Survey on Level of Living of TRIBALS: NSS 44th Round : July 1988-June 1989

Overview	
Type	Socio-Economic/Household Survey
Identification	DDI-IND-MOSPI-NSSO-44Rnd-Sch29dot1-1988-89
Version	Production Date: 2012-10-05 V1.0; Re-organised anonymised dataset for public distribution.
Series	For the purpose of this enquiry, "tribal population" means the members of the Scheduled Tribes declared under the Article 342 of the Constitution of India. They are known to be the descendants of the earliest inhabitants of our country (hence called Adivasis"). At present, in most parts of India, they form one of the economically weakest sections of the society. So far there has not been any systematic study of their living conditions covering the whole country. Whatever data are available are derived from the decennial censuses, apart from some micro studies carried out by social anthropologists. In the NSS the tribal population have always been covered as part of the general population. Separate tables have also been prepared for the scheduled tribe and schedules caste populations in some of these programmes of those rounds were drawn up with the general population in view and so far there had been no enquiry with its focus on the tribal population. In NSS 32nd and 33rd rounds special surveys had been carried out through an integrated schedule (schedule 16.4) in the North-Eastern region. The survey was conducted in the rural areas of the following States:- 32nd round : Arunachal Pradesh, Assam (N. Cachar and Karbi Anglong districts only), Manipur, Meghalaya and Tripura; 33rd round : In addition to the above States, Mizoram also. Even though this covered many aspects specially related to the life of the people of this region (who are mostly tribals), no such survey has so far been undertaken about the life of the tribals living in the main tribal belt stretching from West Bengal through Bihar, Orissa, Madhya Pradesh to Gujarat and Rajasthan.

Abstract

In pursuance of the recommendations made by the Governing Council (G.C.) of the National Sample Survey Organization (NSSO) in its 44th meeting held on 16 January 1987 to undertake a comprehensive survey on the socio-economic conditions of the tribal people in the 44th round (July 1988 - June 1989) of NSS, various schedules of enquiries on the subject were drawn up and tested in the field through a try-out survey. The schedules were discussed in details in the meetings of the Working Groups (W.G) set up by the G.C., NSSO for the NSS 44th round. In the light of the experiences gained through the try-out survey, the schedules of enquiry were finalized by the W.G. and subsequently approved by the G.C. of the NSSO in its 45th meeting held on 29 December 1987.

Schedules of investigation : In order to study the living conditions of tribals, it is, probably, imperative to know the environment in which the tribals live. Hence a village schedule (schedule type 3.1) was canvassed to collect information at village/hamlet level on the extent of availability of various facilities which have direct or indirect bearing on tribal life.

However, the major thrust in collecting information on living conditions of tribals will, obviously, be at the household level. There are various aspects of tribal life which need to be studied. From the point of view of analysis it would have, probably, been ideal to collect all the necessary information from the same set of sample households in an integrated manner. But as the factors are numerous, any attempt to accommodate all the items of information in a single schedule of enquiry will make the schedule unwieldy. It was, thus, decided to frame two schedules of enquiries for collecting information from the tribal households - one mainly on socio-economic aspects relating to the level of living of tribals (schedule type - 29.1) and the other on economic and enterprise aspects of the tribal households (schedule type 29.2).

Further, with a view to studying the problems of land alienation faced by the tribal population due to in-migration of non-tribals in the tribal areas and also to assess the differences in the socio-economic standard of living between the tribals and the non-tribals, a schedule of enquiry (schedule type 29.3) was designed for collecting information from the non-tribal households residing in the tribal areas.

In short, the following four schedules of enquiries have been framed for the tribal survey:

- (i) Village schedule 3.1 : General information on village characteristics
- (ii) Household schedule 29.1 : Level of living of tribals
- (iii) Household schedule 29.2 : Economic activity of the tribals
- (iv) Household schedule 29.3 : Particulars of migration and ownership of land by non-tribals.

Here in this study the focus is Household schedule 29.1: Level of living of tribals. The object of the enquiry on the living condition of the tribal population carried out in the present round was to throw light on as many aspects as possible of the tribal population of this country. They will relate to aspects of their "level of the living" including demographic and activity particulars, family expenditure etc. as well as to their entrepreneurial activities.

Kind of Data	Sample survey data [ssd]
Unit of Analysis	Randomly selected household and its members

Scope & Coverage

Scope

There are various aspects of tribal life on which information is required to study the living conditions of tribals. It has been stated earlier that all those aspects cannot be accommodated in one schedule of enquiry.

The household schedules 29.1 was canvassed in the scheduled tribe households. If different members of a household belong to different tribes, the tribe of the head of the household belong to different tribes, the tribe of the head of the household was considered as the tribe of the household. The schedules was canvassed in the special as well as in general samples belonging to all the rural and urban strata.

In schedule 29.1 demographic particulars, educational particulars with the emphasis on drop-outs and assistance received from various agencies including government, activity particulars and health care & morbidity particulars of each member of the household were collected. Data on economic activity of the members was collected in respect of both usual and current week status following the concepts adopted in the "Employment and Unemployment" survey conducted in 43rd round (July 1987 - June 1988) of National Sample Survey (NSS). At the household level the survey covered information on consumer expenditure, purchase of selected commodities available through public distribution system or from open market and also the particulars of dwelling unit. Although attempts were made to collect information on the total household consumption of the tribal households by using the concepts adopted in the "Consumer Expenditure" survey on the NSS 43rd round, detailed item wise information was not collected due to the practical difficulties of data collection particularly from the tribal households.

Reference period : Different reference periods were used for different items of investigation. The reference period 'last day' will mean the day prior to the date of survey; 'last week' will mean the 30 days preceding the date of survey and 'last year' will indicate 365 days preceding the date of survey.

Geographic Coverage

The survey covered the whole of Indian Union except Ladakh and Kargil districts of Jammu and Kashmir state. schedule 29.1 and 29.2 were not be canvassed in Jammu & Kashmir, Punjab, Haryana, Chandigarh, Delhi and Pondicherry as there is no schedule tribe in those states as per the prescribed list.

Sampling

Sampling Procedure

The sample design is, as usual, stratified two-stage with the census village as the first stage unit in the rural sector and UFS block as the first stage unit in the urban sector. The second stage units were households for all schedules. The sample design in the rural sector was decided with a view to providing good estimates for the tribal enquiry. Except in the north-eastern region, the tribal population was concentrated in some districts within the states having considerable tribal population and even in those districts they were found to be unevenly distributed geographically. Therefore special stratification and selection procedures were adopted not only to net sufficient number of tribal households in the sample but also to improve the design in general for the tribal enquiry.

Sampling frame of villages: The list of 1981 census villages constitute the sampling frame for selection of villages in most districts. However in Assam (where '81 census was not done) and a few districts of some other states (where the available lists of villages were not satisfactory), 1971 census village lists were used as frame.

Stratification : In Haryana, Jammu & Kashmir, Punjab, Chandigarh, Delhi, Goa, Daman & Diu and Pondicherry where there were practically no tribal population, the strata used in NSS 43rd round were retained. In Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Sikkim, Dadra and Nagar Haveli and Lakshadweep also the strata of 43rd round were retained because of the high percentage of ST. population in these States/U.T.'s. (The strata of 43rd round have been retained in the case of Sikkim as the distribution of tribal population is more or less uniform over all the districts). In the remaining states fresh stratification was carried out as described below.

In these states all districts accounting for the bulk of the states's tribal population were selected for formation of strata with concentration of tribal population. Besides these districts, tribal concentration strata were demarcated also in some other districts with relatively small tribal population in order to ensure coverage of as many different ethnic groups as possible.

Within each district so identified for formation of tribal concentration strata, , the tehsils with relatively high concentration of tribal population, together constituted one stratum. These tehsils were selectd in such a way that together they accounted for the bulk (70% or more) of the district tribal population and the proportion of tribal to total population and the proportion of tribal to total population in this stratum was significantly greater than that of the district as a whole. The strata so formed were not always geographically contiguous. These tribal concentration strata are called STRATUM TYPE -1. Further, all the strata of Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Dadra & Nagar Haveli, Lakshdweep and Sikkim are also considered as stratum type-1. All the remaining strata in the rural sector (in any State/U.T.) were called stratum type -2.

General and special sample villages : There were two types of sample villages in this round. The first type was the general sample in which all enquiries were carried out. The second type was designated as "special sample villages" in which only schedules 3.1, 29.1, 29.2 and 29.3 were canvassed. The special samples were intended

for augmenting the general sample for the tribal enquiry. These special sample villages were selected only from the tribal concentration strata (stratum type 1) of the 16 States and the U.T. OF Andaman & Nicobar Islands 1) of 16 States and the U.T. of Andaman & Nicobar Islands. There were no special sample villages in the remaining States/U.T.'s. The special samples were called sample type-1 and the general samples, sample type-2.

Schedule 29.1 was canvassed both in rural and urban sectors. Six households each from the frame of scheduled tribe households in the villages of special as well as general samples falling in the tribal strata were canvassed. On the other hand only two households were selected from the sample villages of stratum type 2 as well as from each sample block in urban areas of the schedule 29.1. In the special sample villages requiring hamlet group formation, the hamlet group having maximum number of tribal population will be designated as area type 1 and the other hamlet group selected at random from the remaining hamlet groups will be called area type 2. From the area type 1, 4 tribal households will be selected, while only 2 tribal households will be sampled from area type 2 for the schedule - 29.1.

Detailed procedures of sampling may be seen in INSTRUCTIONS TO FIELD STAFF : VOLUME I attached as external resource.

Deviations from Sample Design

There was no deviation from the original sample design.

Weighting

Sample weights were NOT included in each of the data files

Data Collection

Data Collection Mode	Face-to-face [f2f]
-----------------------------	--------------------

Data Collection Notes

The survey period of the round was divided into four sub-rounds of 3 months each as follows:-

sub-round number period

- 1 July - September 1988
- 2 October- December 1988
- 3 January- March 1989
- 4 April - June 1989

Equal number of sample villages and block were allocated for survey in each of these sub-rounds. Each village and block was surveyed during the sub-round to which it has been allotted.

Questionnaires

Schedule 29.1 consisted of the following blocks :

Block 1 : identification of sample household

Block 2 : particulars of field operations

Block 3 : remarks by investigator

Block 4 : remarks by supervisory officers(s)

Block 5 : household characteristics

Block 6 : demographic, personal characteristics and migration particulars of household members.

Block 7 : particulars of education

Block 8 : usual and current week activity particulars

Block 9 : quality and value of purchase of selected commodities

Block 10: particulars of health care and morbidity

Block 11 : particulars of ceremonies performed by the household

Block 12 : cash purchase and consumption of food, tobacco, intoxicants, fuel & light, clothing and footwear

Block 13 : expenditure on miscellaneous goods and services, rents and taxes and durable goods for domestic use.

Block 14 : particulars of dwelling unit.

Access Conditions

Validated unit level data relating to various survey rounds are available on CD-ROMS which can be obtained from the Deputy Director General, Computer Centre, M/O Statistics and PI, East Block No. 10 R.K. Puram, New Delhi-110066 by remitting the price along with packaging and postal charges as well as giving an undertaking duly signed in a specified format. The amount is to be remitted by way of demand draft drawn in favour of Pay & Accounts Officer, Ministry of Statistics & Programme Implementation, payable at New Delhi.

Variables Description

Dataset contains 326 variable(s)

File Block-1-Identification-household-Records			
#1 Key_hhno: Key to locate Hhno			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
Recoding and Derivation	Unique Key generated to locate a household serial no.		
#2 Rec_id: Record identifier			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
Definition	Identifies the block number of schedule to which the dataset pertains to.		
Value	Label	Cases	Percentage
01	Block-1 of schedule	16436	100.0%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
#3 Rnd_sch: Round & sch. (code)			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
Definition	Indicate NSS round and shedule 29.1		
Value	Label	Cases	Percentage
441	NSS 44th Round Schedule 29.1	16436	100.0%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
#4 Flot: Flot number			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
#5 sector: Sector			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
Value	Label	Cases	Percentage
1	Rural	14539	88.5%
2	Urban	1897	11.5%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
#6 sample: Sample Type			
Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16436 /-] [Invalid=0 /-]		
Definition	There are two types of sample villages in this round. The first type is the general sample in which all enquiries will be carried out. The second type is designated as "special sample villages" in which only schedules 3.1, 29.1, 29.2 and 29.3 will be canvassed. The special samples are intended for augmenting the general sample for the tribal enquiry. These special sample villages will be selected only from the tribal concentration strata (stratum type 1) of the 16 States and the U.T. OF Andaman & Nicobar Islands 1). There are no special sample villages in the remaining States/U.T.'s. The special samples are called sample type-1 and the general samples, sample type-2.		
Value	Label	Cases	Percentage
1	Special	5420	33.0%

File Block-1-Identification-household-Records**#6 sample: Sample Type**

Value	Label	Cases	Percentage
2	General	11016	67.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#7 state_region: State/Region

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

Frequency table not shown (64 Modalities)

#8 State: State code

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

Frequency table not shown (32 Modalities)

#9 Sub_round: Sub-round

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Sub-round-1	4188	25.5%
2	Sub-round-2	4162	25.3%
3	Sub-round-3	4092	24.9%
4	Sub-round-4	3994	24.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#10 sub_sample: Sub-Sample

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16432 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Sub-sample-1	8192	49.9%
2	Sub-sample-2	8240	50.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#11 stratum: Stratum

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

#12 Stratum_Type: Stratum_Type B1_12

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Tribal	13230	80.5%
2	Others	3206	19.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#13 sub_stratum: Sub-stratum

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

File Block-1-Identification-household-Records

#13 sub_stratum: Sub-stratum

Interviewer's instructions Entry pre-printed as 9

Value	Label	Cases	Percentage
9		16436	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#14 B1_q1_srlno: Srl. number

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

#15 B1_q2_Area: Area type

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Tribal Majority hamlet	1250	7.6%
2	Other hamlet group	15186	92.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#16 hhno: Sample hh. no.

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16436 /-] [Invalid=0 /-]

#17 VillType: Village type (B1_q16)

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16174 /-] [Invalid=0 /-]

Interviewer's instructions Village type (item 16) will be 1 if the tribal population constitutes more than 50 percent of the total population in the village, otherwise code 2 will be recorded
This item will be filled in only in the rural sector.

Value	Label	Cases	Percentage
0	NR	63	0.4%
1	Tribal Majority	8277	51.2%
2	Others	7831	48.4%
9	Invalid	3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#18 B1_q26: Information (code)

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16414 /-] [Invalid=0 /-]

Interviewer's instructions Whether the primary informant is the head of the household or any other member of the household will be indicated against item 26 in terms of code 1 and code 2 respectively

Value	Label	Cases	Percentage
1	Head of household	13429	81.8%
2	Other members of hhold	2675	16.3%
9	Others	310	1.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Block-1-Identification-household-Records

#19 B1_q27: Response (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16415 /-] [Invalid=0 /-]
Interviewer's instructions	This information will be recorded on the basis of the investigator's impression after the entire schedule 29.1 is canvassed.

Value	Label	Cases	Percentage
1	informant cooperative and able	11614	70.8%
2	informant cooperative but weak	4539	27.7%
3	informant bust	136	0.8%
4	informant reluctant	92	0.6%
9	others	34	0.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#20 B1_q28: Survey (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16420 /-] [Invalid=0 /-]
Interviewer's instructions	6.1.2 Whether the originally selected sample household has been surveyed or a substitute household has been surveyed will be noted against this item. The code will be 1, if it is the originally selected sample, while code 2 will be recorded if the surveyed household is a substitute. If both the originally selected household and the substitute household become casualties. Code 3 will be recorded. In such cases only blocks 1 and 2 will be filled in and on the top of the first page of the schedule, the word 'casualty' will be written and underlined.

Value	Label	Cases	Percentage
1	originally selected sample	16273	99.1%
2	surveyed household is a substitute	127	0.8%
3	casualties.	17	0.1%
9	Invalid	3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#21 B1_q29: Casualty (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=171 /-] [Invalid=0 /-]
Interviewer's instructions	For the originally selected sample household which could not be surveyed, the reason for its becoming a casualty will be recorded against item 29 in terms of the specified codes

Value	Label	Cases	Percentage
0	NR	4	2.3%
1	informant busy	40	23.4%
2	members away from home	67	39.2%
3	informant not cooperative	7	4.1%
9	others	53	31.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#21 B5_q5: female child

Information	[Type= continuous] [Format=numeric] [Range= 0-43] [Missing=*]
Statistics [NW/ W]	[Valid=9601 /-] [Invalid=6835 /-] [Mean=1.574 /-] [StdDev=1.119 /-]
Interviewer's instructions	female children (girls of age less than 15 years)

#22 B5_q6: Livelihood class (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16396 /-] [Invalid=0 /-]
Interviewer's instructions	6.5.1 The livelihood class of a household will be decided on the basis of the source of household's income from gainful activity (for the definition of 'gainful activity', reference may be made to para 6.8.2 (a) .if a household as no such income, the livelihood class will be 'others' (code 99). If household's income is mostly from one source, there will not be any difficulty in classifying its livelihood class. But, if the members of the household, excluding those employed by the household and the paying guests, derive their income from more than one source listed under livelihood class codes at the bottom of the block in the schedule, the source which has fetched the maximum income during the last 365 days will be the livelihood class for the household and the corresponding code is to be entered against this item.

File Block-5-characteristics-sample household-Records

#22 B5_q6: Livelihood class (code)

Value	Label	Cases	Percentage
00	NR	2	0.0%
01	hunting, trapping and gathering of forest produce only for household consumption)	188	1.1%
02	shifting cultivation	1198	7.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#23 B5_q7a: Industry (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=15915 /-] [Invalid=0 /-]
Interviewer's instructions	The entry against this item will be recorded in three digits will refer to the appropriate' industry-group' of the NIC 1987
<i>Frequency table not shown (300 Modalities)</i>	

#24 B5_q7b: Occupation (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=15904 /-] [Invalid=0 /-]
Interviewer's instructions	The entry against this item will be recorded in three digits will refer to the relevant occupation family' NCO 1968
<i>Frequency table not shown (350 Modalities)</i>	

#25 B5_q8: Religion (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16419 /-] [Invalid=0 /-]
Interviewer's instructions	6.5.6 the religion of the household in terms of the specified code will be recorded against this item. If different members of the household claim to have different religions, the religion of the head of the household will be considered as the religion of the household. In case a tribal household claims to belong to a religion other than those mentioned against religion codes 1 to 7, it is to be ascertained as to whether the proclaimed religion is a traditional tribal religion or not. If yes, the entry against this item will be 8 : otherwise code 9 will be entered against this item.

Value	Label	Cases	Percentage
0		29	0.2%
1	Hinduism	11496	70.0%
2	Islam	163	1.0%
3	Christianity	2676	16.3%
4	Sikhism	1	0.0%

File Block-5-characteristics-sample household-Records

#25 B5_q8: Religion (code)

Value	Label	Cases	Percentage
5	Jainism	1	0.0%
6	Buddhism	552	3.4%
7	Zoroastrianism	6	0.0%
8	Traditional tribal	1355	8.3%
9	others	140	0.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#26 B5_q9: Name of tribe (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16381 /-] [Invalid=0 /-]
Interviewer's instructions	6.5.6 Name of the scheduled tribe to which the tribal household belongs will be recorded in terms of code against this item. The names of the scheduled tribes and their corresponding codes are given in appendix enclosed with this instruction. In some cases, different members of the household may belong to different tribes. It is also possible, though the eventuality is rare, that some members of the household are not tribals. In all such cases, the tribes of the head of the household will be considered as the tribe of the household.

Frequency table not shown (60 Modalities)

#27 B5_q10: Sex of the head (code)

Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16395 /-] [Invalid=0 /-]		
Value	Label	Cases	Percentage
1	Male	14905	90.9%
2	Female	1476	9.0%
9	Invalid	14	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#28 B5_q11: Land possessed (0.00 acres)

Information	[Type= continuous] [Format=numeric] [Range= 0-5620.32] [Missing=*]
Statistics [NW/ W]	[Valid=15975 /-] [Invalid=461 /-] [Mean=3.698 /-] [StdDev=68.66 /-]
Interviewer's instructions	The total area of land possessed by all the members of the household on the date of survey will be recorded in 0.00 acres against this item. Land possessed will constitute areas which are owned and retained by the household plus areas under owner like possession plus areas leased in from others plus areas which are under the possession of the household though neither owned nor leased in. It should be servant/paying guest who are considered as normal members of the household should not be included. Land possessed by those members would be shown against the households where they would have been considered as normal resident members had they not been staying with the present household.

#29 B5_q12: How long the hh. is residing in the present site (code)

Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=16402 /-] [Invalid=0 /-]		
Interviewer's instructions	Particulars of migration of individual members will be collected in block 6. Against this item, information regarding the movement of the household as a whole is to be collected. For this particular purpose, even movement within the village will be considered. The number of years the household is residing in the present site will be recorded in codes as specified in the schedule.		
Value	Label	Cases	Percentage
1	less than 1 year	485	3.0%
2	1 to 5 years	1423	8.7%
3	5 to 10 years	2116	12.9%

File Block-5-characteristics-sample household-Records

#29 B5_q12: How long the hh. is residing in the present site (code)

Value	Label	Cases	Percentage
4	10 years & above	12375	75.4%
9	Invalid	3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#30 B5_q13: If code 1 or 2 in item no. 12 reason for shifting (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=1881 /-] [Invalid=0 /-]
Interviewer's instructions	If the household has moved to the present site during last 5 years, i.e., if the code against item 12 is either 1 or 2, the reason for moving out of the old place by the head of the household is to be recorded in codes.

Value	Label	Cases	Percentage
1	setting up of a new household	413	22.0%
2	in search of food resources	279	14.8%
3	due to natural calamity	32	1.7%
4	displacement caused by the development project	33	1.8%
9	others	1124	59.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#31 B5_q14: Making of fire (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16342 /-] [Invalid=0 /-]
Interviewer's instructions	generally, for domestic purpose, now-a-days stick is used to make fire. But there are still some remote places where match sticks are not available and the tribals use traditional method of making fire by striking a piece of stone against another. The actual practice of the household is to be ascertained and the appropriate code is to be entered. The codes are : match stick - 1; traditional method-2; others - 9. Sometimes, fire may be preserved by the household for use as and when required. In that case, the appropriate code will be 9 unless the household use any other method for making fire.

Value	Label	Cases	Percentage
1	match stick	15872	97.1%
2	traditional method	190	1.2%
9	others	280	1.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#32 B5_q15: HH. consumer expenditure (last 30 days) (Rs.)

Information	[Type= continuous] [Format=numeric] [Range= 0-670151] [Missing=*]
Statistics [NW/ W]	[Valid=14005 /-] [Invalid=2431 /-] [Mean=1557.413 /-] [StdDev=11186.32 /-]

#28 B6_q12: Use of footwear

Information	[Type= discrete] [Format=character] [Missing=*]		
Statistics [NW/ W]	[Valid=79434 /-] [Invalid=0 /-]		
Value	Label	Cases	Percentage
0	NR	2	0.0%
1	Yes	48802	61.4%
2	No	30619	38.5%
9	Invalid	11	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#29 B6_q13: Whether place of enumeration different from last usual residence (Yes=1; No=2)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=79177 /-] [Invalid=0 /-]
Interviewer's instructions	6.6.13 For obtaining the appropriate response to this question, it has to be ascertained from each member of the household, whether his/her place of enumeration is different from the last (previous) usual residence. The usual residence for the purpose of this survey has been defined as a place (village or town) where the person has stayed continuously for a period of six months or more. If the answer is in the affirmative, code 1 and if it is in the negative code 2 will be recorded in col. (13).

Value	Label	Cases	Percentage
0	NR	2	0.0%
1	Yes	18526	23.4%
2	No	60642	76.6%
9	Invalid	7	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#30 B6_q14: If yes in col.(13):- Period since leaving the last usual place of residence (years)

Information	[Type= continuous] [Format=numeric] [Range= 0-88] [Missing=*]
Statistics [NW/ W]	[Valid=18469 /-] [Invalid=61058 /-] [Mean=14.598 /-] [StdDev=13.476 /-]
Interviewer's instructions	The period elapsed since leaving the last usual residence will be recorded in years rounded off to the nearest integer in this column. For working out this, the period of temporary stay less than six months) in other places after leaving the last usual residence and ultimately moving into the place of enumeration will also be included. If the period so determined is less than six months, the entry will be 'O' in this column.

#31 B6_q15: From where migrated (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=18468 /-] [Invalid=0 /-]
Interviewer's instructions	the type of area from where the person has migrated to the place of enumeration, i.e., the type of last usual residence will be recorded in this column in terms of the specified codes for each migrant member.

File Block-6-demographic-migration-particulars-Records

#31 B6_q15: From where migrated (code)

Value	Label	Cases	Percentage
0	NR	2	0.0%
1	rural areas of the same district	13810	74.8%

#24 B7_q7: Type of inst. (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=12140 /-] [Invalid=0 /-]
Interviewer's instructions	Type of educational institution in which the member is currently enrolled will be indicated in codes in this column. An institution run by the central or state government, local bodies, public sector undertakings etc. will be regarded as government institution. All other types of ownership will be treated as private. If an institution provides residential accommodation for students, the institution will be treated as residential, whether or not the student in question avails of the facility. Combining these two criteria, a code structure, as given below, has been framed for type of institution :

Value	Label	Cases	Percentage
0	NR	184	1.5%
1	Government-residential	2747	22.6%
2	Government-non-residential	7792	64.2%
3	Private-residential	247	2.0%
4	Private-non-residential	1164	9.6%
9	Invalid	6	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#25 B7_q8: Whether staying in Hostel

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=12108 /-] [Invalid=0 /-]
Interviewer's instructions	If the student is continuing his studies staying in a hostel, the entry in this column will be 1, otherwise 2 will be recorded. The hostel may be for students of the institution alone or for students of different educational institutions situated in the locality, which he is studying may be a non-residential institution. It is to be noted here that a student who is staying in a hostel will generally form a single member household.

Value	Label	Cases	Percentage
0	NR	185	1.5%
1	Yes	398	3.3%
2	No	11521	95.2%
9	Invalid	4	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#26 B7_q9: Whether received any scholarship stipend

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=12135 /-] [Invalid=0 /-]

File Block-7-Member-Education particulars-Records

#26 B7_q9: Whether received any scholarship stipend

Interviewer's instructions	Students, in some cases, are awarded scholarship or stipend in cash to continue their studies. If the member has received or due to receive such a benefit during the current academic year, code 1 will be recorded here; otherwise code 2 will be entered in this column.
-----------------------------------	---

Value	Label	Cases	Percentage
0	NR	183	1.5%
1	Yes	2210	18.2%
2	No	9739	80.3%
9	Invalid	3	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#27 B7_q10: If code '1' in col.(9):-Annual amount of scholarship/ stipend (Rs.)

Information	[Type= continuous] [Format=numeric] [Range= 0-300000] [Missing=*]
Statistics [NW/ W]	[Valid=2419 /-] [Invalid=76668 /-] [Mean=1448.57 /-] [StdDev=13264.664 /-]
Interviewer's instructions	If the entry in col. (9) is 1, the total amount of cash received and receivable as scholarship/stipend during the current academic year will be recorded in nearest rupees in col. (10)

#28 B7_q11: Agency providing the scholarship/stipend

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=2466 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
0	NR	183	7.4%
1	Government	2200	89.2%
2	Own community	69	2.8%
9	Others	14	0.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#29 B7_q12: Whether any provision of mid- day meal/nutrition programme

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=11795 /-] [Invalid=0 /-]
Interviewer's instructions	There are schools which provide standard food to all or some students as midday meal, tiffin etc., free or at subsidized rate. If such food is regularly received in the school by the student member, code 1 will be recorded here. Code 2 will be appropriate entry otherwise. There are institutions which provide canteen facilities to their students. Students can purchase foods of their choice and requirements from these canteens on payment. Code 1 should not be entered here simply because such facilities for canteen are available. The deciding factor for code 1 in this column is that (i) the food packet must be similar for groups of students and (ii) payment at the subsidized rate for this, if any, need be made periodically and not every day.

Value	Label	Cases	Percentage
0	NR	185	1.6%
1	Yes	2053	17.4%
2	No	9556	81.0%
9	Invalid	1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#30 B7_q13: If yes, agency providing midday meal

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=2360 /-] [Invalid=0 /-]
Interviewer's instructions	it is to be ascertained by the investigator whether the food received by the student member from his/ her educational institution free of cost or at subsidized rate is supplied by government or by any private body/trust. Code 1 will be given in col. (13) if the agency supplying the food is government. In case of private body/trust, it is

File Block-7-Member-Education particulars-Records

#30 B7_q13: If yes, agency providing midday meal

to be further ascertained whether the body/trust is an organization of some community which provides the food only to the members of the same community. If it is so, the entry in col. (13) will be 2. In all other cases code 9 will be recorded in this column. Care should be taken in making entries in this column. Since cases may not be rare where food supplied by government is distributed to the students through the school authorities or through private organization. There may be cases where although the food is supplied by private agency government pays money to those agencies by way of subsidy to keep down the price of the food packet. In all such cases, food is to be considered as provided by government.

Value	Label	Cases	Percentage
0	NR	187	7.9%
1	Government	1998	84.7%
2	Own community	106	4.5%
3	Others	0	0.0%
9	Invalid	69	2.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#31 B7_q14: Whether mother tongue is the medium of teaching (Yes-1,No-2)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=11903 /-] [Invalid=0 /-]
Interviewer's instructions	it is to be ascertained as to whether teaching in the class is imparted in the mother tongue of the student member code will be 1, if the answer is in affirmative and code 2 will be recorded in this column is the answer is in negative. It may so happen that some of the subjects are taught in the mother tongue of the student member and some others are not. In that case, code 1 will be entered in this column, if majority of the subjects are taught in the mother tongue; otherwise code 2 will be recorded.

Value	Label	Cases	Percentage
0	NR	208	1.7%
1	Yes	6382	53.6%
2	No	5305	44.6%
9	Invalid	8	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#32 B7_q15: Distance from educational inst. (Km.)

Information	[Type= continuous] [Format=numeric] [Range= 0-500] [Missing=*]
Statistics [NW/ W]	[Valid=11492 /-] [Invalid=67595 /-] [Mean=2.084 /-] [StdDev=9.236 /-]
Interviewer's instructions	Distance of the educational institution from the residence of the student member will be recorded in this column in kilometers

#33 B7_q16: If code 2 in col.(4):- Whether ever enrolled

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=67358 /-] [Invalid=0 /-]
Interviewer's instructions	it will be ascertained from all those members who are not currently attending any educational institution, i.e. those with code 2 in col. (4), whether the persons had ever been enrolled in a school in the past. Code 1 will be entered for ever-enrolled persons and code 2 for never-enrolled persons. As stated earlier, persons taught by a private tutor or in a kinder-garden/nursery school should not be treated as school enrolment.

Value	Label	Cases	Percentage
0	NR	306	0.5%
1	Yes	13240	19.7%
2	No	53805	79.9%
9	Invalid	7	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Block-7-Member-Education particulars-Records

#34 B7_q17: If code 1 in col.(16) Age at entry in school (Years)

Information	[Type= continuous] [Format=numeric] [Range= 0-80] [Missing=*]
Statistics [NW/ W]	[Valid=13425 /-] [Invalid=65662 /-] [Mean=6.497 /-] [StdDev=2.146 /-]
Pre-question	If code=1 in q-16 ask this question
Post-question	If code=2 in q-16 skip this s question
Interviewer's instructions	age in completed years at which the person had been first enrolled in a school will be entered here.

#35 B7_q18: Number of years attended

Information	[Type= continuous] [Format=numeric] [Range= 0-90] [Missing=*]
Statistics [NW/ W]	[Valid=13347 /-] [Invalid=65740 /-] [Mean=6.449 /-] [StdDev=4.153 /-]
Pre-question	If code=1 in q-16 ask this question
Post-question	If code=2 in q-16 skip this s question
Interviewer's instructions	The total number of years attended by a person in studying different courses will be recorded here in completed years. It is possible that person has attended more years in studying a course than its duration because of failure in different classes

#36 B7_q19: Level at which discontinued(code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=13364 /-] [Invalid=0 /-]
Pre-question	If code=1 in q-16 ask this question
Post-question	If code=2 in q-16 skip this s question
Interviewer's instructions	6.7.18 Entry in this column will be made in similar way as is done in col. (6) of this block. The codes are identical to 'level of education' provided for col. (9) of block 6. However, it is to be noted that if a member successfully completed a class and thereafter did not continue his/her study, the 'level at which discontinued' would be the level corresponding to the higher class than the completed one. For example, if a student successfully completed class VIII, the level at which discontinued would be the code corresponding to secondary'. On the other hand, if a member discontinued his/her study being unsuccessful in a class (or in the middle of the academic year), the level corresponding to the class last attended by the member would be considered for making entry in this column. However, if a person discontinued his studies after successfully completing the level of "graduation & above", one of the codes 11 to 14 would be recorded against him/her, depending upon the subject of study.

Value	Label	Cases	Percentage
00	NR	309	2.3%

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=78905 /-] [Invalid=0 /-]

Interviewer's instructions 6.8.3 The usual activity status of a person will be

File Block-8-member-activity-status-Records

#19 B8_c2: status code

determined on the basis of the various activities pursued by the person during the reference period of 365 days adopting "relatively long time (major time)" criterion. For this, a person has to be first classified into one of the three broad category groups (working, not working but seeking and/or available for work and neither working nor available for work) on the basis of the time spent on them during the reference period of 365 days preceding the date of survey. Thus the broad activity status of a person will be one of the three category groups, on which the person spent relatively long time during the 365 days. In deciding this, one should consider only the normal working time available for pursuing the various activities and not 24 hours of each day. After deciding the broad usual status of the person, the detailed activity status within the broad group will be determined adopting again the "relatively long" or 'major time" criterion. The detailed activity status, thus determined, will be the principal usual activity status of the person. The code corresponding to this activity status will be recorded in col. (2) against the serial number of the person. It may be noted that if a person found to be engaged in domestic duties (or any non-gainful activity for a relatively long period of the reference period of 365 days is also reported to be simultaneously seeking/available for work, the person should be categorized as "unemployed" and not as "engaged in domestic duties" (or the non-gainful activity pursued).

<i>Frequency table not shown (395 Modalities)</i>	
#29 B8_c15: Wage and salary earnings (Rs.) Cash	
Information	[Type= continuous] [Format=numeric] [Range= 0-98000] [Missing=*]
Statistics [NW/ W]	[Valid=13392 /-] [Invalid=65557 /-] [Mean=779.985 /-] [StdDev=3833.313 /-]
Interviewer's instructions	The wage and salary earnings (not total earnings) receivable for the wage/salaried work done during the reference week will be recorded in these columns. The status codes for which wage and salary earnings are relevant are 31, 41, 51, 71 and 72. Thus , if one of these status codes appears in column (11), columns (15) to (17) will obviously be filed in. But even if 'work' status codes other than those mentioned above (i.e. if the codes are 11 to 16, 61 and 62) are recorded in column (11), it is to be ascertained from the person as to whether he/she did any 'wage/salaried work, on any day during the reference week. If yes, wage and salary earnings receivable for the days such work was carried out would be recorded in these columns. The wages and salaries for the work done during the reference week may be already received or may be receivable in cash or in kind or partly in cash and partly in kind. The total wage or salary received or receivable for the week in cash will be recorded in column (15) and the value (evaluated at current retail price) of salary or wages in kind received or receivable will be recorded in column (16). The total of columns (15) and (16) will be recorded in column (17). For recording the wages and salaries, amount receivable as 'overtime' for the additional work done beyond normal working time will also be counted. Bonus (expected or paid) and perquisites, evaluated at retail prices and duly apportioned for the reference week, will be considered as wages and included for making entries in these columns.

Interviewer's instructions	<p>Columns (5) to (12) : health services received last year: An important facility now being available to the people under public health measure is vaccinations/inoculations to gain immunity against certain infectious diseases. These columns are meant for collecting information regarding health care services of this type received by the members of the household during 365 days preceding the date of survey.</p> <p>All the immunization vaccines listed in cols. (5) to (12) except those against cholera (col. (10), tetanus (col. 11) and rabies (col. 12) are administered in infancy, early childhood and adolescent stages and hence as a rule code 7 (not received) is to be put in cols. (5) to (9) for members above 16 years of age. Immunization measures against cholera and rabies are applicable to all irrespective of their age. Although tetanus injection, as a course of three doses is, generally, given only to women during antenatal period, it is given as a single dose to any person as a precautionary measure against tetanus when he/she receives injury or wounds or cuts .It will be enquired whether a member has been immunized by these vaccines during 365 days preceding the date of survey and the appropriate codes will be entered in these columns.</p>

#30 B10_c13: Whether there was ailment during last 30 days

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=78388 /-] [Invalid=0 /-]
Interviewer's instructions	For each member, it is to be ascertained whether the member has suffered from an ailment or injury during last 30 days preceding the date of survey, irrespective of whether the ailment has been treated or not. If an illness had started prior to the reference period and continued during the reference period, it would also be considered as an ailment during the reference period. In case of two or more spells of illness during the reference period, the particulars of the diagnosed or treated ailments will be recorded in this block. If two or more ailments are diagnosed or all are undiagnosed, the ailment of longer duration will be considered for making entries in this block. The entry in this column will be made in terms of codes yes-1, no - 2.

Value	Label	Cases	Percentage
1	Yes	7337	9.4%
2	No	71041	90.6%
9	Invalid	10	0.0%

#32 B10_c15: Whether treated (Yes-1,No-2)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=7352 /-] [Invalid=0 /-]
Interviewer's instructions	6.10.2 If an ailment noted in column (14) has been treated according to medical advice, code 1 will be entered here. If the ailment has not been treated for some reasons or other, the entry in this column will be 2. Untreated illness will include cases of self drugging and also treatment on the advice of non-medical but knowledgeable persons. However, in rural India, particularly among the tribals, there are medical practitioners who follow indigenous system of medicine other than ayurvedic and unani. It is to be first ascertained as to whether such system of medicine is well recognized and respected by local people. If it is so, a person treated by a practitioner of this system of medicine will be considered as treated, otherwise not. Care should be taken not to include the cases of faith healing etc. under this system. Generally, the tribal medicine man prescribes herbal or animal based medicine. It is to be noted that if after recovery from an ailment (which was treated) a fresh spell of the ailment starts during the reference period for which no further consultation is done and the ailment is treated as per an earlier prescription, the case of ailment will be recognized as untreated.

#19 B11_c3: Ceremony code

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=8853 /-] [Invalid=0 /-]

Interviewer's instructions The serial numbers of ceremonies performed by the household during last 365 days will be recorded in col. (1) giving continuous serial numbers starting from 1. the description and code for each ceremony will be recorded in columns (2) and (3) respectively. The ceremonies may be broadly classified into two groups, namely, household

File Block-11-Household-ceremonies-Records

#19 B11_c3: Ceremony code

and community .some of the ceremonies are household affairs, i. e. , those are performed by the household alone whereas some others are community affairs in which the household also participate and bears part of the expenditure. In columns (1) to (3), the household ceremonies are to be listed first. After exhausting all such ceremonies are to be listed first. After exhausting all such ceremonies performed by the household during the last 365 days preceding the date of survey, community ceremonies observed during the reference period in which the household had borne at least part of the expenditure guest will be recorded. Within each broad group (i.e. household and community ceremonies), the particulars of the ceremonies will be noted in the following lines in sequential order of the dates of performance of the ceremonies.

Value	Label	Cases	Percentage
01	birth	393	4.4%
02	death	226	2.6%
03	marriage of male members	225	2.5%
04	marriage of female members	152	1.7%

#20 B11_c4: Expenditure incurred on ceremony (Rs.)

Information	[Type= continuous] [Format=numeric] [Range= 0-7000000] [Missing=*]
Statistics [NW/ W]	[Valid=8772 /-] [Invalid=83 /-] [Mean=4101.927 /-] [StdDev=81333.424 /-]
Interviewer's instructions	For a household ceremony, the expenditure incurred to entertain guests together with other expenditure incurred for performing the ceremony including the payment made to the priest will be recorded in rupees in column (4) and number of guests entertained will be entered in column (5). If the actual expenditure is not available, some probing has to be made to assess the total expenditure on account of the ceremony. In case of community ceremony, the household's share, i. e., the part of the expenditure borne by the household will be recorded in col. (4) and col. (5) will not be filled in.A cross (x) mark will be put in column (5) for community ceremony.

#21 B11_c5: No. of guests entertained

Information	[Type= continuous] [Format=numeric] [Range= 0-10000] [Missing=*]
Statistics [NW/ W]	[Valid=2906 /-] [Invalid=5949 /-] [Mean=94.405 /-] [StdDev=404.515 /-]
Interviewer's instructions	See C4

#22 B11_c6: whether bride/bride-groom price paid (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=390 /-] [Invalid=0 /-]
Interviewer's instructions	Column (6) will be filled in, if the household performed any ceremony connected with the marriage of a male and/ or female member [i. e. if the code in col. (3) is 3 or 4]. According to tribal customs the bridegroom has to pay a price to the bride's household for marrying the girl as opposed to the practice among the non- tribals to pay to the bridegroom's household by the bride's household. In case of a marriage of a female/male member it is to be enquired whether bridegroom/bribe price has been paid by the household, if not, code 4 will be entered in this column. In case a payment has been made, it is to be further investigated whether the payment was made fully in cash or fully in kind (say, land, livestock etc.) or partly in cash and partly in kind. Depending upon the situation code 1 or 2 or 3 will be entered in this column.

Interviewer's instructions

In this block information on purchase, consumption out of home-grown stock, consumption out of gift, loan etc. and the total consumption of food, pan, tobacco, intoxicants, fuel & light, clothing and footwear for the household during the last 30 days prior to the date of survey will be collected. Purchase and consumption of items by members (in hotels etc.) of the household during the days of their absence from the usual place of residence should also be taken into account as far as possible, while making entries against the items of this block. Information is to be collected, in some cases, for each item of consumption and in some other cases, only for sub-totals or for residual item belonging to the "food" group. The description of the sub-total items and residual item (Viz other food items) and their item codes have been printed in this block under cols. (2) and (1) respectively. Wherever information is required for each item of consumption, few blank lines have been provided before the sub-total items for recording information on consumption of individual constituent items of those sub-totals. The complete list of those items on which information is required separately (if consumed by the household) has been provided in the schedule under "code list for block 12". The codes are same as those provided for block 5 of schedule 1.0, NSS 43rd round. In the blank line, the description of items consumed and their respective codes will be entered in cols. (2) and (1) respectively, consulting the code list mentioned above. Where such blank lines

File Block-12-household-consumer expenditure-Records	
#18 B12_c1: Item code	
	have not been provided as in the cases of salt, other food items, pan, clothing, and footwear, information is not required for individual items. It is to be noted that item code 429 stands for 'other food items' so far this block is concerned although the same item code stands for beverages and processed food sub-total in schedule 1.0 if NSS 43rd round. The 'other food item' will include all food items other than those mentioned in this block. In other words, this will include milk and milk products, edible oil, vegetables, fresh fruits, dry fruits and nuts, sugar, spices and beverages, refreshments & processed food.
<i>Frequency table not shown (122 Modalities)</i>	
#19 B12_c4: Quantity (0.00)	
Information	[Type= continuous] [Format=numeric] [Range= 0-7500] [Missing=*]
Statistics [NW/ W]	[Valid=159267 /-] [Invalid=118393 /-] [Mean=35.185 /-] [StdDev=133.804 /-]
Interviewer's instructions	In columns (4) and (5) the quantity and value respectively of items purchased in exchange of money during the last 30 days prior to the date of survey will be recorded. Here purchase made against cash payment (including those made on credit but to be repaid in cash) will be taken into account. Barter purchase if any, will not be considered here. Purchases made for domestic consumption only should be considered. It may be noted that purchases made for gifts, charities or for household ceremonial purposes should be considered as purchase and the total value of purchase inclusive of such purchases should be recorded in these columns. In case the purchase is for both productive and consumption purposes, the part ascribable to productive purposes should be excluded.

Interviewer's instructions This item refers only to the dwelling unit or the actual residence of the sample household. In some extreme cases, it may so happen that the household does not possess any dwelling unit at all. The household residing more or less permanently on the roadside under some sheds, inside a pipe etc. fall in this category. They will be considered as having no dwelling unit and code 1 will be assigned to them. When the dwelling unit in which the household resides is owned by the household, code 2 will be entered while code 3 will find place against this

File Block-14-dwelling unit-particulars-Records

#17 B14_q1: Whether dwelling unit is owned

item when dwelling unit is taken on hire. In all other cases, the appropriate code for this item will be 9. Items 2 to 15 will be crossed when the entries against item 1 is 1 i. e. when the household does not have any dwelling unit.

Value	Label	Cases	Percentage
1	No dwelling unit	129	0.8%
2	Owned	13757	83.9%
3	hired	995	6.1%
8	Invalid	128	0.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#18 B14_q2: Tenure type of the plot (code)

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16355 /-] [Invalid=0 /-]

Interviewer's instructions The item relates to the plot of land on which the dwelling unit is situated. The land may be owned, leased in or otherwise occupied. Depending upon the case, code 1 or 2 or 9 will be entered against this item. In case the plot of land on which the dwelling unit is situated is taken on a long term lease (say 30 years or more), it will be treated as owner like possession and code 1 will be entered against item 2. In case of multistoried building, if an apartment is owned and occupied by the household, tenure type of the plot will also be 1.

Value	Label	Cases	Percentage
1	OWNED	13092	80.1%
2	LEASED-IN	900	5.5%
9	OTHERS	2354	14.4%
8	Invalid	8	0.0%

#19 B14_q3: Area of the house site (0.00 sq.m.)

Information [Type= continuous] [Format=numeric] [Range= 0-4005] [Missing=*]

Statistics [NW/ W] [Valid=16293 /-] [Invalid=104 /-] [Mean=17.303 /-] [StdDev=70.841 /-]

Interviewer's instructions The area of the house site will be recorded in square metres against this item. The area of the house site will include the area on which the dwelling unit is built and the vacant area within the compound of the house.

#20 B14_q4: Covered area (0.00 sq.m.)

Information [Type= continuous] [Format=numeric] [Range= 0-600] [Missing=*]

Statistics [NW/ W] [Valid=16204 /-] [Invalid=193 /-] [Mean=1.363 /-] [StdDev=12.317 /-]

Interviewer's instructions This will be the sum of the floor area of all rooms, kitchen, etc. and covered and/ or uncovered verandah of the dwelling unit. The area will be recorded in square metres and in whole number. The verandah will mean the space adjacent to the rooms which is used as an access to the rooms of the dwelling unit. Verandah will not, however, cover a passage or a corridor used mainly as an access to the dwelling unit itself.

#21 B14_q5: Plinth level (code)

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=16357 /-] [Invalid=0 /-]

Interviewer's instructions Plinth level means constructed ground floor, level of the house from the ground at the main entrance of the dwelling unit. The entries against this item will be made in terms of codes

Value	Label	Cases	Percentage
1	no plinth...	5177	31.7%
2	less than 0.5 metre	8706	53.2%

File Block-14-dwelling unit-particulars-Records

#21 B14_q5: Plinth level (code)

Value	Label	Cases	Percentage
3	0.5 to 1.0 metre	1819	11.1%
4	1.0 to 2.0 metres	433	2.6%

#22 B14_q6: Type of structure (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16372 /-] [Invalid=0 /-]
Interviewer's instructions	<p>The structures have been classified into three categories, namely, pucca, semi- pucca and katcha on the basis of the materials used for construction. Code 1 or 2 or 3 will be entered against this item if the dwelling unit is categorized as pucca, semi-pucca or katcha respectively.</p> <p>A katcha house is one whose walls and roof are made of mud, bamboo, grass, leaves, reeds, thatch or unburnt bricks. A pucca house is one whose walls and roofs are made of burnt brick, stone, cement concrete, concrete jack-boards (cement plastered reeds) and timber, tiles, galvanized tin, or asbestos cement sheets used in construction of roofs will be regarded as pucca materials. A semi pucca-house is one of which either the roof of the walls are made of pucca materials like 'burnt bricks, stones, cement concrete or timber.</p>

Value	Label	Cases	Percentage
1	pucca	2516	15.4%
2	semi-pucca	6188	37.8%
3	katcha	7667	46.8%
9	Invalid	1	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#23 B14_q7: Type of entrance (code)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16370 /-] [Invalid=0 /-]
Interviewer's instructions	<p>It is to be ascertained to whether the height of the main entrance of the dwelling unit is sufficient for a person of normal height to enter into the dwelling unit in an upright position without bending his/her body. If it is like that, code 1 will be recorded against this item. Code 2 will be recorded if the person cannot enter into the dwelling unit in an upright position but can do so by bending only. If the height of the entrance is such that one has to crawl for entering into the dwelling unit, code 3 is to be recorded against this item.</p>

Value	Label	Cases	Percentage
1	Can enter in upright position	11101	67.8%
2	can enter by bending only	5204	31.8%
3	can enter by crawling only	65	0.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#24 B14_q8: Whether the living room is shared with animal (Yes-1, No-2)

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=16369 /-] [Invalid=0 /-]
Interviewer's instructions	<p>Code 1 will be entered against this item, if the household keeps livestock in the room in which the members of the household live. If the household does not possess any livestock or there is a separate shed for keeping the livestock, the code to be entered against this item will be 2. However, keeping pet dogs, cats and birds in the living room should not be considered as sharing of room with animals.</p>

Value	Label	Cases	Percentage
1	Yes	3099	18.9%
2	No	13264	81.0%
