

Report No. 443 (53/2.41.2/1)

**Small Trading Units in India and Their Basic
Characteristics : 1997**
(Volume I)

NSS 53 rd Round

January - December 1997

National Sample Survey Organisation
Department of Statistics
Government of India

December 1998

P R E F A C E

The National Sample Survey Organisation (NSSO) conducted a sample survey of the small trading units in India in its Fifty-third round during January - December 1997. The survey used the list of enterprises and establishments in the unorganised trade sector obtained from the Economics Census 1990 as the basic frame for selection of samples. The 53rd round of NSS covered own account trading enterprises and non-directory trading establishments which were earlier taken up for survey by NSSO in its 41st (1985-86) & 46th (1990-91) rounds. Results obtained from this enquiry are being presented in the form of two detailed reports.

The present report is the first in the series. It contains information on number of unorganised trading enterprises, persons employed therein, value added and trade margins for different commodity groups traded by those enterprises. Tables containing detailed results for state as well as the country are appended with this report.

While the field work of the survey was done by the Field Operation Division of the NSSO, accumulated data were processed and tabulated by the Data Processing Division of the NSSO, Calcutta. The report at its draft stage was examined by the Governing Council members and officers of the Department of Statistics. Suggestions and various comments received were very helpful in improving the report. I am grateful to everyone. I also wish to put on record my appreciation for the team of SDRD officers for planning and designing the survey, undertaking analysis of the tabulated data, preparing the draft report and then revising it based on the comments received.

I hope the report will serve as a reference document to the planners and the policy makers. Comments / suggestions for further improvement will be most welcome.

Sd /-

(Dr. N. S. Sastry)

Director General and Chief Executives Officer
National Sample Survey Organisation

HIGHLIGHTS

Total number of small trading enterprises in the country during 1997 was estimated to be **145 lakh**. Of these units **92%** were own-account enterprises and the remaining **8%** were non-directory establishments. About **84 lakh** enterprises were located in rural areas and **61 lakh** in urban areas.

About **6%** of the enterprises were wholesale trading units and **82%** were retail trading units. The remaining **12%** enterprises comprised the other trading units (commission agents, auctioneers and free collection categories).

The State of Uttar Pradesh had the highest number of enterprises, followed by West Bengal, Bihar, Andhra Pradesh, Orissa and Maharashtra. These six states together accounted for **more than 61%** of the total trading units.

About **90%** of the rural enterprises and **98%** of the urban enterprises were **perennial** enterprises. Only **9.3%** of the rural enterprises and **1.5%** of the urban enterprises were **seasonal** in nature. **Casual** enterprises were forming a small part of the total in both rural (0.9%) and urban (0.3%) areas. Orissa reported a significant percentage (36.8%) of seasonal enterprises in the rural sector.

About **94%** of the rural enterprises and **86%** of the urban enterprises had **not** maintained any accounts. Among the wholesale trading units, 18% in the rural sector and 34% in the urban sector maintained accounts.

At the all-India level, **7.6%** of the household enterprises were owned by Scheduled Tribes, **10.7%** by Scheduled Castes and **21.4%** by Other Backward Castes. The remaining **60.2%** of the trading units were owned by Others.

The estimated number of workers engaged in small trading units in India during 1997 was **222 lakh**, of which **121.27 lakh** were in the rural sector and **100.25 lakh** in the urban sector. Among the States, Uttar Pradesh had the highest number of workers, followed by West Bengal, Andhra Pradesh, Maharashtra, Orissa and Bihar. These six states together covered more than 60% of the total number of workers.

Average number of workers per enterprise in the small trading sector was **1.53**. There were **2.77** persons employed in an NDTE and **1.41** persons in an OATE.

About **30 lakh** female workers and **6 lakh** child workers were engaged in the small trading units during 1997. Participation of female or child workers in unorganised trade was more prevalent in the rural areas.

The rural enterprises operated for **10.5 months** on an average whereas the urban enterprises operated for **11.2 months** in the last 365 days.

Per enterprise value of net additions to fixed assets in small trading units during the last 365 days was found to be **Rs.1895**. This was **Rs.1074** for owned assets.

Per enterprise value of fixed assets owned and rented were found to be **Rs 26623** and **Rs 22458**, respectively. In the rural sector, per enterprise value of assets owned was much more than that of assets rented. But in the urban sector, the value of rented assets per enterprise was marginally higher than that of owned assets.

The small trading units generated **monthly value added** of about **Rs 3927 crore** of which the rural and urban shares were **37%** and **63%**, respectively. In terms of percentage gross value added, Uttar Pradesh (13.8%), Maharashtra (10.5%), West Bengal (9.5%), Andhra Pradesh (7.9%) and Tamil Nadu (7.5%) were the five states in the lead.

The GVA per enterprise for the country was observed to be **Rs 4068**. It was **Rs 3595**, if calculated by factor income approach.

The **annual value added** by this sector was estimated to be **Rs 44,220 crore** of which the urban and rural shares were **Rs 28,492 crore (64%)** and **Rs 15,727 crore (36%)**, respectively.

CHAPTER I

INTRODUCTION

1.1 The non-agricultural sector is an important and growing segment of the Indian economy. But statistics on the unorganised part of this sector are not available regularly in usable form. To bridge the gap, a countrywide census of all non-agricultural units employing at least one hired worker was undertaken in 1977 by the CSO in collaboration with the State Statistical Bureaus. This census provided a list of all establishments (units having at least one hired worker) in the unorganised sector of economic activities. Using the frame provided by the Economic Census, a follow-up survey of small trading establishments employing five or fewer number of workers and relatively smaller trading units not employing any hired worker was conducted in the thirty-fourth round of the NSS in 1979-80.

1.2 The second Economic Census was conducted in 1980. It had a wider coverage than the earlier one in the sense that it covered the own-account enterprises (units without any hired worker are called **Own-Account Enterprises or OAEs**) also. In this census the establishments were further split into two categories : **Directory Establishments (DEs) and Non-Directory Establishments (NDEs)**; the former employed a total of six or more workers, while the latter employed a total of five or fewer workers. Thus, the second Economic Census dealt with three categories of units, viz. **DEs, NDEs and OAEs**. This census provided a list of villages / enumeration blocks (EBs) giving a count of enterprises and establishments, which has been used by the NSSO as a frame for sample villages / EBs in its follow-up surveys. Two such surveys of units engaged in trading activities were taken up by the NSSO in its forty-first round (July 1985 to June 1986) and forty-sixth round (July 1990 to June 1991).

1.3 The third Economic Census was conducted in the year 1990. The coverage and the classification of the enterprises were the same as those of the second Economic Census. Using the frame based on the third Economic Census, a similar survey on the small trading units was undertaken by the NSSO in its fifty-third round during January to December, 1997.

1.4 The coverage of the fifty-third round of the NSS was restricted to all non-directory trading establishments (NDTEs) and own-account trading enterprises (OATEs) except the public sector trading enterprises / establishments. Hereafter in this report, the term 'enterprise' will mean a trading enterprise or establishment (i.e. OATE or NDTE) as the case may be. All the enterprises covered by the two-digit NIC codes 60 to 68 (called divisions) and three-digit codes 040, 052, 053, 054, 059, 060, 061, 063, 069 and 890 (called groups) under the revised National Industrial Classification, 1987 (**NIC, 1987**) were considered for this survey. The 3-digit codes, viz. 040, 052, ..., 069 represent various free collection activities for sale. These activities are being covered under unorganised trade since the NSS 34th round. The extract of the NIC, 1987 for unorganised trade is provided in Appendix C.

1.5 In its geographical coverage, the fifty-third round survey included the whole of the Indian Union except the Ladakh and Kargil districts of Jammu & Kashmir, 768 interior villages of Nagaland situated beyond five kilometers of the bus route and 195 inaccessible villages of Andaman & Nicobar Islands.

1.6 The fifty-third round of the NSS, as stated in the preceding paragraph, covered OAEs and NDEs in the trade sector. The other part, comprising Directory Trading Establishments (DTEs), which employ

six or more workers, had been surveyed separately under the technical guidance of the Central Statistical Organisation during October 1996 to September 1997. As such, information for the entire trade sector becomes available for the period 1996-97.

1.7 All the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The numbers of first-stage units surveyed (**villages** in the rural areas and **UFS blocks** in the urban areas) were 5988 and 7138 in rural and urban areas, respectively, in the central sample. In this round, the usual practice of hamlet group / sub-block formation was dispensed with. Instead, the whole fsu's (i.e. villages / blocks) were listed. As a result, the workload increased manifold in the field. In a later decision of the Governing Council, a portion of the samples was curtailed from the original allocation. It was also decided that the villages with population 20,000 or more as per 1991 census will be omitted from the sample. The ultimate distribution of the first-stage units among different States for the central sample was as per Statement 1 below:

Statement 1: Number of first stage units in different States and UTs for central sample

state/u.t	villages	blocks	state/u.t	villages	blocks
(1)	(2)	(3)	(1)	(2)	(3)

Lakshadweep	8	8	Pondicherry	8	32
India			6055		7169

1.8 All the second-stage units (i.e. trading enterprises) were listed through a listing schedule. This list constituted the frame for drawing the required number of sample enterprises from each first-stage unit. The enterprises were divided into three **enterprise classes** on the basis of the number of workers

employed, from each of which a certain specified number of enterprises were selected. Information collected through the listing schedule was used for calculating multipliers and for estimation of the number of enterprises. The enterprise schedule was canvassed in the selected sample enterprises for collecting information on basic items like fixed assets, employment, purchase and sale values, other expenditure, value added and trade margins of commodities traded. The present report is based on the data collected through the enterprise schedule canvassed in the central samples of the NSS fifty-third round and presents selected characteristics (viz. number of enterprises, workers, GVA and trade margins) in 12 tables for states as well as for all-India. The remaining tables of the tabulation plan (there are 26 tables in the tabulation plan of NSS 53rd round) are presented in the second report of the series. The estimates are presented by broad industry divisions and/or groups (2- and/or 3-digit levels) of the NIC, 1987. In some of the tables, estimates are presented separately for the enterprises engaged in different types of trades, viz. wholesale trade (NIC 60 to 63), retail trade (NIC 65 to 68), commission agents (NIC 64), auctioneers (NIC 890) and other trading units (NIC 040, 052, 053, 054, 059, 060, 061, 063 & 069). The tables are also presented by certain classificatory variables like duration of operation, social groups, maintenance of accounts, etc.

1.9 In the second volume of the report, along with the three main variables, viz. number of enterprises, number of workers and GVA, some other important variables like fixed assets, net addition to fixed assets, other incidental expenditure and various factor incomes have been presented for the States as well as for all-India. Average numbers of months/days an enterprise operated in the last year/working month are also given. GVA per enterprise is given in the first volume whereas GVA per worker is covered in the second. The trade margins presented in the first report are obtained as direct query from the traders. But the trade margins in second volume are derived from the schedule. Also, the number of enterprises in the second volume is presented by size class of workers and the number of workers is given by full-time and part-time categories. In the first volume, summary discussions are made mostly with the absolute figures of enterprises and workers. Corresponding proportions over different NIC divisions/groups are discussed in some finer details in the summary of findings of the second volume.

1.10 Important concepts and definitions adopted in the survey are explained in Chapter II. Major findings based on the data are discussed in a summarised form in Chapter III. The detailed tables at the all-India as well as the State level are given in Appendix A. Appendix B gives a note on sample design and estimation procedure followed in arriving at the estimates presented in this report. 4-digit industry division/ group codes and the corresponding descriptions are given in Appendix C.

CHAPTER II

CONCEPTS AND DEFINITIONS

Important concepts and definitions followed in the survey of the NSS 53rd round are explained below :

2.1 Trade : Trading is defined as an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of the goods. The activities of intermediaries who do not actually purchase or sell the goods but arrange their purchase and sale, and thereby earn remuneration by way of brokerage or commission, are also covered for the purpose of 'trade' survey. Distributive agencies which undertake trading activity on commission basis are also included. In addition, the activities of free collection for sale of honey and forest products like gathering of fodder, grass, etc.; free hunting, trapping and game propagation for commercial purposes; free collection for sale of fish, prawns, crabs and oysters; free collection for sale of waste paper, ash, rags, coal, etc., are also treated as trade for this survey. Separate and distinct trading units of manufacturing concerns like sale shops of Delhi Cotton Mill, Bombay Dyeing, Bata Shoe, etc., and activities like selling of fruit juice, sugarcane juice, etc., which involve a process of transformation marginally are also covered under trade.

2.2 Wholesale trade: In wholesale trade, goods are generally bought from the producer and sold to the retailer. A wholesaler is generally regarded as an intermediary between the producer and the retailer. A wholesale trader sometimes sells goods to other wholesalers or to the users in bulk. Besides, wholesale business is undertaken not only by the merchant wholesalers who buy and sell commodities but also by the manufacturing wholesalers who maintain distinct and identifiable wholesale trade outlets.

2.3 Retail trade : In retail trade, goods are generally bought from wholesalers or dealers and sold to consumers. The retail trader is an intermediary between a wholesaler and consumers or users. The retail trader may sometimes purchase goods directly from the producer or manufacturer. Hawkers and peddlers selling goods are also considered retail traders.

2.4 Trading enterprise : A trading enterprise is an undertaking/unit engaged in trade. An enterprise may be owned and operated by a household or by an institutional body. The activities of the enterprise may be carried out by household members and/or by hiring outside labourer.

2.5 Household enterprise: A household enterprise is that enterprise which is run by the members of the household. An enterprise run by two or more households on partnership basis is also considered a household enterprise. In other words, all proprietary and partnership enterprises are household enterprises.

2.6 Non-household enterprise: Non-household enterprises are those which are institutional, i.e. owned and run by the public sector (governments, local self-governments, local bodies, government undertakings, etc.), cooperative societies, corporate sector, other types of societies, institutions, associations, trusts, etc. In unorganised trade, however, Public Sector enterprises are not covered.

2.7 **Own-account enterprise:** An enterprise which is run by household workers only (i.e. without any hired worker on a fairly regular basis) is termed as an own-account enterprise. If such an enterprise is engaged in trading, it is termed as an own-account trading enterprise (OATE).

2.8 **Establishment:** An enterprise which is employing at least one hired worker on a fairly regular basis is termed as an establishment.

2.9 **Non-directory establishment :** An establishment employing fewer than six workers (household and hired workers taken together) is termed as a non-directory establishment. If such an establishment is engaged in trading activities, it is termed as a non-directory trading establishment (NDTE).

2.10 **Worker :** A worker is defined as one who is engaged, either full-time or part-time, in the activity of the enterprise, in any capacity - supervisory or primary – whether in return for wages/salaries or not, involving any kind of work incidental to or connected with the (trading) activity. The entire set of workers has been divided into two categories, viz. hired workers and other workers, the main distinction being that while the former category of workers is paid some wages or salaries, the latter category of workers is not paid wages /salaries. For instance, a working proprietor or a working family member is treated as a hired worker if he/she gets remuneration for the work in an explicit form, but any receipt other than remuneration is not considered salary or wage and in that case a working proprietor or working family member is categorised as ‘other worker’.

2.11 **Fairly regular basis :** The term "fairly regular basis" for employment of hired workers means that the enterprise/establishment has engaged hired worker(s) during the **major part** of its period of operation(s) in the last one year. However, it is not necessary that the same worker(s) should be employed throughout the year.

2.12 **Duration of operation of enterprise:** It refers to the regularity with which the enterprise is run. If an enterprise runs more or less regularly throughout the year it is a **perennial** enterprise. If an enterprise usually operates during a particular season or fixed months of a year, it is termed as a **seasonal** enterprise. In case the activities of an enterprise are neither perennial nor seasonal in nature but are undertaken occasionally during the reference year, the enterprise is termed as a **casual** enterprise.

2.13 **Reference period :** It means the period for which information on a particular characteristic is collected. In the NSS 53rd round, only one reference period, viz. 'a month', had been used to collect the data. However, data on trade margins and net additions to fixed assets were collected for the last one year.

2.14 **Fixed assets :** Fixed assets in connection with the enterprise will mean the (i) building (including land) and other construction, (ii) transport equipment and (iii) other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition/construction. The market values of the fixed assets were considered.

2.15 **Trade Margin :** Trade Margin of a commodity is the percentage difference between the sale price and the purchase price. Trade margins were obtained when some transaction of goods took place during the (last) reference year and as such were not applicable for commission agents and auctioneers.

For those units also which collected goods free of cost for sale, data on trade margins were not collected.

2.16 Trader's net earnings/surplus : The total income generated by an enterprise is distributed among 4 major heads. Interest goes to the lenders, rent on land goes to the landlords, compensation goes to the workers and the remaining income is retained by the entrepreneur(s). This fourth part is called the trader's net earnings / surplus. In common parlance, it is known as 'net profit'.

2.17 Change in stock : The change in stock has been estimated in value terms as difference between capital-locked-up in stock at the beginning and that at the end of the reference month (the latter minus the former gives the change in stock). Credit purchases were also considered while arriving at the capital locked up figures.

2.18 Trading expenses : The value of commodities purchased together with incidental expenditure, like electricity consumed, printing, stationery, postage and telephone charges, transport charges, rent on assets other than land, local rates, taxes, licence fees, etc., incurred by the unit during the month for trading purpose, is considered to be trading expenses of the unit.

2.19 Total receipts : The sale value of all commodities traded by the unit together with the value of trading goods consumed at home and other receipts incidental to trading activities will be considered to be the total receipts of the unit.

2.20 Value added : This represents the contribution of a trading unit to the economy. Gross value added is calculated by subtracting the value of trading expenses from the total of receipts and change in stocks of the unit.

Appendix A

List of appendix tables

Table no.	Title	Page no.
1	Number of enterprises of each type (OATE and NDTE) and their percentage distribution by industry division/group	A1 - A33
2	Number of workers by industry division/group	A34 - A66
3	Estimated number of enterprises and value added by maintenance of accounts and by industry division	A67 - A100
4	Gross value added per enterprise by industry division/group	A101 - A133
5	Average trade margin for selected commodity groups for wholesale and retail trade	A134 - A165
5.1	Average trade margin of different commodity groups for wholesale and retail trade by enterprise type	A166 - A169
6	Selected items per enterprise by type of trade	A170 - A186
7	Number of enterprises facing different types of problem by enterprise type and type of trade	A187 - A190
8	Percentage distribution of enterprises by maintenance of accounts for different types of trade and different durations of operation.	A191 - A194
9	Percentage distribution of enterprises of different types by duration of operation	A195 - A206
9.1	Percentage distribution of enterprises of different type by duration of operation for each type of trade	A207 - A208
10	Percentage distribution of household enterprises by sex of the owner for different industry divisions/groups and enterprise types	A209 - A241
11	Percentage distribution of household enterprises by social group for different enterprise types and type of trade	A242 - A274
12	Percentage distribution of enterprises by status in the last three years for different industry division/group, enterprise type and social group	A275 - A278

Appendix B

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. SAMPLE DESIGN

1.1 General : A stratified two-stage sampling design was adopted for the survey. The first stage units (FSUs) were the villages (**panchayat wards** in case of Kerala) in the rural sector and UFS blocks in the urban sector. The second-stage units were the OATEs and NDTEs for the trade survey.

1.2 Sample size : The total number of sampling units (i.e. villages and blocks) surveyed in the 53rd round was 13,224 for Central sample and 14,876 for the State sample.

1.3 Allocation of sample FSUs to States/U.Ts and to rural and urban sectors : The total all-India sample size of FSUs was allocated to different States/U.Ts in proportion to the number of workers engaged in OATEs/NDTEs in the respective States/U.Ts (estimated as number of OATE/NDTE as per EC '90 multiplied by estimated number of workers per enterprise based on NSS 46th round) subject to a minimum allocation given to the State/U.Ts depending upon the total number of districts and town classes for the State/U.T. The State/U.T level sample size was again allocated to the rural and urban sectors in proportion to the number of workers.

1.4 Rural sector design

1.4.1. Sampling frame : The list of villages showing number of OATEs and NDTEs as per 1990 Economic Census was used for selection of villages in the States/U.Ts wherever such frame was available. For Kerala, list of Panchayat wards giving count of OATEs /NDTEs has been used as the frame for selecting Panchayat wards for the the survey instead of villages. For Jammu & Kashmir, the 1981 census lists of villages forms the frame. For Andaman & Nicobar islands, Lakshadweep and 5 districts of Madhya Pradesh, 1991 census lists were used as frame. For Andaman & Nicobar Islands, villages remaining inaccessible throughout the year were excluded from the frame. For Nagaland, only villages connected by bus or situated within 5 kms of the bus route were included in the frame.

1.4.2. Stratification : Each district generally formed a broad stratum. However, for Gujarat, where NSS regions cut across district boundaries, parts of each such part of a district formed a separate stratum. If any district (or part thereof lying in an NSS region in case of Gujarat) had a small number of trading enterprises, it was clubbed with a neighbouring district to form a broad stratum in order to ensure a minimum allocation. To net an adequate number of NDTEs in the sample, each broad stratum was divided into two area types : (i) Area type 1 consisting of villages having at least one NDTE, and (ii) Area type 2 consisting of the remaining villages of the broad stratum.

Where population census frames were used for selection of fsus , there was no division as above. In such cases, all the villages were classified in area type 2.

1.4.3. Allocation of sample villages among strata and area types : The State/U.T level rural sample size was allocated among the strata in proportion to number of workers. While allocating as above, it was maintained that NSS region level allocation were multiples of 8 and stratum level allocation is at least 4 but in multiples of 2. This was done in order to allocate at least two fsu's to each of the area types. The stratum level allocation was again distributed between two area types in proportion to number of NDTEs and OATEs taking into consideration that allocation for each area type was in multiples of 2.

1.4.4. Selection of fsu's : Villages were selected in the form of two independent sub-samples from each broad stratum x area type using circular systematic sampling with probability proportional to size, the size being the number of (OATE + NDTE) for area type 1 and the number of OATEs (after assigning a size of 1 to the fsu's having no trading enterprise) for area type 2.

Where population census frame was used, villages were selected using circular systematic sampling with probability proportional to population. For Lakshadweep and A & N Islands, however, equal probability sampling was adopted.

1.5. Urban sector design :

1.5.1. Sampling Frame : The latest available list of UFS blocks was used as sampling frame for selection of fsu's for all cities and towns.

1.5.2. Stratification : Town classes (broad strata) were formed within each district by grouping

town class code	composition of town class
1	all towns with population less than 1 lakh.
2	all towns with population 1 lakh or more but less than 5 lakhs.
3	all towns with population 5 lakhs or more but less than 10 lakhs.
4/5	each city with population 10 lakhs or more.

cities/towns according to population sizes as per '91 census. Composition of the town classes were as given below :

In case of Gujarat , if any district is spread over more than one NSS region , town classes were formed independently for each part of a district falling within a particular NSS region.

To net adequate number of trading enterprises in the sample, each town class was divided into two area types. Area type 1 consisted of the UFS blocks designated as 'bazar area' and area type 2 consisting of the remaining blocks of the town class.

1.5.3. Allocation of sample blocks among districts, town classes and area types : The state/u.t. level urban allocation is allocated among the districts and town classes in proportion of the number of workers. It is, however, ensured that NSS region level allocations were in multiples of 8 and town class level allocations were at least 4 and were in multiples of 2. Town class level allocations were further allocated between two area types in such a way that UFS blocks of area type 1 get completely surveyed (central and state samples combined) subject to a maximum of 50% of allocation for town class level. Area type wise allocations were in multiples of 2.

1.5.4. Selection of blocks : For both the area types, sample blocks were selected circular systematically in the form of two independent sub-samples with equal probability.

1.6. Sampling of enterprises : All the OATEs and NDTEs of the selected village/block excluding those in the public sector and which operated for at least 30 days (15 days in case of seasonal enterprises) during the last 365 days preceding the date of survey were considered for sampling. All such, eligible enterprises were classified into three classes termed as '**enterprise class**' according to the total number of workers (including hired workers) employed in the enterprises on a regular basis. The classes were as follows :

Enterprise class code	Composition of the class
1	all OATEs and NDTEs with one worker only.
2	all OATEs and NDTEs with two workers only.
3	all OATEs and NDTEs with three or more workers.

Before selecting enterprises from enterprise classes, all the enterprises within an enterprise class were arranged in ascending order of their NIC codes. The number of enterprises selected from enterprise classes 1, 2 and 3 were **4, 6 and 6** respectively. If there is a shortfall in enterprise class 3, it is made up from enterprise class 2, if possible, otherwise from enterprise class 1. Similarly, if there is a shortfall in enterprise class 2, it is made up from enterprise class 3, failing which from enterprise class 1. The priority order for compensation is 3rd, 2nd and 1st enterprise class.

The required number of enterprises were selected from each enterprise class circular systematically with equal probability.

2. ESTIMATION PROCEDURE

2.1. Notations :

- s = subscript for s-th stratum.
 t = subscript for t-th area type ; t= 1,2.
 b = subscript for b-th sub-sample ; b= 1,2.
 i = subscript for i-th sample village/block (fsu).
 j = subscript for j-th enterprise class
 k = subscript for k-th enterprise
 Z = total size for an area type (or for a stratum when there is no area type formation).
 z = village/block size used for selection.
 n = number of sample villages/blocks surveyed including uninhabited and zero cases and excluding casualty and other not received cases (used for tabulation).
 E = total number of enterprises listed in an enterprise class.
 e = number of enterprises surveyed (used for tabulation) in an enterprise class.
 y = value of any character under estimation
 \bar{y} = estimate of population total of the character Y.

2.2 Formula for estimation :

$$\bar{Y}_{sb} = \sum_t \frac{Z_{st}}{N_{stb}} \sum_{i=1}^{N_{stb}} \frac{1}{Z_{stbi}} \sum_{j=1}^3 \frac{E_{stbij}}{e_{stbij}} \sum_{k=1}^{e_{stbij}} y_{stbij}$$

- Note :** 1) For rural sector , \bar{Y}_{sb} was the estimate at the district level and for urban sector , \bar{Y}_{sb} was the estimate at the town class level based on sub-sample b. .
 2) Value of $z_{stbi} = 1$ for urban sector.

2.2.1. Estimate for the aggregate :

Pooled estimate \bar{Y}_s based on two sub-samples is obtained as

$$\bar{Y}_s = \frac{1}{2} \sum_{b=1}^2 \bar{Y}_{sb}$$

The pooled estimate \bar{Y} at the region/state/u.t./All India level is obtained by summing the stratum estimates \bar{Y}_s over all the strata for the region/state/u.t./All India.

2.3 Ratio estimates :

The estimate of the ratio $R = \frac{Y}{X}$ (where X was the population total of an auxiliary variable) is given by $\bar{R} = \frac{\bar{y}}{\bar{x}}$. Ratio may be computed at the last step after separately estimating X and Y.

APPENDIX - C

REVISED NATIONAL INDUSTRIAL CLASSIFICATION

GROUPS AND CLASSES : CLASSIFICATION AT THREE & FOUR DIGIT LEVELS
(For Trade Survey of NSS 53rd Round)

group	class	description
SECTION-0 : AGRICULTURE, HUNTING, FORESTRY AND FISHING		
DIVISION 04 : HUNTING, TRAPPING AND GAME PROPAGATION		
040	040.0	Hunting, trapping, and game propagation other than for sports.
DIVISION 05 : FORESTRY AND LOGGING		
052	052.0	production of firewood/fuel wood (including char coal by burning) by exploitation of forests.
053	053.0	gathering of fodder by exploitation of forests.
054	054.0	gathering of uncultivated materials such as gums, resins, lac, barks, munjh, herbs, honey, wild fruits, leaves etc. by exploitation of forests.
059	059.0	Forestry services n.e.c.
DIVISION 06 : FISHING (INCLUDING COLLECTION OF SEA PRODUCTS)		
060	060.0	Ocean, sea and coastal fishing
061	061.0	Inland water fishing
063	063.0	Collection of pearls, conchs, shells, sponges and other sea products.
069	069.0	Other allied activities and services incidental to fishing n.e.c.
SECTION-6 : WHOLESALE AND RETAIL TRADE AND RESTAURANTS AND HOTELS		
DIVISION 60 : WHOLESALE TRADE IN AGRICULTURAL RAW MATERIALS		
LIVE ANIMALS, FOOD, BEVERAGES, INTOXICANTS		
AND TEXTILES		
600		Wholesale trade in cereals and pulses
	600.1	Procurement agencies dealing primarily in cereals and pulses.

- 600.2 Wholesale trade in cereals and pulses other than by procurement agencies.
- 601 Wholesale trade in basic food-stuffs (other than cereals and pulses).
 - 601.1 Wholesale trade in fruits.
 - 601.2 Wholesale trade in vegetables.
 - 601.3 Wholesale trade in spices in primary forms.
 - 601.4 Wholesale trade in raw milk.
 - 601.5 Wholesale trade in meat, fish and eggs.
 - 601.9 Wholesale trade in other basic food-stuffs n.e.c.
- 602 Wholesale trade in textile fibres of vegetable/ animal origin.
 - 602.1 Procurement agencies dealing primarily in cotton and jute.
 - 602.2 Wholesale trade in cotton and jute, other than by procurement agencies.
 - 602.3 Wholesale trade in raw wool.
 - 602.4 Wholesale trade in raw silk.
 - 602.9 Wholesale trade in other textile fibres of vegetable/animal origin n.e.c. (note : wholesale in man-made textile fibres is included in 615).
- trade group
- 603 Wholesale trade in un-manufactured tobacco, pan leaves, opium, ganja and cinchona etc.
 - 603.1 Wholesale trade in un-manufactured tobacco.
 - 603.2 Wholesale trade in pan leaves.
 - 603.3 Wholesale trade in opium, ganja and cinchona etc.
- 604 Wholesale trade in straw, fodder and other animal/poultry feed.
 - 604.1 Wholesale trade in straw and fodder.
 - 604.9 Wholesale trade in other animal/poultry feed.
- 605 Wholesale trade in live animals and poultry.
 - 605.1 Wholesale trade in live animals.
 - 605.2 Wholesale trade in poultry.

- 606 Wholesale trade in manufactured foodstuffs.
 - 606.1 Wholesale trade in dairy products.
 - 606.2 Wholesale trade in sugar, confectionery and bakery products.
 - 606.3 Wholesale trade in edible oils and fats.
 - 606.4 Wholesale trade in manufactured/processed spices.
 - 606.9 Wholesale trade in other manufactured food-stuffs n.e.c.
- 607 Wholesale trade in tea, coffee, cocoa, tobacco products and beverages other than intoxicants.
 - 607.1 Wholesale trade in tea, coffee and cocoa.
 - 607.2 Wholesale trade in manufactured tobacco and tobacco products.
 - 607.3 Wholesale trade in beverages other than intoxicants.
- 608 608.0 Wholesale trade in intoxicants like wines and liquors including incidental bottling.
- 609 Wholesale trade in textiles and textiles products like all kinds of yarn, fabrics, garments, and other made-up articles etc. (including second-hand textile goods).
 - 609.1 Wholesale trade in yarns.
 - 609.2 Wholesale trade in textile articles.
