

Report No. 444 (53/2.41.2/1)

**Small Trading Units in India and Their Basic
Characteristics : 1997**
(Volume II)

NSS 53 rd Round

January - December 1997

National Sample Survey Organisation
Department of Statistics
Government of India

December 1998

P R E F A C E

The National Sample Survey Organisation (NSSO) conducted a sample survey of the small trading units in India in its Fifty-third round during January - December 1997. The survey used the list of enterprises and establishments in the unorganised trade sector obtained from the Economics Census 1990 as the basic frame for selection of samples. The 53rd round of NSS covered own account trading enterprises and non-directory trading establishments which were earlier taken up for survey by NSSO in its 41st (1985-86) & 46th (1990-91) rounds. Results obtained from this enquiry are being presented in the form of two detailed reports.

The present report is the first in the series. It contains information on number of unorganised trading enterprises, persons employed therein, value added and trade margins for different commodity groups traded by those enterprises. Tables containing detailed results for state as well as the country are appended with this report.

While the field work of the survey was done by the Field Operation Division of the NSSO, accumulated data were processed and tabulated by the Data Processing Division of the NSSO, Calcutta. The report at its draft stage was examined by the Governing Council members and officers of the Department of Statistics. Suggestions and various comments received were very helpful in improving the report. I am grateful to everyone. I also wish to put on record my appreciation for the team of SDRD officers for planning and designing the survey, undertaking analysis of the tabulated data, preparing the draft report and then revising it based on the comments received.

I hope the report will serve as a reference document to the planners and the policy makers. Comments / suggestions for further improvement will be most welcome.

Sd /-

(Dr. N. S. Sastry)

HIGHLIGHTS

Total number of small trading enterprises in the country during 1997 was estimated to be **145 lakh**. Of these units **92%** were own-account enterprises and the remaining **8%** were non-directory establishments. About **84 lakh** enterprises were located in the rural areas and **61 lakh** in the urban areas.

About **6%** of the enterprises were wholesale trading units and **82%** were retail trading units. The remaining **12%** enterprises comprised the other trading units (commission agents, auctioneers and free collection categories).

The State of Uttar Pradesh had the highest number of enterprises, followed by West Bengal, Bihar, Andhra Pradesh, Orissa and Maharashtra. These six states together accounted for **more than 61%** of the total trading units.

About **90%** of the rural enterprises and **98%** of the urban enterprises were found to be **perennial** enterprises. **9.3%** of the rural enterprises and **1.5%** of the urban enterprises were **seasonal** in nature. **Casual** enterprises were almost non-existent in both rural (0.9%) and urban (0.3%) sectors. Orissa showed significant percentage (36.8%) of seasonal enterprises in the rural sector.

About **94%** of the rural enterprises and **86%** of the urban enterprises were observed **not** to have maintained accounts. Among the wholesale trading units, 18% in the rural sector and 34% in the urban sector maintained accounts.

At the all-India level, it is seen that **7.6%** of the household enterprises were owned by Scheduled Tribes, **10.7%** by Scheduled Castes and **21.4%** by Other Backward Castes. The remaining **60.2%** of the trading units were owned by Others.

The estimated number of workers engaged in small trading units in India during 1997 was **222 lakh**, of which **121.27 lakh** were in the rural sector and **100.25 lakh** in the urban sector. Among the States, Uttar Pradesh had the highest number of workers, followed by West Bengal, Andhra Pradesh, Maharashtra, Orissa and Bihar. These six states together covered more than 60% of the total number of workers.

Average number of workers per enterprise in the small trading sector was **1.53**. There were **2.77** persons employed in an NDTE and **1.41** persons in an OATE.

About **30 lakh** female workers and **6 lakh** child workers were engaged in the small trading units during 1997. Participation of female or child workers in unorganised trade was more prevalent in the rural areas.

The rural enterprises operated for **10.5 months** on the average whereas, the urban enterprises operated for **11.2 months** in the last 365 days.

Per enterprise value of net additions to fixed assets in small trading units was found to be **Rs.1895**. This was **Rs.1074** for owned assets.

Per enterprise value of fixed assets owned and rented were found to be **Rs 26623** and **Rs 22458**, respectively. In the rural sector, per enterprise value of assets owned were found to be much more than the assets rented. But in the urban sector, rented assets per enterprise were marginally higher than the owned assets.

The small trading units generated **monthly value added** of about **Rs 3927 crore** of which the rural and urban share were **37%** and **63%**, respectively. In terms of percentage gross value added, Uttar Pradesh (13.8%), Maharashtra (10.5%), West Bengal (9.5%), Andhra Pradesh (7.9%) and Tamil Nadu (7.5%) were the five states in the lead.

The GVA per enterprise for the country was observed to be **Rs 4068**. The same was found to be **Rs 3595**, if calculated by factor income approach.

The annual value added by this sector was estimated to be **Rs 44,220 crore** of which the urban and rural shares were **Rs 28,492 crore** and **Rs 15,727 crore**, respectively.

CHAPTER - I

INTRODUCTION

1.1 As a follow-up survey of the Third Economic Census which was conducted in the year 1990, National Sample Survey Organisation conducted a survey on small trading units in its 53rd round. The objective of the survey was to throw up estimates of some important characteristics like number of enterprises, number of workers, value added and trade margins of commodities sold by the enterprises on the basis of the samples selected. In the first report of the series, the estimates have been presented in the form of 12 tables for all-India as well as States. The present report provides the results of the survey in another set of 12 tables for States as well as all-India.

1.2 The coverage of the fifty-third round of the NSS was restricted to all non-directory trading establishments (NDTEs) and own account trading enterprises (OATEs) except the public sector trading enterprises/establishments. The term 'enterprise' has been used in the report in a generalised sense and will mean trading enterprises as well as establishments. All the enterprises covered by the two-digit codes (called divisions) 60 to 68 and three-digit codes (called groups) 040, 052, 053, 054, 059, 060, 061, 063, 069 and 890 under the revised **National Industrial Classification, 1987** (NIC, 1987) were considered for this survey. Strictly speaking, the activity codes 040, 052, ..., 069, which represent various free collection activities for sale, should be covered under agriculture. But value added for such activities are not regularly available from official sources. As such, they are being covered under unorganised trade since the NSS 34th round. The relevant extract of the NIC, 1987 for trading activities is provided in APPENDIX C. In its geographical coverage, the fifty-third round survey covered the whole of the Indian Union except Ladakh and Kargil districts of Jammu & Kashmir, 768 interior villages of Nagaland situated beyond five kilometers of the bus route and 195 inaccessible villages of Andaman & Nicobar Islands. Villages with population more than 20,000 were also kept outside the coverage of the survey.

1.3 All the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The number of first-stage units (**villages** in the rural areas and **UFS blocks** in the urban areas) surveyed were 5988 and 7138 in rural and urban areas, respectively in the central sample. Under the State sample, 6530 villages and 8346 blocks were surveyed. In this round, instead of resorting to hamlet group or sub-block formation, the **whole fsu's were listed**. The distribution of first-stage units in different States for the Central sample was as given in Statement 1.

Statement 1 : Number of first-stage units allotted to different States and UT's for Central sample in NSS fifty-third round.

state/u.t.	number of sample		States/u.t	number of sample	
	villages	blocks		villages	blocks
(1)	(2)	(3)	(4)	(5)	(6)
Andhra Pradesh	488	450	Arunachal Pradesh	48	32
Assam	224	160	Bihar	536	456
Goa	16	16	Gujarat	216	378
Haryana	112	200	Himachal Pradesh	72	48
Jammu & Kashmir	48	64	Karnataka	318	372

Daman & Diu	8	16	Delhi	8	168
Lakshadweep	8	8	Pondicherry	8	32
All - India				6055	7169

1.4 As already mentioned, enterprises were selected in this round from three enterprise classes. The main characteristics on which information were collected are fixed assets, employment, purchase and sale values, other expenditure, other receipts, value added and trade margin of the traded goods. Reference period for collection of data was 'month' except for fixed assets and trade margin, where the reference period used was 'last one year'. An attempt has also been made to tabulate the average time taken to fill up the schedule and also the number of visits required to collect the information from the traders. The estimates are presented by broad industry divisions and/or groups (2- and/or 3-digit levels) of the NIC,1987. In some of the tables, estimates are presented separately for different types of trade, viz. wholesale trade (NIC 60 to 63), retail trade (NIC 65 to 68), commission agents (NIC 64), auctioneers (NIC 890) and other trading units(NIC 040, 052, 053, 054, 059, 060, 061, 063 & 069).

1.5 In the first report of the series, 12 tables were presented providing the information on number of enterprises, number of workers, gross value added, trade margins for different commodity groups and percentage distribution of enterprises by certain characters. In this report, along with the three variables, viz. number of enterprises, number of workers and GVA, some other important variables like fixed assets, net addition to fixed assets, other expenditure and various factor incomes have been presented for the States as well as for all-India. Average number of months the enterprise operated and the average number of days it operated in the working month are also given. The trade margins presented in the first report were obtained in the schedule as direct query from the traders. But the trade margins in this report are derived from the schedule where purchase and sale took place during the reference month. Some amount of difference is, therefore, expected between the two sets of data. But the table giving the distribution of sample enterprises by trade margins was generated on the basis of the observed trade margins only.

1.6 Important concepts and definitions adopted in the survey are explained in Chapter II. Major findings based on the data are discussed in a summarised form in Chapter III. The detailed tables at the All-India as well as the State level are given in APPENDIX A. APPENDIX B gives a note on sample design and estimation procedure followed in arriving at the estimates presented in this report. Industry division/group codes and the corresponding descriptions are given in APPENDIX C.

CHAPTER II

CONCEPTS AND DEFINITIONS

Important concepts and definitions followed in the survey of NSS 53rd round are explained below :

2.1 Trade : Trading is defined as an act of purchase of goods and their disposal by way of sale without any intermediate physical transformation of goods. The activities of intermediaries who do not actually purchase or sell the goods but arrange their purchase and sale and thereby earn remuneration by way of brokerage or commission, are also covered for the purpose of 'trade' survey. Distributive agencies which undertake trading activity on commission basis are also included. In addition, the activities of free collection for sale of honey and forest products like gathering of fodder, grass, etc.; free hunting, trapping and game propagation for commercial purposes; free collection for sale of fish, prawns, crabs and oysters; free collection for sale of waste paper, ash, rags, coal, etc., are also treated as trade for this survey. Separate and distinct trading units of manufacturing concerns like sale shops of Delhi Cotton Mill, Bombay Dyeing, Bata Shoe, etc., and activities like selling of fruit juice, sugarcane juice, etc. which involve a process of transformation marginally are also covered under trade.

2.2 Wholesale trade: In wholesale trade, goods are generally bought from the producer and sold to the retailer. A wholesaler is generally regarded as an intermediary between the producer and the retailer. A wholesale trader sometimes sells goods to other wholesalers or to the users in bulk. Besides, wholesale business is undertaken not only by the merchant wholesalers who buy and sell commodities, but also by the manufacturing wholesalers who maintain distinct and identifiable wholesale trade outlets.

2.3 Retail trade : In retail trade, goods are generally bought from wholesalers or dealers and sold to consumers. The retail trader is an intermediary between a wholesaler and the consumers or users. The retail trader may sometimes purchase goods directly from the producer or manufacturer. Hawkers and peddlers selling goods are considered to be retail traders.

2.4 Trading enterprise: A trading enterprise is an undertaking/unit engaged in trade. An enterprise may be owned and operated by a household or by an institutional body. The activities of the enterprise may be carried on by household members and/or by hiring outside labour.

2.5 Household enterprise: A household enterprise is an enterprise which is run by the members of the household . An enterprise run by two or more households on partnership basis is also considered a household enterprise. In other words, all proprietary and partnership enterprises are household enterprises.

2.6 Non-household enterprise: Non-household enterprises are those which are institutional, i.e. owned and run by the public sector (governments, local self-governments, local bodies, government undertakings,, etc.), the corporate sector, cooperative societies, other types of societies, institutions, associations, trusts,, etc. In unorganised trade, however, public sector enterprises are not covered.

2.7 Own-account enterprise: An enterprise which is run by household workers only (i.e. without any hired worker on a fairly regular basis) is termed as an own-account enterprise. If such an enterprise is engaged in trading, it is termed as an own-account trading enterprise (OATE).

2.8 Establishment: An enterprise which is employing at least one hired worker on a fairly regular basis is termed as an establishment.

2.9 Non-directory establishment : An establishment employing fewer than six workers (household and hired workers taken together) is termed as a non-directory establishment. If such an establishment is engaged in trading activities, it is termed as a non-directory trading establishment (NDTE).

2.10 Worker : A worker is defined as one who is engaged, either full time or part time, in the activity of the enterprise, in any capacity - supervisory or primary - in return for wages/salaries or not, involving any kind of work incidental to or connected with the (trading) activity. The entire set of workers has been divided into two categories, viz. hired workers and other workers, the main distinction being that while the former category of workers is paid some wages or salaries, the latter category of workers is not paid wages /salaries. For instance, a working proprietor or a working family member is treated as a hired worker if he/she gets remuneration for the work in an explicit form, but any receipt other than remuneration is not considered salary or wage and in that case the working proprietor or working family member is categorised as 'other worker'.

2.11 Fairly regular basis : The term 'fairly regular basis' for employment of hired workers means that the enterprise/establishment has engaged hired worker(s) during the **major part** of its period of operation(s) in the last one year. However, it is not necessary that the same worker(s) should be employed throughout the year.

2.12 Duration of operation of enterprise: It indicates the regularity with which the enterprise is run. If an enterprise runs more or less regularly throughout the year, it is a **perennial** enterprise. If an enterprise usually operates during a particular season or fixed months of a year, it is termed as a **seasonal** enterprise. In case the activities of an enterprise are neither perennial nor seasonal in nature but are undertaken occasionally during the reference year, the enterprise is termed as a **casual** enterprise.

2.13 Reference period : It means the period for which information on a particular characteristic is collected. In the NSS 53rd round only one reference period, viz. 'month' was used to collect the data. However, data on trade margins and net additions to fixed assets were collected for the last one year.

2.14 Fixed assets : Fixed assets in connection with the enterprise will mean (i) building (including land) and other construction, (ii) transport equipment and (iii) other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition/construction. The market values of the fixed assets have been considered.

2.15 Trade Margin :Trade Margin of a commodity is the percentage gain in the sale price over its purchase price. Trade margins will be obtained when some transaction of goods takes place and as such will not be applicable for commission agents, auctioneers, etc.

2.16 Trader's net earnings/surplus :The total income generated by an enterprise is distributed over 4 major heads. Interest goes to the loaners, rent goes to the landlords, compensation goes to the workers and the remaining income is retained by the entrepreneur(s). This fourth part is called the trader's net earnings / surplus. In common parlance, it is known as 'net profit'.

2.17 Change in stock : The change in stock has been estimated in value terms as the difference between capital locked up in stock at the beginning and that at the end of the reference month. Credit purchases were also considered while arriving at the capital locked up figures.

2.18 Trading expenses : The value of commodities purchased together with other incidental expenditure like electricity consumed, printing, stationery, postage and telephone charges, transport charges, rent on assets other than land, local rates, taxes, licence fees,, etc. incurred by the unit during the month for trading purpose are considered to be trading expenses of the unit.

2.19 Total receipts : The sale value of all commodities traded by the unit together with the value of trading goods consumed at home and other receipts incidental to trading activities will be considered as total receipts of the unit.

2.20 Value added : This represents the contribution of a trading unit to the economy. Gross value added is calculated by subtracting the value of trading expenses from the total of receipts and change in stock of the unit.

CHAPTER – III

SUMMARY OF FINDINGS

3.0 Introduction: The present report is the second and final volume on the findings of the unorganised trade survey of NSS 53rd round. In the first volume (report number 443) of the series, 12 tables were presented containing the main characteristics of small trading units, namely, number of enterprises, workers, value added and trade margins. The remaining tables of the tabulation plan are given in this report. This report also furnishes the information on the above-mentioned characteristics but the classificatory variables are different. As for example, Gross Value Added **per enterprise** was shown in the first volume; in this volume Gross Value Added **per worker** are given. **Reported** trade margins were shown in the first volume whereas **calculated** trade margins are shown in the second, etc. Other than the above characteristics, information about fixed assets, average number of days / months operated by the enterprises and GVA by factor income approach are also added in the present volume. The summaries of findings of the report are discussed in the form of 20 statements. Some of the statements have been subdivided into two or three parts for presentation of the findings in finer details. It may be mentioned that ‘dash’ (-) or ‘zero point zero’ (0.0) used in the tables will have their usual connotations of ‘not available’ or ‘negligible values’ in respective situations.

3.1.1 Number of FSUs and SSUs surveyed : Statement 1 gives the number of sample FSUs and SSUs surveyed for different states and UTs. It may be seen that in NSS 53rd round, 5988 villages and 7138 UFS blocks were surveyed all over India. Out of these villages and blocks surveyed, data were collected from 72529 and 83146 enterprises respectively. The sample size for the UTs as well as the relatively smaller states like Arunachal Pradesh, Goa, Haryana, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura was small. It is also seen that major 14 states of the country viz. Andhra Pradesh, Assam, Bihar, Gujarat, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal cover more than 90% of the FSUs and SSUs. As such, in most of the statements the estimates are given only for those 14 states where substantial number of units could be netted in the sample. The number of enterprises surveyed per FSU is observed to be 12.1 and 11.6 in the rural and urban areas respectively. At all India level, the SSU/FSU rate is observed to be 11.9 i.e. 12 enterprises per village/block.

3.1.2 Number of sample enterprises : Statement 1a shows the number of sample enterprises for different NIC groups by OATEs, NDTEs and combined. From the statement it is seen that out of about 1.56 lakh enterprises surveyed in NSS 53rd round, only 16% enterprises were NDTEs which clearly suggests that OATEs were abundantly represented in the sample. For wholesale trade, however, the dominance of OATEs was less prominent. There, sample OATEs were found to have accounted for about 57% of the total surveyed enterprises. In fact, for wholesale trade in wood, firewood, leather etc. (NIC 61) and in machinery and equipment (NIC 62), NDTEs were found to be sampled more in number. In free collection category, only 2.5% of the enterprises surveyed were NDTEs. In auctioneering services, only 17 enterprises were caught all over India. Maximum number of enterprises were surveyed from NIC 65 i.e. retail trade in food articles etc. NIC 68 (retail trade n.e.c) was also fairly represented in the sample. Among free collection categories, NIC 052 (firewood from forest), 054 (gums, resins, honey, fruits from forests) and 061 (inland water fishing) showed substantial number of enterprises (mostly OATEs) in the sample. Retail trading enterprises (sub-total: 65.68) accounted for about 90% of the total sample.

Statement 1: Number of sample FSUs and SSUs surveyed in NSS 53rd round

3.2.1 Estimated number of enterprises: The estimated number of OATEs, NDTEs and their total for all states and UTs are given in statement 2. It is observed that out of 145 lakh enterprises in India 133 lakh (92%) are OATEs and the rest 12 lakh (8%) are NDTEs. It is also seen that about 84 lakh (58%) enterprises are located in the rural areas and 61 lakh (42%) in the urban areas. The percentage of NDTEs is observed to be only 4 in case of rural enterprises and 15 in case of urban enterprises. Among the states, sizable number of NDTEs are observed in West Bengal (0.40 lakh), Maharashtra(0.39 lakh), Andhra Pradesh (0.29 lakh) and Kerala (0.25 lakh) in the rural areas. In the urban areas substantial number of NDTEs are found in Tamil Nadu(1.14 lakh), Maharashtra(1.06 lakh), West Bengal(1.04 lakh) and Andhra Pradesh(0.68 lakh). OATEs are abundant in almost all the states and they are more in number in the rural areas. Uttar Pradesh, West Bengal, Orissa, Bihar and Andhra Pradesh in the rural sector and Uttar Pradesh, West Bengal, Tamil Nadu, Maharashtra and Andhra Pradesh in the urban sector are leaders in the number of OATEs. Overall estimates of number of enterprises is highest in Uttar Pradesh followed by West Bengal, Bihar, Andhra Pradesh and Orissa.

OATEs, NDTEs and thier total at 3-digit levels of NIC. It is seen that out of a total of about 145 lakh small trading units in India, OATEs and NDTEs are estimated to be 133 lakh and 12 lakh respectively. Maximum number of such enterprises are recorded against retail trade (sub-total 65 to 68). Contribution of NIC 65 (retail trade in food products) is found to be maximum among all NICs. At 3-digit level, NIC 650, 688 and 655 show significantly high number of enterprises. In wholesale trade,

NIC 60 (wholesale trade in food and agricultural raw materials) has the highest contribution. NIC 601 and 638 are found to have substantial number of enterprises. Auctioneering services (NIC 890) are observed to be very less in number (only 1228 all over India). But enterprises in free collection have a sizable number. There are about 16 lakh OATEs and 11 thousand NDTEs which traded in freely collected goods. In most of the NIC groups, OATEs are found more in number than the NDTEs, but for NIC 609, 615, 623, 632, 634 etc., the situation is found to be reverse where NDTEs are more in number. As expected, proportion of NDTEs among wholesale trading units (19%) is more than that among retail trading units(8 %).

3.3.1 Key estimates of unorganised trade: The key estimates of unorganised trade obtained from NSS 53rd round have been presented in statement 3 in a concised form. Three basic characteristics of unorganised trade viz. number of enterprises, persons employed therein and **monthly** gross value added by the enterprises have been considered in the statement. The estimates are provided separately for wholesale trade, retail trade and all trading enterprises.

Statement 3: Key characteristics of NSS 53rd round

characteristic	wholesale trade	retail trade	all
Enterprises (lakh)			
(i) total	8.02	119.40	145.04
(ii) OATE	5.86	109.79	132.75
(iii) NDTE	2.17	9.60	12.29
Employment (lakh)			
(i) total	15.12	176.48	221.52
(ii) female	0.44	20.01	30.24
(iii) children	0.26	4.16	6.15
(iv) hired	4.09	13.94	18.86
(v) full time	14.45	163.67	206.57
Gross value added (GVA)			
(i) total (crores)	561.89	3101.85	3927.13
(ii) GVA per enterprise(Rs)	7003	2597	2708
(iii) GVA per worker(Rs)	3717	1758	1773

It may be observed that in the unorganised sector, retail trading units (119 lakh) are outnumbering the wholesale units (8 lakh) by a long margin. However, this feature is less prominent in NDTEs than in OATEs. Among 222 lakh (approx) workers engaged in the unorganised trade sector, it is seen that about 15 lakh workers are employed by the wholesale trading outlets, whereas, about 176 lakh workers are engaged by the retail trading outlets. The employment figures for females suggest that sizable proportions of such workers are engaged in the other trading units (free collection, auctioneering and commission agents taken together). Considering the relatively small number of wholesale enterprises in India (8.02 lakh), the number of hired or full-time workers engaged in such enterprises are found to be substantial. Gross value added by the wholesale units is about one seventh of the total GVA. The retail trading units add value of Rs 3102 crore which amounts to 79% of the total GVA. Gross value added per enterprise and per worker are estimated to be Rs 2708 and Rs 1773 respectively. It may be noted that average value added by a wholesale unit (Rs 7003) is much more than that added by a retail unit (Rs 3102). The variation in the average GVA between wholesale and retail trade is reduced when per worker estimates are taken.

Statement 3a: Comparable statement showing the number of enterprises and number of persons employed in unorganised trade over NSS rounds								
NSS round	number of enterprises ('00)				number of persons employed ('00)			
	wholesale trade	retail trade	others		Wholesale trade	retail trade	others	all
34th round (1979 - 80)	1178 (0.0)	57092 (0.0)	1078 (0.0)	59349 (0.0)	1951 (0.0)	86256 (0.0)	1731 (0.0)	89938 (0.0)
41st round (1985 - 86)	5163 (338.3)	89408 (56.6)	3699 (242.8)	98270 (65.6)	11487 (488.8)	143366 (66.2)	4724 (172.9)	159577 (77.4)
46th round (1990 - 91)	5503 (6.6)	105961 (18.5)	27618 (646.6)	139082 (41.5)	11776 (2.5)	162857 (13.6)	44665 (845.5)	219298 (37.4)
53rd round (1997)	8024 (45.8)	11940 (12.7)	125080 (352.9)	145044 (4.3)	15118 (28.4)	176478 (8.4)	29926 (-49.2)	221522 (1.0)

Note :- figures within bracket show % increase from previous round.

3.3.2 Comparison of estimates obtained in various rounds: Statement 3a shows the number of enterprises and persons employed in unorganised trading enterprises over 4 time periods viz. 34th round (1979 - 80), 41st round (1985 - 86), 46th round (1990 - 91) and 53rd round (1997) of NSS. It is seen that total number of enterprises has shown an upward trend in the four time periods. But the growth has somewhat slowed down after 1990 - 91. The wholesale trading units grew 5 times after 34th round. They remained almost the same in 41st and 46th rounds. But after 1990 - 91, there is a sudden rise in the number of such units. The total number of enterprises has grown by about 41 lakhs in 46th round as compared to the 41st round. It is seen that the rise was due to the rise in the number of trading units other than wholesale and retail trade. Total employment has grown steadily in 34th, 41st and 46th rounds. The growth is minimal after 46th round. Number of persons employed has taken a big jump after 34th round for wholesale as well as retail trade. The growth has slowed down in 53rd round. The growth in the number of persons employed during 46th round is seen to be due to the growth in the employment generated by the other trading units.

3.4.1 Ranking the major states in respect of unorganised trade: In statement 4 the major 16 states (including Delhi) of the country have been ranked on the basis of the 3 basic characteristics, namely, **number of enterprises, employment and (monthly) value added.**

Statement 4: Major states ranked in order of enterprises, employment and gross value added (GVA).									
states/uts	enterprises			employment			gross value added		
	number	% share	RANK	number	% share	RANK	Rupees	% share	RANK

Delhi	205718	1.42	16	358877	1.62	16	1205132387	3.70	13
India	14504370	100	-	22152219	100	-	39271288639	100	-

It has been observed that the above 16 states contribute about 97% of the total enterprises, employment and gross value added of the country. Hence the comments have been restricted to those major states only. It may be noted that the ranks given to the states on the basis of number of enterprises and employment are more or less consistent but their ranks according to the share of GVA are varying considerably. This is because of the composition of the states in respect of types of enterprises and types of trade. The states where concentration of the NDTEs or the wholesale enterprises are more are expected to add more value than the states where OATEs or free collection units are more in number. This point is well established by the observations given below. The state of Uttar Pradesh is ranked first in respect of the number of enterprises and employment. But the rank of the state is observed to be **second** in respect of its share in the GVA of the nation. Maharashtra stands 6th in the number of enterprises, 5th in employment but ranked **first** in its share of GVA. Orissa is 5th in enterprises, 4th in employment but **14th** in its share of GVA. This is perhaps due to the existence of a sizable number of enterprises in Orissa in the free collection category which contribute marginally in GVA. In case of Delhi, it is seen that the rank of the state according to the share in GVA is **13th** although it stands 16th on the basis of estimated enterprises and employment which clearly indicates that Delhi has a concentration of relatively bigger enterprises than lowly placed states like Orissa, Assam and Haryana each of which obviously has a bigger share in the number of enterprises.

3.5 Contribution of industries at the 3-digit level : Statement 5 and 5a delve into the 3-digit level composition of the industries in wholesale (Statement 5) and retail (statements 5a) trading activities. Percentage shares of individual NIC groups in respect of the number of enterprises, number of workers and gross value added are also given in the State ments to indicate the relative importance of the individual industries in their contributions. The enterprises have been arranged in order of their percentage share in GVA at the 3-digit level of NIC.

Statement 5 : Contributions of particular industries to the wholesale trade

NIC group	number of enterprises	% share in total	number of workers	% share in total	gross value added (Rs.)	% share in total

retail trade	11940447	100.00	17647856	100.00	31018507538	100.00

It is observed that there were about 8 lakh wholesale trading units employing about 15 lakh workers and 119 lakh retail trading units employing about 176 lakh workers in 1997. The wholesale enterprises added value of about Rs. 562 crores whereas the retail trading units contributed about Rs. 3102 crores to GVA. It is also seen that the NICs 600 (w.t in metal scraps) are the four industries which contributed quite substantially to the total number of wholesale trading units. They account for about 58.4% of the wholesale units. The maximum number of wholesale enterprises, however, came from the two NICs, viz. 601 (w.t in basic food stuffs) and 638 (w.t in metal scraps). Similarly, the contributions of the NICs 650 (r.t in cereals), 651 (r.t in vegetables), 655 (r.t in pan, bidi etc) and 688 (non-specialised r.t) were noteworthy in the number of retail trading units. These 4 industries jointly contributed about 62% of the total number of retail enterprises. The maximum number of units in retail trade came from NIC groups (r.t in cereals) and 688 (non-specialised r.t). In the total number of workers engaged by the wholesale and retail trading units, significant contributions are observed from NIC 601 (w.t in basic food stuff), 638 (w.t in metal scraps), 600 (w.t in cereals), 609 (w.t in textiles) and 605 (w.t in live animals) in wholesale trading activities and NIC 650 (r.t in cereals), 688 (non-specialised r.t), 655 (r.t in pan, bidi etc.), 651 (r.t in vegetables), and 689 (r.t not elsewhere classified) in retail trading activities. These industries contributed about 58.5% of the workers engaged in wholesale trade and 65.6% of the workers of the retail trade. Maximum workers are engaged by the industries 601 (w.t in basic food stuff) and 638 (w.t in metal scraps) in wholesale trade and 650 (r.t in cereals) and 688 (non-specialised r.t) in the retail trade. Gross value added by the wholesale trade are substantial for NICs 600 (w.t in basic food stuffs), 601 (w.t in basic food stuff), 609 (w.t in textiles), 615 (w.t in medicines) and 639 (w.t not elsewhere classified). They contributed 71.3% of the total GVA. In retail trade, 61.4% GVA is contributed by the NICs 650 (r.t in cereals), 651 (r.t in vegetables), 660 (r.t in textiles), 688 (non-specialised r.t), 683 (r.t in building materials) and 689 (r.t not elsewhere classified). The maximum contributions came from the NICs 650 (r.t in cereals) and 688 (non-specialised r.t).

3.6.1 Distribution of enterprises by number of workers : Statement 6 shows the percentage distribution of enterprises by number of workers. It is observed that at the all-India level about 90% enterprises were covered by the size classes 1 and 2. About 60% of the enterprises were accounted for by the class 1. The overwhelming presence of OATes in the unorganised trade sector may be the reason behind this finding. Concentration of enterprises in size class 1 was found to be the minimum for Andhra Pradesh (46%) and the maximum for Bihar (70%). Percentage of enterprises in size class 2 was observed to be maximum (42%) in Andhra Pradesh and the minimum in Assam (21%). In size class 3, Orissa, Andhra Pradesh, Maharashtra and Tamil Nadu showed higher proportion of enterprises whereas Tamil Nadu and Madhya Pradesh recorded sizable proportions of enterprises in employment size class 4. It may be noted that in size class 0 also, certain proportions of enterprises were present in all the above States. Those were the cases where enterprises did not operated during the reference month. About 0.8% of enterprises were observed in the size class 5 or more. These may have been the cases of bigger OATes (with many household workers) or misclassified DTEs.

Statement 6 : Percentage distribution of enterprises by number of workers in the 14 major States

3.6.2 Distribution of OATEs and their TOTAL by size class of workers: Statement 6a provides the distribution of number of enterprises and the corresponding percentages by number of workers. The information has been provided in the statement sectorwise for OATEs, NDTEs and their total. It may be observed that OATES were concentrated in the size classes 1 and 2, whereas, the concentration of NDTEs were observed against the size classes 2 and 3. In urban areas, however, sizable number of enterprises were also seen which employ three workers. It is interesting to note that there 7366 OATEs and 3435 NDTEs which employed 6 workers or more. There is a chance of misclassification of enterprises in those cases. Among all size classes of workers, highest percentage of enterprises were observed against size class 1. This is happening because of the huge number of estimated OATES. Among the NDTEs about 89% of the enterprises were accounted for by the 3 size classes, viz., 2,3 and 4. More than 94% of the OATES were concentrated in size classes 1 and 2.

3.7 Distribution of full-time and Part-time workers in States : Statement 7 gives the percentage distribution of full-time and part-time workers for the OATEs, NDTEs and their total in the 14 major States. The statement has been presented separately for rural and urban

sectors of the States. It is seen that OATEs in India employ 93% full-time and 7% part-time workers whereas NDTEs engage 95% full-time and 5% part-time workers. Among the States, Maharashtra, Karnataka, Orissa and Uttar Pradesh have relatively higher proportion of part time workers in OATEs. Whereas, Andhra Pradesh, Madhya Pradesh and West Bengal are the States which record higher proportion of part-time workers in NDTEs. If OATEs and NDTEs are considered together, it is seen that Orissa, Maharashtra, Karnataka and Uttar Pradesh are the 4 leading States in the number of part-time workers. All the States in general employ high proportion of full-time workers in OATEs as well as in NDTEs. It is interesting to note that the OATEs are engaging more part-time workers than the NDTEs. This feature is common in almost all the States.

Statement 7 : percentage distribution of full-time and part-time workers for the different enterprise types

state	rural+urban					
	OATE		NDTE		OATE + NDTE	
	full-time	part-time	full-time	part-time	full-time	part-time

3.8.1 Workers per enterprise : Tables 8 and 8a show the number of workers per enterprise by category of workers in the 14 major States. From tables 8, it is observed that worker per enterprise at the all-India level was more in the urban enterprises than in the rural enterprises and this feature was true for all States excepting Orissa. For Orissa, the average for full-time workers in rural areas is more than the urban average. The all-India estimate of workers per enterprise is 1.53 persons of which 1.42 persons are working full-time in an enterprise. Worker per enterprise was highest (1.70) for the State of Andhra Pradesh and it was lowest (1.35) for the State of Assam. The workers engaged in small trading activities were mainly full-time workers. From Table 8a, it is observed that female worker per 1000 enterprises was highest (560) for Orissa and it was much higher than all-India estimate (208) for the States like Andhra Pradesh, Tamil Nadu, Karnataka and Madhya Pradesh. The child worker per 1000 enterprises was highest (109) for the State of Orissa and it was higher than the all-India

estimate (42) for States like Madhya Pradesh, Assam, Andhra Pradesh and Bihar. Child worker per 1000 enterprises was lowest for the State of Kerala (9).

Statement 8 : Per enterprise total and full-time workers for the major States
India

state	rural		urban		rural + urban	
	total workers	full time workers	total workers	full time workers	total workers	full time workers

3.8.2 Workers per enterprise at the all-India level : Statement 8b shows the employment rate (average number of workers per enterprise) for each enterprise type at the all-India level.

Three categories of workers, namely , full-time , hired and total workers, have been considered in the Statement. It may be observed that the average number of workers per NDTE was 2.77 while it was 1.41 per OATE at the all-India. It is also seen that the employment rate for urban areas was more than that of the rural areas for OATEs as well as NDTEs. The majority of the workers engaged by either an OATE or an NDTE were found to be full-time workers. One interesting feature of the NDTEs was that the number of hired workers engaged by such enterprises was almost 50% of the total number of workers. This finding was the same for rural as well as urban sectors.

Statement 8b: Number of workers per enterprise (total, full-time and hired) by enterprises type at the all-India level

sector	enterprise type	rural + urban				
		per enterprise			estimated	
		total workers	full-time workers	hired workers	employment	enterprises
rural	OATE	1.40	1.29	0.01	11358254	8100243

3.9 Distribution of female and child workers over the industries : Table 9 shows the percentage distribution of female workers and Table 9a that of child workers over different NIC groups. From **table 9**, it is observed that in rural areas female workers were mostly concentrated in the retail trading (54.6%) and free collection (44.4%) activities while in urban areas most of the female workers were engaged in retail trading activities (93.6%) only. In rural areas, out of the total female working strength, the highest proportion of females was found to be engaged in the activity of gathering of uncultivated materials such as gum, lac, honey, wild fruits, leaves etc. (NIC 054) and then in the retail trading enterprises in cereals and pulses, tea, coffee, spices etc., (NIC 650). In urban areas, female workers were engaged mainly in the NIC groups 650 and 688.

Statement 9 : Percentage of female workers in specified NIC groups in rural and urban India

Table 9a shows the distribution of total child workers by various trading activities. The feature is similar to the distribution of female workers. In rural sector, children are engaged mostly in retail trade (55.8%) and free collection activity (40.3%) while in urban sector they are concentrated mainly in retail trading activities (92.9%). In rural areas, highest proportion of children are engaged in the NIC group 054 (31.9%) and then in the NIC group 650 (25.7%) and in urban areas highest proportion of children are engaged in the industry group 650.

Statement 9a : Percentage of child workers in specified NIC groups in rural and urban India

3.10 Proportions of female workers and child workers to total workers : The proportions of female workers and child workers among total workers over the different trading activities have been presented in the Statements 10 & 10a. The proportion of 15 or more female workers per 100 workers in rural sector are significantly high for NIC groups 054 (46.43%) and 053 (42.83%). In the urban sector, for NIC groups 053 and 040, higher proportions of females were working than males. From Statement 10a, it may be noted that the proportion of 4 or more child workers per 100 workers was the highest in NIC group 614, i.e. wholesale trade in petrol, mobile oil and allied products (10.23%). Employment of child workers was prominent for NIC groups 054 and 053 in rural areas. Child workers were engaged in a lesser proportion in urban areas than in rural areas. In urban areas, the proportion of child workers was the highest in the activity of wholesale trade in un-manufactured tobacco, pan leaves, ganja, etc., (NIC code : 603).

Statement 10 : NICs with 15 or more female workers per 100 workers in rural and urban India

rural			Urban		
NIC group	description of activity	% of female workers	NIC group	description of activity	% of female workers

3.11 Percentages of female and child workers to total workers : Statements 11 and 11a show the major States arranged according to the percentage of female workers and the percentage of child workers among total workers. It is observed that nearly 14 workers out of 100 were female workers at the all-India level and the participation of the females in the small trading activities was highest for the State of Orissa (33.34). The States of Andhra Pradesh (25.62) and Tamil Nadu (19.45) were in the next two positions. Participation of females in the small trading activities was found to be the lowest for the State of Assam (4.55). West Bengal is just before it (4.80). From Statement 11a, it is observed that nearly 3% of total workers were child workers. This proportion was above 4% for the States of Orissa (6.48%), MP (4.69%) and Assam (4.04%). Employment of child workers is less than 1% for Kerala

(0.72%), Punjab (0.83%) and Delhi (0.87%). It may be noted that Orissa recorded the maximum proportion of female as well as child workers among the 14 major States of India.

Statement 11 : States arranged in order of percentage of female worker to total workers

India			
state	% of female workers	state	% of female workers
Orissa	33.64	Gujarat	8.63
Andhra Pradesh	25.62	Delhi	7.86
Tamil Nadu	19.45	Uttar Pradesh	6.69
Karnataka	17.50	Punjab	6.24
Madhya Pradesh	15.14	Rajasthan	5.89
Maharashtra	13.29	West Bengal	4.80
Kerela	11.91	Assam	4.55
Bihar	8.89		
		India	13.65

Statement 11a: States arranged in order of percentage of female worker to total Workers

India			
state	% of child workers	state	% of child workers
Kerala	0.61	Rajasthan	2.23
Punjab	0.83	Andhra Pradesh	2.83
Delhi	0.86	Bihar	3.48
Tamil Nadu	1.00	Uttar Pradesh	3.87
Gujarat	1.08	Assam	4.04
Maharashtra	1.29	Madhya Pradesh	4.69
West Bengal	1.41	Orissa	6.48
Karnataka	2.23		
		India	2.78

3.12 Gross Value Added per worker : Statements 12 and 12a present the GVA per enterprise and GVA per worker for the 14 major States (Statements 12) and for the various NIC divisions/groups (Statement 12a), respectively. From Statement 12, it may be observed that in India the value added by small trading units was Rs. 1773 per worker. The value added per worker in the urban sector was almost 2.1 times the value added per worker in the rural sector. Punjab contributed the highest GVA per worker by the small trading units and Orissa the lowest (value added per worker in Orissa was one-third that of India) in this regard. GVA per enterprise for urban areas was 2.4 times that for rural areas. Statement 12a provides value added per worker by the various NIC divisions/groups. It may be observed that per worker value added by small trading units was the highest for industry division 62 (wholesale trade in machinery and equipment) which was slightly less than 5 times the value added by all industries taken together. Value added by the wholesale trading units was approximately 3.5 times the value added by the retail trading units. The free collection activity had the lowest value added per worker (Rs.676). The urban-rural ratio of value added per worker in wholesale trade was 3.64 and it was 1.73 for retail trade.

Statement 12 : GVA per enterprise (Rs.) and GVA per worker (Rs) for 14 major States						
state	rural		Urban		rural + urban	
	GVA/ enterprise	GVA/ worker	GVA/ enterprise	GVA/ worker	GVA/ enterprise	GVA/ worker
Andhra Pradesh	1388	831	3863	2219	2410	1417
Assam	1728	1368	3848	2468	2367	1750
Bihar	1408	1077	3437	2278	1887	1393

Kerela	3151	2376	5842	3459	4335	2918
Madhy Pradesh	1457	908	4325	2598	2712	1663
Maharashtra	2369	1537	5161	2866	3849	2298
Orissa	670	390	2791	1933	943	562
Punjab	4055	2974	4904	2985	4544	2981
Rajasthan	2169	1591	4807	2905	3432	2283
Tamil Nadu	1515	1017	4537	2537	3447	2052
Uttar Pradesh	1607	1222	3091	2090	2225	1609
West Bengal	1780	1410	3010	1900	2250	1625
India	1722	1195	4068	2472	2708	1773

3.13.1 Fixed assets - owned and hired : Statement 13 shows the per enterprise value (Rs) of fixed assets owned and hired by the 14 major states of India. The percentage of owned assets among the total assets are also provided in the statement for the states. It may be observed that at all India level the per enterprise value of owned assets (Rs 26623) is higher than the hired assets (Rs 22458) and owned assets is constituting about 54.2% of the total assets. Among the states, Punjab records highest value of assets owned and hired followed by Maharashtra and Gujarat. Orissa is found to record the lowest value of fixed assets per enterprise while Punjab shows the highest value. Percentage of assets owned per enterprise is observed to be maximum for Assam followed by Bihar and Orissa. Interestingly, all the three states mentioned above have recorded per enterprise fixed assets lower than the national average.

Statements 13: Per enterprise value of fixed assets owned and hired (Rs) and percentage of owned assets for 14 major states

states	fixed assets per enterprise (Rs)			rural+urban
	owned	hired	total	percentage of fixed assets owned
Andhra Pradesh	18914	19987	38901	48.60
Assam	15728	6776	22504	69.89
Bihar	12288	5543	17831	68.91
Gujarat	46927	33391	80318	58.43
Karnataka	24283	23982	48265	50.31
Kerala	46982	46014	92996	50.52
Madhya Pradesh	26110	12875	38985	66.97
Maharashtra	50302	49036	99338	50.64
Orissa	3911	1864	5775	67.72
Punjab	63632	62865	126497	50.30
Rajasthan	45678	40321	85999	53.11
Tamil Nadu	24091	38046	62137	38.77
Uttar Pradesh	18957	12248	31205	60.75
West Bengal	14266	12404	26670	53.49
India	26623	22458	49081	54.24

3.13.2 Fixed assets by trade types : Statement 13a provides per enterprise fixed assets owned and hired by wholesale trade, retail trade and all trade types for different enterprise types in India. The percentage of owned assets among total assets and also the sample enterprises under each trade type are presented in the statement. It may be observed that among the OATEs, fixed assets per enterprise is uniformly higher in wholesale trade and the percentage share of owned assets among total fixed assets is more for the retail trading units. In case of NDTEs, per enterprise hired assets is more for wholesale trade but owned assets is almost same for the wholesale and retail trade. It is also observed that the percentage of owned assets among total fixed assets is more for the OATEs than the NDTEs. It may be noted that the sample number of enterprises for wholesale and retail trading enterprises do not add up to the sample number for all trade types. This is because of the existence of other trading enterprises.

Statement 13a: Per enterprise fixed assets owned and hired (Rs) for wholesale and retail trade					
type of trade	per enterprise fixed assets (Rs)			percentage of fixed assets owned	sample number of enterprises
	owned	hired	total		
OATE					
wholesale	25429	28179	53608	47.43	4723
retail	21898	15883	37781	57.58	120045
all	19897	14825	34722	57.30	131195

all	26623	22458	49081	54.24	155675

3.13.3 Different types of fixed assets owned and hired: Statement 13b shows the per enterprise fixed assets by type of assets in the rural, urban and all India. It is seen that 'building and other construction' accounts for the major part of fixed assets for rural as well as urban India. At all India level, per enterprise values of 'building and other construction' is found to be 87% of the total fixed assets; the corresponding percentages in the rural and urban areas being 82% and 88% respectively. The value per enterprise of hired assets in this category is found to be less than the owned assets in the rural areas but more than the owned assets in the urban areas. This may be because of the fact that the enterprises in the rural areas have a tendency to depend on their owned assets. As expected, the per enterprise value of all types of fixed assets in the urban areas are in general more than those in the rural areas. The incidence of hiring of 'transport equipment's' and 'other fixed assets' is found to be less in both the sectors.

Statement 13b: Per enterprise value (Rs.) of fixed assets owned and hired by type of fixed assets

type of assets	per enterprise value (Rs) of fixed assets		All
	owned	hired	
Rural			
bldg. and other const.	11146	4969	16115

3.14 Net additions to fixed assets : Statement 14 shows the per enterprise value (Rs) of net additions to fixed assets for the major 14 states for rural, urban and combined sector. It is observed that the average net additions to fixed assets in India is maximum for Kerala followed by Tamil Nadu and Gujarat. Orissa records the minimum net additions to fixed assets. It is interesting to note that the average net additions to fixed assets is same for Assam and Bihar. For hired assets, net additions are substantial in the states of Kerala, Tamil Nadu and Rajasthan. In respect of

Statement 14: Net addition to fixed assets (Rs) per enterprise for 14 major states

states	net additions to fixed assets (Rs) per enterprise								
	rural			Urban			rural + urban		
	owned	hired	all	owned	hired	all	owned	hired	all
Andhra Pradesh	553	273	826	1526	1959	3485	955	968	1923

Maharashtra	1048	445	1493	2853	1657	4510	2004	1087	3091
Orissa	53	14	67	468	268	736	107	46	153
Punjab	1142	660	1802	1870	1618	3488	1561	1211	2772
Rajasthan	757	589	1346	1644	2410	4054	1181	1460	2641
Tamil Nadu	680	497	1177	2162	3886	6048	1627	2665	4292
Uttar Pradesh	529	264	793	802	1023	1825	643	580	1223
West Bengal	328	42	370	1166	675	1841	648	283	931
India	551	269	820	1797	1583	3380	1074	821	1895

owned assets, however, Gujarat and Maharashtra are found to have added substantial value on the average after Kerala. It is also observed that the average net additions to fixed assets (hired and owned) are more for the urban areas in comparison to their rural counterparts. Orissa and Assam are the two states which record minimum values of net additions to fixed assets in the rural and urban areas respectively. Kerala shows maximum values of net additions to fixed assets in both the sectors.

3.15 Incidental expenditure for OATEs and NDTEs : Statement 15 presents the per enterprise value (Rs) of 'other expenditure' (which are incidental to the entrepreneurial activity) for OATEs and NDTEs in India. The estimates are presented for wholesale as well as retail trading enterprises. As expected, such expenses are always higher in wholesale trade than in retail trade and it is true for OATEs as well as NDTEs. It is also observed that per enterprise expenditure on certain items are more in comparison to other items in OATEs.

Statement 15: Per enterprise value (Rs.) of 'other expenditure' by items of Expenditure				
India	Rural+Urban			
	wholesale		retail	
items of expenditure	OATE	NDTE	OATE	NDTE
packing materials	94	963	35	118
other consumable stores	31	76	8	24
electricity charges	37	185	37	190
printing & stationery charges	13	115	5	54
building - repair & maintenance	13	34	6	29
other - repair & maintenance	27	101	10	50
postage & telephone charges	63	498	11	163
transport charges	579	2097	116	545
rent on asset except land	88	411	59	335
taxes, licence etc	41	365	14	223
local rates	33	115	10	75
any other expenses	250	643	73	311
total trd. Expenses	1267	5587	384	2119

The items were 'transport charges', 'packing materials' 'rent on assets except land' and 'other expenses'. For NDTEs, other than the above four items, substantial expenditure per enterprise is also seen against 'electricity charges', 'postage & telephone charges' and 'taxes, licence etc'. The expenditure on repair and maintenance of buildings for a retail OATE is minimum (only Rs.7) and expenditure on transport charges for a wholesale NDTE is maximum (Rs. 2103). The wholesale : retail ratio of other expenditure is 3.13 for OATEs and 2.37 for NDTEs at all India level.

3.16.1 Gross value added by two approaches: Statement 16 gives the gross value added (GVA) per enterprise in two different approaches at all India level for rural as well as urban sectors of the 14 major states. The GVA as calculated by the addition of the four **Factor Incomes** (*factor income approach*) has been compared with the GVA calculated in usual way as: **Receipts - Expenses + Change in Stock** (*direct approach*). It may be observed that the GVA per enterprise by direct approach has resulted in giving higher values than the GVA per enterprise obtained

from factor income approach at all India level. This is true for rural and urban areas. While looking at the states, however, reverse picture is seen against the following states: Assam(r&u), Karnataka(r&u), Tamil Nadu(r&u) and Punjab(u) where the estimate thrown up by the factor income approach is found to be more than that by the direct approach. Substantial difference is observed in the estimates by the two approaches in the following cases: Punjab (r), Assam(u), Kerala(u) and Maharashtra (u). It is interesting to note that the per enterprise estimates of GVA by the two approaches are almost equal in the rural areas of **Orissa**.

Statement 16: Per enterprise GVA by factor income approach and direct approach in the 14 major states

States	Rural		urban	
	GVA/ent by factor income approach	GVA/ent by direct approach	GVA/ent by factor income approach	GVA/ent by direct approach
Andhra Pradesh	1287	1388	2993	3863
Assam	2258	1728	6009	3848
Bihar	1233	1408	2609	3437
Gujarat	2247	2553	4505	4766
Karnataka	1565	1559	4295	3765
Kerala	2547	3151	4905	5842
Madhya Pradesh	1156	1457	3785	4325
Maharashtra	1901	2369	4285	5161
Orissa	649	670	2648	2791
Punjab	2504	4055	3933	4904
Rajasthan	1805	2169	3743	4807
Tamil Nadu	1432	1515	3933	4537
Uttar Pradesh	1419	1607	2697	3091
West Bengal	1476	1780	2580	3010
India	1486	1722	3595	4068

3.16.2 Statement 16a provides the comparison of per enterprise GVA for OATEs and NDTEs by direct approach and by factor income approach. It is seen that the estimates thrown up by the two approaches are more or less close to each other except for urban NDTEs where a difference of about Rs 4000 is observed between the two estimates. In general, the difference in estimates for OATEs is found to be less than that for NDTEs. Estimated GVA per enterprise is found to be higher for OATEs as well as NDTEs when calculated by direct approach.

3.17 Calculated and observed trade margins: Trade margins at the all-India level for selected commodity groups are presented in statement 17 for wholesale and retail trading activity. The statement enables one to compare the trade margins reported in the schedule with those calculated from the purchase and sale prices of the commodities traded during the reference month. The calculated trade margins are obtained by using the formula:

$$\text{Trade Margin} = \left\{ \frac{\text{average sale price} - \text{average purchase price}}{\text{Average purchase price}} \right\} \times 100$$

It may be seen that the calculated trade margins are negative in as many as 6 cases but the observed trade margins are always positive. This may be due to the fact that the sale price of the trade commodities in certain cases is lower than the corresponding purchase price in the reference month. The commodity groups showing negative trade margins are: *bidi*, Cigarette, etc., precious stones, bulbs and tubes, note books etc., iron rods in the wholesale trade and books and periodicals in the retail trade. The margins in the wholesale trade are, in general, lower than the corresponding retail rates and this feature is common for observed as well as calculated trade margins. However, for certain commodity groups like footwear, textiles, artificial jewellery, TV-VCP-VCR, washing machines, crockery & glassware, cane & bamboo products, coal, coke, firewood, etc., the calculated trade margins for wholesale trade are observed to be more than the corresponding retail rates. The observed trade margins differ markedly from the corresponding calculated margins in case of the following commodity groups: spices, fruits, bidi, cigarette etc., toilet preparations, cotton textiles, jewellery, crockery & glassware, fertilizers, soft drinks, wine and intoxicants, etc. Calculated trade margins for jewellery and coal, coke, etc., are found to be abnormally high.

Statement 16a: Per enterprise GVA (Rs) for OATEs and NDTEs by factor income approach and by direct approach

enterprise type	GVA/ent by factor income approach	GVA/ent by direct approach	India
			Percentage difference
		<u>Rural</u>	
OATE	1335	1552	16.25
NDTE	5365	6110	13.88
		<u>Urban</u>	
OATE	2523	2892	14.62
NDTE	9658	10718	10.97
		<u>Rural+Urban</u>	
OATE	1799	2074	15.29
NDTE	8564	9545	11.45

3.18 Number of months/days operated by the enterprises: Statements 18 and 19 give the number of months and number of days operated by the enterprises on the average in the last year and last working month respectively. The statements have focussed on the OATEs and NDTEs segregating them by their durations of operation. From statement 18, it is seen that OATEs on the average operate for lesser number of months than the NDTEs in perennial and casual enterprises. But for seasonal enterprises in the rural areas, NDTEs work for lesser number of months. The number of months operated is highest for perennial, then for casual and then for seasonal enterprises. This is true for both the sectors. The all India average for number of months operated by urban enterprises(11.2 months) is more than that by their rural counterpart (10.5 months). From statement 19 it is observed that number of days operated in the last working month is maximum for perennial enterprises, then for seasonal and then for casual enterprises in both the sectors. Days operated by the OATEs is less than that of the NDTEs in the rural areas but the reverse case is observed in the urban areas. In general, the urban enterprises are found to operate for more number of days than the rural enterprises. This observation is true for perennial, seasonal and casual enterprises. The all India average for number of days operated by an urban enterprise (26.1 days) is higher than the corresponding average (25.2 days) in the rural enterprises.

Statement 17: Calculated and observed trade margins for selected commodity groups at the all-India level

OATE	26.1	24.7	19.6	26.1
NDTE	25.9	26.7	25.0	25.9
OATE+NDTE	26.1	25.0	19.7	26.1

3.19 Number of visits required to fill up a schedule: Statement 20 shows the average number of visits required to canvass a schedule 2.41.2 in the four sub-rounds (a sub-round means a period of 3 months' duration) of NSS 53rd round. It is seen that the number of visits required for filling up a schedule is **more than one** (1.8 visits at all India level) which vindicates the difficulty in collection of data from trading enterprises. The average number of visits required for an urban schedule is more than that for a rural schedule. This may be due to increased reluctance on the part of the respondents in the urban areas. Number of visits required for an OATE is less as compared to the NDTEs.

Statement 19: Number of visits required to canvass a schedule in different sub-round

Sub Round	enterprise type	rural	urban
		number of visits	number of visits
First	OATE	1.6	1.8
	NDTE	1.8	2.0
	OATE+NDTE	1.6	1.8
Second	OATE	1.6	1.7
	NDTE	1.7	1.9
	OATE+NDTE	1.6	1.8
Third	OATE	1.6	1.8
	NDTE	1.7	2.0
	OATE+NDTE	1.7	1.8
Fourth	OATE	1.6	1.6
	NDTE	1.7	1.7
	OATE+NDTE	1.6	1.6
All Sub Rounds	OATE	1.6	1.7
	NDTE	1.7	1.9
	OATE+NDTE	1.6	1.8

3.20 Yearly gross value added: The trade schedule of NSS 53 round was designed to throw up monthly estimates of GVA for the enterprises. As such, the comments given in statement 4, 12, 12a, 16 and 16a pertain to monthly value added only. However, a provision was kept in the schedule to collect 'number of months of operation' for the enterprises. Using this information, one may calculate the yearly value added from the monthly values as follows:

$$\text{Yearly GVA} = \text{Monthly GVA} \times \text{Number of months of operation}$$

Statement 20 presents the yearly estimates of GVA by the above procedure for state X sector. It is observed that the small trading units added value of Rs. 44,220 crores in 1997. The urban contribution was almost double the contribution of the rural units, although there were about 23 lakh more units in rural areas. The first three states that added substantial values were Uttar Pradesh, Maharashtra, and West Bengal.

Statement 20: Yearly gross value added (Rs. Crores) for States and all-India during 1997			
States / UTs	GVA (Rs. 0.00 Crores)

Appendix B

SAMPLE DESIGN AND ESTIMATION PROCEDURE

1. SAMPLE DESIGN

1.1 General : A stratified two-stage sampling design was adopted for the survey. The first stage units (FSUs) were the villages (**panchayat wards** in case of Kerala) in the rural sector and UFS blocks in the urban sector. The second-stage units were the OATEs and NDTEs for the trade survey.

1.2 Sample size : The total number of sampling units (i.e. villages and blocks) surveyed in the 53rd round was 13,224 for Central sample and 14,876 for the State sample.

1.3 Allocation of sample FSUs to States/U.Ts and to rural and urban sectors : The total all-India sample size of FSUs was allocated to different States/U.Ts in proportion to the number of workers engaged in OATEs/NDTEs in the respective States/U.Ts (estimated as number of OATE/NDTE as per EC '90 multiplied by estimated number of workers per enterprise based on NSS 46th round) subject to a minimum allocation given to the State/U.Ts depending upon the total number of districts and town classes for the State/U.T. The State/U.T level sample size was again allocated to the rural and urban sectors in proportion to the number of workers.

1.4 Rural sector design

1.4.1. Sampling frame : The list of villages showing number of OATEs and NDTEs as per 1990 Economic Census was used for selection of villages in the States/U.Ts wherever such frame was available. For Kerala, list of Panchayat wards giving count of OATEs /NDTEs has been used as the frame for selecting Panchayat wards for the the survey instead of villages. For Jammu & Kashmir, the 1981 census lists of villages forms the frame. For Andaman & Nicobar islands, Lakshadweep and 5 districts of Madhya Pradesh, 1991 census lists were used as frame. For Andaman & Nicobar Islands, villages remaining inaccessible throughout the year were excluded from the frame. For Nagaland, only villages connected by bus or situated within 5 kms of the bus route were included in the frame.

1.4.2. Stratification : Each district generally formed a broad stratum. However, for Gujarat, where NSS regions cut across district boundaries, parts of each such part of a district formed a separate stratum. If any district (or part thereof lying in an NSS region in case of Gujarat) had a small number of trading enterprises, it was clubbed with a neighbouring district to form a broad stratum in order to ensure a minimum allocation. To net an adequate number of NDTEs in the sample, each broad stratum was divided into two area types : (i) Area type 1 consisting of villages having at least one NDTE, and (ii) Area type 2 consisting of the remaining villages of the broad stratum.

Where population census frames were used for selection of fsus , there was no division as above. In such cases, all the villages were classified in area type 2.

1.4.3. Allocation of sample villages among strata and area types : The State/U.T level rural sample size was allocated among the strata in proportion to number of workers. While allocating as above, it was maintained that NSS region level allocation were multiples of 8 and stratum level allocation is at least 4 but in multiples of 2. This was done in order to allocate at least two fsu's to each of the area types. The stratum level allocation was again distributed between two area types in proportion to number of NDTEs and OATEs taking into consideration that allocation for each area type was in multiples of 2.

1.4.4. Selection of fsu's : Villages were selected in the form of two independent sub-samples from each broad stratum x area type using circular systematic sampling with probability proportional to size, the size being the number of (OATE + NDTE) for area type 1 and the number of OATEs (after assigning a size of 1 to the fsu's having no trading enterprise) for area type 2.

Where population census frame was used, villages were selected using circular systematic sampling with probability proportional to population. For Lakshadweep and A & N Islands, however, equal probability sampling was adopted.

1.5. Urban sector design :

1.5.1. Sampling Frame : The latest available list of UFS blocks was used as sampling frame for selection of fsu's for all cities and towns.

1.5.2. Stratification : Town classes (broad strata) were formed within each district by

town class code	composition of town class
1	all towns with population less than 1 lakh.
2	all towns with population 1 lakh or more but less than 5 lakhs.
3	all towns with population 5 lakhs or more but less than 10 lakhs.
4/5	each city with population 10 lakhs or more.

grouping cities/towns according to population sizes as per '91 census. Composition of the town classes were as given below :

In case of Gujarat , if any district is spread over more than one NSS region , town classes were formed independently for each part of a district falling within a particular NSS region.

To net adequate number of trading enterprises in the sample, each town class was divided into two area types. Area type 1 consisted of the UFS blocks designated as 'bazar area' and area type 2 consisting of the remaining blocks of the town class.

1.5.3. Allocation of sample blocks among districts, town classes and area types : The state/u.t. level urban allocation is allocated among the districts and town classes in proportion of the number of workers. It is, however, ensured that NSS region level allocations were in multiples of 8 and town class level allocations were at least 4 and were in multiples of 2. Town class level allocations were further allocated between two area types in such a way that UFS blocks of area type 1 get completely surveyed (central and state samples combined) subject to a maximum of 50% of allocation for town class level. Area type wise allocations were in multiples of 2.

1.5.4. Selection of blocks : For both the area types, sample blocks were selected circular systematically in the form of two independent sub-samples with equal probability.

1.6. Sampling of enterprises : All the OATEs and NDTEs of the selected village/block excluding those in the public sector and which operated for at least 30 days (15 days in case of seasonal enterprises) during the last 365 days preceding the date of survey were considered for sampling. All such, eligible enterprises were classified into three classes termed as '**enterprise class**' according to the total number of workers (including hired workers) employed in the enterprises on a regular basis. The classes were as follows :

Enterprise class code	Composition of the class
1	all OATEs and NDTEs with one worker only.
2	all OATEs and NDTEs with two workers only.
3	all OATEs and NDTEs with three or more workers.

Before selecting enterprises from enterprise classes, all the enterprises within an enterprise class were arranged in ascending order of their NIC codes. The number of enterprises selected from enterprise classes 1, 2 and 3 were **4, 6 and 6** respectively. If there is a shortfall in enterprise class 3, it is made up from enterprise class 2, if possible, otherwise from enterprise class 1. Similarly, if there is a shortfall in enterprise class 2, it is made up from enterprise class 3, failing which from enterprise class 1. The priority order for compensation is 3rd, 2nd and 1st enterprise class.

The required number of enterprises were selected from each enterprise class circular systematically with equal probability.

2. ESTIMATION PROCEDURE

2.1. Notations :

- s = subscript for s-th stratum.
- t = subscript for t-th area type ; t= 1,2.
- b = subscript for b-th sub-sample ; b= 1,2.
- i = subscript for i-th sample village/block (fsu).
- j = subscript for j-th enterprise class
- k = subscript for k-th enterprise
- Z = total size for an area type (or for a stratum when there is no area type formation).
- z = village/block size used for selection.
- n = number of sample villages/blocks surveyed including uninhabited and zero cases and excluding casualty and other not received cases (used for tabulation).
- E = total number of enterprises listed in an enterprise class.
- e = number of enterprises surveyed (used for tabulation) in an enterprise class.
- y = value of any character under estimation
- \bar{Y} = estimate of population total of the character Y.

2.2 Formula for estimation :

$$\bar{Y}_{sb} = \sum_t \frac{Z_{st}}{n_{stb}} \sum_{i=1}^{n_{stb}} \frac{1}{z_{stbi}} \sum_{j=1}^3 \frac{E_{stbij}}{e_{stbij}} \sum_{k=1}^{e_{stbij}} y_{stbijk}$$

Note : 1) For rural sector , \bar{Y}_{sb} was the estimate at the district level and for urban sector , \bar{Y}_{sb} was the estimate at the town class level based on sub-sample b. .

2) Value of $z_{stbi}=1$ for urban sector.

2.2.1. Estimate for the aggregate :

Pooled estimate \bar{Y}_s based on two sub-samples is obtained as

$$\bar{Y}_s = \frac{1}{2} \sum_{b=1}^2 \bar{Y}_{sb}$$

The pooled estimate \bar{Y} at the region/state/u.t./All India level is obtained by summing the stratum estimates \bar{Y}_s over all the strata for the region/state/u.t./All India.

2.3 Ratio estimates :

The estimate of the ratio $R = \frac{Y}{X}$ (where X was the population total of an auxiliary variable) is given by $\bar{R} = \frac{\bar{Y}}{\bar{X}}$. Ratio may be computed at the last step after separately estimating X and Y.

APPENDIX - C**REVISED NATIONAL INDUSTRIAL CLASSIFICATION**

**GROUPS AND CLASSES : CLASSIFICATION AT THREE & FOUR DIGIT LEVELS
(For Trade Survey of NSS 53rd Round)**

group	class	description
SECTION-0 : AGRICULTURE, HUNTING, FORESTRY AND FISHING		
DIVISION 04 : HUNTING, TRAPPING AND GAME PROPAGATION		
040	040.0	Hunting, trapping, and game propagation other than for sports.
DIVISION 05 : FORESTRY AND LOGGING		
052	052.0	production of firewood/fuel wood (including char coal by burning) by exploitation of forests.
053	053.0	gathering of fodder by exploitation of forests.
054	054.0	gathering of uncultivated materials such as gums, resins, lac, barks, munjh, herbs, honey, wild fruits, leaves etc. by exploitation of forests.
059	059.0	Forestry services n.e.c.
DIVISION 06 : FISHING (INCLUDING COLLECTION OF SEA PRODUCTS)		
060	060.0	Ocean, sea and coastal fishing
061	061.0	Inland water fishing
063	063.0	Collection of pearls, conchs, shells, sponges and other sea products.
069	069.0	Other allied activities and services incidental to fishing n.e.c.
SECTION-6 : WHOLESALE AND RETAIL TRADE AND RESTAURANTS AND HOTELS		
DIVISION 60 : WHOLESALE TRADE IN AGRICULTURAL RAW MATERIALS LIVE ANIMALS, FOOD, BEVERAGES, INTOXICANTS AND TEXTILES		
600		Wholesale trade in cereals and pulses
	600.1	Procurement agencies dealing primarily in cereals and pulses.

- 600.2 Wholesale trade in cereals and pulses other than by procurement agencies.
- 601 Wholesale trade in basic food-stuffs (other than cereals and pulses).
 - 601.1 Wholesale trade in fruits.
 - 601.2 Wholesale trade in vegetables.
 - 601.3 Wholesale trade in spices in primary forms.
 - 601.4 Wholesale trade in raw milk.
 - 601.5 Wholesale trade in meat, fish and eggs.
 - 601.9 Wholesale trade in other basic food-stuffs n.e.c.
- 602 Wholesale trade in textile fibers of vegetable/animal origin.
 - 602.1 Procurement agencies dealing primarily in cotton and jute.
 - 602.2 Wholesale trade in cotton and jute, other than by procurement agencies.
 - 602.3 Wholesale trade in raw wool.
 - 602.4 Wholesale trade in raw silk.
 - 602.9 Wholesale trade in other textile fibers of vegetable/animal origin n.e.c. (note : wholesale trade in man-made textile fibers is included in group 615).
- 603 Wholesale trade in UN-manufactured tobacco, pan leaves, opium, ganja and cinchona etc.
 - 603.1 Wholesale trade in UN-manufactured tobacco.
 - 603.2 Wholesale trade in pan leaves.
 - 603.3 Wholesale trade in opium, ganja and cinchona etc.
- 604 Wholesale trade in straw, fodder and other animal/poultry feed.
 - 604.1 Wholesale trade in straw and fodder.
 - 604.9 Wholesale trade in other animal/poultry feed.
- 605 Wholesale trade in live animals and poultry.
 - 605.1 Wholesale trade in live animals.
 - 605.2 Wholesale trade in poultry.

- 606 Wholesale trade in manufactured foodstuffs.
- 606.1 Wholesale trade in dairy products.
 - 606.2 Wholesale trade in sugar, confectionery and bakery products.
 - 606.3 Wholesale trade in edible oils and fats.
 - 606.4 Wholesale trade in manufactured/processed spices.
 - 606.9 Wholesale trade in other manufactured food-stuffs n.e.c.
- 607 Wholesale trade in tea, coffee, cocoa, tobacco products and beverages other than intoxicants.
- 607.1 Wholesale trade in tea, coffee and cocoa.
 - 607.2 Wholesale trade in manufactured tobacco and tobacco products.
 - 607.3 Wholesale trade in beverages other than intoxicants.
- 608 608.0 Wholesale trade in intoxicants like wines and liquors including incidental bottling.
- 609 Wholesale trade in textiles and textiles products like all kinds of yarn, fabrics, garments, and other made-up articles etc. (including second-hand textile goods).
- 609.1 Wholesale trade in yarns.
 - 609.2 Wholesale trade in textile articles.
 - 609.3 Wholesale trade in made-up textile articles (except garments) such as blankets, carpets, felts etc.
 - 609.4 Wholesale trade in new ready made garments (except hosiery/knitted garments).
 - 609.5 Wholesale trade in hosiery/knitted textile products
 - 609.6 Wholesale trade in used/second-hand garments.
 - 609.9 Wholesale trade in textiles and clothing accessories, not elsewhere classified.

**DIVISION-61 : WHOLESALE TRADE IN WOOD, FIREWOOD, PAPER,
SKIN, LEATHER AND FUR, FUEL, PETROLEUM,
CHEMICALS, PERFUMERY, CERAMICS, GLASS AND
ORES, AND METALS**

610	610.0	Wholesale trade in cane, bamboo and thatches etc.
	610.8	Wholesale trade in wood.
	610.9	Wholesale trade in fire-wood.
611	611.0	Wholesale trade in paper and other stationery goods.
612	612.0	Wholesale trade in skin, leather, fur and their products.
613	613.0	Wholesale trade in fuel and lighting products.
614	614.0	Wholesale trade in petrol, mobile oil and allied products.
615	615.0	Wholesale trade in medicines and chemicals.
616	616.0	Wholesale trade in fertilisers and pesticides.
617	617.0	Wholesale trade in toiletry, perfumery and cosmetics.
618	618.0	Wholesale trade in metal, porcelain, and glass utensils, crockery and chinaware.
619		Wholesale trade in ores and metals.
	619.1	Wholesale trade in ores.
	619.2	Wholesale trade in metals in primary form (note : wholesale trade in precious metals is included in group 637)

**DIVISION 62 : WHOLESALE TRADE IN ALL TYPES OF MACHINERY
EQUIPMENT INCLUDING TRANSPORT EQUIPMENT**

620		Wholesale trade in agricultural and industrial machinery.
	620.1	Distributors of agricultural machinery and equipment.
	620.2	Distributors of industrial machinery and equipment other than electrical/electronic.
621	621.0	Wholesale trade in electrical machinery and equipment.

622	622.0	Wholesale trade in electronic equipment and accessories.
623		Wholesale trade in transport and storage equipment.
	623.1	Distribution of heavy motor vehicles classified in group 373.
	623.2	Distribution of motor vehicles classified in group 374.
	623.3	Distribution of motor-cycles scooters and three wheelers etc. classified in group 375.
	623.4	Distribution of cycles, rickshaws and other non-mechanical transport equipment
	623.5	Distributors of other transport equipment n.e.c.
	623.6	Distributors of storage equipment.

DIVISION 63 : WHOLESALE TRADE NOT ELSEWHERE CLASSIFIED

630	630.0	Wholesale trade in furniture and fixtures
631	631.0	Wholesale trade in rubber, plastic and their products.
632	632.0	Wholesale trade in building materials.
633	633.0	Wholesale trade in hardware and sanitary fixtures.
634	634.0	Wholesale trade in household equipment, appliances n.e.c.
635	635.0	Wholesale trade in scientific, medical and surgical instruments.
636	636.0	Wholesale trade in watches/clocks, eye-glasses and spectacles frames.
637	637.0	Wholesale trade in precious metals, stones, and jewellery.
638	638.0	Wholesale trade in wastes and metal scraps.
639		Wholesale trade in miscellaneous goods not elsewhere classified.
	639.1	Wholesale trade in photographic equipment
	639.2	Wholesale trade in games, toys and sports-goods.
	639.9	Wholesale trade in other goods n.e.c.

DIVISION 64 : COMMISSION AGENTS

640	640.0	Commission agents dealing in agricultural raw materials, live animals, food, beverages, intoxicants and textiles.
641	641.0	Commission agents dealing in wood, paper, skin, leather and fur, fuel, petroleum, chemicals, perfumery, cosmetics, glass, ores and metals.
642	642.0	Commission agents dealing in machinery and equipment.
649	649.0	Other commission agents n.e.c.

DIVISION 65 : RETAIL TRADE IN FOOD AND FOOD ARTICLES, BEVERAGES, TOBACCO AND INTOXICANTS (NOTE : NON-SPECIALISED RETAIL TRADE ESTABLISHMENTS SUCH AS DEPARTMENTAL STORES, SUPER BAZARS, AND GENERAL STORES ARE CLASSIFIED IN GROUP 688 ALONG WITH NON-STORE RETAIL SALE ESTABLISHMENTS ENGAGED IN HOUSE TO HOUSE OR OTHER AMBULANT SALES)

650	650.0	Specialised retail trade in cereals and pulses, tea, coffee, spices, flour, and other basic food items.
651	651.0	Retail trade in vegetables and fruits.
652	652.0	Retail trade in meat, fish and poultry.
653	653.0	Retail trade in sweetmeat, bakery products dairy products and eggs.
654	654.0	Retail trade in aerated water, soft-drinks and ice-cream.
655	655.0	Retail trade in pan, bidi and cigarette
656	656.0	Retail trade in wine and liquor not consumed on the spot.
659	659.0	Retail trade in food and food articles, beverages, tobacco and intoxicants not elsewhere classified.

DIVISION 66 : RETAIL TRADE IN TEXTILES

- 660 Retail trade in textiles.
- 660.1 Exclusive showrooms of mills.
- 660.2 Retail trade in textiles of hand loom and khadi sectors.
- 660.3 Other retailers dealing in textiles of mill or power loom sectors.
- 660.9 Other dealers in textiles n.e.c.
- 661 Retail trade in ready-made garments, hosiery/knitted garments, etc. (includes retail trade in second-hand garments).
- 661.1 Retail trade in hosiery goods.
- 661.2 Retail trade in ready-made garments (new) except hosiery goods.
- 661.3 Retail trade in second-hand garments.

DIVISION 67 : RETAIL TRADE IN WOOD, FUELS AND OTHER HOUSE HOLD UTILITIES AND DURABLES

- 670 Retail trade in wood firewood, coal, kerosene oil and cooking gases.
- 670.1 Retail trade in coal, cinder coal dust.
- 670.2 Retail trade in kerosene oil.
- 670.3 Retail trade in cooking gases.
- 670.8 Retail trade in wood.
- 670.9 Retail trade in firewood.
- 671 671.0 Retail trade in footwear.
- 672 Retail trade in crockery, glassware and plastic-ware.
- 672.1 Retail trade in crockery and glassware (including melamine crockery).
- 672.2 Retail trade in plastic wares.

673	673.0	Retail trade in utensils (except those specialising in plastic wares).
674	674.0	Retail trade in furniture.
675		Retail trade in electric/electronic equipment (including watches and clocks).
	675.1	Retail trade in household electric equipment and appliances (including air conditioners, refrigerators and room-coolers etc.)
	675.2	Retail trade in audio/video household equipment (including TV sets, transistors, VCRs etc.)
	675.3	Retail trade in watches and clocks.
	675.4	Retail trade in photographic equipment (like cameras, photo films, etc.
	675.9	Retail trade in other electric and electronic goods n.e.c.
676	676.0	Retail trade in jewellery.
679		Retail trade in fuel and other household utilities and durable not elsewhere classified.
	679.1	Retail trade in gas stoves and other cooking appliances.
	679.2	Retail trade in sewing and knitting machines.
	679.9	Retail trade in other household utilities and durable n.e.c.

DIVISION 68 : RETAIL TRADE N.E.C.

680	680.0	Retail trade in books, magazines and stationery (including distribution of newspapers).
681	681.0	Retail trade in agricultural inputs, viz. seeds, fertilisers and pesticides.
682	682.0	Retail trade in motor fuels.
683	683.0	Retail trade in building materials.
684	684.0	Retail trade in agricultural machinery and equipment.

685	685.0	Retail trade in industrial machinery and equipment electrical and non-electrical.
686	686.0	Retail trade in transport equipment.
687	687.0	Retail trade in pharmaceutical, medical and orthopedic goods.
688		Non-specialised retail trade including non-store retail trade.
	688.1	Super bazars and other cooperative stores.
	688.2	Fair price shops.
	688.3	General stores.
	688.4	Retail sale via mail-order houses.
	688.5	Retail sale via stalls and markets (Note : This class includes retail sale of any kind of product in a usually movable stall either along a public road or on a fixed market place. Also included are sales via peddlers).
	688.6	Retail sale via house-to-house or other ambulant sales.
	688.8	Other non-store retail sales n.e.c.
	688.9	Other non-specialised retail trade n.e.c.
689		Retail trade not elsewhere classified.
	689.1	Retail trade in sun-glasses, spectacles frames etc.
	689.2	Junk shops (waste articles, etc.)
	689.3	Free collection for retail trade of waste-paper, rags, ash, coal etc.
	689.9	Other retail trade n.e.c.

DIVISION 89 : BUSINESS SERVICES NOT ELSEWHERE CLASSIFIED

890	890.0	Auctioneering services.
-----	-------	-------------------------

N.B : 'n.e.c' means 'not elsewhere classified'.
