतिशत थे।
- (g) *अनौपचारिक क्षेत्र के उद्यमों के कर्मचारियों की मजदूरी/वेतन का अर्जन* [पैरा 3.2.13]
- ❖ वे सभी नियमित मजदूरी/वेतनभोगी कर्मचारी जो अनौपचारिक उद्यमों में कार्यरत थे उनका वेतन(प्रतिदिन) अन्य उद्यमों में सभी कार्यरत कर्मचारियों से आधा था । रु 321 'सभी' प्रकार के उद्यमों के लिए एवं रु 177 अनौपचारिक उद्यमों के लिए । आकस्मिक श्रमिकों के लिए यह अनौपचारिक क्षेत्र में रु 115 एवं 'सभी' उद्यमों के लिए रु 112 था ।

2. रोजगार की स्थितियां

(a) *अलिखित रोजगार समझौता (जाँब कांट्रेक्ट) वाले कर्मचारी* [पैरा 3.3.2]

- ❖ गैर कृषि क्षेत्र के सभी कर्मचारियों में, (नियमित मजदूरी/वेतनभोगी कर्मचारी एवं आकस्मिक मजदूर) करीब 81 प्रतिशत ग्रामीण क्षेत्रों में एवं 74 प्रतिशत नगरीय क्षेत्रों में को कोई लिखित रोजगार समझौता नहीं था ।
- ❖ गैर कृषि क्षेत्र में नियमित मजदूरी/वेतनभोगी कर्मचारियों में करीब 60 प्रतिशत ग्रामीण क्षेत्रों और 65 प्रतिशत नगरीय क्षेत्रों के पास लिखित रोजगार समझौता नहीं था ।

(b) *अस्थायी प्रकृति के रोजगार वाले कर्मचारी* [पैरा 3.3.3]

- ❖ गैर-कृषि क्षेत्र के सभी कर्मचारियों में ग्रामीण क्षेत्रों के करीब 52 प्रतिशत एवं नगरीय क्षेत्रों के करीब 42 प्रतिशत के पास अस्थायी प्रकृति का रोजगार था ।

(c) *सवेतन छुट्टी के बिना कर्मचारी* [पैरा 3.3.4]

- ❖ गैर कृषि क्षेत्र में सभी कर्मचारियों में से करीब 80 प्रतिशत ग्रामीण क्षेत्रों और 60 प्रतिशत नगरीय क्षेत्रों में सवेतन छुट्टी के पात्र नहीं थे ।
- ❖ गैर-कृषि क्षेत्र के नियमित मजदूरी/वेतनभोगी कर्मचारियों में से करीब 50 प्रतिशत ग्रामीण क्षेत्रों में एवं 46 प्रतिशत नगरीय क्षेत्रों में सवेतन छुट्टी के पात्र नहीं थे ।

(d) *बिना किसी भी सामाजिक सुरक्षा लाभ के कर्मचारी* [पैरा 3.3.5]

- ❖ गैर-कृषि उद्यमों के सभी कर्मचारियों के बीच ग्रामीण क्षेत्रों के करीब 82 प्रतिशत एवं नगरीय क्षेत्रों के करीब 64 प्रतिशत किसी भी तरह के सामाजिक सुरक्षा लाभ के पात्र नहीं थे ।
- ❖ गैर-कृषि क्षेत्र के नियमित मजदूरी/वेतनभोगी कर्मचारियों में से करीब 57 प्रतिशत ग्रामीण क्षेत्रों के एवं 53 प्रतिशत नगरीय क्षेत्रों के किसी भी तरह के सामाजिक सुरक्षा लाभ के पात्र नहीं थे ।

(e) *अलिखित रोजगार समझौता (जाँब कांट्रेक्ट) एवं सवेतन छुट्टी के कर्मचारी* [पैरा 3.3.6]

- ❖ ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्र के सभी कर्मचारियों में से ग्रामीण क्षेत्र के करीब 75 प्रतिशत एवं नगरीय क्षेत्रों के करीब 56 प्रतिशत के पास न तो कोई लिखित रोजगार समझौता था, और न ही वे सवेतन छुट्टी के पात्र थे ।

(f) *कर्मचारियों के भुगतान की प्रणाली* [पैरा 3.3.7]

- ❖ ए.जी.ई.जी.सी. एवं गैर-कृषि क्षेत्र के नियमित मजदूरी/वेतनभोगी कर्मचारियों के बीच करीब 90 प्रतिशत को नियमित मासिक वेतन मिला । आकस्मिक श्रमिकों में से 7 प्रतिशत को नियमित मासिक वेतन मिला एवं 53 प्रतिशत ने दैनिक भुगतान प्राप्त किया ।

(3) *यूनियन/एसोसियेशन का अस्तित्व* [पैरा 3.4]

- ❖ रा.औ.व.-2004 के प्रभाग 01 से 99 तक कार्यरत सभी कर्मचारी जो कि 15 वर्ष या उससे अधिक के थे उनमें से करीब 79 प्रतिशत के क्रियाकलाप में कोई भी यूनियन/एसोसियेशन नहीं था : यह आकस्मिक श्रमिकों के बीच करीब 85 प्रतिशत, एवं स्वनियोजित व्यक्तियों में करीब 81 प्रतिशत एवं नियमित मजदूरी/वेतनभोगी कर्मचारियों में करीब 58 प्रतिशत था ।

HIGHLIGHTS

This report is based on the eighth quinquennial survey on employment and unemployment conducted in the 66th round of NSS during July 2009 to June 2010. The survey was spread over 7,402 villages and 5,252 urban blocks covering 1,00,957 households (59,129 in rural areas and 41,828 in urban areas) and enumerating 4,59,784 persons (2,81,327 in rural areas and 1,78,457 in urban areas).

In the NSS 66th round, particulars of the workers in the *informal sector* and conditions of employment of the different categories of employees (viz., regular wage/ salaried workers and casual labourers) were collected for the industry groups/ divisions 012, 014, 015, 02, 05, 10-99 of NIC-2004. Among these, the industry groups/divisions 012, 014, 015, 02, 05 (henceforth referred to as AGE GC sector) were in the *[ag]ricultural sector [e]xcluding only [g]rowing of [c]rops, market gardening, horticulture (industry group 011) and growing of crops combined with farming of animals (industry group 013)*. The industry groups 011 and 013 were kept out of the coverage. This information was collected from those who were classified as workers according to usual principal status (ps) including those engaged in subsidiary economic activity (ss). The discussions on *informal sector* and *conditions of employment*, refer to the workers in usual status (ps+ss) engaged in AGE GC and non-agriculture sectors.

In India, nearly 49 per cent of the workers were employed in the industry groups 011 and 013—nearly 63 per cent in the rural areas and 6 per cent in the urban areas. The coverage of this report has been mostly confined to AGE GC and the non-agriculture sectors for purpose of discussion on *informal sector* and conditions of employment of the employees. However, the discussion on the existence of union/ association pertains not only to employees but also to the self-employed workers in all the industry divisions of NIC-2004, i.e., NIC –2004 codes 01 to 99.

Some of the key findings relating to workers in *informal sector* (defined to cover proprietary and partnership enterprises), location of workplace of the workers, proportion of workers engaged in enterprises that used electricity, size of the enterprise, wage and salary earnings of the employees, and some of conditions of employment of the employees (regular wage/salaried employees and casual labourers), viz., type of job contract, eligibility of paid leave, nature of employment (temporary/permanent), availability of social security benefits, etc., are given below:

1. Workers in Informal sector

(a) *Share of workers (ps+ss) in AGE GC and non-agriculture sectors [para. 3.1.3 and 3.1.4]:*

- ❖ In rural areas, AGE GC and non-agriculture sectors together shared 37 per cent (AGE GC: 5 per cent and non-agriculture: 32 per cent) of the all workers (ps+ss).
- ❖ In urban areas, AGE GC and non-agriculture sectors together shared 94 per cent (AGE GC: 1.6 per cent and non-agriculture: 92.5 per cent) of the workers.
- ❖ Among the workers in AGE GC and non-agriculture sectors, the AGE GC engaged nearly 8 per cent and the remaining 92 per cent of the workers were in non-agriculture sector.

- ❖ In the distribution of the total workers in AGEGC and non-agriculture sectors, in the urban areas the non-agriculture sector shared nearly 98 per cent of the workers compared to 87 per cent in rural areas.

(b) Share of workers in informal sector [para.3.2.2 and 3.2.5]:

- ❖ Among all workers in AGEGC and non-agriculture sectors, nearly 71 per cent were engaged in the *informal sector* (74 per cent in the rural areas and 67 per cent in the urban areas).
- ❖ More than 93 per cent of workers in both rural and urban areas engaged in AGEGC belonged to the *informal sector*. In the non- agriculture sector, nearly 71 per cent of the workers in rural areas and 67 in urban areas were engaged in the *informal sector*.
- ❖ Among self-employed in non-agriculture sector, about 92 per cent in the rural areas and 95 per cent in the urban areas worked in the *informal sector*.
- ❖ Among casual labourers engaged in works other than *public works* in the non-agriculture sector, nearly 73 per cent in both the rural and urban areas worked in the *informal sector*.
- ❖ Among regular wage/salaried employees in non-agriculture sector, nearly 39 per cent in the rural areas and 40 per cent in the urban areas worked in the *informal sector*.

(c) Informal sector workers in broad industry of work [para.3.2.7 and 3.2.8]:

- ❖ *Construction, manufacturing and wholesale and retail trade* activities together was the main providers of employment for the *informal sector* enterprises and ‘all’ enterprises in both the rural and urban areas.
- ❖ Out of all workers in the non-agriculture *informal sector*, 76 per cent in the rural areas and 72 per cent in urban areas belonged to *construction, manufacturing and wholesale and retail trade* provided. The corresponding figures for all workers in non-agriculture sector in rural and urban areas were nearly 69 per cent and 59 per cent, respectively.
- ❖ Proportions of *informal sector* workers in the activities which provided majority of employment in *informal sector*:

industry sections	rural	urban
manufacturing	86	78
construction	64	72
wholesale or retail trade, etc.	91	92
transport, storage and communication	82	68

- ❖ Among the female workers in informal sector, nearly 53 per cent in rural areas and 47 per cent in urban areas were in *manufacturing* activity. In the *manufacturing* activity, a higher proportion of female workers were employed in *informal sector* than males: 87 per cent of female workers compared to 75 per cent of male workers in urban areas and 93 per cent of female workers compared to 83 per cent of male workers in rural areas.

(d) Location of workplace of informal sector workers [para. 3.2.10]:

- ❖ The proportion of rural female workers having workplace in rural areas was 93 per cent and in the case of male it was nearly 83 per cent.
- ❖ The proportion of urban female workers having their workplace in urban areas was nearly 92 per cent and in the case of male it was nearly 85 per cent.
- ❖ Among the workers in *informal sector* residing in rural areas, nearly 95 per cent of females and 86 per cent of males had their workplace in rural areas.
- ❖ Among the workers in *informal sector* residing in the urban areas, nearly 92 per cent of females and 83 per cent of males had their workplace in urban areas.
- ❖ In rural areas, nearly 68 per cent of females and 21 per cent of males employed in *informal sector* was working in any of the following types of workplaces: (i) *own dwelling*, (ii) *structure attached to own dwelling unit*, (iii) *open area adjacent to own dwelling unit* and (iv) *detached structure adjacent to own dwelling unit*. The corresponding proportions in urban areas were nearly 52 per cent for females compared to 15 per cent of males.

(e) Informal sector workers in manufacturing enterprises that used electricity [para.3.2.11]:

- ❖ In the rural areas, 31 per cent of all workers engaged in *manufacturing* were employed in enterprises that used electricity for production purposes and in the case of *informal sector manufacturing* enterprises, the share was 27 per cent. In the urban areas, corresponding proportions were 58 per cent and 52 per cent, respectively.

(f) Informal sector workers in smaller enterprises (i.e. enterprise with less than 6 workers) [para.3.2.12]:

- ❖ In rural areas, 77 per cent of the workers in *informal* sectors were engaged in *smaller enterprises* compared to 64 per cent of ‘all’ workers, while the corresponding proportions in urban areas were 69 per cent and 53 per cent, respectively.

(g) Wage/salary earning of the employees in informal sector enterprises [para. 3.2.13]:

- ❖ The regular wage/salaried employees engaged in the *informal* sector enterprises earned nearly half the salary earnings (per day) of the employees considering all types of enterprises- Rs. 321 for ‘all’ types of enterprises and Rs. 177 for *informal sector* enterprises. In the case of *casual labourers*, it was Rs. 115 in the *informal* sector enterprises and Rs. 112 for ‘all’ enterprises.

2. Conditions of Employment**(a) Employees without written job contract [para. 3.3.2]:**

- ❖ Among all the employees (regular wage/salaried employees and casual labourers) in the non-agriculture sector, nearly 81 per cent in the rural areas and 74 per cent in urban areas had no written job contract.
- ❖ Among the regular wage/salaried employees in the non-agriculture sector, nearly 60 per cent in rural areas and 65 per cent in the urban areas had no written job contract.

(b) Employees with temporary nature of employment [para. 3.3.3]:

- ❖ Among all the employees in the non-agriculture sector, nearly 52 per cent in the rural areas and 42 per cent in the urban areas had temporary nature of employment.

(c) Employees without paid leave [para. 3.3.4]:

- ❖ Among all the employees in the non-agriculture sector, nearly 80 per cent in rural areas and 60 per cent in urban areas were not eligible for paid leave.
- ❖ Among the regular wage/salaried employees in the non-agriculture sector, nearly 50 per cent in rural areas and 46 per cent in urban areas were not eligible for paid leave.

(d) Employees without any social security benefit [para. 3.3.5]:

- ❖ Among all the employees in the non-agriculture sector, nearly 82 per cent in rural areas and 64 per cent in urban areas were not eligible for any social security benefit.
- ❖ Among the *regular wage/salaried employees* in the non-agriculture sector, nearly 57 per cent in rural areas and nearly 53 per cent in urban areas were not eligible for any social security benefit.

(e) Employees without written job contract and paid leave [para. 3.3.6]:

- ❖ Among all the employees in the AGEGC and non-agriculture sector, nearly 75 per cent in rural areas and 56 per cent in urban areas neither had written job contract and nor were eligible for paid leave.

(f) Method of payment of employees [para. 3.3.7]:

- ❖ Among the regular wage/salaried employees in the AGEGC and non-agriculture sector, nearly 90 per cent got *regular monthly salary* and among casual labourers, only 7 per cent got *regular monthly salary* and 53 per cent got *daily payment*.

3. Existence of Union/ Association [para.3.4]

- ❖ Among all workers of age 15 years and above engaged in any of the industry divisions 01 to 99 of NIC-2004, nearly 79 per cent had no union/ association in their activity: it was nearly 85 per cent among casual labourers, nearly 81 per cent among the self-employed persons and nearly 58 per cent among the regular wage/salaried employees.

NOTES ON TABLES

1. Estimates are provided separately for rural and urban areas and for males and females.
2. The estimates presented in the report, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.
3. It may be noted that as the tables are generally presented as ‘per 1000 distribution’ or ‘estimates per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in the ratio or percentage estimates presented in the report. The estimated aggregates, wherever possible, can be used to get ratios with more significant digits.
4. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category becomes 0. Estimated number per 1000 are also shown as 0, when they are greater than 0 but less than 0.5.
5. In the detailed tables, in some of the deeper classifications, some sample sizes may be small and this may have a bearing on the precision of the corresponding estimates.
6. The cell-level figures in the tables, when added up, may not exactly be equal to the figure shown against the ‘total’ column (or line) due to (i) rounding off and/or (ii) presence of non-response cases.

Chapter One

Introduction

1.1 The Report in Perspective

1.1.1 The National Sample Survey Office (NSSO) during the period July 2009 - June 2010 carried out an all-India household survey on the subject of employment and unemployment in India as a part of 66th round of its survey programme. In this survey, the nation-wide enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment and labour force characteristics at the national and State levels. Information on various facets of employment and unemployment in India was collected through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Based on the data collected during the entire period, estimates pertaining to employment-unemployment in India along with various characteristics associated with them have been presented, in detail, in NSS Report No. 537 (*Employment and Unemployment Situation in India, 2009-10*). Besides, '*Key Indicators of Employment and Unemployment in India, 2009-10*' has already been released on June 2011.

1.1.2 In addition to generating lead indicators of employment and unemployment such as labour force participation rate (LFPR), worker population ratio (WPR), unemployment rate (UR) and proportion unemployed (PU) based on alternative approaches of their measurement, in various cross classification, the NSS 66th round also endeavoured to capture the details on qualitative aspects of employment, viz., employment in informal sector and informal employment. For this purpose, a set of probing questions were asked to usual status workers regarding some features of the enterprises in which they worked, in order to study the characteristics of the workers particularly in the unincorporated enterprises¹ that were considered as constituting *informal sector*. Besides, for the employees (i.e., for regular wage/salaried persons and casual labourers) in usual status, information on conditions of employment was also collected. Collection of information on type of enterprises and on conditions of employment of the employees was done for whole of the non-agricultural sector and a part of the agricultural sector² excluding 'growing of crops; market gardening; horticulture' (NIC-2004 group 011) and 'growing of crops combined with farming of animals' (NIC-2004 group 013). Thus, coverage of the activities for collection of information on *informal sector* and *conditions of employment* was restricted to those workers engaged in industry groups 012, 014, 015 and industry divisions 02, 05, 10-99 of NIC-2004. Of these industry groups/ divisions, 012, 014, 015, 02 and 05 are in the [ag]ricultural sector [e]xcluding [g]rowing of [c]rops, market gardening, horticulture and growing of crops combined with farming of animals (AGEGC activities for short henceforth).

¹ Enterprises with type of ownership as *proprietary* or *partnership*.

² The coverage of the activities of the agricultural sector for collection of information on enterprise type and conditions of employment were 'farming of animals' (NIC-2004 group 012), 'agricultural and animal husbandry service activities, except veterinary activities' (NIC-2004 group 014), 'hunting, trapping and game propagation including related service activities' (NIC-2004 group 015), 'forestry, logging and related service activities' (NIC-2004 division 02), and 'fishing' (NIC-2004 division 05).

1.1.3 This report, the second in the series of eight reports planned for NSS 66th round survey on employment and unemployment (Schedule 10), pertains to the estimates of usual status (ps+ss) workforce according to characteristics of enterprise where workers were engaged, with special reference to those engaged in the *informal sector* enterprises, as well as the conditions of employment of the employees characterizing informal employment. The estimates have, as usual, been presented in respect of various characteristics associated with them.

1.1.4 The NSSO during the 55th round survey (July 1999- June 2000), for the first time, collected information, through employment – unemployment survey, in respect of workers engaged in the non-agricultural enterprises in the informal sector and the estimates on them are available in NSS Report No. 460³. However, in NSS 55th round, no information on conditions of employment of the employees was collected. In NSS 61st round, information from the usual status workers regarding some features of the enterprises in which they worked was collected and for the first time, information on conditions of employment for the employees was also collected. While, the coverage of activities in NSS 55th round was for the non-agricultural sector only, the coverage of activities in NSS 61st round (July 2004-June 2005) was similar to that of NSS 66th round. The results related to the workforce according to the characteristics of the enterprises and conditions of employment of the employees obtained from NSS 61st round survey are available in NSS report no. 519⁴.

1.2 Genesis of NSS Employment and Unemployment Survey

1.2.1 The quinquennial survey on employment-unemployment is one of the important surveys conducted regularly by the NSSO. The first such survey was done during September 1972 - October 1973 corresponding to the 27th round of NSSO. The present survey is the eighth in the series.

1.2.2 *Past Quinquennial Surveys:* The assessment of the volume and structure of employment and unemployment using large scale household surveys commenced with the NSS 9th round (May - September, 1955). Subsequently NSSO conducted a number of surveys on this subject to firm up the concepts and methods. The core conceptual framework for conducting such surveys was put in place by an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee), set up by the Planning Commission. The Expert Committee reviewed these surveys and the indicators generated from such surveys conducted by NSS in the past. The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in the 27th round of NSS (September 1972 – October 1973). Since then, six comprehensive quinquennial surveys on employment and unemployment situation in India have been carried out in the past by the NSSO prior to the present quinquennial survey. These were carried out during the 32nd round (July 1977 – June 1978), 38th round (January 1983 – December 1983), 43rd round (July 1987 – June 1988), 50th round (July 1993 – June 1994), 55th round (July 1999 – June 2000), 61st round (July 2004 – June 2005) in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these

³ NSS Report No. 460: Non-agricultural workers in informal sector based on Employment-Unemployment Survey, 1999-2000.

⁴ NSS Report No. 519: Informal Sector and Conditions of Employment in India, 2004-05.

surveys have been brought out in the form of NSS reports. In NSS 55th round, the aspects of enterprise characteristic of employment and in NSS 61st round the qualitative aspects of informal employment was added in the survey module of the quinquennial round.

1.2.3 Other surveys on employment-unemployment: Apart from these quinquennial surveys on employment and unemployment, NSSO had also been collecting information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). The objective of data collected in the annual series was to measure employment and unemployment indicators in terms of the usual and current weekly statuses only and study of these indicators in respect of category of employment, industrial distribution of the usually employed, etc. These procedures continued till the 59th round (January-December 2003) of NSS. In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60th round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In NSS 62nd round (July 2005 - June 2006) and in NSS 64th round (July 2007- June 2008) also a separate schedule on employment and unemployment, similar to the one canvassed during NSS 60th round, was canvassed and particulars on labour force were collected in the manner similar to the quinquennial rounds.

1.3 Scope of NSS 66th round Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional; it varies over regions, age, education, gender, industry and occupational categories. In NSS surveys, persons are classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. Three reference periods are used in NSS surveys, viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. The activity status determined on the basis of the reference period of one year is known as the usual activity status (US) of a person, that determined on the basis of a reference period of one week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of the engagement on each day during the reference week is known as the current daily status (CDS) of the person.

1.3.2 In NSS 66th round Employment & Unemployment schedule, the major features of data collected in NSS 61st round were retained. In addition, some information on 'Home based workers' was collected. There is another specific importance associated with the period of NSS 66th round. The present quinquennial round is the first one, since the major

public intervention in the rural labour market made with the enactment of the Mahatma Gandhi National Rural Employment Guarantee Act 2005. The survey instruments for NSS 66th round appropriately incorporated the assimilation of data on some salient aspects relating to MGNREGA.

1.3.3 In NSS 66th round, data on employment-unemployment characteristics were collected through Schedule 10. The schedule captured a range of information on the following aspects:

- i) *Household characteristics*, like household size, religion, social group, land possessed, land cultivated, etc. For the rural households, information was collected on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card, whether got work in MGNREG works during the last 365 days, number of days got work in MGNREG works and mode of payment of the wages earned in MGNREG works. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment-unemployment characteristics with the level of living of the population.
- ii) *Demographic particulars*, like age, sex, educational level, status of current attendance and vocational training.
- iii) *Usual principal activity status and subsidiary economic activity status* of the all persons.
- iv) *Particulars of the enterprise* for all the usual status workers (excluding those engaged in growing of crops and growing of crops combined with farming of animals) viz., location of work place, type of enterprises, number of workers in the enterprise etc. and some *particulars on the conditions of employment* for the employees, like type of job contract, eligibility for paid leave, availability of social security benefits, etc. For self-employed persons in the usual status, some particulars were collected for identification of home-based workers.
- v) Extent of *underutilization of the labour time* and on the *qualitative aspects of employment*, like changes in activity status, occupation /industry, existence of trade unions/associations, nature of employment (permanent/temporary), etc.
- vi) *Participation in specified activities* by the household members who are classified as engaged in domestic duties in the usual principal activity status.

1.4 The survey outline of NSS 66th round survey

1.4.1 *Geographical coverage*: The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

1.4.2 *Sub-round*: The fieldwork of the 66th round of NSSO started from 1st July, 2009 and continued till 30th June, 2010. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. An equal number of sample villages/blocks (FSUs) was allotted for survey in

each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households.

1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs. For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame). Within each district of a State/ UT, two basic strata were formed as follows: rural stratum comprising all rural areas of the district and urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata. These were, sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001) and sub-stratum 2: remaining villages.

1.5.2 At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. This sample size was at par with the sample size of NSS 61st round. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

1.5.3 For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in the selected village/block/ hamlet-groups/sub-blocks

were stratified into three second stage strata (SSS). A total of 8 households were selected from each sample village/block for canvassing the employment and un-employment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,808 FSUs (7,524 villages and 5,284 urban blocks) allotted for the central sample⁵ (including 24 state sample FSUs of Leh and Kargil districts of J & K: 16 for rural sector and 8 for urban sector), 12,654 FSUs (7,402 villages and 5,252 urban blocks) could be surveyed at the all-India level for canvassing Schedule 10. The number of households surveyed was 1,00,957 (59,129 in rural areas and 41,828 in urban areas) and number of persons surveyed was 4,59,784 (2,81,327 in rural areas and 1,78,457 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this report.

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in census. The urban frame used in the survey is the latest updated UFS that takes into account the newly declared towns after the last census 2001. Accordingly the rural sector is the one that is not urban.

1.6 Contents of the Report

1.6.1 As stated earlier, this report deals with various estimates with regard to workers engaged in non-agricultural sector as well as in the agricultural sector (excluding 'growing of crops, market gardening, horticulture' and 'growing of crops combined with farming of animals') along with their correlates as obtained on the basis of data collected on relevant items of information for the entire round. Consequently, all discussions in this report are limited to only such items/concepts, based on which estimates have been generated. Detailed explanations of these are given in the next chapter entitled 'Concepts and Definitions'.

1.6.2 This report contains three chapters, including the present introductory chapter, and four appendices. Chapter Two provides details of the concepts and definitions of only those terms used in the survey in connection with the subject focus of this report. Chapter Three discusses the main findings of the survey relating to these items. While Appendix A gives the detailed tables on which this report is based, Appendix B presents a description of the sample design and estimation procedure used for the survey. In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for male and female separately for rural and urban for each State/UT. Appendix D gives a facsimile of the schedule canvassed in the survey.

1.6.3 The detailed tables turned out to be very voluminous. Hence, the hard-copy of the detailed tables (Appendix A) does not form a part of the Report and Appendix A of the report is provided in CD.

⁵ The sample selected for NSS 66th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: the sample surveyed by State Government officials is termed as "State sample".

1.6.4 *Tables in Appendix:* Appendix A of the report contains twelve tables. Of these, five tables provide estimates of workers including both the self-employed and wage employees by various attributes such as their activity status, enterprise type, location of workplace, using electricity for production, existence of union/ association in the activity, etc. The other seven tables present estimates of wage employees by some combination of attributes like type of job contract, eligibility for paid leave, social security benefits, method of payment, etc.

1.6.5 The estimates in this report are generally presented, as ratios. The estimates of aggregates are also given in the margin of the detailed tables presented for all-India levels. It may be noted that estimates of ratios are generally expected to be robust and the estimates of aggregates may be used only to combine the ratios. However, to arrive at estimated absolute number in any category, the users may apply the survey estimates of ratios to the census population or projections⁶. It may also be noted that as the tables are generally presented as ‘per 1000 distribution’ or ‘rates per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates presented in this report, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.

1.6.6 The estimates of the key parameters have been presented for all the States and UTs. While using the estimates for the smaller States, it may be kept in mind that the sample sizes for them may not be adequate enough for getting sufficiently reliable estimates.

1.7 NSS 66th Round Reports on Employment and Unemployment

1.7.1 The results of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the central sample data. Corresponding to NSS 66th round quinquennial survey on Employment and Unemployment, the results are planned for release in eight reports. In addition to these eight reports planned, *Key Indicators of Employment and Unemployment in India, 2009-10* has already been released in June 2011. Of the eight reports, the present one is the second in the series of reports, while the first report, Report no. 537 (*Employment and Unemployment Situation in India, 2009-10*) has already been released. The tentative titles of the remaining six reports planned to be released are:

- (i) *Employment and Unemployment situation among Social Groups in India*
- (ii) *Status of Education and Vocational Training in India*
- (iii) *Participation of Women in Specified Activities along with Domestic Duties*
- (iv) *Employment and Unemployment situation in Cities and Towns in India*
- (v) *Home-based Workers in India*
- (vi) *Employment and Unemployment situation among Major Religious groups in India.*

⁶ In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for male and female separately for rural and urban for each State/UT.

Chapter Two

Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

2.2 **Economic activity:** The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

2.2.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

2.2.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 66th round, therefore, included:

(i) all the market activities performed for pay or profit which result in production of goods and services for exchange.

(ii) of the non-market activities,

(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

2.3 Activity status: It is the activity situation in which a person was found participated in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

2.3.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained in a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either *the major time* or *priority criterion*. The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status' approach. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one

economic activity during the reference period, the appropriate detailed activity status code was connected to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activities.

2.3.2 The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in the survey are given below:

<u>code</u>	<u>description</u>
working (or employed)	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual wage labour in public works other than Mahatma Gandhi NREG public works
42	worked as casual wage labour in Mahatma Gandhi NREG public works
51	worked as casual wage labour in other types of works
61	did not work owing to sickness though there was work in household enterprise
62	did not work owing to other reasons though there was work in household enterprise
71	did not work owing to sickness but had regular salaried/wage employment
72	did not work owing to other reasons but had regular salaried/wage employment
not working but seeking/available for work (or unemployed)	
81	sought work or did not seek but was available for work (for usual status approach)
81	sought work (for current weekly status approach)
82	did not seek but was available for work (for current weekly status approach)
neither working nor available for work (or not in labour force)	
91	attended educational institutions
92	attended to domestic duties only
93	attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
94	rentiers, pensioners, remittance recipients, etc.
95	not able to work owing to disability
97	others (including beggars, prostitutes, etc.)
98	did not work owing to sickness (for casual workers only)
99	children of age 0-4 years

It may be noted that codes 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. Moreover, activity status code 41 in the usual status is used for casual wage labour in all types of *public works*, whereas in the current activity status, code 41 is for casual wage labour in *public works* other than MGNREG public works and code 42 is for casual wage labour in MGNREG public works.

2.4 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21, 61, 62), *regular salaried/wage employee* (relevant activity status codes: 31, 71, 72), and *casual wage labour* (relevant activity status codes: 41, 42 and 51).

2.5 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

2.6 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

2.7 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.8 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were treated as self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

2.8.1 *Categories of self-employed persons*: Self-employed persons were categorised as follows:

- (i) ***own-account workers***: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- (ii) ***employers***: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) ***helpers in household enterprise***: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

2.9 ***Regular wage/salaried employee***: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.10 ***Casual wage labourer***: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

2.11 ***Public works***: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between '*public works*' and works not classifiable as '*public works*', some broad characteristics of '*public work*' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that the existing activity status code 41 (casual wage labour in public works) was split into two codes for assigning activity status codes as per current daily activity status and current weekly activity status, as follows:

- (i) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41
- (ii) worked as casual wage labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

However, in the usual activity status, code 41 was used for casual wage labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.

2.12 Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedures adopted to arrive at the usual status, current weekly status and current daily status are elucidated below.

2.12.1 Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

2.12.2 Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of

survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period *but not simultaneously with principal activity*, was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

2.12.3 Usual activity status considering principal and subsidiary status taken together: The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

2.12.4 Current weekly activity status: The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided *on the basis of a certain priority cum major time criterion*.

2.12.4.1 According to the *priority criterion*, the status 'working' gets priority over the status 'not working but seeking or available for work' that, in turn, gets priority over the status 'neither working nor available for work'. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work (or unemployed)' if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

2.12.4.2 After deciding the *broad current weekly activity status* of a person on the basis of '*priority*' criterion, the *detailed current activity status* was then decided *on the basis of 'major time' criterion* if that person pursued multiple economic activities. The current weekly

activity status of a person could be any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

2.12.5 Current daily activity status: The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week *using a priority-cum-major time criterion* (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.
- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
- iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.
- vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

2.13 Industry of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2004 was used. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC-2004, eight additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/chowkidar/watchman (95004), governess/baby-sitter (95005), tutor (95006), driver (95007) and 'others' (95009). Industry Divisions 96 (except the activities covered in other Industry Divisions) and 97 of NIC-2004 were not used for the purpose of collection of information on industry of activity. The entire activities described under Division 97 are not under the production boundary of Indian System of National Accounts (ISNA) and are not also considered as economic activities in the NSS survey. A part of the activities under Division 96 (viz., hunting and gathering, farming and the production of shelter), which is within the production boundary of ISNA, is also considered as economic activities in NSS surveys and the industry of these undifferentiated activities were judged in the usual manner, by considering the industry in which major time was spent. Thus, this part of activities got classified against the respective industries under divisions 01-14 relating to the primary sector or 45 relating to construction. The rest of Division 96 is outside the production boundary of ISNA and was not considered as economic activity for the NSS survey.

2.14 Industry of work for coverage of informal sector and conditions of employment: Certain probing questions to collect information on informal sector and informal employment was asked to all the workers, whether engaged in the usual principal status or in the subsidiary status, engaged in non-agricultural sector and a part of the in the agricultural sector, excluding 'growing of crops, market gardening, horticulture' (industry group 011 of NIC - 2004) and 'growing of crops combined with farming of animals' (industry group 013 of NIC - 2004) of the agricultural sector. Thus, coverage of the activities for *informal sector and conditions of employment* of the employees was restricted to those workers engaged in industry groups 012, 014, 015 and industry divisions 02-99 of NIC-2004. Of this industry groups/ divisions, 012, 014, 015, 02 and 05 are in the [ag]ricultural sector [e]xcluding [g]rowing of [c]rops, market gardening, horticulture and growing of crops combined with farming of animals (AGEGC activities for short henceforth). The industry groups/ divisions 012, 014, 015, 02 and 05 will henceforth be called as AGEGC for the purpose of discussion of this report. The industry divisions 10-99 are for the non-agricultural sector. The discussion on the existence of union/ association pertains not only to employees but also to self-employed workers in all the industry divisions of NIC - 2004, i.e., NIC - 2004 codes 01 to 99. The descriptions of the relevant industry sections/divisions/groups are given in Annexure I.

2.15 Wage and salary earnings: Information on wage and salary earnings was collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions were followed.

- i) The wages in kind were evaluated at the current retail price.
- ii) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or

at retail prices and duly apportioned for the reference week were also included in earnings.

- iii) Amount receivable as 'over-time' for the additional work done beyond normal working time was excluded.

It may be noted that in the survey, at most two activities could be recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but only one activity or two activities at the most, depending upon the time spent on those activities, was recorded. In that case, the wage/salary income only from that activity(s) was collected and recorded separately, and not the total income of the person from all the activities done for the entire day.

2.16 Enterprise type: An enterprise is an undertaking which is engaged in the production and /or distribution of some goods and /or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body. The definitions of various types of enterprises are given below:

2.16.1 Proprietary: When an individual is the sole owner of an enterprise it is a proprietary enterprise. Own account production of fixed assets for own use, when produced by a single member, was classified as proprietary enterprise.

2.16.2 Partnership: Partnership is defined as the "relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all". There may be two or more owners, belonging to the same or different households, on a partnership basis, with or without formal registration (where there is a tacit understanding about the distribution of profit among the so-called partners). Own account production of fixed assets, when produced by two or more members belonging to the same or different households was classified as partnership enterprises. Thus, own account production of fixed assets by a group of households for community use was classified as partnership enterprise.

2.16.3 Government/public sector enterprise: An enterprise, which is wholly owned/run/managed by Central or State governments, quasi-government, institutions, local bodies like universities, education boards, municipalities, etc. An enterprise was not treated as a public sector enterprise if it was run on a loan granted by government, local body etc.

2.16.4 Private limited company: Private company means a company which by its articles:
(a) restricts the right to transfer its shares, if any,
(b) limits the number of its members to fifty not including-
(i) persons who are in the employment of the company, and
(ii) persons who, having been formerly in the employment of the company, were members of the company while in that employment and have continued to be members after the employment ceased; and
(c) prohibits any initiation to the public to subscribe for any share in, or debentures of, the company.

[Where two or more persons hold one or more shares in a company jointly, they shall, for the purpose of this definition, be treated as a single member.]

2.16.5 Public limited company: A public limited company is defined as a company that is not a private company. As such public companies can have an unlimited number of members and can invite the public to subscribe to its shares and debentures. The minimum number of members required to form a public company is seven.

2.16.6 Co-operative societies: Co-operative society is one that is formed through the co-operation of a number of persons, recognised as members of the society, to benefit themselves. In the process, the funds are raised by member's contributions/investments and the profits generated out of the society's activities are shared by the members. The government itself in a government agency can also be a member or shareholder of a registered co-operative society but this fact cannot render the society into a public sector enterprise for the purpose of this survey.

2.16.7 Trust: An arrangement through which one set of people, the trustees, are the legal owners of property which is administered in the interest of another set, the beneficiaries. Trusts may be set up to provide support for individuals or families, to provide pensions, to run charities, to liquidate the property of the bankrupts for the benefit of their creditors, or for the safe keeping of securities bought by trusts with their investor's money. The assets, which trusts hold are regulated by law, these must be administered in the interests of the beneficiaries, and not for the profit of the trustees.

2.16.8 Employer Households (i.e. private households employing maid servant, watchman, cook etc.): The households which are employing maid servant watchmen, cook, private tutor, etc. was considered notionally as enterprise for the purpose of this survey and was classified as 'Employer households'.

2.17 **Location of workplace:** The location of workplace for each of the working members of a household was categorised as follows:

- no fixed workplace
- workplace located in:
 - own dwelling unit
 - structure attached to own dwelling unit
 - open area adjacent to own dwelling unit
 - detached structure adjacent to own dwelling unit
 - own enterprise/unit/office/shop but away from own dwelling
 - employer's dwelling unit
 - employer's enterprise/unit/office/shop but outside employer's dwelling
 - street with fixed location
 - construction site
 - others

The specified locations (except 'no fixed workplace') of workplace was further distinguished depending upon the location of the workplace in rural and urban areas.

2.18 **Uses of electricity for production of goods and services:** The information as to whether the enterprise in which the person worked, used *electricity for its production purposes* was collected. It may be mentioned here that use of electricity exclusively for purposes other than

production like, for comfort, security, illumination, etc., was not considered as the use of electricity by the enterprise for its production.

2.19 Number of workers in the enterprise: Information on number of workers in which the persons worked was collected in terms of 5 codes. The number of workers employed in the enterprise on an average in a day of operation, irrespective of whether they are hired worker or household members working in the enterprise, was considered as the number of workers in the enterprise. The number of workers also included working owner(s).

2.20 Type of job contract: It was ascertained for each employee whether for the job in which he/she was engaged, there was any *written contract or agreement* in respect of duration of employment with his/her employer. For those who reported to have written job contract with their employer, further probing was done in respect of the length of duration contracted, viz., for 1 year or less, for more than 1 year to 3 years and more than 3 years. If the contract of employment specified a particular date of termination which was more than 3 years or if the type of job contracted was such that no time was fixed but the contract could only be terminated for certain administrative reasons such as incompetence, misconduct or for economic reasons then the contract was considered to have a duration of 3 years or more. However, if no written contract existed, then irrespective of the duration of employment, it was considered as no written job contract.

2.21 Eligibility of paid leave: Paid leave included leave during sickness, maternity, or such leave, as an employee was eligible to take without loss of pay, as per the conditions of employment. The situation was assessed excluding the paid off-days/holidays, which an enterprise normally allows to its employees. Employees were classified as those with eligible for paid leave and those without eligibility for paid leave.

2.22 Availability of social security benefits: It was ascertained from the employees whether they were covered under any of the specified social security benefits or a combination of them which are arranged or for which contribution was made by the employer. For the purpose of the survey the following schemes were considered as social security benefits:

- only PF/ pension (i.e., GPF, CPF, PPF, pension, etc.).
- only gratuity
- only health care & maternity benefits
- only PF/ pension and gratuity
- only PF/ pension and health care & maternity benefits.
- only gratuity and health care & maternity benefits
- PF/ pension, gratuity and health care & maternity benefits

Those who were not eligible for any of the above social security schemes were considered as not eligible for any social security benefits

2.22.1 The term Provident Fund (PF) included General Provident Fund, Contributory Provident Fund, Public Provident Fund, Employees Provident Fund, etc. It may be mentioned that coverage under any of these social security schemes meant that the employer contributed/ arranged/ paid in implementing the social security benefits for the worker. If an employee

operated, in his/ her individual capacity, a PPF account and the employer is not contributing in that account then it was not considered as a social security benefit. On the contrary, a scheme, in which both the employee and the employer contributed, was considered a social security benefit. When benefits were given by the employer for treatment of illness/ injury or an employee was eligible for paid leave for a specified period of pre-natal/ childbirth/ post-natal stages or the expenditure for maternity care or childbirth was borne by the employer as per the conditions of employment, then such benefits was considered as health care & maternity benefits. There may be cases where the employer was not directly contributing in a social security scheme for the employees, but being the member of the welfare association or organization or scheme in relation to the specific activity carried out by the employer, the employees got the benefit from that welfare association/ organization/ scheme. Such cases were also considered as social security benefits availed through the employer.

2.23 Method of payment: The method by which payments were received by the workers for work done was recorded. The different methods of payment were, regular monthly salary, regular weekly payment, daily payment, piece rate payment and which could not be classified in any of the above categories was considered as ‘other’ method of payment.

2.24 Existence of union/association in the activity: Union/association meant any registered/recognised body whose membership is open to a section of those engaged in a specific activity or trade and whose main objective is to look into the interests of its members. Thus, besides the usual trade unions, this category also covered the association of owners, self-employed persons, etc.

2.25. Informal sector and informal employment: A broad guideline regarding the coverage of informal sector and informal employment as enunciated in the 15th International Conference of Labour Statisticians (ICLS) and 17th ICLS, are given below. Extracts of the resolutions and guidelines concerning informal sector and informal employment are given in Annexure II and Annexure III respectively, at the end of Chapter Two.

2.25.1 AS per 15th ICLS, the *informal sector* is broadly characterized as consisting of:

(a) units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

(b) production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Thus, for statistical purposes, the *informal sector*, as per guidelines of 15th ICLS is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts, form part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households.

2.25.2 According to the 17th ICLS framework, *informal employment* is identified by jobs classified by status of employment of various categories of workers engaged in different types of production units consisting of (a) formal sector enterprises, (b) informal sector enterprises, and (c) households which produce goods for their own final use and/or those employing domestic workers. The status of employment of the workers performing the jobs may be (a) own account workers, (b) employers, (c) contributing family workers, (d) employees, or (e) member of informal producers' co-operatives. The employment in the above categories may be formal or informal depending upon the type of enterprises in which the workers are engaged or the nature of work they perform.

Accordingly, the *informal employment* comprises jobs held by:

- own-account workers and employers who have their own informal sector enterprises;
- contributing family workers, irrespective of whether they work in formal or informal sector enterprises;
- employees who have informal jobs (for definition, see item (5) in paragraph 3 in Annexure III) whether employed by formal sector enterprises, informal sector enterprises, or as paid domestic workers by households;
- members of informal producers' cooperatives; and
- persons engaged in the own-account production of goods exclusively for own final use by their household, such as subsistence farming or do-it-yourself construction of own dwellings.

2.25.3 In the 66th round survey, like in NSS 61st round, information on enterprise type was collected for all the usual status workers and the enterprise types proprietary and partnership are classified as informal sector enterprises. Thus, using the information on type of enterprise, estimates of workforce in informal sector can be derived. Besides, certain information from usual status workers engaged in industry groups 012, 014, 015 and divisions 02 to 99, was collected to identify informal employment. The relevant information required for this purpose are employment status, type of enterprise, type of job contract, availability of social security benefits, nature of job, existence of union/ association, etc.

ANNEXURE – I

NATIONAL INDUSTRIAL CLASSIFICATION (NIC) – 2004

(Description of industry groups 012, 014, 015 and all the industry divisions)

Section A AGRICULTURE, HUNTING AND FORESTRY

Division 01: Agriculture, hunting and related service activities

Group 012 : Farming of animals

Group 014: Agricultural and animal husbandry service activities, except veterinary activities.[This class includes specialized activities, on a fee or contract basis, mostly performed on the farm.]

Group 015: Hunting, trapping and game propagation including related service activities

Division 02: Forestry, logging and related service activities

Section B FISHING

Division 05: Fishing, operation of fish hatcheries and fish farms; service activities incidental to fishing

Section C: Mining and quarrying

Division 10: Mining of coal and lignite; extraction of peat

Division 11: Extraction of crude petroleum and natural gas; service activities incidental to oil and gas extraction, excluding surveying

Division 12: Mining of uranium and thorium ores

Division 13: Mining of metal ores

Division 14: Other mining and quarrying

Section D: Manufacturing

Division 15: Manufacture of food products and beverages

Division 16: Manufacture of tobacco products

Division 17: Manufacture of textiles

Division 18: Manufacture of wearing apparel; dressing and dyeing of fur

Division 19: Tanning and dressing of leather; manufacture of luggage, handbags, saddlery, harness and footwear

Division 20: Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials

Division 21: Manufacture of paper and paper products

Division 22: Publishing, printing and reproduction of recorded media

Division 23: Manufacture of coke, refined petroleum products and nuclear fuel
Division 24: Manufacture of chemicals and chemical products
Division 25: Manufacture of rubber and plastics products
Division 26: Manufacture of other non-metallic mineral products
Division 27: Manufacture of basic metals
Division 28: Manufacture of fabricated metal products, except machinery and equipment
Division 29: Manufacture of machinery and equipment n.e.c.
Division 30: Manufacture of office, accounting and computing machinery
Division 31: Manufacture of electrical machinery and apparatus n.e.c.
Division 32: Manufacture of radio, television and communication equipment and apparatus
Division 33: Manufacture of medical, precision and optical instruments, watches and clocks
Division 34: Manufacture of motor vehicles, trailers and semi-trailers
Division 35: Manufacture of other transport equipment
Division 36: Manufacture of furniture; manufacturing n.e.c.
Division 37: Recycling

Section E: Electricity, gas and water supply

Division 40: Electricity, gas, steam and hot water supply
Division 41: Collection, purification and distribution of water

Section F: Construction

Division 45: Construction

Section G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods

Division 50: Sale, maintenance and repair of motor vehicles and motorcycles; retail sale of automotive fuel
Division 51: Wholesale trade and commission trade, except of motor vehicles and motorcycles
Division 52: Retail trade, except of motor vehicles and motorcycles; repair of personal and household goods

Section H: Hotels and restaurants

Division 55: Hotels and restaurants

Section I: Transport, storage and communications

Division 60: Land transport; transport via pipelines
Division 61: Water transport
Division 62: Air transport
Division 63: Supporting and auxiliary transport activities; activities of travel agencies
Division 64: Post and telecommunications

Section J: Financial intermediation

Division 65: Financial intermediation, except insurance and pension funding
Division 66: Insurance and pension funding, except compulsory social security
Division 67: Activities auxiliary to financial intermediation

Section K: Real estate, renting and business activities

Division 70: Real estate activities
Division 71: Renting of machinery and equipment without operator and of personal and household goods

Division 72: Computer and related activities
Division 73: Research and development
Division 74: Other business activities

Section L: Public administration and defence; compulsory social security

Division 75: Public administration and defence; compulsory social security

Section M: Education

Division 80: Education

Section N: Health and social work

Division 85: Health and social work

Section O: Other community, social and personal service activities

Division 90: Sewage and refuse disposal, sanitation and similar activities
Division 91: Activities of membership organizations n.e.c.
Division 92: Recreational, cultural and sporting activities
Division 93: Other service activities

Section P: Activities of private households as employers and undifferentiated production activities of private households

Division 95: Activities of private households as employers of domestic staff
Division 96: Undifferentiated goods-producing activities of private households for own use
Division 97: Undifferentiated service-producing activities of private households for own use

Section Q: Extraterritorial organizations and bodies

Division 99: Extraterritorial organizations and bodies

ANNEXURE – II

**Resolution concerning statistics of employment in the informal sector,
adopted by the Fifteenth International Conference of Labour Statisticians (January
1993)**

[Extract]

Concept

5 (1) The informal sector may be broadly characterized as consisting of units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at a low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations - where they exist - are based mostly on casual employment, kinship or personal and social relations rather than contractual arrangements with formal guarantees.

(2) Production units of the informal sector have the characteristic features of household enterprises. The fixed and other assets used do not belong to the production units as such but to their owners. The units as such cannot engage in transactions or enter into contracts with other units, nor incur liabilities, on their own behalf. The owners have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligations incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. Similarly, capital goods such as buildings or vehicles may be used indistinguishably for business and household purposes.

Operational definitions

Informal sector

6 (1) For statistical purposes, the informal sector is regarded as a group of production units which, according to the definitions and classifications provided in the United Nations System of National Accounts (Rev. 4), form part of the household sector as household enterprises or, equivalently, unincorporated enterprises owned by households as defined in paragraph 7.

(2) Within the household sector, the informal sector comprises (i) "informal own-account enterprises" as defined in paragraph 8; and (ii) the additional component consisting of "enterprises of informal employers" as defined in paragraph 9.

(3) The informal sector is defined irrespective of the kind of workplace where the productive activities are carried out, the extent of fixed capital assets used, the duration of the operation of the enterprise (perennial, seasonal or casual), and its operation as a main or secondary activity of the owner.

Household enterprises

7. According to the United Nations System of National Accounts (Rev. 4), household enterprises (or, equivalently, unincorporated enterprises owned by households) are distinguished from corporations and quasi-corporations on the basis of the legal organization of the units and the type of accounts kept for them. Household enterprises are units engaged in the production of goods or services which are not constituted as separate legal entities independently of the households or household members that own them, and for which no complete sets of accounts (including balance sheets of assets and liabilities) are available which would permit a clear distinction of the production activities of the enterprises from the other activities of their owners and the identification of any flows of income and capital between the enterprises and the owners. Household enterprises include unincorporated enterprises owned and operated by individual household members or by two or more members of the same household as well as unincorporated partnerships formed by members of different households.

Informal own-account enterprises

8 (1) Informal own-account enterprises are household enterprises (in the sense of paragraph 7) owned and operated by own-account workers, either alone or in partnership with members of the same or other households, which may employ contributing family workers and employees on an occasional basis, but do not employ employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, informal own-account enterprises may comprise, depending on national circumstances, either all own-account enterprises or only those which are not registered under specific forms of national legislation.

(3) Registration may refer to registration under factories or commercial acts, tax or social security laws, professional groups' regulatory acts, or similar acts, laws, or regulations established by national legislative bodies.

Enterprises of informal employers

9 (1) Enterprises of informal employers are household enterprises (in the sense of paragraph 7) owned and operated by employers, either alone or in partnership with members of the same or other households, which employ one or more employees on a continuous basis and which have the characteristics described in subparagraphs 5 (1) and (2).

(2) For operational purposes, enterprises of informal employers may be defined, depending on national circumstances, in terms of one or more of the following criteria:

- (i) size of the unit below a specified level of employment;
- (ii) non-registration of the enterprise or its employees.

(3) While the size criterion should preferably refer to the number of employees employed on a continuous basis, in practice, it may also be specified in terms of the total number of employees or the number of persons engaged during the reference period.

(4) The upper size limit in the definition of enterprises of informal employers may vary between countries and branches of economic activity. It may be determined on the basis of minimum size requirements as embodied in relevant national legislations, where they exist, or in terms of empirically determined norms. The choice of the upper size limit should take account of the coverage of statistical inquiries of larger units in the corresponding branches of economic activity, where they exist, in order to avoid an overlap.

(5) In the case of enterprises, which carry out their activities in more than one establishment, the size criterion should, in principle, refer to each of the establishments separately rather than to the enterprise as a whole. Accordingly, an enterprise should be considered to satisfy the size criterion if none of its establishments exceeds the specified upper size limit.

(6) Registration of the enterprise may refer to registration under specific forms of national legislation as specified in subparagraph 8 (3). Employees may be considered registered if they are employed on the basis of an employment or apprenticeship contract which commits the employer to pay relevant taxes and social security contributions on behalf of the employee or which makes the employment relationship subject to standard labour legislation.

10. For particular analytical purposes, more specific definitions of the informal sector may be developed at the national level by introducing further criteria on the basis of the data collected. Such definitions may vary according to the needs of different users of the statistics.

Population employed in the informal sector

11 (1) The population employed in the informal sector comprises all persons who, during a given reference period, were employed (in the sense of paragraph 9 of resolution I adopted by the Thirteenth International Conference of Labour Statisticians) in at least one informal sector unit as defined in paragraphs 8 and 9, irrespective of their status in employment and whether it is their main or a secondary job.

Treatment of particular cases

14. Household enterprises, which are exclusively engaged in non-market production, i.e. the production of goods or services for own final consumption or own fixed capital formation as defined by the United Nations System of National Accounts (Rev. 4), should be excluded from the scope of the informal sector for the purpose of statistics of employment in the informal sector. Depending on national circumstances, an exception may be made in respect of households employing domestic workers as referred to in paragraph 19.

16. For practical reasons, the scope of the informal sector may be limited to household enterprises engaged in non-agricultural activities. With account being taken of paragraph 14,

all non-agricultural activities should be included in the scope of the informal sector, irrespective of whether the household enterprises carry them out as main or secondary activities. In particular, the informal sector should include secondary non-agricultural activities of household enterprises in the agricultural sector if they fulfil the requirements of paragraphs 8 or 9.

17. Units engaged in professional or technical activities carried out by self-employed persons, such as doctors, lawyers, accountants, architects or engineers, should be included in the informal sector if they fulfil the requirements of paragraphs 8 or 9.

18 (1) Outworkers are persons who agree to work for a particular enterprise, or to supply a certain quantity of goods or services to a particular enterprise, by prior arrangement or contract with that enterprise, but whose place of work is not within any of the establishments, which make up that enterprise.

(2) In order to facilitate data collection, all outworkers should be potentially included in the scope of informal sector surveys, irrespective of whether they constitute production units on their own (self-employed outworkers) or form part of the enterprise, which employs them (employee outworkers). On the basis of the information collected, self-employed and employee outworkers should be distinguished from each other by using the criteria recommended in the United Nations System of National Accounts (Rev. 4). Outworkers should be included in the informal sector, or in the population employed in the informal sector, if the production units, which they constitute as self-employed persons or for which they work as employees fulfil the requirements of paragraphs 8 or 9.

19. Domestic workers are persons exclusively engaged by households to render domestic services for payment in cash or in kind. Domestic workers should be included in or excluded from the informal sector depending upon national circumstances and the intended uses of the statistics. In either case, domestic workers should be identified as a separate sub-category in order to enhance international comparability of the statistics.

ANNEXURE – III

**Guidelines concerning a statistical definition of informal employment,
endorsed by the Seventeenth International Conference of Labour Statisticians
(November-December 2003)**

The Seventeenth International Conference of Labour Statisticians (ICLS),

Acknowledging that the relevance of informal employment varies among countries, and that a decision to develop statistics on it is therefore determined by national circumstances and priorities,

Noting that the term ‘informal economy’ is used by the ILO as including the informal sector as well as informal employment, and that as a supplement to the System of National Accounts 1993 an international conceptual framework for measurement of the non-observed economy already exists, which distinguishes the informal sector from underground production, illegal production, and household production for own final use,

Recalling the existing international standards on statistics of employment in the informal sector contained in the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS (January 1993),

Noting the recommendation made by the Expert Group on Informal Sector Statistics (Delhi Group), during its Fifth Meeting, that the definition and measurement of employment in the informal sector need to be complemented with a definition and measurement of informal employment,

Emphasizing the importance of consistency and coherence in relating the enterprise-based concept of employment in the informal sector to a broader, job-based concept of informal employment,

Considering the methodological work, which the International Labour Office and a number of countries have already undertaken in this area,

Supporting the request, which was made by the International Labour Conference in paragraph 37(n) of the Resolution concerning decent work and the informal economy adopted during its 90th Session (2002), that the International Labour Office should assist countries in the collection, analysis and dissemination of statistics on the informal economy,

Recognizing that the considerable diversity of informal employment situations poses limits to the extent to which statistics on informal employment can be harmonized across countries,

Realizing the usefulness of international guidelines in assisting countries in the development of national definitions of informal employment, and in enhancing the international comparability of the resulting statistics to the extent possible,

Endorses the following guidelines, which complement the Resolution concerning statistics of employment in the informal sector of the Fifteenth ICLS, and encourages countries to test the conceptual framework on which they are based.

1. The concept of informal sector refers to production units as observation units, while the concept of informal employment refers to jobs as observation units. Employment is defined in the sense of paragraph 9 of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

2. *Informal sector enterprises* and *employment in the informal sector* are defined according to the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS. For the purpose of statistics on informal employment, paragraph 19 of the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS should be applied to exclude households employing paid domestic workers from informal sector enterprises, and to treat them separately as part of a category named 'households'.

3. (1) *Informal employment* comprises the total number of informal jobs as defined in subparagraphs (2) to (5) below, whether carried out in formal sector enterprises, informal sector enterprises, or households, during a given reference period.

(2) As shown in the attached matrix, informal employment includes the following types of jobs:

- (i) own-account workers employed in their own informal sector enterprises (cell 3);
- (ii) employers employed in their own informal sector enterprises (cell 4);
- (iii) contributing family workers, irrespective of whether they work in formal or informal sector enterprises (cells 1 and 5);
- (iv) members of informal producers' cooperatives (cell 8);
- (v) employees holding informal jobs (as defined in subparagraph (5) below) in formal sector enterprises, informal sector enterprises, or as paid domestic workers employed by households (cells 2, 6 and 10);
- (vi) own-account workers engaged in the production of goods exclusively for own final use by their household (cell 9), if considered employed according to paragraph 9 (6) of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

(3) Own-account workers, employers, members of producers' cooperatives, contributing family workers, and employees are defined in accordance with the latest version of the International Classification of Status in Employment (ICSE).

(4) Producers' cooperatives are considered informal, if they are not formally established as legal entities and also meet the other criteria of informal sector enterprises specified in the Resolution concerning statistics of employment in the informal sector adopted by the Fifteenth ICLS.

(5) Employees are considered to have informal jobs if their employment relationship is, in law or in practice, not subject to national labour legislation, income taxation, social protection or entitlement to certain employment benefits (advance notice of dismissal, severance pay, paid annual or sick leave, etc.). The reasons may be the following: non-declaration of the jobs or the employees; casual jobs or jobs of a limited short duration; jobs with hours of work or wages below a specified threshold (e.g. for social security contributions); employment by unincorporated enterprises or by persons in households; jobs where the employee's place of work is outside the premises of the employer's enterprise (e.g. outworkers without employment contract); or jobs, for which labour regulations are not applied, not enforced, or not complied with for any other reason. The operational criteria for defining informal jobs of employees are to be determined in accordance with national circumstances and data availability.

(6) For purposes of analysis and policy-making, it may be useful to disaggregate the different types of informal jobs listed in paragraph 3 (2) above, especially those held by employees. Such a typology and definitions should be developed as part of further work on classifications by status in employment at the international and national levels.

4. Where they exist, employees holding formal jobs in informal sector enterprises (cell 7 of the attached matrix) should be excluded from informal employment.

5. *Informal employment outside the informal sector* comprises the following types of jobs:

- (i) employees holding informal jobs (as defined in paragraph 3 (5) above) in formal sector enterprises (cell 2) or as paid domestic workers employed by households (cell 10);
- (ii) contributing family workers working in formal sector enterprises (cell 1);
- (iii) own-account workers engaged in the production of goods exclusively for own final use by their household (cell 9), if considered employed according to paragraph 9 (6) of the Resolution concerning statistics of the economically active population, employment, unemployment and underemployment adopted by the Thirteenth ICLS.

6. Countries, which do not have statistics on employment in the informal sector, or for which a classification of employment by type of production unit is not relevant, may develop statistics on informal employment, if desired, in specifying appropriate definitions of informal jobs of own-account workers, employers and members of producers' cooperatives. Alternatively, they may limit the measurement of informal employment to employee jobs.

7. Countries, which exclude agricultural activities from the scope of their informal sector statistics, should develop suitable definitions of informal jobs in agriculture, especially with respect to jobs held by own-account workers, employers and members of producers' cooperatives.

Conceptual Framework: Informal Employment

Production units by type	Jobs by status in employment									
	Own-account workers		Employers		Contributing family workers	Employees		Members of producers' cooperatives		
	Informal	Formal	Informal	Formal		Informal	Formal	Informal	Formal	
Formal sector enterprises					1	2				
Informal sector enterprises ^(a)	3		4		5	6	7	8		
Households ^(b)	9					10				

- (a) As defined by the Fifteenth International Conference of Labour Statisticians (excluding households employing paid domestic workers).
- (b) Households producing goods exclusively for their own final use and households employing paid domestic workers.

Note: Cells shaded in dark grey refer to jobs, which, by definition, do not exist in the type of production unit in question. Cells shaded in light grey refer to formal jobs. Un-shaded cells represent the various types of informal jobs.

Informal employment: Cells 1 to 6 and 8 to 10.

Employment in the informal sector: Cells 3 to 8.

Informal employment outside the informal sector: Cells 1,2, 9 and 10.

Chapter Three

Summary of Findings

3.0. Introduction

3.0.1 *General*: In NSS 66th round, information from the usual status workers regarding some features of the enterprises in which they worked and information on conditions of employment for the employees was collected for those engaged in industry groups/divisions ‘farming of animals’ (NIC-2004 group 012), ‘agricultural and animal husbandry service activities, except veterinary activities’ (NIC-2004 group 014), ‘hunting, trapping and game propagation including related service activities’ (NIC-2004 group 015), ‘forestry, logging and related service activities’ (NIC-2004 division 02), and ‘fishing’ (NIC-2004 division 05) and non-agriculture sector (NIC-2004 division 10-99). This report provides estimates of workforce in respect of certain characteristics of the enterprise where workers worked, with special reference to those engaged in the *informal sector* enterprises and estimates of employees with respect to their conditions of employment. The report provides these estimates for India and the constituent states and union territories. The discussions in this chapter, however, focus on the all-India estimates.

3.0.2 It is to be noted that for the purpose of discussion on *informal sector* and *conditions of employment*, in this chapter, the workforce, unless otherwise mentioned, will refer to the workers, in the usual status (ps+ss), engaged in the non-agriculture sector as well as in the [ag]ricultural sector [*excluding [g]rowing of [c]rops, market gardening, horticulture and growing of crops combined with farming of animals*] (henceforth referred to as AGE GC for discussion in this chapter). Discussion on the conditions of employment is with respect to the employees (*regular wage/salaried persons and casual labourers*). However, the discussion on the existence of union/ association pertains not only to *employees* but also to *self-employed* workers in all the industry divisions of NIC-2004, i.e., NIC – 2004 codes 01 to 99. In this chapter, the main findings relating to the workforce in usual status (ps+ss) in respect of certain characteristics of the enterprises in which they worked and the conditions of employment of the employees have been presented.

3.0.3 It may be noted that the aforesaid information on informal employment and employment in the informal sector in respect of the *usual status* workers was collected for the first time in NSS 61st round. The coverage of the activities on which the information on features of the enterprises and conditions of employment collected in NSS 66th round was similar to those of NSS 61st round, i.e., the AGE GC and the whole of non-agriculture sector. Accordingly, comparison with the corresponding results obtained from the 61st round (2004-05) survey has also been given at the all-India level.

3.0.4 To study workforce engaged in the *informal sector* enterprises in the country, it is necessary to have a perspective of the worker population ratio (WPR) in the economy and the relative shares of workforce engaged in the *non-agriculture* sector as well as in the AGE GC. This is presented in Section 1 of this chapter. Following that, Section 2 deals with several associated features of workers in the *informal sector*, such as their industrial distribution, employment status, location of work place, number of workers in the enterprise, wage/ salary earnings, etc. In Section 3, a detailed discussion of the *conditions of employment* of the employees (*viz., regular wage/ salaried employees and casual*

labour), such as type of job contract, eligibility of paid leave, availability of social security benefits, method of payment, etc, has been attempted. In Section 4, details of the existence of union/ association in the activities in which the workers were engaged have been given.

3.0.5 In all the sections of this chapter, the workers will mean those engaged in economic activity in the usual status taking into consideration both the principal status (ps) and subsidiary status (ss). In the summary statements of this report, this has been referred to as workers according to usual status (ps+ss) or simply workers (ps+ss). It may be mentioned that while all-India summary results are presented along with a write-up, the corresponding results at the state/ union territory level results are given at the end of this chapter¹.

Statement 3.0: Number of sample usual status (ps+ss) workers engaged in different industry groups/ divisions and status in employment in the employment and unemployment survey during 2009-10

3.0.6 *Number of Sample workers:* To have a meaningful discussion about the parameters presented in this chapter, it is necessary to have an idea about the sample sizes which in turn can throw some light on the reliability of the underlying estimates. Statement 3.0, gives the number of sample workers in different statuses in employment according to usual status (ps+ss) engaged in the industry groups/divisions 012, 014, 015, 02, 05 (AGEGC sector), divisions 10-99 (non-agriculture sector) and in all industries (01-99), separately for males and females in the rural and urban areas at the all-India level. The corresponding figures for each state/UT are presented in Statement 3.0.1. It can be seen from Statement 3.0 that, even at the all-India level, the sample sizes for the AGE GC sector are very small for the rural areas and even smaller for the urban areas. For the non-agriculture sector, though the sample sizes seem sufficient for a number of states/ UTs., yet when these sample sizes are to be distributed

¹ The convention for statement numbering followed in this chapter is that all statements start with the chapter number (3 here) with decimal extension giving serially continuous numbering of statements presenting all-India estimates and the corresponding state level estimates in a statement with the same number together with an additional decimal extension. For example, Statement 3.2 (second statement in Chapter 3) gives all-India level estimates while the corresponding state level estimates are given in Statement 3.2.1.

over different classificatory variables (such as industry sections, place of work, etc.) in order to examine the multidimensional aspects of the workers engaged in the *informal* sector, the adequacy of the sample size for different states/UTs cannot be assured. Considering the limitations that the sample sizes for different categories impose for drawing valid inference at the state/UT level, the discussions in this chapter are restricted to the findings at the all-India level. However, in some cases, the state/UT level results are given corresponding to the all-India results.

3.1 Magnitude of Workforce

3.1.1 *Worker population ratio (WPR)*: At the outset, it is useful to have a perspective of the workforce at the all-India level and within the total workforce, the share of AGEGC and non-agriculture sectors. For this, usual status ‘all’ workers, i.e., workers in principal

Statement 3.1: Worker population ratio (wpr) per 1000 of persons according to usual status (ps+ss) during 2009-10

*: Proportion of workers in subsidiary status (SS) is derived irrespective of the usual principal activity status of the persons

and subsidiary economic status taken together were considered to constitute the workforce. Statement 3.1 presents the number of workers per 1000 persons for all-India level and the corresponding figures for each state/UT are presented in Statement 3.1.1. This Statement shows that, the WPR was much higher in rural areas (41 per cent) than that in urban areas (35 per cent). Further, it was higher among males than those among females. It was the lowest for urban females at 14 per cent and only 26 per cent among their rural counterparts. It is moreover seen that, nearly 37 per cent of the population were workers in the principal status and 9 per cent of the population worked in subsidiary capacity whether or

not they worked in their principal status. The RSEs of worker population ratio (WPR) according to usual status (PS+SS) for all-India and each of the major States are given in Statement 3.29.1 at the end of this Chapter.

3.1.2 *Status in employment*: Statement 3.2 presents the distribution of workers by status in employment, viz., self-employed (codes: 11-21), regular wage/ salaried employee (code: 31), casual labour engaged in public works (code: 41) and casual labours engaged in other types of works (code: 51), separately by sex and rural and urban areas of India. The corresponding figures for each state/UT are presented in Statement 3.2.1. Predominance of self-employment activity is a notable feature here. At the all-India level, the proportion of self-employed was higher among the females (53 per cent) than among the males (50 per cent). The regular wage/salaried employees constituted a higher proportion of the urban workforce compared to the rural areas. It may be noted that the share of regular wage/salaried employees was merely 7 per cent of the rural workforce. In other words, the self-

employed together with casual labourer had a share of nearly 93 per cent of the total workforce in the rural areas. On the other hand, in the urban areas, nearly 59 per cent of the workforce was engaged in self-employed or casual labour activities.

Statement 3.2: Per 1000 distribution of workers (ps+ss) by status in employment during 2009-10

person	59	16	925	1000
rural+urban				
male	450	22	528	1000
female	595	92	313	1000
person	491	41	468	1000

Note: 1: Ref: NSS Report No. 537 (Employment and Unemployment Situation in India, 2009-10)

2. industry groups/ divisions: AGGC (growing of crops, market gardening, growing of combined with farming of animals): 011, 013, AGEGC: 012, 014, 015, 02, 05, non-agriculture: 10-99, all: 01-99

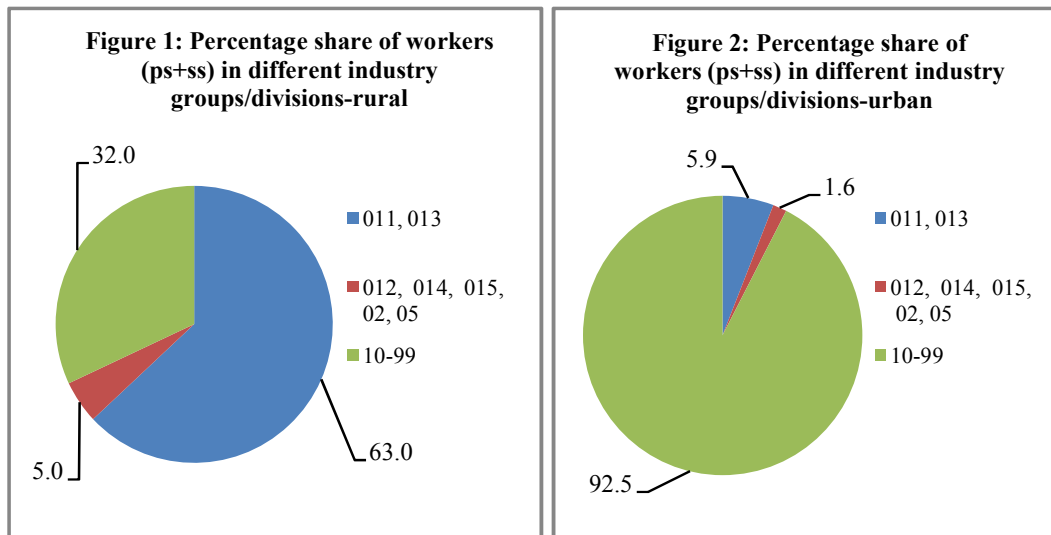

workers was about 41 per cent. It may be noted that the coverage of activities for collection of information on *informal sector* and conditions of employment being the AGEGC and non-agriculture sectors, workers in AGGC that accounted for nearly 49 per cent of the total workers remained outside the purview of this report. In Figures 1 and 2,

3.1.3 Distribution of workers by industry of work:

Statement 3.3 gives the distribution of all workers (ps+ss) by broad group of industry of work, namely, 'non-agriculture' sector (Divisions: 10 to 99), 'AGEGC' (Groups: 012, 014, 015, 02, 05) and 'AGGC' (remaining industry groups in agriculture: 011, 013) at the all-India level and Statement 3.3.1 gives the corresponding figures

for each state/UT. This gives an idea of the coverage of workers engaged in the non-agriculture sector and the AGEGC sector compared to the total workers in the country. It is seen that about 51 per cent of the workers were engaged in the AGEGC and non-agriculture sector together. The proportion was 37 per cent and 94 per cent for rural and urban areas, respectively. The gender-wise differences were quite significant for both rural and urban areas. While about 55 per cent of the male workers were engaged in the AGEGC and non-agriculture sectors together, the corresponding percentage for female

the distribution of workers in AGGC, AGEGC and non-agriculture sectors is presented for the rural and urban areas, respectively.

3.1.4 *Distribution of workers between AGEGC and non-agriculture sector:* Statement 3.4 gives the distribution of workers (ps+ss) engaged in AGEGC and non-agriculture sectors by AGEGC and non-agriculture sectors. Between these two sectors of activities, the non-agriculture sector alone accounted for almost 92 per cent of workers (ps+ss) and AGEGC engaged remaining 8 per cent. In

Statement 3.4: Per 1000 distribution of workers (ps+ss) engaged in AGEGC and non-agriculture sectors during 2009-10

Note: industry groups/ divisions: AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99

61st Round in Statement 3.5 at the all-India level. Over a period of 5 years since 2004-2005, there has been a 3 percentage point rise in the proportion of workers engaged in AGEGC and non-agriculture sector together: from 48 per cent in 2004-05 to 51 per cent in 2009-10. Corresponding rise for males was 3 percentage points (from 52 per cent in 2004-05

to 55 per cent in 2009-10) and that for females was 2 percentage points (from 39 per cent in 2004-05 to 41 per cent in 2009-10).

3.2 Employment in Informal Sector

3.2.1 *Share of employment in informal sector:* According to the 15th ICLS conceptual framework (Chapter 2, Annexure II), unincorporated enterprises, (i.e., *proprietary* and *partnership* enterprises including the informal producers' cooperatives) are largely considered as *informal sector* enterprises. It may be noted that proportion of workers in enterprise type 'co-operative societies/ trusts / other NPIs' among workers in AGEGC and non-agriculture sectors is small and such enterprise could not be distinguished as *formal* or *informal* (see Statement 3.6). Thus, in the coverage of *informal sector*, workers engaged in enterprise type 'co-operative societies/ trusts / other NPIs' have been excluded. The share of employment in the enterprise type 'employer's households' has also not been included in the coverage of *informal sector* (see Statement 3.7). Thus, for the purpose of this report, *informal sector* will mean the *proprietary* and *partnership* (P & P) enterprises.

3.2.2 Statement 3.6 shows that in both 2004-05 and 2009-10, among workers engaged in AGEGC and non-agriculture sector according to usual status (ps+ss), nearly 1 per cent workers are engaged

in the enterprise type 'co-operative societies/trusts/ other non-profit institutions'. In the rural areas, the corresponding figure was 0.7 per cent in 2009-10 which was 0.9 per cent in 2004-05 and in urban areas, the corresponding

Statement 3.6: Proportion (per 1000) of workers in enterprise type 'co-operative society trusts / other NPIs*' among workers (ps+ss) engaged in AGEGC and non-agriculture sectors during 2004-05 and 2009-10 all-India

category of workers	61 st round			66 th round		
	rural	urban	rural+urban	rural	urban	rural+urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)
male	11	12	11	8	11	9
female	6	30	14	6	33	16
person	9	16	12	7	15	11

Note: 1.*: Non-profit Institutions

2. industry groups/ divisions: AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99

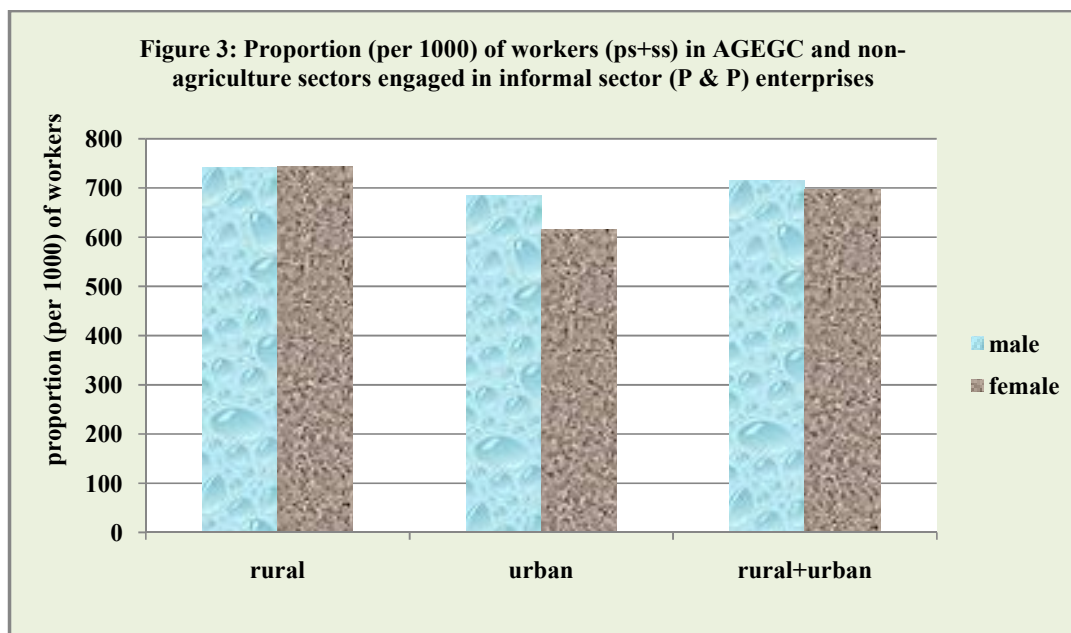

figure was 1.5 per cent in 2009-10 which was 1.6 per cent in 2004-05. The proportion of workers engaged in *proprietary* and *partnership* (P & P) enterprises and 'employer's

households among workers (ps+ss) engaged in AGE GC and non-agriculture sectors have been presented at the all-India level in Statement 3.7 for NSS 61st round and NSS 66th round. The two types of enterprises – *proprietary* and *partnership* – have been clubbed together and denoted as P&P. The statement shows that a high proportion of AGE GC and non-agriculture sector workers, in both the rural and urban areas, worked in the *informal sector*. The survey estimated that during 2009-10, among workers in the AGE GC and non-agriculture sectors, about 74 per cent in the rural areas and 67 per cent in the urban areas were employed in the *informal sector*. This proportion was almost the same for the males and females (74 per cent each) in the rural areas, while in the urban areas, the proportion was higher for the males (69 per cent) than that for the females (62 per cent). It may be noted that in the urban areas, 8 per cent of the female workers in AGE GC and non-agriculture sectors were engaged in *employer's households*. The proportion was about 2 per cent for females in the rural areas. If the share of workers in *employers' households* are added to those in P&P enterprises, the share of female workers in these enterprise are higher than those of male workers in rural areas and was of the same level in urban areas. When the proportion of *informal sector* workers in 2009-10 is compared with that of 2004-05, perceptible decline is observed across all the four segments of the workforce: rural male, rural female, urban male and urban female. At the all-India level, in 2004-05 nearly 78 per cent of the usual status workers in AGE GC and non-agriculture sectors were engaged in *informal sector*, while in 2009-10 the proportion is 71 per cent. The decline in the share of workers in the *informal sector* was highest for females in rural areas: for rural female the decline was nearly 12 percentage points, for urban females the decline was nearly 3 percentage points, while for males in both rural and urban areas the decline in the share of workers in *informal sector* was nearly 5 percentage points each. In Figure 3, the proportion (per 1000) of usual status (ps+ss) workers in AGE GC and non-agriculture sectors engaged in *proprietary and partnership* enterprises is presented. The corresponding proportions for each state/UT are presented in Statement 3.7.1.

Statement 3.7: Proportion (per 1000) of workers engaged in *proprietary* and *partnership* (P & P) enterprises and 'employer's households' among workers (ps+ss) engaged in AGE GC and non-agriculture sectors during 2004-05 and 2009-10

3.2.3 Changes in share of employment in different types of informal sector enterprises during 2004-05 and 2009-10: The proportion of workers engaged in different types of informal sector enterprises among workers (ps+ss) in AGEGC and non-agriculture sectors

is presented in Statement 3.8 at the all-India level for NSS 61st and NSS 66th rounds. It may be noted that in NSS surveys four types of *informal* sector enterprises were distinguished: *proprietary male*, *proprietary female*, *partnership with owners from the same household* and *partnership with owners from different households*. It is observed that, the entire decline of 5 percentage points in respect of each of rural male and urban male workers in the *informal* sector between 2004-05 and 2009-10, was due to the fall in the share of male workers in *proprietary* male enterprises. The decrease in the share of female workers in *informal* sector shows distinct feature. The decrease for female workforce in *informal* sector in rural areas between 2004-05 and 2009-10 was nearly 9 percentage points in male *proprietary* enterprises and another 4 percentage points in female *proprietary* enterprises. Similar feature was also observed in the reduction of urban female workforce in *informal* sector during 2004-05 and 2009-10: the share of female workforce in male *proprietary* enterprise reduced by 3 percentage points and another 1 percentage points was due to fall in the share of female workforce in female *proprietary* enterprises.

Statement 3.9: Per 1000 distribution of workers (ps+ss) in AGE GC and non-agriculture sectors engaged in *informal sector* (P & P) enterprises and ‘all’ types of enterprises by status in employment

11-51	1000	1000	1000	1000	1000	1000

Note: 1. status in employment (code): self-employment - 11, 12, 21, regular wage/ salaried employees - 31, casual labour in other than public work - 51, casual labour in public work - 41
2. industry groups/ divisions: AGE GC: 012, 014, 015, 02, 05, non-agriculture:10-99

3.2.4 *Distribution of usual status workers engaged in informal sector by status in employment*: Previous statements showed the magnitude of usual status workers in the *informal* sector. The workers are distinguished by their statuses in employment. The three broad statuses in employment in the *informal* sector are *self-employed* (activity status codes: 11, 12, 21), *regular wage/ salaried employees* (activity status code: 31) and *casual labours engaged in work other than public works* (activity status code: 51). In Statement 3.9, distribution of workers in AGE GC and non-agriculture sectors is presented separately

for those engaged in *informal* sector enterprises and ‘all’ types of enterprises. It is seen that the compositional structure of the workforce engaged in *informal* sector and in ‘all’ types of enterprises differ: the proportion of self-employed persons is more in the *informal* sector than that in ‘all’ enterprises, the proportion of regular wage/salaried employees is lesser in *informal* sector than that in ‘all’ enterprises, while proportion of casual labours is almost same in these two sectors. It is seen that share of self-employed was nearly 54 per cent for rural male workers engaged in the *informal* sector compared to 43 per cent in ‘all’ enterprises and 78 per cent of rural female workers in *informal* sector compared to 60 per cent in ‘all’ enterprises. Similar features were observed in the urban areas as well: 55 per cent of the male *informal* sector workers were self-employed compared to 40 per cent considering ‘all’ enterprises and 65 per cent of female *informal* sector workers were self-employed compared to 41 per cent of the workers considering ‘all’ types of enterprises.

Statement 3.10: Proportion (per 1000) of *informal sector* (P & P) workers among workers (ps+ss) engaged in AGEGC and non-agriculture sectors for different statuses in employment during 2009-10

Note:1: status in employment (code): self-employed - 11, 12, 21, regular wage/ salaried employees – 31, casual labour in other than public work – 51.

2: industry groups/ divisions: AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99

3.2.5 *Status in employment and share of workers in informal sector*: Statement 3.10 presents the proportions of workers engaged in the *informal sector* (per 1000 of workers in AGE GC and non-agriculture sectors) for different usual activity work statuses. It may be noted that the casual workers engaged in public works (status code 41), by definition, are outside the coverage of *informal sector*. The statement reveals that among self-employed non-agricultural workers, about 92 per cent in the rural areas and 95 per cent in the urban areas reported to have worked in the *informal sector*. Among the non-agricultural workers who were casual labourers engaged in works other than public works, a substantial chunk was employed in the *informal sector*—73 per cent in both rural and urban areas. However, among the regular wage/salaried non-agricultural workers, a much lower proportion was employed in the *informal sector*: 39 per cent in the rural areas and 40 per cent in the urban areas. Among the AGE GC workers, the overall proportion of workers engaged in the *proprietary and partnership* enterprises was higher than that among the non-agriculture sector in both the rural and urban areas. The gender differentials in the proportion of workers in the *informal sector* over the activity statuses are found to be narrow, except for the regular wage/salaried earners in the non-agriculture sector, where the differences are found to be very sharp, both in the rural and urban areas. The proportion of male regular wage/ salaried non-agricultural workers employed in the *informal sector* far exceeded the proportion of the female regular wage/ salaried workers: nearly 41 per cent of the rural male regular wage/salaried employees in the non-agriculture sector was engaged in *informal sector*, compared to 27 per cent for female and nearly 43 per cent of urban male regular wage/salaried employees in the non-agriculture sector was engaged in *informal sector*, compared to 29 per cent for female. The results for the States and Union Territories are presented in Statement 3.10.1 at the end of this chapter.

3.2.6 *Changes in the share of workers in informal sector in different status in employment*: In Statement 3.11, proportion of *informal sector* workers with different statuses is presented for NSS 61st and 66th rounds. It is seen that, in 2004-05 among the rural male self-employed workers in AGE GC and non-agriculture sector, nearly 95 per cent were engaged in *informal sector*, which decreased to 92 per cent in 2009-10 and in urban areas the decrease was from 97 per cent to 95 per cent. Among the self-employed female workers in AGE GC and non-agriculture sectors, in both rural and urban areas, the proportion engaged in *informal sector* was around 97 per cent during this period, except for rural female in 2009-10, when the proportion was 96 per cent. Among the male regular wage/salaried workers in AGE GC and non-agriculture sectors, the proportion of workers engaged in *informal sector* decreased from 45 per cent in 2004-05 to 42 per cent in 2009-10 for rural male and from 47 per cent to 43 per cent for urban male. For the female regular wage/salaried workers in AGE GC and non-agriculture sectors, the proportion of workers engaged in *informal sector* was around 26 to 27 per cent in rural areas and 28 to 29 per cent in urban areas. The proportion of casual labour in AGE GC and non-agriculture sectors engaged in *informal sector*, has shown decrease in 2009-10 compared to that of 2004-05: for rural male nearly 81 per cent of the casual labour in AGE GC and non-agriculture sectors was engaged in *informal sector* in 2004-05 which reduced to 75 per cent in 2009-10; for urban male the decrease was from 85 per cent to 76 per cent; for rural female the decrease was from 76 per cent to 70 per cent; for urban female it decreased from 69 per cent to 62 per cent.

Statement 3.11: Proportion (per 1000) of *informal sector* (P & P) workers among workers (ps+ss) engaged in AGEGC and non-agriculture sectors in different statuses in employment during 2004-05 and 2009-10

Note: 1: status in employment: self-employment - 11, 12, 21, regular wage/ salaried employees - 31, casual labour in other than public work - 51.
2: industry groups/ divisions: AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99

3.2.7 *Distribution of informal sector workers by industry of work*: Statement 3.12 presents the distribution of workers engaged in AGEGC and non-agriculture sectors in different broad industry of work (referred to as *tabulation category* in National Industrial Classification 1998 and industry section in NIC 2004), at the all-India level, separately for P & P enterprises and ‘all’ enterprises. The Statement also presents the corresponding distribution of workers engaged in the non-agriculture sector only.

3.2.7.1 *In rural areas*: The survey results suggest that *construction (section F)* and *manufacturing (section D)* and *wholesale and retail trade (section G)* together provided employment to nearly 76 per cent of the *informal non-agriculture sector* workers and 69 per cent of the non-agricultural workers considering ‘all’ enterprises. The survey estimates that among all the non-agricultural workers, about 29 per cent were engaged in *construction*, 22 per cent in *manufacturing* and 18 per cent in *wholesale and retail trade*, while among the non-agricultural workers in the *informal sector*, nearly 27 per cent were employed in *manufacturing*, 26 per cent in *construction* and 23 per cent in *wholesale and retail trade*. Nearly 36 per cent of non-agricultural female workers were engaged in *manufacturing* activities and when *informal sector* was considered the share of *manufacturing* activities was found to be 53 per cent. However, in contrast to the preponderance of *manufacturing* activities observed in the case of females, for male

workers, these proportions were lower – 19 per cent for those engaged in ‘all’ non-agricultural work and 21 per cent for those in *informal sector*. *Construction* shared nearly 30 per cent of all the male non-agricultural workers compared to 25 per cent for females, while in the *informal sector*, the share of *construction* was nearly 14 per cent for female workers and 29 per cent for male workers. Nearly 11 per cent of all female non-agricultural workers and 19 per cent of male non-agricultural workers were employed in *wholesale and retail trade etc.* However, when the *informal sector* is considered, it is found that nearly 16 per cent of females and 24 per cent of male workers were engaged in *wholesale and retail trade etc.* Among the *informal sector* workers, the proportion which was engaged in AGE GC was higher for females than for males: among the workers in *informal sector*, the share of workers engaged in AGE GC was 43 per cent for females and 8 per cent for males, compared to 58 per cent for females and 92 per cent for males in the non-agriculture sector.

3.2.7.2 *In urban areas*: As was seen in the rural areas, in the urban areas also, among the workers in the non-agricultural activities, *manufacturing (section D)*, *construction (section F)*, and *wholesale and retail trade etc, (section G)* were the main providers of employment: nearly 59 per cent of the workers considering all the enterprises and 72 per cent of the *informal sector* enterprises were engaged in these industry sections. Among all the workers in the non-agriculture sector nearly 25 per cent workers were engaged in *manufacturing*, 23 per cent by *wholesale and retail trade etc*, and 11 per cent in *construction*, while among the workers engaged in *informal sector*, *manufacturing* activities shared 29 per cent of the workers, *wholesale and retail trade etc*, shared 32 per cent of the workers and 12 per cent of the non-agricultural workers in the *informal sector* were engaged in *construction*. A higher proportion of *informal sector* female workers in non-agriculture sector were engaged in *manufacturing* activities (47 per cent) compared to the males (26 per cent). Among the workers engaged in *informal sector*, the share of *wholesale and retail trade etc.*, was far higher for males compared to females: nearly 34 per cent of the male *informal* non-agriculture sector workers were engaged in *wholesale and retail trade etc*, compared to 18 per cent of female workers. The share of *construction* activities among the workers in *informal sector* was also higher for males than for females: nearly 13 per cent of the male *informal* non-agriculture sector workers were engaged in *construction* compared 6 per cent of female workers. The activities of *education (section M)*, *other community, social and personal service activities (section O)* shared significant proportion of female workers engaged in non-agricultural activities in the *informal sector*: nearly 9 per cent of the female non-agricultural *informal sector* workers were engaged in *education* activities while nearly 8 per cent were in *other community, social and personal service activities*. Among the male workers, *transport, storage and communication (section I)* shared nearly 11 per cent of the *informal sector* workers.

Statement 3.12: Per 1000 distribution of workers (ps+ss) in AGEGC and non-agriculture sectors engaged in *informal sector* (P & P) enterprises and 'all' types of enterprises by industry groups/sections of NIC-2004 during 2009-10

3.2.8 Share of workers in informal sector in different broad industry of work: Statement 3.13 presents the proportion of *informal sector* workers among all workers in different industry groups/sections at the all-India level during 2009-10. The corresponding results for the states/UTs. are presented in Statement 3.13.1. Statement 3.13 shows that during

2009-10, nearly 93 per cent of the rural and urban workers engaged in AGEGC belonged to the *informal sector* and a higher proportion of female workers engaged in AGEGC in both the rural and urban areas were in *informal sector* compared to male workers: in rural areas, nearly 95 per cent of female workers compared to 91 per cent of male workers and in urban areas, 98 per cent of female workers compared to 88 per cent of male workers engaged in AGEGC was in *informal sector*. In the urban areas, among the different broad sections, the following industries had a very high proportion of workers in the *informal sector*: nearly 92 per cent of the workers in *wholesale or retail trade, etc. (section G)* were engaged in *informal sector*, nearly 88 per cent in *hotels and restaurants (section H)*, nearly 78 per cent in *manufacturing (section D)*, nearly 73 per cent in *other community, social and personal service activities (section O)* and nearly 72 per cent in *construction (section F)*. In urban areas, *mining (section C)*, *electricity (section E)*, *financial intermediation (section J)*, *education (section M)* and *health (Section N)* had less than 50 per cent of the workers in *informal sector*. In the rural areas, similar feature was observed on the proportion of workers in *informal sector* in different broad industries. In each of *wholesale or retail trade, etc* and *hotels and restaurants*, nearly 91 per cent of the workers were in *informal sector*, in *manufacturing* 86 per cent, in *transport, storage and communication*, 82 per cent and in *other community, social and personal service activities*, nearly 81 of the workers were in *informal sector*. Among different broad industries in rural areas, in *gas, electricity and water supply, financial intermediation, education* and *health* had less than 50 per cent of the workers in *informal sector*. It is seen that in urban areas, a higher proportion of female workers were engaged in *informal sector* compared to male workers in the following broad industries: in *mining* industry (35 per cent of the female workers compared to 24 per cent of male workers were engaged in *informal sector*), in *manufacturing* (87 per cent of female workers compared to 75 per cent male workers), in *wholesale and retail trade* (93 per cent of female workers compared to 91 per cent of male workers) and in *hotels and restaurants* (90 per cent of female workers compared to 88 per cent of male workers). In rural areas, the proportion of female workers engaged in the following broad industries was higher than that of their male counterparts: in *manufacturing* (93 per cent females workers compared to 83 per cent of male workers), *wholesale and retail trade* (96 per cent of female workers compared to 91 per cent of male workers) and *financial intermediation* (80 per cent of female workers compared to 25 per cent of male workers). In Figure 4, the proportion (per 1000) of workers (ps+ss) in *informal sector* enterprises is presented for AGEGC sector and also for different industry sections.

Statement 3.13: Proportion (per 1000) of *informal sector (P & P)* workers among workers (ps+ss) in different industry groups/sections during 2009-10

3.2.9 Changes in the share of informal sector workers in AGE GC and non-agriculture sector during 2004-05 and 2009-10: In Statement 3.14, the proportion of *informal sector* workers among AGE GC workers and that among workers in non-agriculture sector is presented at the all-India level during 2004-05 and 2009-10. It is seen that in rural areas, the proportion of female workers in *informal sector* has reduced in AGE GC sector from 97 per cent in 2004-05 to 95 per cent in 2009-10, while the proportion of male workers in *informal sector* engaged in AGE GC remained almost at 90 per cent. Significant reduction in the proportion of workers in *informal sector* has been observed in the non-agriculture sector. In the rural areas, among the workers in the non-agriculture sector, nearly 78 per cent of the male workers and 77 per cent of female workers were engaged in *informal sector* in 2004-05, which reduced to 73 per cent for male workers and 64 per cent for female workers in 2009-10. In the non-agriculture sector of the urban areas also, the proportion of workers engaged in *informal sector* reduced during 2004-05 and 2009-10: in 2004-05 nearly 74 per cent of the male workers in non-agriculture sector were engaged in *informal sector* compared to 68 per cent in 2009-10 and in 2004-05, nearly 64 per cent of the female workers in the non-agriculture sector were engaged in *informal sector* compared to 60 per cent in 2009-10.

Statement 3.14: Proportion (per 1000) of *informal sector* (P & P) workers among workers (ps+ss) separately for AGE GC and non-agriculture sector during 2004-05 and 2009-10

3.2.10 *Location of Work Place*: In the survey, apart from the type of enterprise in which a worker was working, information in respect of the location of work place (enterprise) was also collected for each of the working members of the sample households engaged in AGE GC and non-agriculture enterprises. Types of location of workplace considered have been described earlier in Chapter Two (para 2.17). Statement 3.15 presents the distribution of usual status (ps + ss) workers by their location of work place separately for the *informal sector* enterprises and for ‘all’ enterprises’.

3.2.10.1 *In Rural Areas*: The statement shows that considering all workers, a very high proportion of workers residing in rural areas had reported their work place location in the rural area itself – nearly 86 per cent. The proportion for female workers residing in rural areas, who had their work place situated in the rural areas was even higher (93 per cent) than that for male workers (83 per cent). These proportions were even higher when employment in the *informal sector* (P&P) alone is considered. For female workers employed in the *informal sector* alone, the proportion was as high as 95 per cent and the corresponding proportion for males was 86 per cent. One distinct feature of the female workers employed in *informal sector* was that a higher proportion of them was working in any of the following types of workplace in their (i) *own dwelling*, (ii) *structure attached to own dwelling unit*, (iii) *open area adjacent to own dwelling unit* and (iv) *detached structure adjacent to own dwelling unit* – nearly 68 per cent for females compared to 21 for males. Moreover, when all types of enterprises were considered, it is found that in these four types of workplaces, nearly 52 per cent of female workers and 16 per cent of the male workers were working. In the case of male workers in the *informal sector*, nearly 56 per cent were working either in their *own enterprise* or *employers enterprise/ unit/ office/ shop, etc.* or *construction site*. The proportion of workers with *no fixed work place* was higher among the males than the females. For the AGE GC and non-agriculture workers as a whole as well as for *informal sector* workers, these proportions were 6 per cent and 2 per cent for males and females, respectively.

Statement 3.15: Per 1000 distribution of workers (ps+ss) **residing in rural areas** engaged in *informal sector* (P & P) and 'all' types of enterprises in AGEGC and non-agriculture sectors by **location of work place** during 2009-10

3.2.10.2 *In Urban Areas*: Among AGEGC and non-agriculture workers residing in urban areas, about 86 per cent are estimated to have their work place in urban areas itself. This proportion was 85 per cent among the workers employed in the *informal sector*. Almost all female workers residing in urban areas and engaged in the *informal sector* 92 per cent was working in the urban areas itself. The corresponding proportion for male workers was, however, a little lower at 83 per cent. Among other categories of workplace where the share of female workers was higher were *employer's enterprise etc. but outside employer's dwelling* (37 per cent of all non-agricultural and AGEGC workers and 21 per cent of *informal sector* workers). Like in rural areas, a very high proportion of female workers employed in *informal sector* were working in any of the following types of workplace in their (i) *own dwelling*, (ii) *structure attached to own dwelling unit*, (iii) *open area adjacent to own dwelling unit* and (iv) *detached structure adjacent to own dwelling*

unit – nearly 52 per cent for females compared to 15 per cent of males. The difference was narrower when the workers in all types of enterprises were considered - the proportions being 33 per cent for females and 10 per cent for males. On the other hand, male workers were found to be mostly working in *employer's enterprises etc. but outside employer's dwelling* (44 per cent among AGE GC and non-agriculture workers and 29 per cent among *informal sector* workers). They were also found to be working in relatively large numbers in their *own enterprises etc. but outside own dwelling* – 18 per cent among all non-agriculture and AGE GC workers and 25 per cent among the *informal sector* workers.

Statement 3.15: Per 1000 distribution of workers (ps+ss) **residing in urban areas** engaged in *informal sector* (P & P) and 'all' types of enterprises in AGE GC and non-agriculture sectors by **location of work place** during 2009-10

3.2.11 *Workers in manufacturing enterprises using electricity:* As seen earlier, *manufacturing* sector (section D) was the second most important provider of employment in rural areas and was the most important one in urban areas. An important input for raising productivity of workers in *manufacturing* enterprises is the use of electricity for purposes of manufacturing. Statement 3.16 presents the proportions of workers engaged in

enterprises that used electricity, separately for all *manufacturing enterprises* in the *informal sector* as well as in 'all' types of *manufacturing enterprises*. These figures are presented considering all the enterprises in AGEGC and non-agriculture activities also. In the Statement the survey results of NSS 61st round (2004-2005) are also given for comparison. The corresponding proportions for each state/UT are given in Statement 3.16.1. Proportion of workers engaged in *manufacturing enterprises* that uses electricity for production is presented in Figure 5 for 2004-05 and 2009-10.

Statement 3.16: Proportion (per 1000) of workers engaged in enterprises that used electricity among workers (ps+ss) of manufacturing enterprises and 'all' enterprises in AGEGC and non-agriculture sectors separately for P & P and 'all' enterprise types during 2004-05 and 2009-10

3.2.11.1 *In Rural Areas*: It is seen that nearly 31 per cent of the workers in rural households were engaged in *manufacturing enterprises* that used electricity for production purposes. However, a higher proportion of male workers (nearly 39 per cent) were engaged in the manufacturing enterprises that used electricity for production purposes than female workers (14 per cent). The scenario was a bit different when the *informal sector enterprises* are considered. Only 27 per cent of the workers of the *informal sector* engaged in *manufacturing activity* were found to be working in those enterprises which used electricity for production purposes. A significant difference is observed, when workers employed in *manufacturing enterprises* owned on a *partnership* basis are compared with those owned on *proprietary* basis: nearly 46 per cent of the workers in *manufacturing enterprise in partnership informal sector* were engaged in enterprises that used electricity while nearly 25 per cent of the workers in *manufacturing enterprises in proprietary informal sector* were engaged in enterprises that used electricity. Compared to the

manufacturing enterprises, when all enterprises are considered, it is seen that a smaller proportion of workers were engaged in enterprises that used electricity for production of goods and services: 13 per cent of the workers in AGEGC and non-agricultural enterprises were engaged in units that used electricity for production of goods and services while nearly 12 per cent of the workers in AGEGC and non-agriculture *informal sector* enterprises were engaged in units that used electricity for production of goods and services.

3.2.11.2 *In Urban Areas*: The proportion of workers in urban areas working in *manufacturing* enterprises that used electricity to all those working in all types of *manufacturing* enterprises as a whole was almost double (58 per cent) of that in rural areas. The feature observed in rural areas (viz. the proportion being lower for workers in *informal sector* as a whole, but being much higher for workers in partnership enterprises engaged in manufacturing), holds true in urban areas also. In the case of *informal partnership enterprises in manufacturing* activity, 73 per cent of the workers were engaged in units that used electricity for production. As observed in the case of rural areas, a higher proportion of male workers were employed in the *manufacturing* units using electricity for production purposes- in *partnership* enterprises, 76 per cent of males compared to 57 per cent female workers and in *proprietary* enterprises, 59 per cent of male workers compared to 26 per cent for female workers were employed in the *manufacturing* units using electricity. In all the enterprises in AGEGC and non-agriculture, nearly 29 per cent of the workers were engaged in enterprises that used electricity for production of goods and services with significant male-female differences: 30 per cent for male workers and 21 per cent for female workers. Moreover, among the workers in *informal* AGEGC and non-agricultural enterprises, nearly 26 per cent were engaged in enterprises that used electricity for production of goods and services: among workers in *informal* AGEGC and non-agricultural enterprises owned on *proprietary* basis nearly 25 per cent were engaged in units that used electricity for production of goods and services, while it was nearly 44 per cent in case of workers in *partnership* enterprises.

3.2.11.3 *Changes between 2004-05 and 2009-10*: It is seen that proportion of workers engaged in *manufacturing* as well as all in AGEGC and non-agricultural activities that used electricity for production purposes had increased for both *informal sector enterprises* (*proprietary* and *partnership*) and 'all' types of enterprises during 2009-10 compared to 2004-05. Considering 'all' types of enterprises in *manufacturing* activities, while nearly 26 per cent of the workers in the *manufacturing* were engaged in enterprises that used electricity for production purposes in the rural areas and 51 per cent in the urban areas during 2004-05, the proportions increased to 31 per cent and 58 per cent, respectively during 2009-10. For *informal sector enterprises in manufacturing* activities, the proportion of workers engaged in enterprises that used electricity increased from 22 per cent in 2004-05 to 27 per cent in 2009-10 in rural areas and from 44 per cent in 2004-05 to 52 per cent in 2009-10 in urban areas. The increase in the proportion of workers in *partnership enterprises* involved in *manufacturing* that used electricity for production purposes was from 53 per cent in 2004-05 to 59 per cent in 2009-10 for rural males and from 12 per cent in 2004-05 to 19 per cent in 2009-10 for rural females, while for workers in *proprietary enterprises* involved in *manufacturing* that used electricity for production purposes, the increase was from 28 per cent to 32 per cent for rural males and from 9 per cent to 13 per cent for rural females. In urban areas, the proportion of male workers engaged in *manufacturing* activities in *proprietary enterprises* that used electricity for production increased from 49 per cent in 2004-05 to 59 per cent in 2009-10 and for female workers the increase was from 18 per cent to 26 per cent. But, the proportion of urban male

workers engaged in *manufacturing* activities in *partnership* enterprises that used electricity decreased from 82 per cent in 2004-05 to 76 per cent in 2009-10 and for females the decrease was from 63 per cent to 57 per cent during this period. It is seen that considering all the AGEGC and non-agricultural activities, the proportion of workers engaged in enterprises that used electricity increased from 11 per cent in 2004-05 to 13 per cent in 2009-10 in rural areas and from 23 per cent to 29 per cent in urban areas during this period.

3.2.12 *Workers in smaller sized enterprises*: Information was collected from the workers in usual status about the number of workers in the enterprise in which they were engaged. The enterprises with less than 6 workers are termed for the purpose of this report as *smaller enterprises*. In Statement 3.17, proportion of workers in AGEGC and non-agriculture sectors engaged in smaller enterprises are presented for NSS 61st and NSS 66th round, separately for *informal sector* and ‘all’ sectors combined. The corresponding proportions for each state/UT are given in Statement 3.17.1. In Figure 6 proportions of workers in smaller enterprises (less than 6 workers) are presented for *informal sector* enterprises and all the enterprises in AGEGC and non-agriculture sectors.

3.2.12.1 It is seen that in rural areas, a higher proportion of workers were engaged in smaller enterprises compared to urban areas: in rural areas, 64 per cent of the workers in AGEGC and non-agriculture sectors were engaged in *smaller enterprises* compared to 53 per cent in urban areas. Moreover, in *informal sector enterprises* in AGEGC and non-agriculture sectors, a higher proportion of workers were engaged in *smaller enterprises* compared to all workers in AGEGC and non-agriculture sectors in both rural and urban areas: in rural areas, 77 per cent of the workers in *informal sectors* were engaged in smaller enterprises compared to 64 per cent of ‘all’ workers in AGEGC and non-agriculture sectors while in urban areas, 69 per cent of the workers in *informal sector* were engaged in *smaller enterprises* compared to 53 per cent of ‘all’ workers in AGEGC and non-agriculture sectors. It is, moreover, seen that compared to males a higher proportion of females had worked in *smaller enterprises*: in rural areas, in *informal sector*, 75 per cent of the males and 83 per cent of females were engaged in smaller enterprises, while in urban areas, 69 per cent males and 74 per cent females were engaged in smaller enterprises. Similar feature was observed when all the workers in AGEGC and non-agriculture sectors are considered: 62 per cent males and 69 per cent females in rural areas

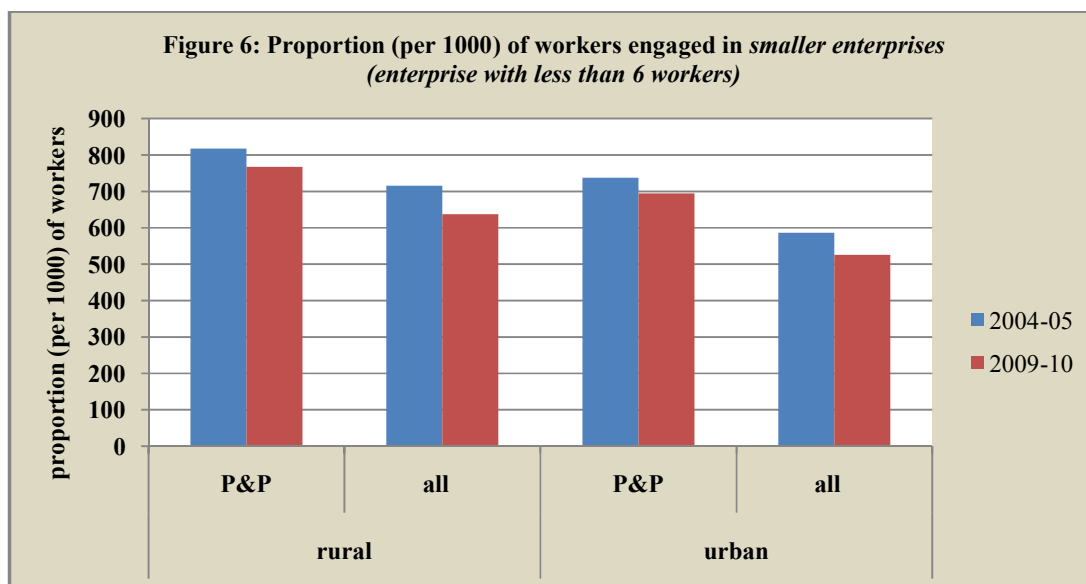

while 52 per cent males and 58 per cent females in urban areas were engaged in smaller enterprises.

3.2.12.2 *Changes between 2004-05 and 2009-10*: It is seen that during 2009-10, the proportion of workers in smaller enterprises had decreased, in both rural and urban areas. In rural areas, in *informal* sector, the proportion of workers in *smaller enterprises* decreased from 82 per cent in 2004-05 to 77 per cent in 2009-10, while in urban areas the decrease was from 74 per cent to 69 per cent. Similar situation was observed when workers in all the AGEGC and non-agriculture sectors are considered: in rural areas during 2004-05 nearly 72 per cent of the workers were in smaller enterprises which decreased to 64 per cent in 2009-10 and in urban areas 59 per cent of the workers in smaller enterprises which decreased to 53 per cent in 2009-10.

Statement 3.17: Proportion (per 1000) of workers engaged in enterprises with less than 6 workers among the workers (ps+ss) in AGEGC and non-agriculture sectors separately for 'P & P' enterprises and 'all' enterprise types during 2004-05 and 2009-10

3.2.13 *Wage and salary earnings*: The information regarding the wage and salary earnings was collected for regular wage/salaried employees and casual labourers in the current daily status only, while the particulars of the enterprise in which the workers were engaged were collected in usual status only. The status in employment may differ in the usual status and in the current daily status. Thus, it is not possible to calculate the wage and

Statement 3.18: Average wage and salary earnings (Rs.) per day received by wage/ salaried employees according to usual status (ps+ss) engaged in AGE GC and non-agriculture sectors who had same status in employment in current daily status during 2009-10

Note: industry groups/ divisions: AGE GC: 012, 014, 015, 02, 05, non-agriculture:10-99

(*proprietary* and *partnership*) enterprises earned a little higher than half the salary earnings (per day) of the employees considering all types of enterprises – it being Rs. 321 for ‘all’ types of enterprises and Rs. 177 for *informal sector* enterprises. In the case of the

salary earning of the workers employed in different types of enterprises according to usual status. However, an attempt was made to calculate the wage and salary earnings of only those regular wage/salaried employees and casual labourers according to usual status who had the same status in employment in the current daily status as well. It was assumed that these employees were engaged in the same enterprise type in the current daily status which were reported by them in their usual status. This approach will exclude those, who were either regular wage/salaried workers or casual labourers in usual status but had not the same status in employment in the current daily status. Statement 3.18 presents the average wage/salary earnings per day in respect of regular wage/salaried employees and casual labourers who had same status in employment in the usual status and current daily status for different types of enterprises (*viz*, *proprietary* and *partnership* and employer's households) in which they were engaged in their usual status. The corresponding results at the state/UT level are given in Statement 3.18.1.

3.2.13.1 *Earnings of regular wage/salaried employees*: It is seen that, at the all-India level, the regular wage/salaried employees engaged in the *informal*

regular wage/salaried employees employed in the *employer households*, the difference in their earnings is high compared to that for 'all' types of enterprises – earnings from work in '*employer's households*' was less than one-third of the earnings considering 'all' types of enterprises. It is seen that *regular wage/salaried employees* in the urban areas, whether they were employed in *informal* enterprises or *employer's households* earned uniformly higher wages compared to those employed in the rural areas, and this observation holds good for both males and females. It is, moreover, observed that the male *regular wage/salaried employees* earned higher wages than females irrespective of the types of enterprise in which they worked. For *regular wage/salaried employment* in the rural areas, the female-male wage ratio was 0.75 in the *informal sector* enterprises, which was slightly higher than the corresponding ratio (0.63) for 'all' types of enterprises. For *regular wage/salaried employment* in the urban areas, female-male wage ratio was 0.77 for *informal sector* enterprises and 0.82 for 'all' enterprises.

3.2.13.2 *Earnings of casual labourers*: In the case of *casual labourers*, difference in wages of the workers employed in the *informal sector* enterprises compared to 'all' types of enterprises was negligible. Male casual labourers in urban areas earned a little higher wages than those in rural areas, while a reverse situation was observed for females. It is seen that for rural male *casual labourers* in *informal sector* enterprises, wage rate (per day) was nearly Rs. 118 compared to Rs. 115 for 'all' enterprises, while in both the cases wage rate (per day) was around Rs. 81 for rural female, nearly Rs. 125 for urban male and nearly Rs. 71 for urban female. In the case of *casual labourers* engaged in the *informal sector*, the female-male wage ratio was 0.69 in the rural areas and 0.56 in the urban areas and for 'all' enterprises, the corresponding figures were 0.70 and 0.56, respectively.

3.3 Conditions in Employment

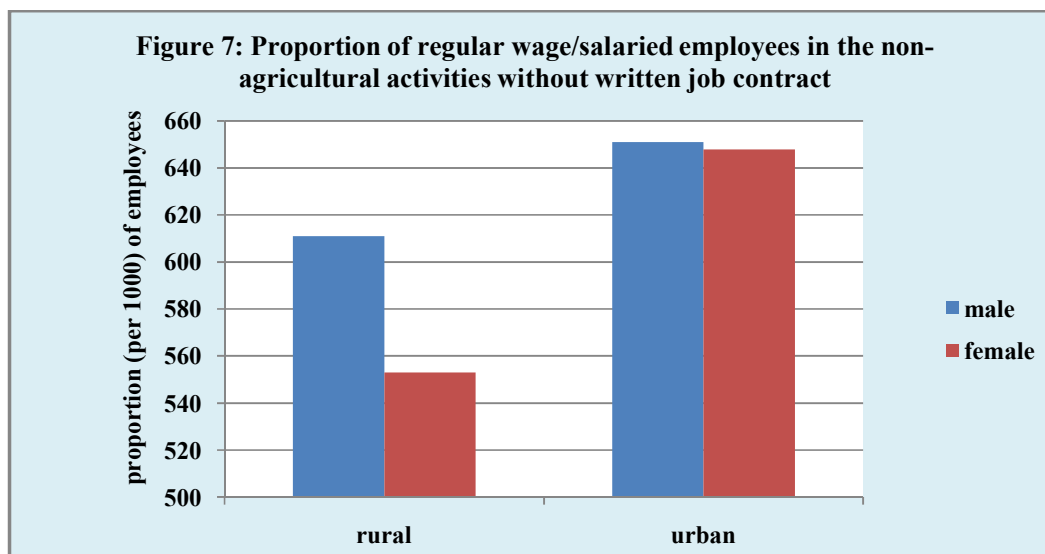

3.3.1 In this section conditions of employment of regular wage/ salaried workers and casual labourers, hereafter referred to as employees only, have been studied. Certain information like whether there was any written job contract in the employment, whether employees were eligible for the paid leave, whether employees were covered under social security benefits, etc., were collected in the survey for the employees, that is, for *regular wage/salaried* and *casual labourers* engaged in the non-agriculture sector (NIC-2004, industry divisions 10-99) and AGE GC sector (NIC-2004, industry groups/divisions 012, 014, 015, 02, 05). The sample number of employees of these two categories in the AGE GC and non-agriculture sector is presented in Statement 3.0 (para. 3.0.6). It is evident from the Statement that the sample size for the AGE GC sector even at the all-India level is too small and this poses severe limitation in drawing valid inferences on the basis of the estimates for such category of employees even at the all India level. The comparable results for NSS 61st round (2004-05) have also been presented; however, comparisons have mainly been restricted for the non-agriculture sector considering the small sample size netted in the AGE GC sector.

3.3.2 *Employees with no written job contract*: In the survey, information was collected for the employees on whether there was any written contract or agreement with the employer regarding duration of employment in respect of the job they were engaged in. The proportion of different categories of workers, viz. regular wage/ salaried employees, and *casual labourers* who had no written job contract with the employer is presented in Statement 3.19. The results for each state/UT are presented in Statement 3.19.1. In Figure

7, the proportion (per 1000) of regular wage/ salaried employees in non-agriculture sector who had no written job contract is presented.

3.3.2.1 *Non-agriculture sector*: In the non-agriculture sector in 2009-10, about 81 per cent of employees in rural areas and 74 per cent in urban areas had no written job contract with their employer. As expected, among the *casual labourers* nearly 93 per cent in the rural areas and 97 per cent in the urban areas had no written job contract. In contrast, a lower proportion of the *regular wage/salaried employees* had no written job contract: 60 per cent in rural and 65 per cent in urban areas. Gender differentials regarding this condition of employment was found to be marginal for *regular wage/salaried employees* - while in the rural areas nearly 61 per cent of the male workers had no written job contract, for females the corresponding proportion was 55 per cent and in the urban areas the proportion of males and females with no written job contract was 65 per cent.

3.3.2.2 *AGEGC sector*: The incidence of persons without written job contract was more prevalent in this sector - 88 per cent in the rural areas and 90 per cent in the urban areas. In this sector too, the proportion of the regular wage/salaried employees with no written job contract was lower (83 per cent in the rural areas and 72 per cent in the urban areas) than the corresponding proportion for casual labourers (89 per cent in the rural areas and almost universal in urban areas). In the rural areas, among the regular wage/ salaried workers, nearly 90 per cent of female workers had no written job contract compared to 82 per cent of male workers, while in the urban areas nearly 92 per cent female workers had no written job contract compared to 70 per cent of male workers.

3.3.2.3 *Changes in proportion of employees with no written job contract during 2004-05 and 2009-10*: Statement 3.19 presents the proportion of employees engaged in AGEGC and non-agriculture sectors without written job contract. However, considering the small sample size, the comparison here is restricted to the employees in non-agriculture sector. It is seen that among the employees in non-agriculture sector, in the rural areas nearly, 79 per cent had no written job contract in 2004-05 compared to 81 per cent in 2009-10 and in urban areas, nearly 68 per cent of the employees had no written job contract in 2004-05 compared to 74 per cent in 2009-10. A comparison of the situation for regular wage/salaried employees in the non-agriculture sector show that compared to 2004-05, in

2009-10, a higher proportion in urban areas had no written job contract while the situation in the rural areas has remained unchanged: in rural areas, in 2004-05 as well as in 2009-10 nearly 60 per cent of the regular wage/salaried employees in the non-agriculture sector had no written job contract, while in the urban areas the proportion of regular wage/salaried employees without written job contract increased from 59 per cent to 65 per cent during this period. It is moreover noticed that during this period, among the rural male regular wage/salaried employees the proportion without written job contract has increased (from 59 per cent in 2004-05 to 61 per cent in 2009-2010) while among rural females it has decreased (from 57 per cent to 55 per cent). In urban areas, on the other hand, the proportion of *regular wage/salaried employees* without written job contract has increased for both males and females: for male the increase was from 59 per cent to 65 per cent and for females the increase was from 61 per cent to 65 per cent.

Statement 3.19: Proportion (per 1000) of employees who had no written job contract among employees (ps+ss) in AGEGC and non-agriculture sectors for different status in employment during 2004-05 and 2009-10

3.3.2.4 *Distribution of employees without written job contract by industry of work*: In Statement 3.20, the distribution of usual status (ps+ss) workers having no written job contract across *industry group/ division* has been given at the all-India level. It shows that among all the *regular wage/salaried employees* and *casual labourers* who had no written job contract with their employers, about 67 per cent and 47 per cent in the rural and urban areas, respectively belonged to either the *manufacturing* sector (section D) or to the *construction* sector (section F). Among other sectors having a large proportion of such workers were in industry section *wholesale and retail trades; repair of motor vehicles, motor cycles and personal and household goods* (13 per cent) in the urban areas, and in industry section *transport, storage and communications* sector (9 per cent in rural areas and 10 per cent in urban areas).

Statement 3.20: Per 1000 distribution of employees (ps+ss) in AGE GC and non-agriculture sectors who had no written job contract by industry group/ section during 2009-10

2: industry groups/ divisions: AGE GC: 012, 014, 015, 02, 05, non-agriculture: 10-99

3.3.3 *Nature of employment*: Information on whether the employment was permanent or temporary was collected for all *regular wage /salaried employees* and *casual labourers* in the survey. Nature of employment was defined to be *permanent if the person was, in normal course, likely to continue in the same employment*. The results obtained from the survey are presented, for those engaged in AGE GC and non-agriculture sectors, in Statement 3.21 for all-India for 2004-05 and 2009-10. The results for each state/UT for 2009-10 are given in Statement 3.21.1.

3.3.3.1 *Proportion of temporary employees during 2009-10*: During 2009-10, among the employees engaged in AGEGC and non-agriculture sectors as a whole, about 52 per cent in rural areas and 42 per cent in urban areas were temporary employees. It is seen that among the *regular wage/salaried employees*, in the non-agriculture sector, during 2009-10, nearly 32 per cent in rural areas and 33 per cent in urban areas were temporary employees. Gender differential was not significant in the proportion of temporary *regular wage salaried employees* in both rural and urban areas. It is seen that among the *casual labourers*, in the non-agriculture sector, nearly 63 per cent in rural areas and 67 per cent in urban areas were temporary employees. In Figure 8, the proportion (per 1000) of temporary employees in non-agriculture sector among *regular wage/ salaried employees* is presented.

3.3.3.2 *Changes in the proportion of temporary employees during 2004-05 and 2009-10*: It is seen that, the proportion of temporary employees among all employees, in the non-agriculture sector, did not change much in 2009-10 compared to that of 2004-05: in 2004-05, proportion of temporary employees was 49 per cent in rural areas which increased to 52 per cent in 2009-10 and in urban areas it was 41 per cent and 42 per cent, respectively, in these two periods. Among the *regular wage/salaried employees* in the non-agriculture sector, the proportion of temporary employees has remained almost at the same level during 2004-05 and 2009-10 in both the rural and urban areas. In the rural areas, nearly 33 per cent of the *regular wage/salaried employees* engaged in the non-agriculture sector were temporary employees during 2004-05 and it was nearly 32 per cent in 2009-10, while in urban areas the proportions were 32 per cent and 33 per cent respectively during these two periods. It is seen that in both rural and urban areas there was a reduction in the proportion of temporary employees among the female *regular wage/salaried employees* engaged in the non-agriculture sector: in rural areas it decreased from 36 per cent in 2004-05 to 32 per cent in 2009-10 while in urban areas the reduction was from 37 per cent to 34 per cent. Among male *regular wage/ salaried employees*, the proportion of temporary employees remained at 32 per cent in rural areas during these two periods while in urban areas, there was an increase in the proportion of *regular wage/ salaried employees* from 31 per cent in 2004-05 to 33 per cent in 2009-10 .

Statement 3.21: Proportion (per 1000) of temporary employees among employees (ps+ss) in AGEGC and non-agriculture sectors for different status in employment during 2004-05 and 2009-10

3.3.4 *Eligibility for paid leave:* For the purpose of survey, paid leave included the cases of leave during sickness, maternity or such leaves as the employee was eligible to take without loss of pay as per the conditions of employment. Statement 3.22 gives, at all-India level, the proportion of *regular wage /salaried employees* and *casual labourers* not eligible for paid leave among all employees (ps+ss) in AGEGC and non-agriculture sectors for different status in employment during 2004-05 and 2009-10. The results for states/UTs for 2009-10 are presented in Statement 3.22.1.

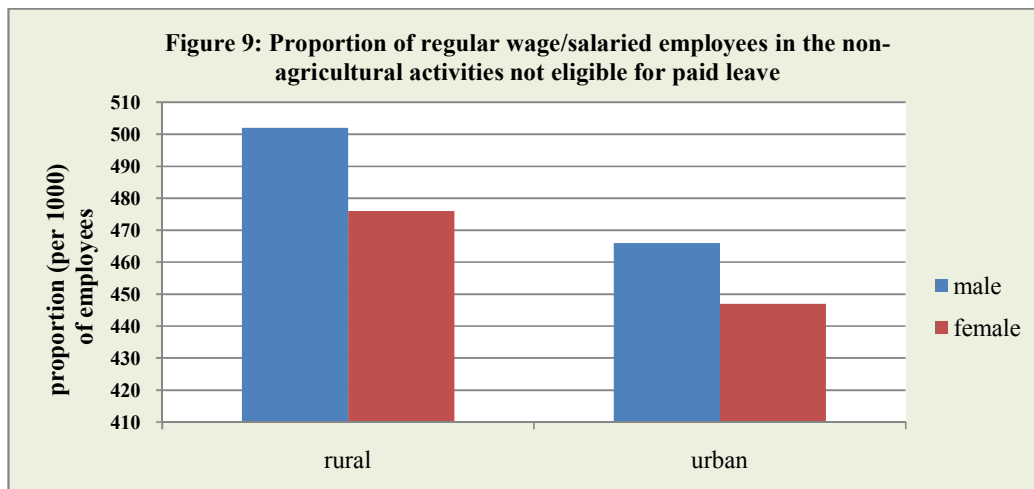

3.3.4.1 *Eligibility for paid leave among employees during 2009-10:* Statement 3.22 shows that the proportion of employees not eligible for paid leave is much higher among the *casual wage labourers* (97 per cent in rural and 96 per cent in urban areas) compared to the *regular wage /salaried employees* (50 per cent in rural areas and 46 per cent in urban

areas). Among the regular wage/salaried employees in the non-agriculture sector, nearly 50 per cent in rural areas and 46 per cent in urban areas were not eligible for paid leave, while those engaged in AGE GC sector a higher proportion were not eligible for paid leave: 80 per cent in rural areas and 61 per cent in urban areas. In the non-agriculture sector, not much gender differences were observed in the proportion of *regular wage/salaried employees* who were not eligible for paid leave: nearly 50 per cent of male employees against 48 per cent of female employees in rural areas and 47 per cent of male employees and 45 per cent of female employees in urban areas were not eligible for paid leave. In Figure 9, the proportion (per 1000) of regular wage/ salaried employees in non-agriculture sector not eligible for paid leave is presented.

Statement 3.22: Proportion (per 1000) of employees not eligible for paid leave among employees (ps+ss) in AGE GC and non-agriculture sectors for different status in employment during 2004-05 and 2009-10

3.3.4.2 *Changes in the proportion of employees not eligible for paid leave during 2004-05 and 2009-10:* The proportion of employees in the non-agriculture sector who were not eligible for paid leave has increased in 2009-10 from that of 2004-05. In rural areas, the increase in the proportion of employees of the non-agriculture sector who were not eligible for paid leave was from 74 per cent in 2004-05 to 80 per cent in 2009-10, while the increase in urban areas was from 58 per cent to 60 per cent during this period. Among the regular wage/salaried employees in the non-agriculture sector, the proportion of employees not eligible for paid leave has remained almost at the same level during 2004-05 and 2009-10 in both the rural and urban areas. In the rural areas, nearly 48 per cent of the regular wage/salaried employees engaged in the non-agriculture sector were not eligible for paid leave during 2004-05 and it was nearly 50 per cent in 2009-10, while in urban areas the proportion was 46 per cent in both of these two periods. It is also seen that in non-agriculture sector, during 2004-05, in rural areas nearly 47 per cent of male and 49 per cent of female *regular wage/salaried employees* were not eligible for paid leave while in 2009-10, these were 50 per cent and 48 per cent, respectively. In the urban areas, during 2004-05, nearly 45 per cent of male and 48 per cent of female *regular wage/salaried employees* in the non-agriculture sector were not eligible for paid leave while, these proportions were 47 per cent and 45 per cent respectively.

3.3.4.3 *Distribution of employees not eligible for paid leave by industry of work:* The distribution of *regular wage/salaried employees* and *casual labourers (ps+ss)* in AGEFC and non-agriculture sectors who were not eligible for paid leave is presented in Statement 3.23 at the all-India level. It may be seen from the statement that *manufacturing* (section D) sector had the highest share of the workers not eligible for paid leave in the urban areas (29 per cent), followed by *construction* (section F) (nearly 23 per cent), while in the rural areas *construction* had the highest share (nearly 53 per cent), followed by *manufacturing* (nearly 17 per cent). These two industry sections together accounted for a large proportion of wage employees who were not eligible for paid leave. Among other industry sections that had significant share of employees not eligible for paid leave were *wholesale and retail trades; repair of motor vehicles, motor cycles and personal and household goods* (14 per cent in urban areas and 4 per cent in the rural areas), and *transport, storage and communications* (10 per cent in the urban areas and 9 per cent in the rural areas).

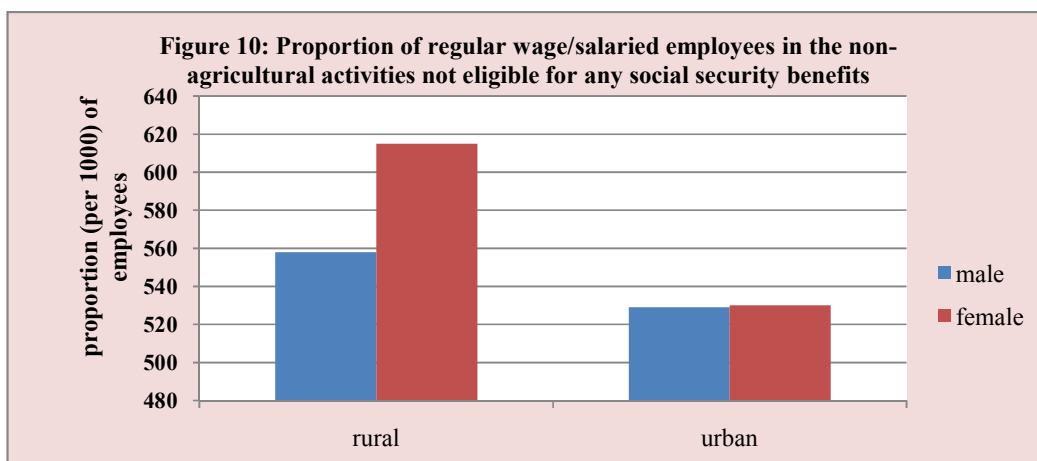

Statement 3.23: Per 1000 distribution of employees (ps+ss) not eligible for paid leave and engaged in AGEGC and non-agriculture sectors by industry group/ division during 2009-10

3.3.5 Eligibility for social security benefits: Information on eligibility for different social security benefits for the regular wage/salaried employees and casual labourers was collected in the survey. It was ascertained from the employees whether they were covered under any of the specified social security benefits or a combination of them. The different social security benefits covered in the survey were Provident Fund (PF) scheme, gratuity and health care & maternity benefits. The term Provident Fund (PF) included General Provident Fund, Contributory Provident Fund, Public Provident Fund, Employees Provident Fund, etc. It may be mentioned that coverage under any of these social security schemes would mean that the employer contributed/arranged/paid in implementing the social security benefits for the worker. If an employee operated a PPF account in his/her individual capacity and the employer was not contributing to that account, it was not considered as a social security benefit. On the contrary, a scheme, in which both the employee and the employer contributed, was considered a social security benefit. Similarly, if an employee was eligible for paid leave for a specified period of pre-natal/childbirth/post-natal stages or if the expenditure for maternity care or childbirth was met by the employer as per the conditions of employment, then such benefits were considered to be social security benefits.

3.3.5.1 Statement 3.24 presents the proportion of employees (ps+ss) not eligible for any social security benefit, mentioned above, for different categories of employees at all-India level during 2004-05 and 2009-10. The state/UT level results for 2009-10 are presented in Statement 3.24.1. Non-existence of social security benefit is a measure of insecurity in the job one performs. It is seen that in 2009-10, as high as 83 per cent of the employees in the rural areas and 65 per cent in the urban areas engaged in AGEGC and non-agriculture sectors were not covered by any social security benefit. Though, among the casual labourers, it is expected that a very higher proportion of them would be outside the social security net, even for the regular wage/salaried employees, the proportion of workers left out of the coverage of the social security benefits was considerable. While, almost none among the casual wage labourers (97 per cent in both rural and urban areas) were covered under any of the specified social benefits, the proportion for the regular wage/salaried employees not covered by any of the social security benefits was also nearly 57 per cent in rural areas and 53 per cent in the urban areas. In the rural areas, in the non-agriculture sector, among the *regular wage/salaried employees*, while 56 per cent of male employees were not covered by any of the social security benefits, in case of females it was nearly 62 per cent. In the urban areas, the proportions of *regular wage/salaried employees*, who were not covered under any social security benefit were 53 per cent each for males and females. In Figure 10, the proportion (per 1000) of *regular wage/ salaried employees* in non-agriculture sector not eligible for social security benefits is presented.

3.3.5.2 *Changes in the proportion of employees not eligible for any social security benefits during 2004-05 and 2009-10:* Statement 3.24 shows that among the employees in the non-agriculture sector, the proportion without social security benefits increased from 78 per cent in 2004-05 to 82 per cent in 2009-10 in rural areas and in the urban areas, the proportion without social security benefits was around 64 per cent in these two time periods. Among the *regular wage/salaried employees* in the non-agriculture sector, the coverage of social security benefits have remained invariant during the period 2004-05 and 2009-10: in rural areas nearly 57 per cent of the *regular wage/salaried employees* were not eligible for social security benefits in 2004-05 as well in 2009-10 and in urban areas nearly 53 per cent were not eligible for social security benefits in both of these two time periods. However, slight difference has been observed between the coverage of social security benefits in these two periods for females in urban areas, while for others the coverage of social security benefits has remained almost invariant. Among urban female *regular wage/salaried employees* nearly 60 per cent in 2004-05 and 53 per cent during 2009-10 were not covered in any social security benefits.

Statement 3.24: Proportion (per 1000) of employees not eligible for any social security benefit* among employees (ps+ss) in AGEGC and non-agriculture sectors for different status in employment during 2004-05 and 2009-10

Note: 1. For the purpose of the survey, the social security benefits considered were PF/ pension, gratuity, health care and maternity benefit.

2: industry groups/ divisions: AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99

3.3.5.3 *Distribution of employees not eligible for any social security benefit by industry of work:* The distribution of *regular wage /salaried employees* and *casual labourers* (ps+ss) in AGEGC and non-agriculture sectors who were not eligible for any social security benefit by industry groups/sections is presented in Statement 3.25 at the all-India level. The distribution shows a similar pattern as in the case of employees who were not eligible for paid leave. Here too, the dominance of the *manufacturing* (section D) and *construction* (section F) is observed where a large proportion of employees were not eligible for any social security benefit. These two industry sections accounted for about 67 per cent employees in the rural areas and 49 per cent employees in the urban areas who were not eligible for any social security benefits.

Statement 3.25: Per 1000 distribution of employees (ps+ss) not eligible for any social security benefit and engaged in AGE GC and non-agriculture sectors by industry groups/ sections during 2009-10

not eligible for paid leave is presented in Statement 3.26 at the all-India level during 2004-05 and 2009-10. The results for each state/UT for 2009-10 are presented in Statement 3.26.1. It shows that during 2009-10, at the all-India level about 66 per cent of the employees engaged in AGE GC and non-agriculture sectors had neither written job contract nor were eligible for the paid leave. Considerable rural-urban differentials were observed: in rural areas nearly 75 per cent of the employees had no written job contract and were not eligible for paid leave, while in urban areas it was nearly 56 per cent. Gender differentials in the availability of these two benefits simultaneously are noticed to exist in both rural and urban areas: among male employees, nearly 77 per cent in rural areas and nearly 57 per cent in urban areas had neither written job contract nor were eligible for paid leave, while the corresponding figures for females were 65 per cent and 54 per cent, respectively. A comparison of the situation of the employees with respect to these two conditions during 2004-05 and 2009-10 shows that, in rural area nearly, 71 per cent of the employees in 2004-05 had neither written job contract nor were

eligible for paid leave, which rose to 75 per cent in 2009-10, while in urban areas the proportions were around 55 per cent to 56 per cent during this period.

3.3.7 *Method of payment*: Information on method of payment in terms of *regular monthly, weekly, daily, and piece rate* basis was collected for the employees engaged in AGE GC and non-agriculture sectors. The distribution of employees (ps+ss) engaged in AGE GC and non-agriculture sectors by method of payment is presented in Statement 3.27 at the all-India level.

Statement 3.27: Per 1000 distribution of usual status (ps+ss) regular wage/salaried employees and casual labourers engaged in AGE GC and non-agriculture sectors by method of payment during 2009-10

Note: 1: industry groups/ divisions: AGE GC: 012, 014, 015, 02, 05, non-agriculture: 10-99

3.3.7.1 The statement shows that among the regular wage /salaried employees, *regular monthly salary* formed the basis of payment for 87 per cent of such workers in rural and 91 per cent in urban areas. In both rural and urban areas gender differential in the method of payment of *regular monthly salary* was not prominent: in the rural areas nearly 87 per cent of male and 85 per cent of female regular wage/salaried employees received *regular monthly salary*, while in urban areas, these proportions were 91 per cent and 93 per cent respectively. In the case of casual labourers, *daily payment* was the most prevalent mode of payment - nearly 54 per cent in rural areas and 50 per cent in urban areas received *daily payment*. It is seen that a lower proportion of female *casual labourers* received *daily payment* but a higher proportion of the female *casual labourers* had method of payment by

regular monthly salary, regular weekly payment or piece rate payment compared to their male counterparts. It is seen that nearly 33 per cent for rural female *casual labourers* compared to 59 per cent for rural male casual labourers and 31 per cent for urban female casual labourers compared to 54 per cent for urban male casual labourers had *daily method payment*. The results for each state/UT are presented in Statement 3.27.1.

3.4 Existence of Union/ Association

3.4.1 For the purpose of the survey, union/ association meant any registered/ recognized body whose membership was open to a section of those engaged in a specific activity or trade and whose main objective was to look after the interests of its members. Existence of union/ association in enterprises in which the persons work is often recognized as to give them collective bargaining power in respect of their common interests. In the case of workers these interests are conditions of employment, wage rates, social security, job security, safety in work place, etc. The findings included in this section about the existence

Statement 3.28: Proportion (per 1000) of workers with non-existence of union/ association in their activity among usual status (ps+ss) workers of age 15 years and above during 2009-10

category of workers	all-India status in employment			
	11-21	31	41 & 51	11-51
(1)	(2)	(3)	(4)	(5)

Note: status in employment(code):self-employed - 11-21, regular wage/ salaried employees - 31, casual labours - 41 and 51.

of union/ association, pertain not only to employees but also to self-employed workers in all the industry divisions of NIC-2004, i.e., NIC-2004 codes 01 to 99. Statement 3.28 presents the proportion of usual status workers (including self-employed) of age 15 years and above who reported non-existence of union/ association in the enterprises in which they were engaged. It is observed that a very high proportion of casual labourers (nearly 85 per cent in rural areas and 80 per cent in urban areas) had no union/ association in their enterprises. It was followed closely by the self-employed workers – nearly 84 per cent in rural areas and 71 per cent in urban areas. The regular wage/salaried employees displayed a distinct feature with a smaller proportion of them reporting non-existence of union/ association in their activities compared to other category of workers: nearly 55 per cent in rural areas and 60 per cent in urban areas. No gender differential in the existence of union/association in the activity of the *regular wage/salaried employees* was observed, but among *self-employed workers* and *casual labourers* gender differential was noticeable in both rural and urban areas and a higher percentage of female workers had no union/ association in their activities than their male counterparts. Among the *self-employed* females in rural areas, nearly 88 per cent had no union/association in their activity against 82 per cent for male and 81 per cent of female self-employed workers in urban areas had no union/association in their activity against 68 per cent for male. In case of *casual labourers*, nearly 88 per cent for rural female against 84 per cent for rural male and 85 per cent of urban female compared to 78 per cent of urban male *casual labourers* had no union/association in their activity. The results for each state/UT are presented in Statement 3.28.1.

Appendix B

Sample Design and Estimation Procedure

Appendix - B

Sample Design and Estimation Procedure

1. Introduction

1.1 The 66th round (July 2009-June 2010) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage. In addition to these, all the sample first stage units of the following areas were casualty in different sub-rounds: (i) in sub-rounds 1, 2, and 4, both rural and urban areas of Rajouri district of Jammu & Kashmir, (ii) in sub-round 2, urban areas of Lakhisarai district of Bihar, (iii) in sub-round 3, rural areas of Doda district of Jammu & Kashmir. The estimates of the different sub-rounds, therefore, excluded these areas. The period of survey was of one year duration starting on 1st July 2009 and ending on 30th June 2010. The survey period of this round was divided into four sub-rounds of three months' duration each, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

2.2.2 *Stratification of the first stage units*: Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification*: There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

2.3.1 *Selection of hamlet-groups/sub-blocks:* Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg’s/ sb’s by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS	Rural composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

2.3.4 *Stratification of urban households:* Three second stage strata (SSS) were formed in the urban areas as follows:

SSS	Urban composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2:	households having MPCE of middle 60% of urban population ($A \leq \text{MPCE} \leq B$)	4	2
SSS 3:	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61st round data for **each NSS region** for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 66th round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (only for rural sector)

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

= (D – 1) for FSUs with $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s):

3.2.1 Sub-sample estimate for a sub-stratum in rural areas:

For j-th second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Sub-sample estimate for a stratum in rural areas: Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.2.3 Sub-sample estimate for a stratum in urban areas:

For j-th second stage stratum of a stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.6 *Estimates of Error:* The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate \hat{Y} :*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ for rural stratum, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

and

$V\hat{a}r(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2$ for urban stratum, \hat{Y}_{s1} and \hat{Y}_{s2} being the stratum estimates for sub-sample 1 and 2 respectively.

3.6.2 *For ratio \hat{R} :*

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

for rural and

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \left[(\hat{Y}_{s1} - \hat{Y}_{s2})^2 + \hat{R}^2 (\hat{X}_{s1} - \hat{X}_{s2})^2 - 2\hat{R} (\hat{Y}_{s1} - \hat{Y}_{s2}) (\hat{X}_{s1} - \hat{X}_{s2}) \right]$$

for urban.

3.7 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

Note: 1. Projected population as on 1st March 2009 and 1st March 2010 are from RGI (reference Tables 8 and 9 of the Population Projections for India and States: 2001-2026).

2. Table 8 provides projected population as on 1st March 2009 and 1st March 2010 for rural+urban combined and Table 9 provides projected population as on 1st March 2009 and 1st March 2010 for urban.

3. Projected population as on 1st January 2010 has been derived using the formula, $A = 1 * [(-)^{l / }]$, where A1 is the population for 1st March 2009, A2 is the population for 1st March 2010 and A is the population for 1st January 2010.

4. Projected population as on 1st January 2010 has been derived for the rural+urban and urban separately and that for rural has been derived by subtracting these two.

3.	number of additional sheets attached								
4.	total time taken to canvass	Schedule 10							
5.	(in minutes)	block 9 of Schedule 10							
6.	whether the schedule contains remarks? (yes -1, no-2)	in block 10/ 11			elsewhere in the schedule				
7.	signature								

[10] remarks by investigator

--

[11] comments by supervisory officer (s)

--

[3] household characteristics												
1.	household size			10.		whether the household has NREG job card (yes-1, no-2)						
2.	principal industry (NIC-2004)	description:			11.	for rural areas,	whether got work in NREG works during last 365 days (code)					
		code (5-digit)							12.	if code 1 in item 11,	no. of days worked	
												mode of payment (code)
3.	principal occupation (NCO-2004)	description:			is any member of the household the holder of post office account (yes-1, no-2, don't know-9) and number of such accounts in the household as on the date of survey [in items 14 to 17]							
		code (3-digit)						type of post office account	whether held by any member (yes-1, no-2, don't know -9)	no. of accounts in the hh.		
4.	household type (code)			14.	savings bank							
5.	religion (code)			15.	recurring deposit account							
6.	social group (code)			16.	monthly income accounts scheme							
7.	land owned as on the date of survey (0.000 hectares)			17.	any other account or savings instruments							
8.	land possessed as on the date of survey (0.000 hectares)			has any member used the following services in any Post Office during last 3 months (yes-1, no-2, don't know-9) [items 18 to 20]								
				18.	money order							
9.	land cultivated (including orchard and plantation) during July 2008–June 2009 (0.000 hectares)			19.	instant money order							
				20.	international money transfer service							

Note: 1 acre = 0.4047 hectare, 1 hectare = 10,000 sq. metre

Codes for Block 3

item 4: household type:

for rural areas: self-employed in non-agriculture -1, agricultural labour -2, other labour -3, self-employed in agriculture -4, others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

item 11: whether got work in NREG works: got work in NREG works -1, sought but did not get work in NREG works -2, did not seek work in NREG works -3.

item 13: mode of payment: paid: directly into post office account-1, directly into bank account-2, in a gram sabha meeting-3, by the field assistant/mate-4, by an SHG member-5, through a smartcard-6, other-9; not yet paid-7.

[3.1] indebtedness of rural labour household as on the date of survey (i.e., for households with code 1 in item 5, block 1 along with code 2 or 3 in item 4, block 3)				
srl. no. of loan	nature of loan (code)	source (code)	purpose (code)	amount outstanding including interest as on the date of survey (Rs)
(1)	(2)	(3)	(4)	(5)
total				

Codes for Block 3.1

col. (2): nature of loan: hereditary loan -1, loan contracted in cash -2, loan contracted in kind -3, loan contracted partly in cash and partly in kind -4.

col. (3): source: government -1, co-operative society -2, bank -3, employer/ landlord -4, agricultural/ professional money lender -5, shopkeeper/ trader -6, relatives/ friends -7, others -9.

col. (4): purpose: household consumption: medical expenses -1, educational expenses -2, legal expenses -3, marriage and other ceremonial expenses-4, other household consumption expenses -5; purchase of land/ construction of building -6, other productive purpose -7, repayment of debt -8, others -9.

Codes for Block 4**col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): marital status:

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): educational level - general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kinder garten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): type of institution: government -1, local body -2, private and aided -3, private and unaided -4, not known -5.**col. (12): whether receiving/received any vocational training:**

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

col. (15): source from where degree/diploma/certificate received/to be received:

Industrial Training Institutes (ITIs)/Industrial Training centers (ITCs) -01, School offering vocational courses (Secondary, Higher Secondary level) -02, UGC (first degree level) -03, Polytechnics -04, Community Polytechniques/ Jansiksha Sanstha -05, National Open School -06, Hotel Management Institutes -07, Food craft & Catering Institutes -08, Small Industries Service Institutes/District Industries Centres/Tool Room Centres -09, Fashion Technology Institutes -10, Tailoring, Embroidery and Stitch Craft Institutes -11, Nursing Institutes -12, Rehabilitation/ Physiotherapy /Ophthalmic and Dental Institutes -13, Institutes giving Diploma in Pharmacy -14, Hospital and Medical Training Institutes -15, Nursery Teachers' Training Institutes -16, Institutes offering training for Agricultural Extension -17, Training provided by Carpet Weaving Centers -18, Handloom/ Handicraft Design Training Centers/ KVIC -19, Recognised Motor Driving Schools -20, Institute for Secretariat Practices -21, Recognised Beautician Schools -22, Institutes run by Companies/ Corporations -23, Institutes for Journalism and Mass Communication -24, other institutes -99.

col. (16): whether the vocational training was ever helpful in getting a job:

yes: was helpful in taking up self-employment activity- 1, was helpful in taking up wage/salaried employment-2; was not helpful-3, not applicable-4.
