PREFACE

The Annual Survey of Industries (ASI) provides information on important characteristics for objectively evaluating the industrial scenario of India. It helps planners and policy makers in framing policies for faster industrial development and also removing regional imbalances. To meet the challenges of liberalization and global competition, there is an urgent requirement of release of timely, relevant and reliable industrial statistics. Timely release of survey results of ASI meets the requirements of Central/State Governments, research scholars and other stakeholders in the industrial development, both at national and international levels.

Industrial units registered under Sections 2m (i) and 2m (ii) of the Factories Act, 1948 and Bidi and Cigar establishments registered under the Bidi and Cigar Workers (Conditions of Employment) Act, 1966 are covered under ASI. The survey is carried out in the entire country. National Industrial Classification 2008 is being used for classification of the industrial establishments by industrial activities. All the industrial units of the factory sector are covered in two sub-sectors: Census and Sample. In the census sector, the data from all the units employing 100 or more workers are collected. In sample sector, the data are collected by drawing a representative sample from all the units having less than 100 workers in such a manner that each industrial group is represented in each state.

The Field Operations Division of the National Sample Survey Office (NSSO) carries out the fieldwork for collection of data. For ASI 2010-11, the survey was carried out during the year 2011-12. The Industrial Statistics Wing (ISW), Kolkata of the Central Statistics Office (CSO) prepares the entire plan of the survey including data processing, validation, tabulation of ASI results and data dissemination. Computer Centre of the Ministry also disseminates the unit level data to the users and uploads the results of the survey in the website of the Ministry.

The ASI 2010-11 publication contains detailed results of factory sector in two volumes reflecting important economic characteristics at 2/3-digit level of industrial classification by States/Union Territories and 4-digit level of industrial classification at all India level. The Volume-I presents data relating to capital, employment, emoluments and several economic parameters relevant to industrial sector which, among others, include (i) number of factories; (ii) fixed/working capital; (iii) total inputs; (iv) total output; (v) depreciation; (vi) net value added etc. From ASI 2010-11, "Summary Results of Factory Sector" will also be published based on ASI 2010-11 results for easy comprehension. During the year 2010-11, Gross Value Added and Output have registered a growth rate of 18.35% and 25.27%, respectively over the previous year, i.e., 2009-2010. From ASI 2010-11, the Volume-I will be published in the website of MOS&PI (www.mospi.gov.in) only. The Volume-II of the publication provides details on material consumed and ex-factory value of products and by-products both at all India level as well as at the level of State/UTs. This volume is published in e-media (CD-ROM).

I record my appreciation for all the officers and staff members of NSSO (Field Operations Division) and CSO (IS Wing and Economic Statistics Division) for their dedicated work in bringing out these volumes.

We strive to improve both content and presentation of the report and, therefore, welcome suggestions from all users of the results of the survey.

ANNUAL SURVEY OF INDUSTRIES: 2010-11

1.1 Scope and Coverage

1.1.1 The Annual Survey of Industries (ASI) has been conducted since 1959 under the authority of the Collection of Statistics Act, 1953. From ASI 2010-11, the survey is conducted under the authority of the Collection of Statistics Act, 2008. In accordance with the provisions of the Collection of Statistics (Central) Rules, 2011 framed under the Act, it had been designed to obtain comprehensive and detailed data with the objectives of estimating the contribution of manufacturing industries as a whole to the national income by type of industry, systematic study of the structure of the industry by type of industry, occasional analysis of the various factors influencing industries in the country to facilitate the construction of comprehensive, factual and systematic bases for formulation of policy. A copy of the above Act and the Rules made there under is given in *Annexure – I*.

1.1.2 Coverage of the Annual Survey of Industries extends to the entire Factory Sector comprising industrial units (called factories) registered under the Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948, wherein a 'Factory', which is the primary statistical unit of enumeration for the ASI, is defined as:

'Any premises' including the precincts thereof: -

(i) Wherein ten or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on, or,

(ii) Wherein twenty or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power or is ordinarily so carried on, but does not include a mine subject to the operation of the Mines Act, 1952, or a railway running shed.

The 'manufacturing process' referred to above has been defined [vide Section 2(k)] in the Factories Act, 1948 as:

'Any process' for:

(i) making, altering, ornamenting, finishing, packing, oiling, washing, cleaning, breaking up, demolishing or otherwise treating or adapting any article or substance with a view to its use, sale, transport, delivery or disposal; or,

(ii) pumping oil, water or sewage ; or,

(iii) generating , transforming or transmitting power; or,

(iv) composing types for printing by letter press, lithography, photogravure or other similar process or book binding; or,

(v) constructing, reconstructing, repairing, refitting, finishing or breaking up ships or vessels; or,

(vi) preserving or storing any article in cold storage.

1.1.3 In addition to Sections 2(m)(i) & 2(m)(ii) of the Factories Act, 1948, bidi & cigar units, employing 10 or more workers with the aid of power and 20 or more workers without the aid of power and registered under the Bidi & Cigar Workers (Conditions of Employment) Act, 1966 are also covered in ASI.

1.1.4 Although the scope of the ASI was extended to all registered manufacturing establishments in the country, establishments under the control of the Defence Ministry, oil storage and distribution units, restaurants and cafes and technical training institutions not producing anything for sale or exchange were kept outside the coverage of the ASI. The Collection of Statistics Act, 2008, being not applicable to Jammu & Kashmir, factories in that state used to be covered under ASI on a voluntary basis till a similar State Act, called the Jammu & Kashmir Collection of Statistics Act, 1961 was enacted and the Collection of Statistics Rules, 1964 was framed thereunder making thereby the collection of statistics under the ASI also statutory in that state. The geographical coverage of the Annual Survey of Industries, 2010-2011 has been extended to the entire country.

1.2 Unit of Enumeration

1.2.1 The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas and water supply undertakings and an establishment in the case of bidi and cigar industries. The owner of two or more establishments located in the same state and pertaining to the same industry group and belonging to census scheme only is, however, permitted to furnish a single consolidated return, termed as 'Joint Return'. Such consolidated returns are a common feature in the case of bidi and cigar establishments, electricity and certain public sector undertakings.

1.3 ASI Frame

1.3.1 The ASI frame is based on the lists of registered factory / units maintained by the Chief Inspector of Factories (CIF) in each state and those maintained by registration authorities in respect of bidi and cigar establishments and electricity undertakings. The frame is being revised and updated periodically by the Regional Offices of the Field Operations Division of NSSO in consultation with the Chief Inspector of Factories in the state. At the time of revision, the names of the de-registered factories are removed from the ASI frame and those of the newly registered factories are added. In updation, only new registrations are added to the existing frame. In spite of regular updating of the frame, quite a number of small-sized factories selected for the survey are found to be non-existing in the field and are termed as deleted factories. However, such factories are not taken into consideration for the purpose of tabulation and analysis in this report.

1.3.2 All electricity undertakings other than captive units as well as all departmental undertakings such as Railway workshops, etc. have been kept outside the purview of ASI from 1999-2000.

1.4 Reference Period

1.4.1 Reference period for ASI 2010-2011 was the accounting year of the factory, ending on any day during the fiscal year 2010-2011. Thus in ASI 2010-2011, data collected from respective establishment relate to their accounting year ended on any day between 1st April 2010 and 31st March 2011. Survey was conducted in the year 2011-2012 (October 2011 to April 2012).

1.5 Sample Design and Sample Allocation

1.5.1 As per the decision taken by the Standing Committee on Industrial Statistics (SCIS), a new sampling design has been adopted since ASI 2007-08. Accordingly, for ASI 2010-2011, the Census Sector has been defined as follows:

- a) All industrial units belonging to the six less industrially developed states/ UT's viz. Manipur, Meghalaya, Nagaland, Sikkim, Tripura and Andaman & Nicobar Islands.
- b) For the rest of the twenty-six states/ UT's., (i) units having 100 or more workers, and (ii) all factories covered under Joint Returns.

1.5.2 Strata (State by Sector by 4-digit of NIC-08) having less than or equal to four units after selecting the Census Sector units as defined above are also selected as census sector.

1.5.3 From the remaining frame, samples are drawn considering a uniform sampling fraction of 18% for the states within a State X Sector X 4-digit NIC with a minimum of 4 units evenly distributed in two sub-samples.

1.6 Estimation Procedure

1.6.1 The sample design and procedures for estimation of the characteristics are shown in *Annexure-II*.

1.6.2 For some selected units, it is found during the survey that the unit existed in the given location and had engaged some employees during the reference period, but could not initiate production or did not produce anything during the reference period due to various reasons, and can take up production any moment once the problems are sorted out. These units, for the purpose of the survey, are considered as *closed units* and similarly placed with other surveyed units (i.e., units for which the relevant information could be collected) in respect of all parameters, such as, assets, employment, etc. There are some other units which existed in the given location, but did not engage any employee during the reference period, and also, did not initiate production or produce anything during the reference period. These units, for the purpose of ASI, are considered as *non-operative units* and termed as NOP cases, during the reference period. Moreover, as a matter of practice, these units are maintained in the frame for consecutive three years and are meant for selection for survey with the consideration that these units might start production any time employing some workers. In case, however, any such unit is found to be *non-operative* for consecutive three years, it is assumed to be dead and marked deleted from the frame and thus, from the survey. Important to note that in providing the estimated number of units (factories) for the reference period, unlike the practices of previous years, these units are also similarly placed

with other surveyed units, in the usual manner, in estimating the parameters presented in this report.

1.6.3 The results presented in the publications are based on the central sample data collected by the FOD, NSSO and processed by the CSO (IS Wing). Moreover, all the estimated value figures given in this publication are reported in current prices. The value figures are generally rounded off to thousand rupees or lakhs of rupees. All India figures are rounded off separately and may not tally with the sum of State/UT's figures. Similarly, all-Industry figures may not tally with the sum of individual industry figures. Also the industry-wise totals at lower level may not tally with the next higher level due to necessary merging at different levels.

1.7 Schedule of Enquiry

1.7.1 The schedule for ASI 2010-2011 has two parts. Part-I which is processed at the CSO (IS Wing), Kolkata, aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items – indigenous and imported, products and by-products, distributive expenses etc. Part-II, processed by the Labour Bureau, aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, man-hours worked, earning and social security benefits. A copy of the ASI 2010-2011 schedule is given as *Annexure –III*. The different concepts and definitions used in ASI survey are given in *Annexure-IV*.

1.8 Classification of Industries

1.8.1 The NIC-1970 was followed to classify economic activities of the factories from ASI 1973-74 to ASI 1988-89. NIC-1987 had then been introduced and followed till ASI 1997-98. NIC-1998 was then followed from ASI 1998-99 to ASI 2003-04. From ASI 2004-05, the new series of classification, i.e., NIC-2004 has been introduced and the same has been used till ASI 2007-08. From ASI 2008-09, NIC- 2008 has been introduced. It classifies all the factories in the ASI frame in their appropriate industry groups on the basis of the principal product manufactured. This way a unit gets classified in one and only one industry group even though it might be manufacturing products belonging to different industries. The estimates for different aggregates presented in this report at two or three or four digit level of industry correspond to the NIC-2008 classification.

1.9 Publications and Limitations

1.9.1 The results of ASI 2010-2011 are released at 4-digit level of NIC-2008 for All-India and at 2/3-digit level of NIC-2008 for states /UT's. The list of 3/4-digit level of NIC-2008 codes along with descriptions is given in *Annexure-V*. While Volume-I contains tables related to capitals and value added, employment and labour cost, fuels consumed etc., Volume-II contains NIC by state-wise materials consumed as well as products & by-products generated by the factories. These input/output items are classified as per National Product Classification for Manufacturing Sector (NPC-MS), 2011.

1.9.2 The Collection of Statistics Act prohibits disclosure of data relating to individual factories. Therefore, if the number of factories under any industry (3-digit level of NIC-2008) in a state is less than three, the data have been combined to a similar industry in order to conceal the identity of all such units belonging to the concerned stratum. Similarly, if number of units under

any 4-digit level of NIC at All-India level is less than three, the industry has been merged to a similar industry under the same broad industry group. A list of such merged industries is given in *Annexure –VI*.

1.9.3 All the estimates, especially for quantity and value figures for any particular item consumed and produced, are subject to Statistical Error as these are estimated on the basis of a selected sample. The consumptions and productions are not estimated separately for those items for which the number of observations is insufficient. They have been reported under 'others' as the estimates for those items may not be proper.

1.9.4 As per tabulation policy it has been decided to publish the detailed information corresponding to industry codes 01, 08, 10 to 33, 38 and 58 following NIC-2008. For all other industry codes, the units have been clubbed and shown under a common industry '**Other**' in different tables.

1.9.5 Another important point may also be noted that the rates and ratios of some parameters presented in this report at the disaggregate level, particularly for the smaller states and UTs cross classified by 2/3/4-digit level of industry classification, are subject to the limitation of small sample and thus, the user may cautiously interpret the changes of these parameters over time.

1.9.6 Prior to ASI 2010-11, although the samples were drawn from the domain of units with the statuses 'open', 'closed' and 'non-operative'; separate treatment was given to these units for estimating the "number of factories" and "number of factories in operation". While the units with the status code '1' (i.e., open) only were considered as surveyed cases for estimating the "number of factories in operation", the units with the status codes '1' and '2' (i.e., open and closed respectively) were considered as surveyed cases for estimating the "number of factories", and accordingly the multipliers (weights) were calculated. Now, all the units with codes '1', '2' and '3', that is, all units with 'open', 'closed' and 'NOP' statuses are similarly placed and are considered as surveyed cases for estimating the "number of factories in operation" and multipliers (weights) are calculated accordingly. After deriving the estimates mentioned above, all the rates and ratios in respect of 'per factory' are derived using the estimate of "number of factories in operation" unless otherwise mentioned. The detailed discussion of procedures for estimation of factory for ASI 2010-11 is given in *Annexure-VII*.

1.9.7 Description of industries along with NIC-2008 codes covered in ASI are given in *Annexure-V* and as per the tabulation policy, information for them are processed and brought out in the ASI publications. In Table 1 of publication: ASI, Volume I, selected characteristics of the factories are presented at the 4-digit level of industry for all-India. For the first time in ASI 2010-11, it has been observed that industry Class '0164' (*Seed Processing for propagation*) has been reported by some units whereas, the 2-digit industry division recorded in ASI frame for such units is '10' (*Manufacture of Food Products*). The detailed description of the industry Class '0164' is produced below:

"This class includes all post-harvest activities aimed at improving the propagation quality of seed through the removal of non-seed materials, undersized, mechanically or insect-damaged and immature seeds as well as removing the seed moisture to a safe level for seed storage. This activity includes the drying, cleaning, grading and treating of seeds until they are marketed. The treatment

of genetically modified seeds is included here. This class excludes growing of seeds, processing of seeds to obtain oil and research to develop or modify new forms of seeds.”

It is evident from the activity description of industry Class ‘0164’ that it is similarly placed with the industry Class ‘0163’ (*Post harvest crop activities: Preparation of crops for primary markets, i.e., cleaning, trimming, grading, disinfecting; Cotton ginning, cleaning and bailing, Preparation of tobacco leaves; Other post harvest crop activities, n.e.c.*), which is already covered in ASI. The same is, therefore, included in ASI from ASI 2010-11 onwards.

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. As stated in Section 1 of this publication, FOD, NSSO collects the data for central sample units, and the data so collected are validated, processed, tabulated and published by the CSO (IS Wing). For selection of central sample units, all the factories in the frame are divided into two categories, viz., Census Sector and Sample Sector.

2. **Census Sector:** Census Sector consists of the following units:

a) All industrial units belonging to the six less industrially developed states/ UT's viz. Manipur, Meghalaya, Nagaland, Sikkim, Tripura and Andaman & Nicobar Islands.

b) For the rest of the twenty-six states/ UT's., (i) units having 100 or more workers, and (ii) all factories covered under Joint Returns.

c) After excluding the Census Sector units as defined above, all units belonging to the strata (*State by Sector by 4-digit of NIC-08*) having less than or equal to 4 units are also considered as Census Sector units.

3. **Sample Sector:** From the remaining units excluding those of Census Sector, called the sample sector, samples are drawn circular systematically considering sampling fraction of 18% within each stratum (*State X Sector X 4-digit NIC*) for all the states. An even number of units with a minimum of 4 are selected and evenly distributed in two sub-samples. The sectors considered here are Biri, Manufacturing and Electricity.

4. **Estimation Procedure**

4.1 **Notations:**

i = subscript for i -th state

s = subscript for s -th stratum in the i -th state

m = subscript for sub-sample ($m = 1, 2$)

k = subscript for k -th sample enterprise under a particular stratum

E = total number of factory **in the sample sector** in a stratum

e = number of factories surveyed out of total number of factory **in the sample sector** in a stratum

x, y = observed value of characteristics x, y under estimation

\hat{X}, \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

Y_{ismk} = observed value of the characteristic y for the k -th enterprise belonging to the m -th sub-sample for the s -th stratum in the i -th state.

(a) Formulae for estimation of aggregates for a state based on central sample:

Estimation formula for any characteristics of the enterprise **for the sample sector** of the i-th state is:

$$\hat{Y}'_i = \sum_{s=1} \left[\frac{E_{is}}{e_{is}} \left[\sum_{k=1}^{e_{is1}} y_{is1k} + \sum_{k=1}^{e_{is2}} y_{is2k} \right] \right] \dots\dots\dots (1)$$

The formula for corresponding sub-sample wise estimates **for the sample sector** of the i-th state is:

$$\hat{Y}'_{im} = \sum_{s=1} \left[\frac{E_{is}}{e_{ism}} \sum_{k=1}^{e_{ism}} y_{ismk} \right], \quad m=1,2. \dots\dots\dots (1.1)$$

If \hat{Y}''_i be the corresponding estimate for that characteristic of the enterprise **for the census sector** of the i-th state, then the estimate for that characteristic of the enterprise for the i-th state **as a whole** is given by:

$$\hat{Y}_i = \hat{Y}'_i + \hat{Y}''_i \dots\dots\dots (2)$$

The estimate of the characteristic of the enterprise for all-India will be:

$$\hat{Y} = \sum_i \hat{Y}_i \dots\dots\dots (3)$$

4.2 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X for two characteristics y and x, respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

4.3 Estimates of Error for Aggregate \hat{Y} : The variance is to be obtained for the sample sector units only. The estimated variances of the estimates at state level will be as follows:

$$V\hat{a}r(\hat{Y}_i) = \sum_s V\hat{a}r(\hat{Y}_{is}) \dots\dots\dots (4)$$

where $V\hat{a}r(\hat{Y}_{is})$ is given as below:

$$V\hat{a}r(\hat{Y}_{is}) = \left\{ (\hat{Y}_{is1} - \hat{Y}_{is2}) / 2 \right\}^2 \dots\dots\dots (5)$$

For all-India, the estimated variances of the estimates will be as follows:

$$V\hat{a}r(\hat{Y}) = \sum_i V\hat{a}r(\hat{Y}_i) \dots\dots\dots (6)$$

4.4 For ratio \hat{R} :

For \hat{R} at all-India,

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} [\hat{V}(\hat{Y}) - 2\hat{R}Co\hat{v}(\hat{X}, \hat{Y}) + \hat{R}^2\hat{V}(\hat{X})] \dots\dots\dots (7)$$

For \hat{R} at state level,

$$M\hat{S}E(\hat{R}_i) = \frac{1}{(\hat{X}_i)^2} [\hat{V}(\hat{Y}_i) - 2\hat{R}_iCo\hat{v}(\hat{X}_i, \hat{Y}_i) + \hat{R}_i^2\hat{V}(\hat{X}_i)] \dots\dots (8)$$

4.5 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100 \dots\dots\dots (9)$$

$$M\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100 \dots\dots\dots (10)$$

4.6 Multipliers for enterprises:

The formulae for multipliers for a stratum are given below:

formula for sub-sample wise multiplier	formula for combined sample multiplier
$\frac{E_{is}}{e_{ism}}, i= 1 \text{ or } 2.$	$\frac{E_{is}}{e_{is}}$

4.7 Treatment for surveyed cases and casualty cases:

4.7.1 While counting the number of units surveyed (e_{ism}) in the m-th sub-sample of a stratum, all the units with survey codes 1 to 9 recorded in Item 12, Block A will be considered.

4.7.2 *Casualty cases:* Units with survey codes 5, 7 and 8 as per Item 12, Block A are treated as casualties.

4.7.3 *Zero cases:* Units with survey codes 4, 6 and 9 should not have been present in the frame for the reasons like 'non-existence of unit and owner not traceable' or 'unit deleted due to de-registration or out of coverage', etc., and such units are treated as 'zero' cases in calculating the weights (multipliers).

4.8 ***Treatment in cases of void strata:***

4.8.1 A stratum may be void because of the casualty of all the units belonging to the stratum. This may occur in one sub-sample or in both the sub-samples. If it relates to only one sub-sample, then estimate for the void stratum may be replaced with the estimate as obtained from the other sub-sample for the same stratum.

4.8.2 When a stratum is void in both the sub-samples, the following procedure is recommended:

Case (I): Census sector is void, but sample sector is not void:

i) Information in respect of all the characteristics may be borrowed from the previous year, if available, for the census sector units belonging to that stratum. In case the information is available for some, then an adjustment factor is to be obtained for the census sector units for which information is not available. For example, if information is available for n units out of N in the census sector in a particular stratum, then the appropriate adjustment factor would be (N/n) .

Case (II): Sample sector is void, but Census sector is not void:

ii) The estimated figures in respect of all the characteristics obtained for the census sector may be assumed to hold good for each of the units in the sample sector and accordingly, the estimate for the sample sector may be obtained. For example, if there are n units in the sample sector in a particular stratum, then the estimated figure per census units (i.e., average figures) for a characteristic will be multiplied by n to obtain the estimate for the sample sector in that stratum.

Case (III): Both the Sample sector and Census sector are void:

iii) The stratum may be merged with the nearest stratum looking into the description of the 4-digit NIC activity, or else it could be merged with the 4-digit NIC activity 'others' within that 4-digit NIC group.

Concepts, Definitions and Procedures

Important concepts and definitions used in ASI are explained below.

1. A number of accounting, economic and other terms related to the factories are used in conduct of Annual Survey of Industries. For proper assessment and interpretation of ASI data, those are given below.

2. **Accounting Year:** For the purpose of ASI, the accounting year is the period on which the factory closes its books of account. With the enactment of Income Tax Act, by and large, the accounting year of all factories is from April to March.

3. **Reference Period:** It corresponds to the financial year. For example, for ASI 2010-2011 the reference period is the financial year commencing from 1st April 2010 and ending on 31st March 2011 or the accounting year of the factory ending on any date between 1.4.10 to 31.3.11.

4. **Survey Period:** Survey period is a period during which work of any Annual Survey of Industries is undertaken. Since ASI 1978-79 the survey period has been fixed from 1st July to 30th June of the next year. From ASI 1998-99 the survey period has been changed from 12 months to 4 months i.e. from Nov'99 to Feb'2000. The survey period for ASI 99-00 has been again changed from October to March. The survey period for ASI 2010-2011 is from September, 2011 to April, 2012.

5. **Factory (as per the Factory Act 1948):** Factory is one, which is registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948. The Sections 2m(i) and 2m(ii) refer to any premises including the precinct thereof (i) wherein ten or more workers are working, or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power, or is ordinarily so carried on, or (ii) wherein twenty or more workers are working, or were working on any day of the preceding twelve months and in any part of which a manufacturing process is being carried on without the aid of power, or is ordinarily so carried on. Closed factories with fixed assets on site are also considered as registered factories till they are de-registered and removed from the live-register maintained by the Chief Inspector of Factories (CIF) in the State.

6. **Manufacturing Process:** This is as per Section 2(k) of the Factories Act, 1948, and briefly mentioned in Section 1.

7. **Gross Value of Plant and Machinery:** Gross value of plant and machinery represents the total original (un-depreciated) value of installed plant and machinery as at the end of the accounting year. It includes the book value of own constructed plant and machinery, if installed, and the approximate value of rented-in plant and machinery as at the time of renting in but excludes the value of rented-out plant and machinery. Total value of all the plant and

machinery acquired on hire-purchase basis is also included. Thus it represents the gross value of plant and machinery engaged in production process.

8. **Fixed Capital:** Fixed Capital represents the depreciated value of fixed assets owned by the factory as on the closing day of the accounting year. Fixed assets are those, which have normal productive life of more than one year. Fixed capital covers all type of assets, new or used or own constructed, deployed for productions, transportation, living or recreational facilities, hospitals, schools, etc. for factory personnel. It would include land, building, plant and machinery, transport equipment etc. It includes the fixed assets of the head office allocable to the factory and also the full value of assets taken on hire-purchase basis (Whether fully paid or not) excluding interest element. It excludes intangible assets and assets solely used for post-manufacturing activities such as, sale, storage, distribution, etc.

9. **Depreciation:** Depreciation is consumption of fixed capital by the factory due to wear and tear and obsolescence during the accounting year and is taken as provided by the factory owner, or if not provided by the factory this is estimated on the basis of cost of installation and working life of the fixed assets.

10. **Finished Goods:** Finished Goods are those, which are manufactured by the factory for sale. Finished goods should conform to a prescribed standard.

11. **Physical Working Capital:** This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores etc. purchased expressly for re-sale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded.

12. **Working Capital:** Working Capital is the sum total of the physical working capital as already defined above and the cash deposits in hand and at bank, land, the net balance of amounts receivable over amounts payable at the end of the accounting year. Amounts receivable include value of credit items on revenue account, such as sums due to the factory for goods sold, amounts advanced in connection with normal factory work, bills of exchange payable to the factory, payments made in advance such as for fire insurance, telephone charges, rates and taxes, call deposits and security deposits having a normal life of less than one year, etc. It excludes unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, long-term loans including interest thereon and investment.

13. **Invested Capital:** Invested capital is the total of fixed capital and physical working capital.

14. **Productive Capital:** This is the total of fixed capital and working capital.

15. **Outstanding Loans:** Outstanding loans represent all loans, whether short-term or long-term, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year.

16. **Contract Worker:** All persons who are not employed directly by an employer but through the third agency, i.e. contractor, are termed as contract workers. Those workers may be employed with or without the knowledge of the principal employer.

17. **Employees:** Employees relate to all persons engaged by the factory whether for wages or not, in work connected directly or indirectly with the manufacturing process and include all administrative, technical and clerical staff as also labour in production of capital assets for factory's own use. This is inclusive of persons holding position of supervision or management or engaged in administrative office, store-keeping section and welfare section, watch and ward staff, sales department as also those engaged in the purchase of raw materials etc. and production of fixed assets for the factory. It also includes all working proprietors and their family members who are actively engaged in the work of the factory even without any pay and the unpaid members of the co-operative societies who work in or for the factory in any direct and productive capacity. Persons in the head office connected with the manufacturing activity of the factory are also included in this item.

18. **Labour Turnover:** Labour turnover measures the extent of change in the working force due to accession and separation during a given period. The term 'accession' was defined as the total number of workers added to employment during the period, whether new or re-employed or transferred from other establishments or units under the same management. Inter-departmental transfers within the same establishment are, however ignored. The term 'separation' implies termination of employment at the instance of worker or employers. It includes termination of services due to death or retirement. As in the case of accession, transfers to other establishments are included but transfers within the same establishment are ignored. Retrenchment as a result of rationalisation or modernisation or any other cause, is also treated as separation.

19. **Wages:** Wages are defined to include all remuneration capable of being expressed in monetary terms and also payable/paid more or less regularly in each pay period to workers (defined above) as compensation for work done during the accounting year. It **includes:**

(i) Direct wages and salary (i.e. basic wages/salaries, payment of overtime, dearness, compensatory, house rent and other allowances);

(ii) Remuneration for period not worked (i.e. basic wages), salaries and allowances payable for leave period, paid holidays, lay-off payments and compensation for unemployment (if not paid from source other than employers);

(iii) Bonus and ex-gratia payment paid both at regular and less frequent intervals (i.e., incentive bonuses and good attendance bonuses, production bonuses, profit sharing bonuses, festival or yearend bonuses etc.).

It **excludes** layoff payments and compensation for employment except where such payments are for this purpose, i.e., payments not made by the employer. It **excludes** employer's contribution to old age benefits and other social security charges, direct expenditure on maternity benefits and creches and other group benefit in kind and travelling and other expenditure incurred for business purposes and reimbursed by the employer. The wages are expressed in terms of gross value, i.e., before deductions for fines, damages, taxes, provident fund, employee's state insurance contribution etc. Benefits in kind (perquisites) of individual nature are only **included**.

20. Bonus: Profit sharing bonus, festival bonus, year-end bonus, and all other bonuses and ex-gratia payments paid at less frequent intervals are covered by this term.

21. Workmen and Staff Welfare Expenses: These include expenditure incurred by the employer on the maternity benefits and crèches and other benefits such as supply of food, beverages, tobacco, clothing and group lodging at concessional rates and educational, cultural and recreational facilities and services and grants to trade unions and cooperative stores meant for employees. All group benefits are included.

22. Emoluments: These are defined in the same way as wages but paid to all employees plus imputed value of benefits in kind i.e. the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance etc. for payment by the factory also is included in the emoluments.

23. Supplements to Emoluments: These include: (i) employer's contribution to old age benefits, i.e., provident fund, pension, gratuity, etc.; (ii) employer's contribution towards other social security charges such as Employees' State Insurance, compensation for work injuries, occupational diseases, maternity benefits, retrenchment and lay-off benefits etc.; and (iii) group benefits like direct expenditure on maternity, creches, canteen facilities, educational, cultural and recreational facilities and grant to trade unions, co-operative stores etc. meant for employees.

24. Compensation of Employees: Compensation of employees is the total of emoluments and supplement to emoluments.

25. Mandays Worked: These are obtained by summing up the number of mandays worked by persons working in each shift over all the shifts on all days, i.e. both manufacturing and non-manufacturing days. This figure excludes persons who are paid but remain on leave, strike, etc.

26. Mandays Paid For: The number of mandays paid for is arrived at by summing up the number of employees paid for in each shift. This also includes mandays on weekly schedule holidays if paid for and those absences with pay as also mandays lost through lay off/ strike for which compensation was payable.

27. **Working Day:** Working day means the days on which a manufacturing process and/or repair or maintenance work was carried on.

28. **Non-working Day:** Apart from manufacturing day and repair and maintenance days there may be some non-working days. Non working days are those days on which the workers give their attendance but due to non-availability of raw materials power etc. no effective work is done. As the workers are paid for these days such days are also taken into account for the purpose of labour statistics.

29. **Basic Materials:** Basic materials are the materials which are important and of key nature to the industry on which the manufacturing process is based, viz. metal for machine, leather for shoe. Such material is not lost through the process of production but only changes its forms.

30. **Consumable Stores:** All such materials which assist the manufacturing process and lose their identity without entering the products are called consumable stores, e.g., cotton waste.

31. **Fuel Consumed:** Fuel Consumed represent total purchase value of all items of fuels, lubricants, electricity, water (purchased to make steam) etc. consumed by the factory during the accounting year except those which directly enter into products as materials consumed. It excludes that part of fuels, which is produced and consumed by the factory in manufacture i.e., all intermediate products and also fuels consumed by employees as part of amenities. It includes quantities acquired and consumed from allied concerns, their book value being taken as their purchase value and also the quantities consumed in production of machinery or other capital items for factory's own use.

32. **Materials Consumed:** Materials consumed represent the total delivered value of all items of raw materials, components, chemicals, packing materials and stores which actually entered into the production process of the factory during the accounting year. It also includes the cost of all the materials used in the production of fixed assets, including construction work for factory's own use. Components and accessories fitted as purchased with the finished product during the accounting year are also to be included. It excludes intermediate products. Intermediate products in the above context mean all those products which are produced by the factory and consumed for further manufacturing process.

33. **Total Input:** This comprises gross value of fuel materials etc. consumed (as defined above) and also other inputs viz. (a) cost of non-industrial services received from others (b) cost of materials consumed for repair and maintenance of factory's fixed assets including cost of work done by others to the factory's fixed assets (c) cost of contract and commission work done by others on materials supplied by the factory (d) cost of office supplies and products reported for sale during last year & used for further manufacture during the accounting year.

34. **Intermediate Product:** Intermediate Product is a product which is obtained during a manufacturing process, which may or may not be saleable and is not the intended final product.

35. **Net Value of Semi-Finished Goods:** It represents the excess/deficit of value of semi-finished goods and/or goods-in-process at the end of the accounting year over that at the beginning of year.

36. **Products:** These are defined to include the ex-factory value (i.e. exclusive of taxes, duties etc. on sale and inclusive of subsidies etc., if any) of all products and by-products, excluding intermediate products, that have been completed during the accounting year for sale whether actually sold during the accounting year or entered into books. Also include fixed assets produced by the factory for its own use.

37. **Gross Output:** Gross output is defined to include the ex-factory value, (i.e., exclusive of taxes, duties, etc. on sale and inclusive of subsidies etc., if any) of products and by-products manufactured during the accounting year, and the net value of the semi-finished goods, work-in-process, (represents the excess/deficit of value of semi-finished goods or work-in-process at the end of the accounting year over that of the beginning of the year plus net balance of semi-finished fixed assets on factory's capital account) and also the receipts for industrial and non-industrial services rendered to others, value of semi-finished goods of last year sold in the current year, sale value of goods sold in the same condition as purchased and value of electricity generated and sold. Value of gross output and total output has been used in the text interchangeable to mean the same thing.

38. **Industrial Services:** Any services taken or rendered from one to another unit resulting in increase in the value of material during the manufacturing process are industrial services.

39. **Non-Industrial Services:** All such services which do not have a direct bearing on the manufacturing process but are needed by any manufacturing unit are called non-industrial services, say, transport.

40. **Net Value Added:** This is the increment to the value of goods and services that is contributed by the factory and is obtained by deducting the value of total inputs and depreciation from gross value of output.

Factory Estimation Procedures for ASI 2010-11

1. Prior to ASI 2010-11, separate procedure was followed for estimating the 'number of factories' and 'number of factories in operation'. While the units with the status code '1' (i.e., open) only were considered as surveyed cases for estimating the 'number of factories in operation' earlier, the units with the status codes '1' and '2' (i.e., open and closed respectively) were considered as surveyed cases for estimating the 'number of factories', and accordingly the multipliers (weights) were calculated. That for all other parameters, the units with status codes '1', '2' and '3' (i.e., open, closed and NOP cases respectively, with essential blocks filled-in) were considered as surveyed and multipliers (weights) were calculated accordingly.
2. For ASI 2010-11, certain modifications have been done in recording the codes for 'status of unit' in item-12 of Block-A keeping in mind the requirements and field suggestions. Details of the new and old code structures along with the concordance of the two structures and treatment of units with different status codes in calculation of multipliers (weights) are given in Table 1. Table 2 gives the treatment of various cases of 'status of units' in calculation of multiplier.
3. It may be noted that the samples are always drawn from the ASI frame containing units with status codes '1', '2' and '3', that is, open, closed and NOP units respectively – the reason being that these are considered as the live units in the domain and some have operated during the reference period, and some others have continued to produce in the past, but for certain reasons it did not operate/produce any during the reference period but exit with all assets, etc and may start producing any moment. In all these cases, the units are considered as 'surveyed' if essential information for the unit is collected, else they are treated as 'Non-reported' or 'casualty'.
4. Statement 0A gives the State/UT-wise picture of number of factories (i) in frame, (ii) selected and (iii) surveyed in ASI 2010-11. It may be noted in this table that the 'surveyed' cases exclude all the casualty cases as explained above. Statement 0B and 0C respectively gives the absolute and percentage distribution of number of factories over various status of ASI 2010-11.
5. Statement 1A gives the estimated 'number of factories' (in absolute terms) in 2010-11 by status of survey, and Statement 2A displays the estimated 'number of factories in operation' (in absolute terms) by status of survey separately for each State/UT. It may be noted that all the rates and ratios, presented in this publication, are derived for per 'factories in operation'. The respective percentage distributions are given in Statements 1B and 2B, respectively.
6. Statements 1A and 1B, in fact, give the estimated 'number of factories' separately for all the statuses of units recorded during the survey. Similarly, the estimate and percentage distribution of 'operating factories' by status of survey are given in Statements 2A and 2B, respectively. It may be seen from Statements 1A and 1B that during the survey, about 39,483 factories (18.66%) reported their status code either 4 or 6 or 9. This indicates that these units should not have been present in the frame for the reasons like 'non-existence of unit and owner not traceable' or 'unit deleted due to de-registration or out of coverage', etc., and such units are treated as 'zero' cases in calculating the weights (multipliers). Of the estimated 2,11,660 'number of factories', about 1,72,177 factories (81.44%) are the similarly placed and that are with status codes 1, 2 and 3 and ideally, only they should have been

present in the frame during the accounting year 2010-11. These units are considered as ‘operating units’ and used in calculating all rates and ratios in the reports based on ASI 2010-11 data unless otherwise mentioned. It may be worth noting that the comparable estimates of ‘operating units’ with the previous year, which considered status codes 1 and 2 only, would be 1,71,538 – less by just 141 estimated factories (0.08%) only compared to the estimates based on the present approach.

7. In order to compare the ‘per factory’ rates and ratios of ASI 2010-11 for a category (NIC Div., asset class, employment size class, etc.) with that of previous ASI data, one need to multiply the ‘per factory’ rates and ratios of ASI 2010-11 with an adjustment factor, which is given by:

$$\frac{[\text{Estimated total number of 'operating factories' in ASI 2010-11 for a category}]}{[\text{Estimated total number of operating factories in ASI 2010-11 considering only the status codes 1 and 2 for that category}]}$$

[Estimated total number of operating factories in ASI 2010-11 considering only the status codes 1 and 2 for that category]
