

*Report No. 461(55/1.0/4)*

# **Consumption of Some Important Commodities in India 1999-2000**

**NSS 55th Round  
(July 1999 – June 2000)**

**National Sample Survey Organisation  
Ministry of Statistics & Programme Implementation  
Government of India**

**July 2001**

## Preface

The National Sample Survey Organisation (NSSO) has been carrying out all-India household surveys on Consumer Expenditure and Employment & Unemployment with a large sample usually once in every five years. The sixth such survey was conducted in the 55<sup>th</sup> round (July 1999-June 2000) - which covered Non-agricultural Enterprises in the Informal Sector in addition. The schedule of enquiry on Consumer Expenditure for the survey was, more or less, similar to that adopted in previous quinquennial rounds.

The present report is the fourth in the series of reports through which the results on consumer expenditure survey are being released. It contains detailed tables giving estimates of monthly per capita consumer expenditure for all the items for which either 10% of households reported consumption or average monthly per capita expenditure is 50 paise or more along with the estimated proportions of households consuming each item during the last 30 days or 365 days (the period for which the consumption data were collected) for rural and urban areas of each State and Union Territory of India. This report also deals with possession of durable goods in India during 1999- 2000.

This report has five sections and one appendix. Section One of the report is introductory while Section Two presents Concepts and Definitions. Section Three gives Sample Design and Estimation Procedure. Section 4 discusses per capita expenditure estimates of important items of consumption. Section 5 presents information on the number per 1000 of households reporting possession of specific durable goods. The detailed tables are provided in the Appendix.

The Field Operations Division (FOD) of the Organisation conducted the fieldwork for the survey. The collected data were processed and tabulated by the Data Processing Division (DPD) of the NSSO. The Survey Design & Research Division (SDRD) of the NSSO developed the survey design and prepared the report.

I am grateful to the Chairman and members of the Governing Council, Heads of various Divisions of the NSSO and their colleagues for the contribution made in preparing the report.

Comments/suggestions from the readers will be most welcome.

New Delhi  
July 2001

N. S. Sastry  
Director General & Chief Executive Officer  
National Sample Survey Organisation

## Highlights

- Among the items of cereals, the share of rice is the highest. But per capita consumption of rice in physical terms has a declining trend over the period 1987-2000.
- Regarding pulses, the per capita quantity of consumption remained almost static during 1987-2000.
- Per capita quantity of consumption of milk shows an increase during 1987-2000, especially in urban areas.
- Only mustard oil, among different edible oils, was used in increasing quantities over the period 1987-2000 in both rural and urban areas. The pattern is the same for rural and urban areas.
- Among the items of meat, egg & fish, there was an increase in per capita quantity of consumption for many of the items. However for goat meat /mutton, there was some decline for urban households.
- Data on the consumption of vegetables show that the increase in per capita quantity of consumption was considerable in both rural and urban areas for almost all the important items of vegetables except brinjal.
- Among the spices, per capita quantity of consumption decreased for tamarind and dry chillies. For many other items of spices group, it has increased over 1987-2000. There was also some increase in consumption of green chillies.
- The per capita quantity of consumption of fruits has increased in general barring some exceptions.
- The percentage of households possessing different durable goods is normally higher in urban areas than in rural areas.
- Inter-state differences among households in possession of durable goods were more striking for rural areas than for urban areas.
- In urban areas, percentage of households possessing radio was higher for Bihar and West Bengal. For almost all other types of durables, like refrigerator, pressure cooker and washing machine or motor cycle/scooter or sewing machine and air cooler/conditioner, the percentages of households possessing tended to be the highest for States like Punjab, Haryana and Gujarat.
- In rural areas, the percentage of households possessing tape recorder/ CD player, refrigerator and motorcycle/scooter was relatively low in the four eastern States and Uttar Pradesh.

# Section 1

## Introduction

1.0 The National Sample Survey was set up in 1950, with the idea of having a permanent survey organisation to collect data on various facets of the economy through nationwide sample surveys in order to assist in socio-economic planning and policy making. The NSS is a continuing survey in the sense that it is carried out in the form of successive "rounds", each round usually of a year's duration, covering several topics of current interest in a specific survey period. At present each NSS round covers, at the all-India level, about 12,000 to 14,000 villages and blocks in the Central sample (covered by the Central agency, NSSO) and an independent sample of about 14,000 to 16,000 villages and blocks in the State sample (covered by the Governments of various states and union territories). However, due to relatively high workload in the 55<sup>th</sup> round, the total number of villages and UFS blocks allotted was smaller - about 10,000.

1.1 **Background:** Starting from the very first round (1950-51) data on household consumer expenditure was being collected in every round of NSS. From 1972-73, according to a decision of the Governing Council of NSSO, the consumer expenditure survey became a quinquennial feature. It was also integrated with the employment and unemployment survey in the sense that a common sample of households was subjected to both the enquiries. An annual series of consumer expenditure surveys of a smaller-scale was again launched from the 42<sup>nd</sup> round (1986- 87) to fill the data gaps which planners and researchers had begun to feel. From the 45<sup>th</sup> round onwards the subject coverage of the consumer expenditure schedule was expanded to include some important key characteristics of employment-unemployment so that an annual series of consumer expenditure and employment-unemployment data became available. It is the larger-scale quinquennial surveys, however, which are expected to be more useful for the study of trends in the level of consumer expenditure and spending patterns. The six quinquennial surveys of consumer expenditure have been conducted during 27<sup>th</sup>, 32<sup>nd</sup>, 38<sup>th</sup>, 43<sup>rd</sup>, 50<sup>th</sup> and 55<sup>th</sup> rounds of NSS. They relate, respectively, to the years 1972-73, 1977-78, 1983, 1987-88, 1993-94 and 1999-2000.

1.2 The fifty-fifth round of NSS was conducted during July 1999 to June 2000 for collecting information on household consumer expenditure, employment-unemployment and informal non-agricultural enterprises (other than those engaged in industrial categories of 'mining & quarrying', electricity, gas and water supply) from nationwide samples of households or enterprises. It was the sixth quinquennial survey on Consumer Expenditure and Employment-Unemployment. The household consumer expenditure schedule was canvassed in 120309 households located in 6046

villages and 4116 urban blocks. This report is the fourth<sup>1</sup> of the series of reports through which the findings of the 55<sup>th</sup> round consumer expenditure survey are being released. Through the consumer expenditure schedule, data were collected on quantity and value of household consumption of different goods and services, using different reference periods, viz. "last 7 days", "last 30 days" or "last 365 days" preceding the date of survey. However, this report is based on data relating to the reference period of last 365 days preceding the date of survey for items of clothing, footwear, education, medical (institutional) and durable goods, and of last 30 days for all other items of consumption including food items.

**1.3 Geographical coverage:** The entire area of the country - rural and urban - was covered, with the exception of Ladakh and Kargil districts of Jammu & Kashmir, 768 interior villages of Nagaland and 172 villages in Andaman & Nicobar Islands which remained inaccessible throughout the year. A few other areas of Jammu & Kashmir were also excluded from the survey coverage owing to unfavourable field conditions.

**1.4 Consumer expenditure schedule:** The household consumer expenditure schedule used for the survey collected information on quantity and value of consumption of the households for a specified period, called reference period. To minimize recall errors, a very detailed item classification was, as usual, adopted to collect information, including 141 items of food, 20 items of pan, tobacco & intoxicants, 13 items of fuel and light, 22 items of clothing, 5 items of footwear, 7 items of educational expenses, 10 items of medical expenses, 49 items of durable goods, and 70 other items. For clothing, footwear, education, medical (non-institutional) expenses and durable goods, on which consumption expenditure by individual households varies widely from month to month, data with a reference period of "last 365 days" were collected. For food, pan, tobacco and intoxicants, data were collected independently using two different reference periods, viz. "last 30 days" and "last 7 days" preceding the date of survey. For the remaining items viz. fuel and light and miscellaneous goods and services data were collected for the reference period of "last 30 days" preceding the date of survey. The schedule also collected some other household particulars including age, sex and educational level of each household member.

**1.5 Earlier reports:** On the basis of the first semi-round data relating to July-December 1999, a report (Report no. 453) providing key characteristics on household consumer expenditure was released. Another report (Report no. 454) on key characteristics was also brought out covering the whole round July 1999 - June 2000. The main report (Report no. 457) on consumer expenditure based on the 55th round survey released information on (a) distribution of households and persons over MPCE classes for each state/u.t. and all-India, (b) averages of MPCE (state/u.t. and all-India) (c) break-up of these average values by important heads of consumption, (d) break-ups of both

NSS Report No. 454: Household Consumer Expenditure in India, 1999-2000 - Key Results  
NSS Report No. 457: Level and Pattern of Consumer Expenditure in India, 1999-2000

quantity and value of per capita consumption of cereals and pulses by cereal/pulse type. The average values were provided not only for the population as a whole but also for 12 different segments of population demarcated by MPCE level.

1.6 In Report no. 457, break-up of consumption expenditure by 32 broad groups of items of consumption were given, the groups being: cereals, gram, cereal substitutes, pulses and pulse products, milk and milk products, edible oil, meat, fish and egg, vegetables, fruits(fresh), fruits(dry), sugar, salt, spices, beverages and processed food, pan, tobacco, intoxicants, fuel and light, clothing, footwear, education, medical-institutional, medical-non-institutional, entertainment, goods for personal care & effects, toilet articles, sundry articles, consumer services, conveyance, rent, taxes and cesses, and durable goods.

**1.6 Salient features of 55<sup>th</sup> Round:** During the 55<sup>th</sup> round, a series of remedial measures were taken to control the non-sampling errors. At the same time, household surveys were integrated with an enterprise survey. Since the reorganization of NSSO in 1972, an integrated survey of households and enterprises was conducted for the first time in this round.

The salient features of this quinquennial survey were as follows:

- Considering the size of the consumer expenditure schedule and the employment-unemployment schedule it was thought that it would be very difficult to obtain information for both the schedules from the same household. So, they were canvassed in separate sets of households unlike in earlier rounds. However, an abridged consumer expenditure schedule was added to the employment-unemployment schedule to facilitate classification of employment-unemployment data by levels of MPCE.
- The itemization in the consumer expenditure schedule was rationalized by merging some of the items. Information on cash purchase and consumption out of homegrown stock was not collected like in earlier rounds as it was found from the past results that a household normally consumed either from purchase or from homegrown stock and seldom from both purchase and homegrown stock during the reference period. During this round, therefore, only total consumption for each item of food, pan, tobacco & intoxicants, fuel & light and clothing & footwear was collected. Also source of consumption was collected for items of food, pan, tobacco & intoxicants and fuel & light.
- For ensuring better cooperation from the informants a team of 2 or 3 investigators along with one supervisory staff was deployed for fieldwork in each first stage unit (FSU) instead of only one investigator, which had been the practice in earlier years.
- The expenditure on second-hand clothing and second-hand durable goods was included in the consumption expenditure for the first time. Although information on second-hand durable goods was collected in earlier rounds, they were never included in total consumption expenditure estimates. Also, the wages paid in cash to domestic servant or

cook who was classified as a member of the household by definition, were also included in the consumption expenditure estimates for the first time. Thus, the scope of the consumption expenditure data has been extended compared to the previous rounds.

- For controlling non-sampling errors, information on consumption for items of food, pan, tobacco & intoxicants were collected for two different reference periods viz., 7 days and 30 days. In the past this information was collected for only one reference period, usually 'the last 30 days'.
- In contrast, information for items of clothing, footwear, education, medical (institutional) expenses and durable goods was collected for only one reference period of last 365 days. This information was collected for two different reference periods in the earlier quinquennial rounds of consumer expenditure. [Prior to 50<sup>th</sup> round, two reference periods – last 30 days and last 365 days - were used for the items of clothing, footwear and durable goods only.]
- Considering a very high workload per first-stage unit on an average in the 55<sup>th</sup> round, the total number of sample first-stage units was reduced. However, to balance this reduction, the number of sample households surveyed per first-stage unit was increased from 10 to 12.

**1.7 Contents of the present report :** In the present report an attempt has been made to study consumption patterns in greater detail, using the item classification adopted in the household consumer expenditure schedule. Per capita expenditure estimates are presented here (see Section 4) for the items satisfying one or both of the following conditions:

- 10% of households reported the consumption of the item
- the monthly estimate of per capita expenditure on the item > 50 paise.

The number per 1000 of households along with the sample number of households consuming each of these items during the reference period is also presented. The estimates have been presented at all-India level by MPCE class. However, these estimates are not presented separately for different MPCE classes of the population at the State or UT level. This report also contains information on the number per 1000 of households reporting possession of specific durable goods. This has been discussed in Section 5.

Section Two of this report gives the concepts and definitions pertaining to various items / terms used in this report. Section 3 deals with the sample design and estimation procedure used in the 55<sup>th</sup> round.

Detailed tables have been provided in Appendix. The detailed item-wise estimates have been provided at State/UT level. For all-India, the estimates are presented for each MPCE class.

## Section 2

# Concepts and Definitions

2.0 The main concepts and definitions used in this report are given below.

2.1 **Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. The word 'normally' means that temporary visitors are excluded but temporary stay-aways are included. Thus, a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. 'Living together' is usually given more importance than 'sharing food from a common kitchen' in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc., is considered a single-member household except that a family living in a hotel (say) is considered to be one household only; the same applies to residential staff of such establishments.

2.2 **Adult:** A person who has completed 15 years of age is called an adult. Children are those who have not completed 15 years of age.

2.3 **Household size:** The size of a household is the total number of persons in the household.

2.4 **Household consumer expenditure:** The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items, namely, (i) food, *pan* (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

2.5 For groups (i) and (ii), the total value of consumption is derived by aggregating the monetary value of goods actually consumed during the reference period. An item of clothing and footwear is considered to be consumed if it is brought into maiden or first use during the reference period. The consumption may be out of (a) purchases made during the reference period or earlier; (b) home grown stock; (c) receipts in exchange of goods and services; (d) any other receipt through gift, charity, borrowing; and (e) free collection. Home produce is evaluated at the ex farm or ex factory prices. For evaluating the consumption of the items of group (iii), i.e. items categorised as miscellaneous goods and

services and durable goods, a different approach is followed. In this case, the expenditure made during the reference period for the purchase of goods and services is considered to be consumption.

2.6 It is pertinent to mention here that the consumer expenditure of a household on food items relates to the actual consumption by the normal resident members of the household and also by the guests, whether during ceremonies or otherwise. To avoid double counting, transfer payments like charity, loan, advance, etc., made by the household are not considered consumption for items of groups (i) and (ii), since transfer receipts of these items have been taken into account. However, the item 'cooked meals' is an exception to the rule. Meals prepared in the household kitchen and provided to the employees and/or others would automatically get included in domestic consumption of employer (payer) household. There is a practical difficulty in estimating the quantities and values of individual items used for preparing the meals served to employees or to others. Thus, to avoid double counting, cooked meals received as perquisites from employer household or as gift or charity are not recorded in the recipient household. As a general principle, cooked meals purchased from the market for consumption of the normal resident members and of guests and employees are recorded in the purchaser household.

2.7 This procedure of recording cooked meals served to others in the expenditure of the serving households only leads to bias-free estimates of average per capita consumption as well as total consumer expenditure. However, as the proportions of donors and recipients of free cooked meals are likely to vary in opposite directions over the expenditure classes, the nutritional intake derived from the consumer expenditure survey data may present a somewhat distorted picture. These derived nutrition intakes may get inflated for the rich (net donors) and somewhat understated for the poor (net recipients). This point has to be kept in mind while using the NSS consumer expenditure data for any nutritional studies relating to the nutritional status of households.

2.8 **Value of consumption:** Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex farm or ex factory prices. Value of consumption out of gifts, loans, free collection and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period.

2.9 **Cash purchase :** The term cash purchase is used to signify that purchases for which payment is made in **kind** (barter purchase) are excluded. Credit purchases (where payment is to be in cash) are included even when payment is not made within the reference period. Only purchases made for domestic consumption are considered.

2.10 **Consumption out of home-grown or home-produced stock:** Home-produced or home-grown stock refers to goods produced by households in their own farm or manufacturing establishment and crop received as rent on land leased out. Produce brought from village home and consumed at urban residence is also included. Valuation excludes transport charges for carrying the commodity to the place of residence for consumption.

**2.11 Reference period:** Reference period means the period of time for which data on consumption was collected. The reference period used for the survey was a “moving” one, varying from household to household, although it was a fixed length of period. During 55<sup>th</sup> round of NSS, information on consumption of food, pan, tobacco & intoxicants was collected independently for two different reference periods of the last 30 days and the last 7 days from the same households. For items of clothing, footwear, durable goods, education and medical (institutional) expenses, data were collected for the reference period of “last 365 days” preceding the date of survey. For the remaining items, a reference period of “last 30 days” preceding the date of survey was used. However, the **monthly estimates presented in this report were based on data collected for “last 365 days” for clothing, footwear, durable goods, education and medical (institutional) expenses and for “last 30 days” for the rest of the items**. Here, it is worth mentioning that the main results of 50<sup>th</sup> and other earlier quinquennial rounds were based on a reference period of 30 days only for all the items.

**2.12 Sector :** The word “Sector” is used for the rural-urban demarcation: rural and urban are the only two sectors as far as this report is concerned.

**2.13 Major states :** This refers to the following states of India: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Kamataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal.

**2.14 Monthly per capita consumer expenditure (MPCE):** For a household, this is its last 30 days’ total consumer expenditure divided by its size. A person’s MPCE is understood as that of the household to which he or she belongs.

**2.15 MPCE class:** The MPCE classes are normally revised during quinquennial surveys of Consumer Expenditure. Usually, 12 MPCE classes are formed from a table giving estimated cumulative percentage frequency distribution of persons by MPCE for each sector separately and also combinedly. The upper limits of these classes correspond broadly to 5%, 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90%, 95% and 100% - of population. The class limits are given below:

| sl. no. | rural (in Rs) | urban (in Rs) |
|---------|---------------|---------------|
| 1       | 0 – 225       | 0 - 300       |
| 2       | 225 – 255     | 300 - 350     |
| 3       | 255 – 300     | 350 - 425     |
| 4       | 300 – 340     | 425- 500      |
| 5       | 340 – 380     | 500 - 575     |
| 6       | 380 – 420     | 575 - 665     |
| 7       | 420 – 470     | 665 - 775     |
| 8       | 470 – 525     | 775- 915      |
| 9       | 525 – 615     | 915 - 1120    |
| 10      | 615 – 775     | 1120 - 1500   |
| 11      | 775 – 950     | 1500 - 1925   |
| 12      | 950+          | 1925+         |

**2.16 Milk and milk products:** This group includes *ghee*, butter, curd, ice cream, etc. Milk-based sweetmeats (*pera*, *rosogolla*, etc.) come under 'beverages, refreshments and processed food' unless they are prepared from milk, sugar, etc., within the household. In the latter case, consumption of milk, sugar, etc., is accounted separately instead of as a single item under 'milk products'.

**2.17 Beverages, refreshments, etc. (including processed food):** This includes all beverages including tea, coffee, cocoa, cold drinks and various commercially produced beverages, biscuits and confectionery, salted refreshments, sweets, pickles, sauce, jams and jellies, and also cooked meals obtained on payment.

**2.18 Clothing:** This category includes bedsheets, bedcovers, pillows, curtains, mattresses, blankets, rugs, mats and matting, cotton yarn, wool and knitting wool. It, however, **excludes** tailoring charges, which come under 'miscellaneous goods and services'.

**2.19 Education:** Apart from educational expenses proper such as school and college fees, private tuition charges, textbooks, etc., this group of items includes expenses on newspapers and magazines, fiction and stationery. Donations to school fund, however, are excluded.

**2.20 Institutional and non-institutional medical expenses:** The distinction between institutional and non-institutional medical expenses lies in whether the expenses were incurred for medical treatment undergone as an in-patient of a medical institution (such as a hospital or nursing home) or otherwise. Medical expenses include expenditure on medicines and medical goods including family planning appliances, payments made for medical treatment, and expenses incurred for clinical tests.

**2.21 Miscellaneous goods and services :** This includes amusement, goods for personal care and effect, toilet articles, consumer services, conveyance etc. In fact, this is a residual group containing items other than food, pan, tobacco, intoxicants, fuel and light, clothing, footwear and durable goods.

**2.22 Entertainment :** This includes expenses on cinema, theatre, fairs, etc., photography, sports goods, toys, club fees and other recreational/hobby expenses, and hire charges for video cassettes/VCR/VCP.

**2.23 Goods for personal care :** These include pens, torches, locks, spectacles, umbrellas and raincoats, walking sticks, sanitary napkins and cigarette lighters.

**2.24 Sundry articles :** These include electric bulbs, fluorescent tubes, batteries other non-durable electrical goods, earthenware, glassware, plastic goods, washing requisites, flowers, incense, insecticide and other petty household articles.

**2.25 Consumer services :** This category includes expenses on domestic servants, cook, sweeper, barber/beautician, laundry and ironing, tailor, priest, and pet animals; legal

expenses, postage, telegram and telephone charges, repair charges (excluding repairs of household durables), grinding charges, and other consumer services excluding transport.

**2.26 Conveyance :** Apart from bus, rail, plane, steamer, taxi and similar fare, this includes cost of fuel for owned motor transport and animal feed for owned animal driven carriage, but not driver's or cleaner's salary, nor garage rent. Expenses of holiday transport reimbursed by employer (e.g. Leave Travel Concession journeys by Government servants) are included.

**2.27 Rent :** This includes house rent (residential building), garage rent, residential land rent, and consumer rent (other goods). For government accommodation, the portion of monthly emoluments forfeited on account of occupation of government quarters is considered as monthly house rent payment. Hire charges of video cassettes, VCR and VCP are not accounted in consumer rent here but under "amusement".

**2.28 Taxes and cesses:** This category includes road cess, chowkidari tax, municipal rates, other taxes and cesses paid by the household as a domestic consumer, and consumer license fees. It does not include income tax or sales taxes.

**2.29 Durable goods :** This term refers to durable goods other than clothing and footwear (which come under semi-durable); items included here are distinguished from miscellaneous goods by having a longer expected lifetime of use (roughly, one year or more). Though life of some petty durables such as pens, torches, spectacles and walking sticks, as well as books, is normally one year or more, they are by convention included among miscellaneous goods and not under durable goods. *Durable goods used for household purposes thus include furniture and fixtures, recreational goods such as cameras, TV, cassettes and musical instruments, jewellery and ornaments, clocks and watches, household utensils and appliances for cooking, heating, cooling, and other work such as sewing, vehicles for personal transport, tyres and tubes, fluorescent tubes and lamps, and other electrical and sanitary fittings.* Expenditure incurred on repairs and construction of durables used for domestic purpose is included in "expenditure on durable goods".

### **2.30 Notes on coverage of specific items**

**2.30.1 Rice :** This does not include rice products such as *chira* (rice flakes), *muri* (puffed rice), etc. This is a departure from the convention normally followed in presenting NSS tables for cereal consumption estimates (see, e.g., NSS report nos. 453, 454, 457) where rice stands for "rice and rice products", "wheat" for "wheat and wheat products", and so on. Cooked rice purchased from market is not accounted here.

**2.30.2 Milk (liquid) :** Consumption of "milk (liquid)" includes milk converted into curds, butter, *ghee*, casein (*panir*), etc. within the household prior to consumption. It also includes milk going into household preparation of sweetmeats. Bottled or polypacked flavoured milk comes under milk (liquid).

2.30.3 **Ghee** : Consumption of ghee excludes ghee prepared from milk within the household. See **milk (liquid)**.

2.30.4 **Mustard oil, coconut oil, etc** : Oil used for toilet purposes is not accounted here.

2.30.5 **Sugar** : Consumption of sugar includes sugar used in household preparation of sweetmeats, pickles etc.

2.30.6 **LPG** : Expenditure on this does not include caution money deposited for getting a cylinder connection.

2.30.7 **Clothing** : Apart from clothing in the narrow sense, this category includes bedsheets, bedcovers, pillows, curtains, mattresses, blankets, rugs, mats and matting, cotton yarn, wool, and knitting wool. It, however, **excludes** tailoring charges, which come under "miscellaneous goods and services".

2.30.8 **Saree** : This includes variants such as "*mekhla*" (Assam), and "*dakbanda*" (Garo hills).

2.30.9 **Education** : Cost of all books including fiction and journals and all newspapers and magazines bought by the household are included under "education". All tuition fees (but not school donations) are included. School bus/van expenses are excluded.

2.30.10 **Medical** : Expenditure on family planning appliances is included here. Free medicines and medical treatment received from employer are excluded. But expenditure on medicine, medical tests, and treatment incurred by the household and reimbursed by the employer are included.

2.30.11 **Rent ( imputed )** : This is rent of the residential house or garage which are either not owned or otherwise occupied without paying any rent. It is imputed at the prevailing rate of rent of similar houses in the locality or surrounding areas. This information has been collected for urban households only.

## Section 3

# Sample Design and Estimation Procedure

### 3.1 Sample Design

3.1.1 **General:** A stratified sampling design has been adopted for selection of the sample first-stage units (FSU's). The FSU's are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USU's) are enterprises for schedule 2.0 and households for schedule 1.0/ 10/ 10.1, which are selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSU's are subdivided into hamlet-groups (rural)/ sub-blocks (urban), that are grouped into two segments, and USU's are selected independently from each of these segments.

3.1.2 **Sampling frame for first stage units:** List of villages (panchayat wards for Kerala) as per 1991 Census and latest lists of UFS blocks are respectively used for selection of rural and urban sample FSU's. For selection of sample villages from the State of Jammu & Kashmir, list of villages as per 1981 Census has been used as the sampling frame. It may be mentioned that all the uninhabited villages of the country as per 1991 Census, interior villages of Nagaland situated beyond 5 km of a bus route and inaccessible villages of Andaman & Nicobar Islands are left out of the survey coverage of the NSS 55th round.

### 3.1.3 Stratification

3.1.3.1 **Rural:** Two special strata are formed at the **State/ UT level** viz.

- Stratum1: all FSUs with population between 1 to 100, and
- Stratum2: FSUs with population more than 15,000.

[Note: The above two strata are spread across a given state and are not confined to any particular administrative division within the state.]

Above strata of either type are formed if at least 50 such FSU's are there in the respective frames. Otherwise, they are merged with the general strata.

While forming general strata (consisting of FSU's other than those covered under strata 1 & 2), efforts have been made to treat each district as a separate stratum. If limitation of sample size does not allow forming so many strata, smaller districts within a particular NSS region are merged to form a

stratum. Each district with rural population of 2 millions or more as per 1991 Census (1.8 millions or more as per 1981 Census in case of Jammu & Kashmir) is as usual split into a number of strata.

3.1.3.2 **Urban** : Strata are formed within NSS Regions as follows:

| <b>Stratum number</b> | <b>Composition of strata by considering population of various towns as per the 1991 Census</b>  |
|-----------------------|---|
| 1, 3, 5 *             | 'hospital area' (HA) / 'industrial area' (IA) / 'bazaar area' (BA) blocks taken together of each single city with a population of 10 lakhs or more (there could be a maximum of 3 such cities within an NSS Region) |
| 2, 4, 6 *             | Other blocks of each single city with a population of 10 lakhs or more  |
| 7                     | HA or IA or BA blocks of all towns with population between 50,000 and less than 10 lakhs  |
| 8                     | Other blocks of all towns with population between 50,000 and less than 10 lakhs   |
| 9                     | HA or IA or BA blocks of all towns with population less than 50,000   |
| 10                    | Other blocks of all towns with population less than 50,000  |

\* Stratum numbers 3, 4, 5 & 6 remain void if there is only one city in an NSS region with a population of 10 lakhs or more.

If limitation of sample size does not allow forming so many strata, all blocks of stratum 7 are merged with those of stratum 8 and all blocks of stratum 9 are merged with those of stratum 10.

3.1.4 **Sample size** : A total number of 10,384 FSU's is selected for survey in the *central sample* at all-India level (rural & urban combined) in the 55th round. For *state samples*, there is a matching sample size as per the usual matching pattern being followed over the last few rounds. Sample size for the whole round for each State/UT and Sector (i.e. rural/ urban) are allocated equally among the four sub-rounds. Sample FSU's for each sub-round are selected afresh in the form of two independent sub-samples. The details of allocation and survey of FSUs, households and persons are given in Statement 0.

**3.1.5 Allocation of first-stage units (FSU's)**: State/ UT level rural sample size is allocated among the rural strata in proportion to population. State/ UT level urban sample size is first allocated among the three classes of towns (i.e. 10 lakh +, 50000 to less than 10 lakhs and less than 50,000) in proportion to population. Then sample allocation for each of the three classes of towns, within an NSS region, is further allocated between two strata types consisting of - (i) HA/ IA/ BA blocks, and (ii) the rest in proportion to total number of FSU's in the respective frames with double weightage given to the first category of blocks. Stratum level allocations for both rural and urban areas of a sub-round are made in even numbers in order to facilitate selection of FSU's in the form of two independent sub-

samples. Sub-sample numbers are 1 & 2 for sub-round 1; 3 & 4 for sub-round 2; 5 & 6 for sub-round 3 and 7 & 8 for sub-round 4.

**3.1.6 Selection of first-stage units:** For each sub-round, sample FSU's from each stratum are selected in the form of 2 independent sub-samples by following circular systematic sampling with (a) probability proportional to population for all rural strata other than stratum 1, and (b) equal probability for rural stratum 1 as well as all urban strata.

**3.1.7 Formation of hamlet-groups in large villages and number of hamlet-groups selected for survey :** Depending upon the values of approximate present population (P) and approximate total number of non-agricultural enterprises (E), decision is taken to divide the FSU into a fixed number of hamlet-groups (hg's - the term applicable for rural samples) / sub-blocks (sb's - the term applicable for urban samples) as per the rules given below:

| Value of P     | No. of hg's/ sb's formed in the FSU as per population criterion | value of E    | no. of hg's/ sb's formed in the FSU as per enterprise criterion |
|----------------|---|---------------|---|
| (1)            | (2)   | (3)           | (4)   |
| Less than 1200 | 1 @   | Less than 100 | 1 @   |
| 1200 – 1999    | 5   | 100 – 249     | 5   |
| 2000 – 2399    | 6   | 250 – 299     | 6   |
| 2400 – 2799    | 7   | 300 – 349     | 7   |
| 2800 – 3199    | 8   | 350 – 399     | 8   |
| (and so on)    |   | (and so on)   |   |

@ no. of hg's/ sb's = '1' means the whole FSU is considered for listing.

[For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of Jammu & Kashmir, number of hg's formed in the village as per population criterion is : 1 for P < 600, 5 for P = 600 to 999, 6 for P = 1000 to 1199, 7 for P = 1200 to 1399, 8 for P = 1400 to 1599, and so on.]

The number (D) of hamlet-groups (hg)/ sub-blocks (sb) formed in the FSU is such that the higher of the two values as per population and enterprise criteria is chosen. If value of P is less than 1200 (600 for certain hilly areas specified above) as well as value of E is less than 100 for an FSU, hg/ sb formation is not resorted to and the whole FSU is considered for listing. In case hg's/ sb's are formed in the sample FSU, the same is done by more or less equalizing population.

**3.1.8 Formation of Segments within FSU:** The hg/ sb having maximum concentration of non-agricultural enterprises is selected with certainty for listing of households/ enterprises. This hg/ sb is referred to as segment 1. From the remaining (D-1) hg's/ sb's of the FSU, 2 more hg's/ sb's are selected circular systematically and these 2 selected hg's/ sb's together is referred to as segment 2 for doing a combined listing of households/ enterprises. Thus listing of households/ enterprises is done only in segments 1 and 2 of the FSU. The FSU **not requiring** hg/ sb formation is to be treated as **segment 1** for the purpose of data collection and estimation.

**3.1.9 Stratification of households :** All the households listed in a segment (both rural & urban) are stratified into two **second stage strata**, viz. ‘affluent households’ (forming second stage stratum 1) and **the rest** (forming second stage stratum 2). In rural sector, a household is classified as ‘affluent’ if the household owns certain items like motor car/ jeep, colour TV, telephone, etc. or owns land / livestock in excess of certain limits. In urban sector, the households having MPCE (monthly per capita consumer expenditure) greater than certain limit for a given town/city are treated as ‘affluent’ households for the present survey and are included in the frame of second stage stratum 1, and rest of the urban households are included in the frame of second stage stratum 2.

**3.1.10 Number of households/ enterprises selected for survey:** The number of households/ enterprises selected for survey from each FSU in general is given below:

| segment                              | number of households allotted for consumer expenditure schedule |     |           |
|--------------------------------------|---|-----|-----------|
|                                      | Second Stage Stratum (SSS)                                      |     |           |
|                                      | 1   | 2   | total     |
| (1)                                  | (2)   | (3) | (4)       |
| <b>FSU with hg/ sb formation:</b>    |   |     |           |
| <b>1</b>                             | 1   | 3   | <b>4</b>  |
| <b>2</b>                             | 1   | 7   | <b>8</b>  |
| <b>FSU with no hg/ sb formation:</b> |   |     |           |
| <b>1</b>                             | 2   | 10  | <b>12</b> |

### 3.2 Estimation Procedure:

**3.2.1 General procedure of selection of households:** Sample households are selected from the respective frames by circular systematic sampling with equal probability. For the purpose of systematic sampling, households in the frame of second stage stratum 2 are arranged by means of livelihood and land possessed classes for rural samples and by means of livelihood and MPCE classes for urban samples.

**3.2.2 Approach:** The estimate for a sub-round is obtained by combining the estimates of the corresponding sub-sample replicates. Similarly, an estimate for the Round is obtained by combining the four sub-round-wise estimates.

**3.2.3** The following notations are being used in this section:

- a = subscript for the a-th stratum
- r = subscript for the r-th sub-sample replicate ( r = 1,2,...,8)
- q = subscript for the q-th sub-round (q = 1,2,3 & 4)
- f = subscript for the f-th sampled village/ block as First Stage Unit ( FSU )
- s = subscript for the s-th segment of sampled village/ block ( s = 1 & 2)

- c = subscript for the c-th 2nd stage stratum of households in the sampled village/ block (c = 1,2)  
j = subscript for the j-th sampled household  
p = subscript for pooled estimate  
z = size used for selection of an FSU from the sampling frame  
Z = total of sizes in the sampling frame for the stratum

[Note: For urban sector, z=1 and Z=N which is the total number of UFS blocks (FSU's) in the frame.]

- n = number of sampled FSU surveyed within a stratum and a sub-sample replicate (including zero cases but excluding casualty and not reported cases) and used for tabulation  
L = number of sub-sample replicates surveyed and used for tabulation  
D = number of hamlet-groups/ sub-blocks formed in rural/ urban sampled FSU  
H = total number of households listed in the appropriate frame  
h = number of sampled households surveyed and used for tabulation from the frame  
E = total number of enterprises listed in the appropriate frame  
e = number of sampled enterprises surveyed and used for tabulation from the frame  
y, x = value of characteristic y, x obtained in the sample  
 $\bar{y}, \bar{x}$  = estimated value of characteristic y, x obtained from the sample.

**3.2.4 ESTIMATES OF AGGREGATE:** In the formulae given in this section,  $\bar{Y}$  is the estimate of aggregate of any characteristic y for a given stratum (a), and for a particular sub-round (q) and sub-sample replicate (r). These formulae are provided for the general case of FSU's having two segments 1 & 2. For the FSU's requiring no hg/ sb formation, the formula is identical to that given for segment 1 while the contribution from segment 2 is taken as zero for estimating a characteristic of household from a given 2nd stage stratum (c) in the selection frame

$$\text{Rural : } \hat{Y}_c = \frac{Z}{n} \sum_{f=1}^n \frac{1}{z_f} \sum_{s=1}^2 B_{fsc} \sum_{j=1}^{h_{fsc}} y_{fscj} \quad (1)$$

$$\text{Here } B_{fsc} = \frac{H_{fsc}}{h_{fsc}}, \text{ for segment 1 (s=1) and } B_{fsc} = \frac{D_f - 1}{2} \times \frac{H_{fsc}}{h_{fsc}}, \text{ for segment 2 (s=2).}$$

$$\text{Urban: } \hat{Y}_c = \frac{Z}{n} \sum_{f=1}^n \sum_{s=1}^2 B_{fsc} \sum_{j=1}^{h_{fsc}} y_{fscj} \quad \dots(2)$$

$$\text{Here } B_{fsc} = \frac{H_{fsc}}{h_{fsc}}, \text{ for segment 1 (s=1) and } B_{fsc} = \frac{D_f - 1}{2} \times \frac{H_{fsc}}{h_{fsc}}, \text{ for segment 2 (s=2).}$$

*Note: For tabulating any characteristic from this detailed schedule  $\hat{Y} = \sum_c \hat{Y}_c$  is to be used.*

**3.2.4.1 COMBINED ESTIMATE FROM SUB-SAMPLES:** In the previous section, the estimate of a characteristic  $\hat{Y}$  as obtained for a stratum (a), for a particular sub-round (q) and a sub-sample replicate

(r), actually represent  $\hat{Y}_{aqr}$ . The combined /pooled estimate for a particular stratum and a particular sub-round is computed as the average of sub-sample replicate estimates and is given below:

$$\hat{Y}_{aq} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{aqr} \quad \dots(3)$$

**3.2.4.2 ESTIMATE OF AGGREGATES FOR A SUB-ROUND AT STATE/ UT/ REGION LEVEL:** If  $\hat{Y}_{qr}$  be the State/ UT/ Region level aggregate from the r-th sub-sample replicate and q-th sub-round, and  $\hat{Y}_{qp}$ , the combined/ pooled estimate of the aggregate based on the whole sample, for a given sub-round q, then

$$\hat{Y}_{qr} = \sum_a \hat{Y}_{aqr} \quad \dots(4)$$

based on sub-sample replicate group r, and

$$\hat{Y}_{qp} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{qr} \quad \dots(5)$$

based on all sub-sample replicates.

**3.2.4.3 ESTIMATES OF AGGREGATE FOR THE ROUND (i.e. all the 4 sub-rounds together) AT STATE/ UT/ REGION LEVEL:** The estimates of aggregates for the whole round are computed as the simple average of the sub-round estimates and are given below:

$$\hat{Y}_r = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qr} \quad \dots(6)$$

based on sub-sample replicate 1 and 2\*and

$$\hat{Y}_p = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qp} \quad \dots(7)$$

based on whole sample.

*\*Note: In the Round, sub-samples 1, 3, 5 & 7 (in sub-rounds 1 to 4) are combined together to form sub-sample replicate 1 (annual) while sub-samples 2, 4, 6 & 8 (in sub-rounds 1 to 4) are combined together to form sub-sample replicate 2 (annual). This has been followed in the remaining sections also. Stratum level estimate for the Round is obtained similarly.*

**3.2.5 ESTIMATES OF RATIO:** If  $\hat{X}$  &  $\hat{Y}$  be the State/ UT/ Region level aggregate estimate corresponding to variables x and y, then the estimate of ratio is given below:

$$\hat{R}_r = \frac{\hat{Y}_r}{\hat{X}_r} \quad \dots(8)$$

based on sub-sample group r, and

$$\hat{R}_p = \frac{\hat{Y}_p}{\hat{X}_p} \quad \dots(9)$$

based on the whole sample.

The formulae for  $\hat{X}$  are obtained similarly by replacing  $\hat{Y}$  by  $\hat{X}$  and y by x in the above formulae stated in previous sections.

*Note: Estimates for the sub-round  $\hat{R}_{qr}$  and  $\hat{R}_{qp}$  has been be obtained by replacing  $\hat{Y}_r$  and  $\hat{Y}_p$  by  $\hat{Y}_{qr}$  and  $\hat{Y}_{qp}$ , respectively and  $\hat{X}_r$  and  $\hat{X}_p$  by  $\hat{X}_{qr}$  and  $\hat{X}_{qp}$ , respectively.*

| <b>Statement 0: Number of villages/ blocks allotted and surveyed and number of households and persons surveyed</b> |                 |          |               |          |            |       |         |       |

## Section 4

### Per capita consumption of individual items

4.0 The present report makes use of the detailed item classification adopted in the schedule of enquiry to study consumer expenditure patterns in much greater detail. In this section, per capita estimates of consumption in quantity and value terms are presented for all the items of consumption for which either the monthly estimate of expenditure is at least 50 paise or at least 10% households reported consumption. These estimates are given for rural and urban areas separately for the 32 States and UTs of India. For all-India, these estimates have been presented for each MPCE class. Due to difference in the scope of all-India and State/UT tables, the numbering has been made separately for all-India and States/UTs. The items in the appendix have been divided into two groups – food and non-food. At all-India level, Tables 1R & 1U give estimates for food items and Tables 3R & 3U for non-food items. For States and UTs, Tables 2R & 2U give estimates for food items and Tables 4R & 4U for non-food items.

4.1 From the list of the items of the Appendix tables the items that contributed relatively high proportions of consumption in the respective item group to which it belongs have been identified. The estimates of monthly per capita consumption of these individual items, both in terms of quantity and value, are presented along with the corresponding estimates of two previous quinquennial rounds – 50<sup>th</sup> (July 1993 – June 1994) and 43<sup>rd</sup> (July 1987 – June 1988) - in Statements 1R and 1U. The estimates span the period 1987 – 2000.

4.2 The monthly per capita quantity of consumption (abbreviated PCQC) and monthly per capita value of consumption (abbreviated PCVC) for individual items have been examined. On the whole, the consumption pattern is found to be more or less stable for almost all the important items in both rural and urban areas of the country. Here the discussion is restricted to all-India level estimates with emphasis on quantity of consumption. Statements 1R and 1U reveal the following points.

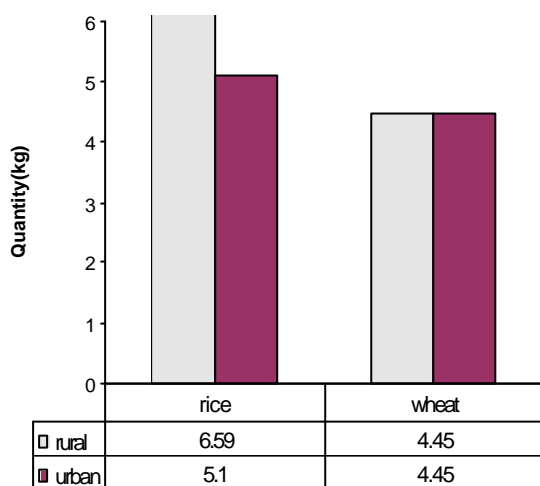

- Among the items of cereals, the most important items are rice and atta. It is seen that PCQC for rice has a declining trend over the period 1987-2000. During 55<sup>th</sup> round, atta was merged with wheat (whole or broken grain) in the schedule but wheat was separately collected in earlier rounds. Considering that the contribution of wheat to the merged item atta/wheat is negligible, it is difficult to conclude whether the PCQC of atta has declined or not. However, PCQC for atta in rural India is exactly the same as that of urban India in the 55<sup>th</sup> round.

- Regarding the items of pulses, it is found that the quantity of consumption remained almost static during the period 1987-2000. This is true for both rural and urban areas.
- PCQC for milk (liquid) shows a definite increase during the period 1987-2000, especially in urban areas.
- Among different edible oils, only mustard oil was used in increasing quantities over the period 1987-2000 in both rural and urban areas. The pattern is the same for rural and urban areas.
- Among the items of meat, egg & fish there was an increase in PCQC for many of the items. However, for goat meat /mutton there was a decline over the time period 1987-2000.
- Data on the consumption of vegetables show that the increase in PCQC was considerable in both rural and urban areas for almost all the important items of vegetables except brinjal, for which a slight fall is observed, over the period 1987-2000, in both rural and urban areas. One important thing can be noted: the consumption of green chillies increased over time and at the same time consumption of dry chillies decreased. Fruit consumption also increased over time, especially for coconut, lemon, mango and groundnut.
- Among the spices, PCQC decreased for tamarind and dry chillies. For many other items of spices group, it has increased. Thus, people are consuming more of spices but less of chilli and tamarind.
- PCVC for almost all the items increased from 1987 to 2000 at current prices. The increase was about three times during this period 1987-2000. During the first half of this period (1987-1994), the increase was about one and a half times.
- In the rural areas, the increase in PCVC was marked for many items, viz., chicken, egg, chilli (green), leafy vegetables, cauliflower, cabbage, tea (leaf), biscuits, electricity, LPG, clothing items, footwear, toilet articles (soap, lotion, cream etc.), postage, telegram and telephone charges, petrol and bicycle.
- In the urban areas, the increase was significantly high for the items like coconut oil, chicken, leafy vegetables, lady's finger, beans, garlic, electricity, LPG, books, newspapers, toilet articles, scooter, motor car etc.

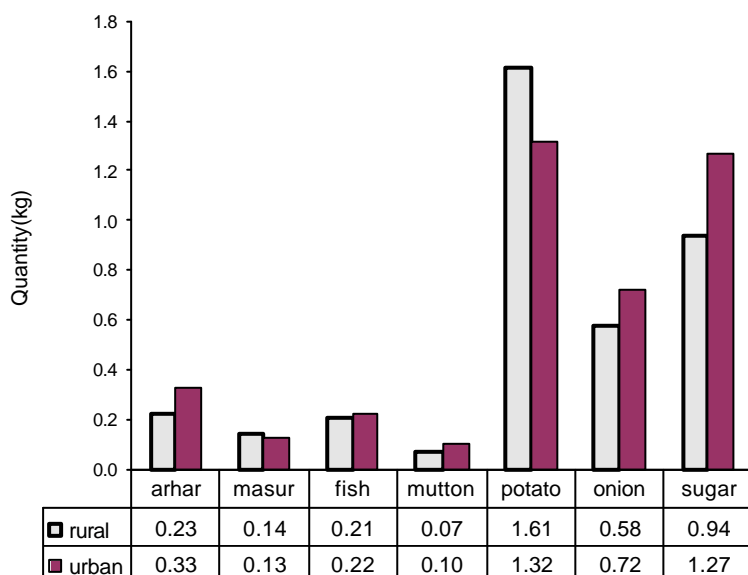

4.3 For the 55<sup>th</sup> round, estimates for some selected items have been presented graphically to show the monthly per capita quantity of consumption of these items in Figures 1 to 4.

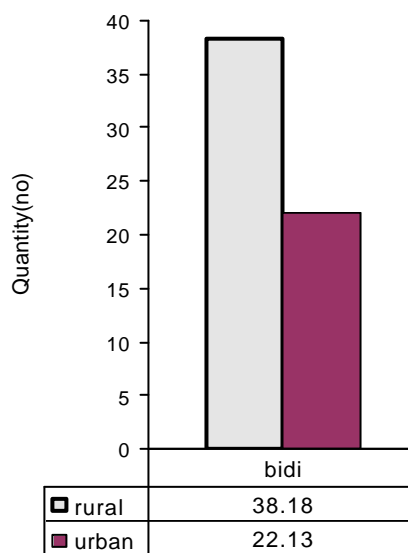

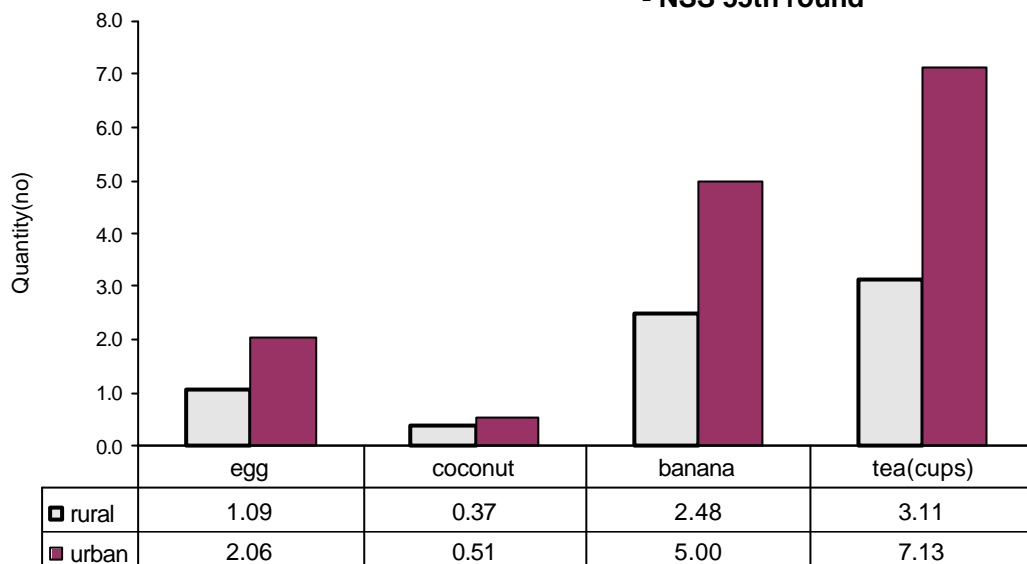

**Figure 1: Per capita consumption of rice and wheat per 30 days : all-India - NSS 55th round**

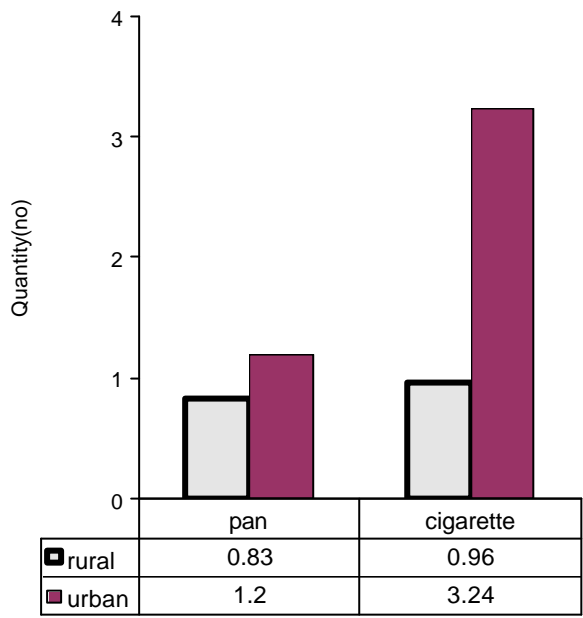

**Figure 2: Per capita consumption of some selected items per 30 days: all-India - NSS 55th round**

## Section 5

### Possession of Durable Goods

5.0 This section reports the proportion of households possessing different items of durable goods.

5.1 Tables 5R and 5U of the Appendix give estimated percentages of households possessing different durable goods separately for different MPCE classes and for the entire population, of rural and urban areas of each State and UT, and of the country as a whole. Twenty-three different durable goods are considered. The last but one column (column 16) of the table gives the average number of such goods possessed per 1000 households. Thus, a figure of 445 in column 16 against, say, “electric fan” means that the average number of electric fans possessed per household was 0.445 for the entire rural/urban area of the State/UT concerned.

Ignoring differences among the MPCE classes for the moment, one may consider first the “all classes” figures for the major States and all-India. Numbers per 1000 households reporting possession of different items of durable goods have been presented in Statements 2R & 2U below.

5.2 **Rural-urban differences:** The percentages of households possessing durable goods in urban areas are in nearly all cases higher than the corresponding percentages for rural areas. At all-India level, bicycle is the only item for which percentage of possessor households in rural areas is more than that for urban households. Rural-urban differences in incidence of possession are seen to be low in case of bicycles (40% for rural India as a whole and 39% for urban India) and also low for bedsteads (rural - 79%, urban - 82%), ‘suitcase, trunk, box, handbag and other travel goods’, and radio. For all the other durables listed in Statements 2R and 2U, rural-urban differentials are much higher. Examples are: TV and pressure cooker (rural - 3%, urban - 50%), electric fan (rural - 26%, urban - 69%) and refrigerator (rural - 3%, urban - 23%).

### Inter-state differences

5.3 As a rule, inter-state differences were more striking for rural areas of the country than for urban areas. Thus, for television, the range of variation was only 40% to 69% for urban areas but 6% to 60% for rural areas.

#### 5.4 Entertainment: radio, TV and tape recorder

**Radio** sets were possessed by 50% of *rural* households in Kerala and by 18-43% of rural households in other major states. Bihar (52%) and West Bengal (50%) had the highest incidence of household possession of radios in *urban* areas.

**Tape recorders and CD players** were present in 33 % of the rural households in Kerala and 29% of the rural households in Punjab, 21% of the rural households in Haryana and by less than 16% in all other major states (only 4-5% in Bihar, Orissa and UP). In urban areas the incidence was 40-44% in Kerala and Gujarat but the incidence was low in Bihar, Orissa, UP, and MP among the major states.

**Statement 2R: Inter-state variation in proportion of households (number per 1000) possessing different items of durable goods**

**Rural**

| 630  | clock, watch   | 721          | 413    | 574    | 667        | 535        | 509           | 586         | 604       |

The percentages of *rural* households reporting possession of **VCR/VCP** are seen to be 2% for Punjab, but less than 1% for all other major states, and in fact under 0.1% in 5 major States. In *urban* areas of Kerala, 14% households possessed VCR /VCP and no other major State had more than 6% households possessing VCR/VCP.

In rural areas, the proportion of households possessing television is high in Punjab (60%) and Haryana (49%) but low in Bihar, Orissa and west Bengal. On the other hand, the inter-state variation is not much striking in urban areas. The estimates were relatively low for Bihar, Orissa and Uttar Pradesh.

### 5.5 Equipment for housework: refrigerators, washing machines, pressure cookers, stoves and sewing machines

It is seen from Statement 2 that only 3% of rural households and 23% of urban households in India were found to possess a **refrigerator**. In urban India, the incidence of possession was much higher than the national average in Punjab (40%), Haryana (37%) and Gujarat (32%), and somewhat high in Kerala and Maharashtra (28%), and much below the national average in Bihar and Orissa.

The proportion of *rural* households having **pressure cookers** was under 10% in 9 of the 15 major states, though as high as 41% in Punjab, 33% in Gujarat and 34% in Haryana. In *urban* areas the proportion varied from 30% to 72%.

The use of **washing machines** was found to be 15 times more frequent in *urban* India compared to rural India. The use is high only in Punjab and Haryana (17%) compared to urban India as a whole (9%). The proportion of *urban* possessors did not exceed 9% in 10 out of 15 major states.

About 60-70% of *rural* households possessed **stoves** in Punjab and Gujarat, as against 48% in Haryana and 45% in Maharashtra. In as many as 9 major states the proportion was under 30%. In *urban* areas the proportion was above 45% in all the major states, being the highest in Maharashtra (76%) and Karnataka (75%) and 65-69% in Andhra Pradesh, Haryana, Punjab, Rajasthan and Tamil Nadu.

One of the most striking instances of inter-state variation was in possession of **sewing machines** in *rural* areas. Percentage of possessor households was 7% or less for 10 of the 15 major states, but as high as 41% in Haryana, and 49% in Punjab. In urban areas such variation was less, though considerably higher than the variation in case of (say) TV sets and tape recorders.

### 5.6 Personal transport: motorcycles/ scooters and bicycles

Kerala had the lowest proportion (20%) of *rural* households possessing **bicycles**. The proportion was also low in the two other southern states – Andhra Pradesh and Karnataka - and in Maharashtra (28%). All other states reported proportions between 30% and 52% except Punjab, where nearly 73% of *rural* households had at least one bicycle. Interestingly, the proportion was much lower in *urban* Punjab (only 54%), no doubt due to the widespread use of motorcycles and scooters in preference to bicycles there.

The percentage of households with **motorcycles/scooters** was around 18% in urban India and 5% in rural India. The incidence of possession was the highest in *urban* areas of Gujarat (31%) and Punjab (27%). In *rural* India, Punjab (20%) was well ahead of all other major states in this respect.

West Bengal (5%) had the lowest percentage of **motorcycle/scooter** possessors in *urban* India. In rural India, the 4 eastern states - Assam, West Bengal, Bihar and Orissa - occupied the lowest positions in this respect among all major states.

### 5.7 “Comfort” goods: air coolers/ conditioners and electric fans

The percentage of rural households with electric fan was the highest in Punjab (84%) and Haryana (75%). In urban India, 80-85% households possessed electric fan in Gujarat, Haryana, Punjab and Rajasthan. In all the major states, the rural possession rate was much lower than the urban.

In rural areas, the lowest percentage of households with **electric fans** was reported by Bihar (4%) while in urban areas the percentage was the lowest for Assam (41%). In *rural* areas, the percentage is low in four states, viz., Karnataka, Orissa, Uttar Pradesh and West Bengal (12-21%).

**Air coolers/conditioners** were present in 11% of *urban* households in the country as a whole. They were most common in Haryana (38%) and Punjab (28%). Rajasthan (27%), Madhya Pradesh (20%) and Uttar Pradesh (13%) were the only other states where the proportion of possessor households exceeded 10%. In rural India there was no major state where the percentage of households reporting possession of this commodity is more than 3% except Punjab and Haryana.

### 5.8 Other durables

Rural areas of two major states - Karnataka and Tamil Nadu - had less than 70% households possessing **bedsteads**. In Orissa and West Bengal, the percentage was between 70% and 80%, and for the rest of the States, the percentage was above 80%. As for urban areas, Tamil Nadu had the lowest percentage of households with bedsteads (63%), followed by Karnataka (69%), Assam (71%) and Orissa (76%) and all other States reporting more than 80%.

Both rural and urban areas of Kerala had around 80% households possessing **clocks/watches**. The percentage is also high in Haryana (rural – 66%), Gujarat (urban – 77%) and Maharashtra (urban – 72%). As for most of the items, the percentage is low in both rural and urban areas of Assam, Bihar and Orissa.

### Variation with overall level of living

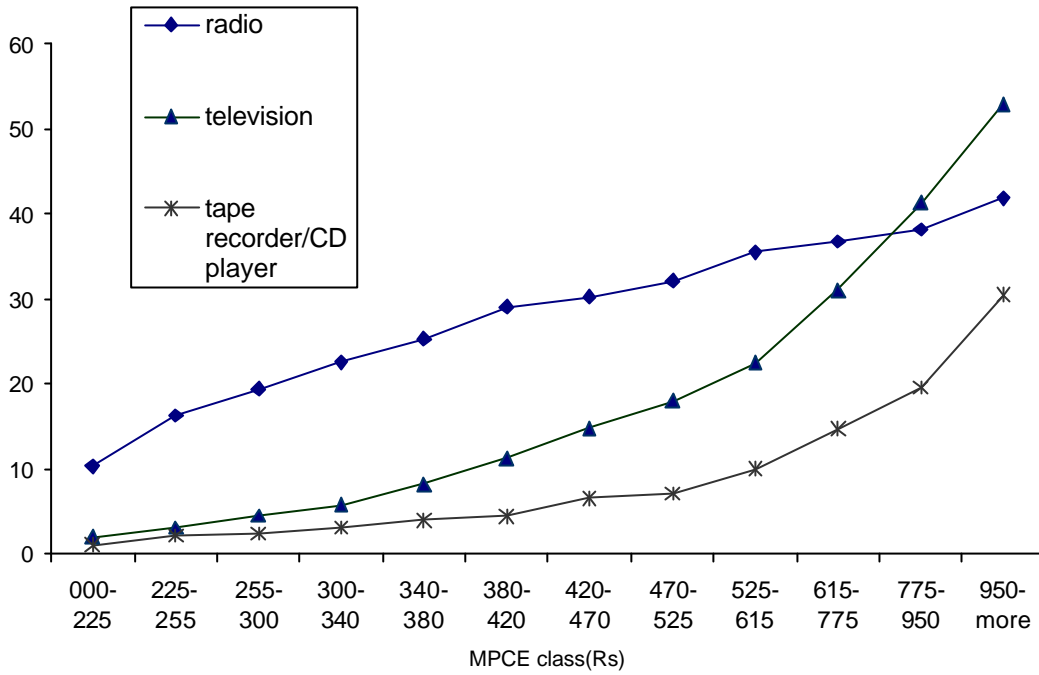

**5.9** Here the object of interest is the variation among the different MPCE classes in respect of the percentage of households possessing each item of durable goods. Although Tables 5R and 5U of the appendix give details of such variation for each State and UT, the discussion here will be confined to variation at the national level, considering rural and urban areas separately.

In Figures 5 to 7, the all-India percentages of households (as appearing in Tables 5R and 5U of the appendix under “all-India”) in different MPCE classes reporting possession are shown graphically for 11 of the 23 durable goods considered in this report, with the MPCE classes represented on the horizontal axis.

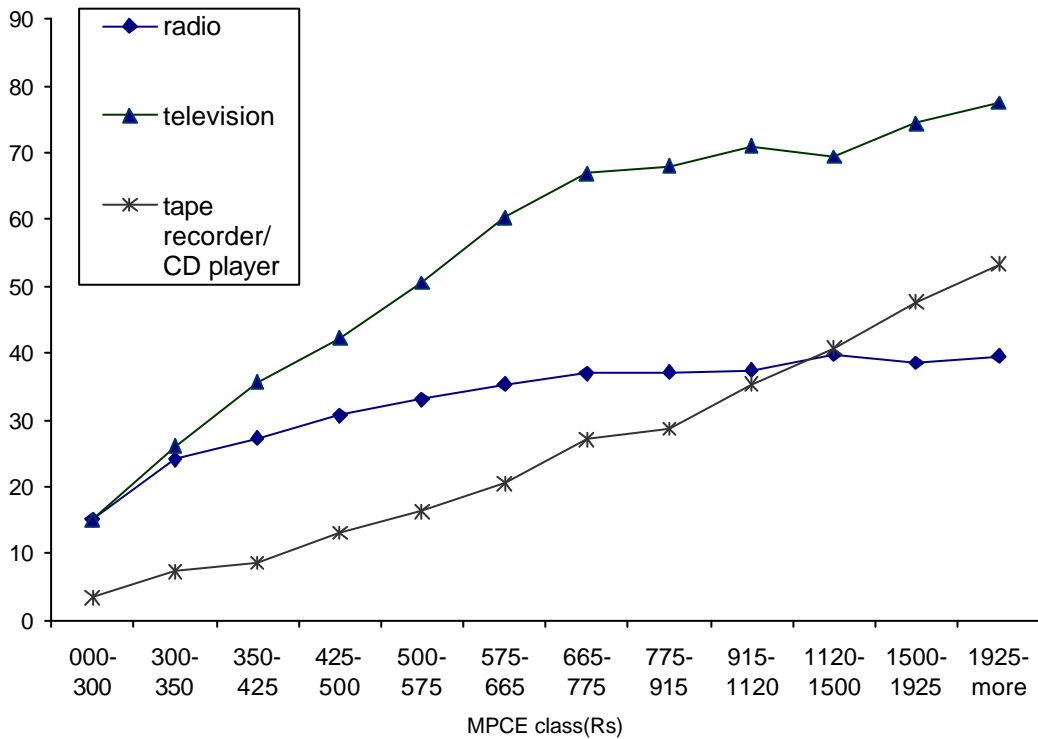

### Goods for recreation and comfort

**5.10 Radios:** There is a marked contrast between rural and urban areas in the way the incidence of possession varies over the MPCE classes.

**Figure 5R : Leisure-time needs - percentages of possessor households**

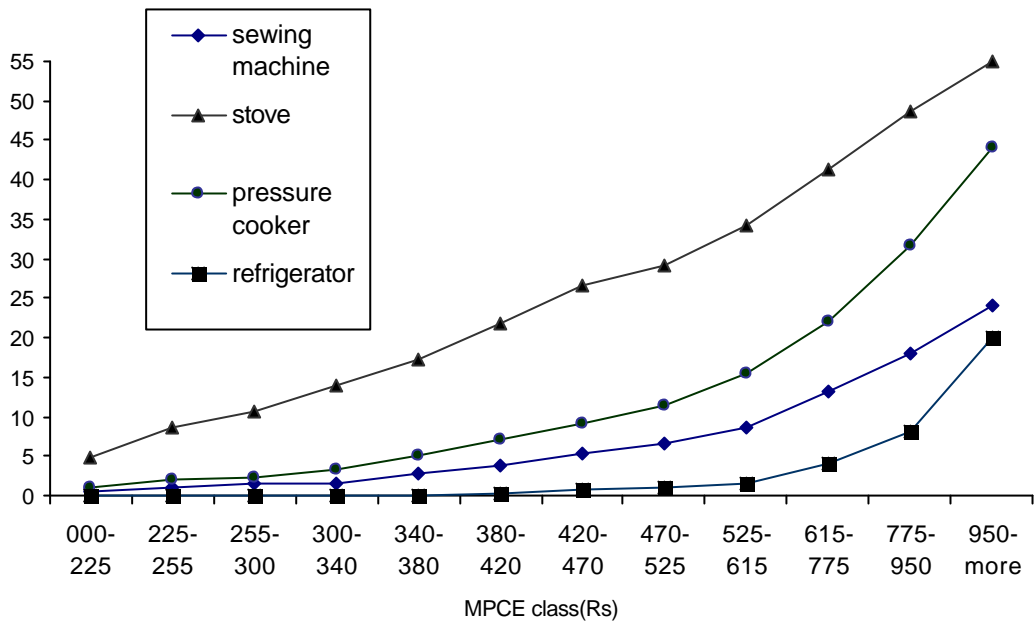

**Figure 5U: Leisure-time needs - percentages of possessor households**

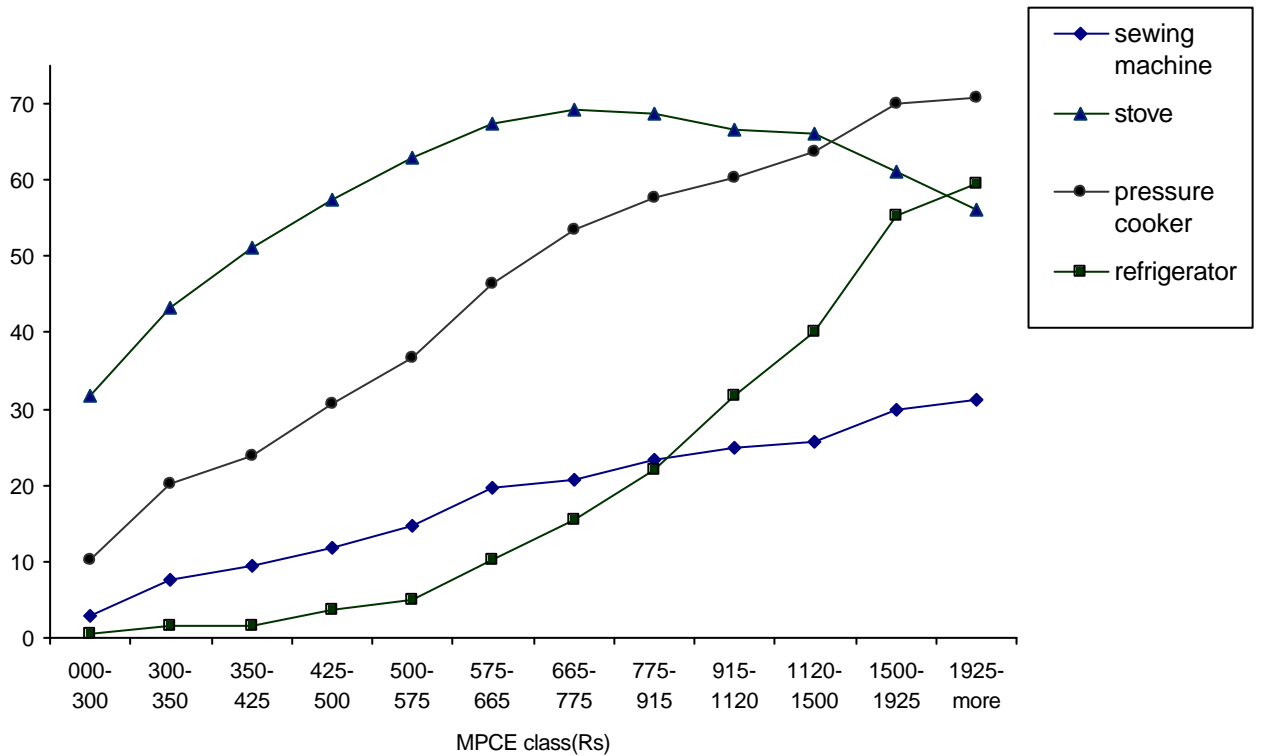

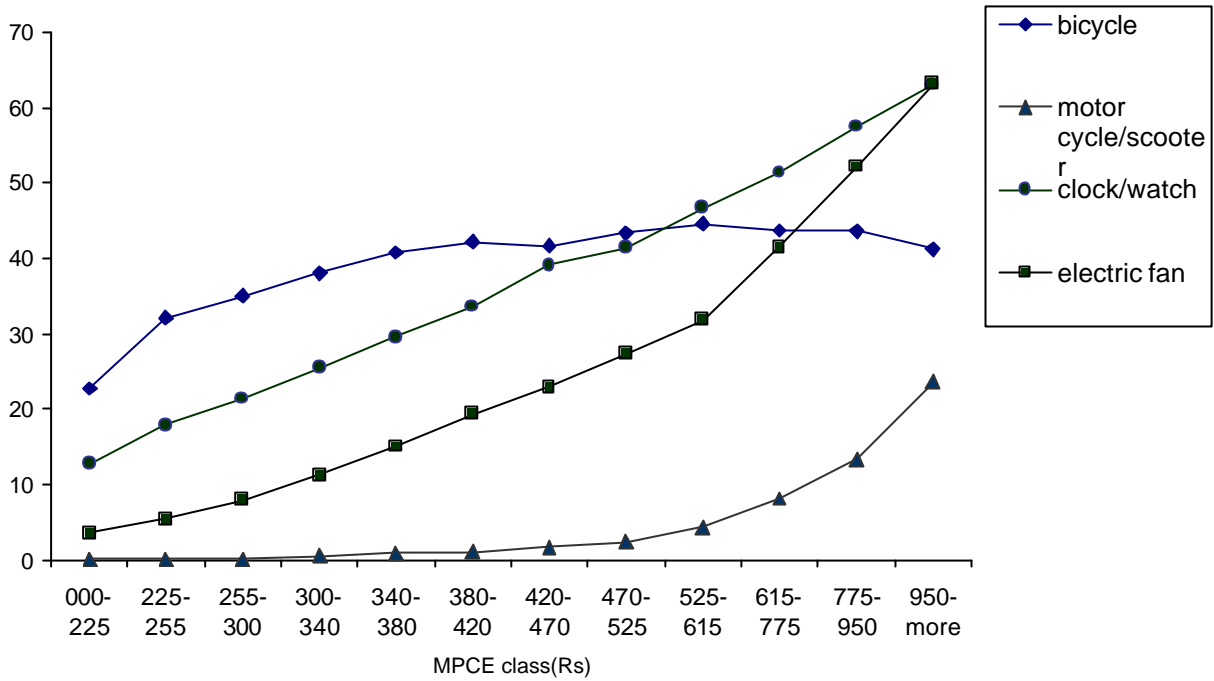

**Figure 6R: Labour-saving household equipment - percentages of possessor households**

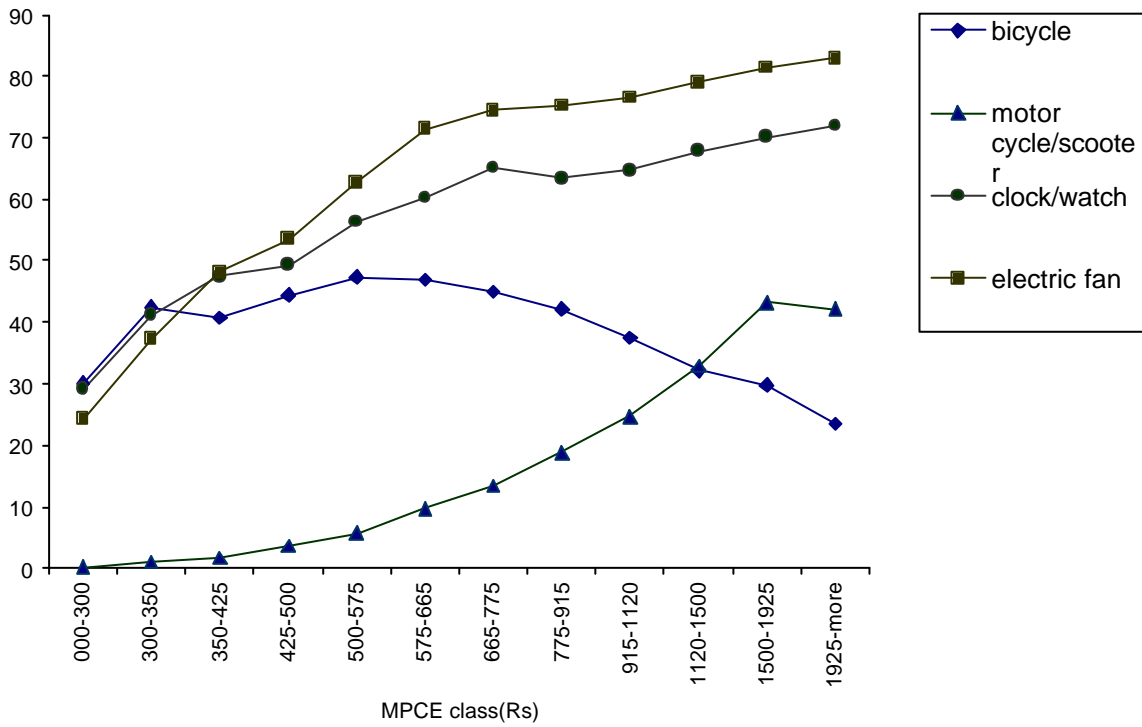

**Figure 6U: Labour-saving household equipment - percentages of possessor households**

**Figure 7R: Clocks/watches, electric fan, bicycles and two wheelers - percentages of possessor households**

**Figure 7U: Clocks/watches, electric fan, bicycles and two wheelers - percentages of possessor households**

For urban areas (Figure 5U) the curve is seen to flatten out considerably. The percentage of possession in the lowest MPCE class is 15.1% and in the highest, 39%. In rural areas (Figure 5R), on the other hand, the proportion of possessor households in the lowest MPCE class is 10.3% and in the highest, 41.9%.

**5.11 TV and tape recorder /CD Player :** These are much later arrivals on the Indian market compared, for instance, to the radio set. Incidence of possession in rural areas exceeds 5% only from the 4<sup>th</sup> MPCE class onwards in case of TV, and only from the 7<sup>th</sup> MPCE class onwards for tape recorders. Both commodities are clearly luxury items with the incidence of possession rising sharply as one reaches the top two MPCE classes. In urban India TV sets are possessed by nearly 15% of households in even the lowest MPCE class and by nearly 50% households in the 5<sup>th</sup> MPCE class, but the incidence-of-possession curve tends to flatten out a little for the upper MPCE classes.

**5.12 Electric fans:** The lowest MPCE class in rural India (Figure 7R) has about 3.5% households possessing electric fans and the highest MPCE class, 63%. The incidence of possession goes up by roughly equal increments as one moves up from each MPCE class to the next. The percentage of urban households with fans (Figure 7U) goes up from 24% for the lowest MPCE class to 83% for the highest, but the slope of the incidence-of-possession curve decreases progressively as one moves from lower to upper MPCE classes.

### **Equipment for household work**

**5.13 Stoves:** For rural areas (Figure 6R) the incidence of possession curve for stoves resembles the curve for electric fans. In the lowest MPCE class of rural population, 5% possessed stoves and in the highest MPCE class, 55%. For urban areas (Figure 6U) the variation in the percentage of possessing households is of a totally different kind. Starting at a level of 32% for the lowest MPCE class, the percentage rises with each successive MPCE class up to the 7<sup>th</sup>, at which point a peak (69%) is reached, after which the percentage then declines gradually. The data thus enable one to identify, fairly accurately, the average level of living at which the stove, in urban India, begins to get substituted by "superior" equipment such as the LPG cylinder.

**5.14 Pressure cookers:** The percentage of rural possessor households (Figure 6R) is under 12% till the 8<sup>th</sup> MPCE class is reached. The incidence of possession then rises more steeply, ending at 44% for the top MPCE class, and closely parallels the possession pattern for TV sets. For urban areas (Figure 6U), the percentage of households with cookers is 10% for the lowest MPCE class and 71% for the top MPCE class, and the similarity with the curve for TV sets is again very strong.

**5.15 Refrigerators:** This commodity (Figures 6R & 6U) shows unmistakable luxury characteristics not only for rural India but also for urban India. Percentage of possessor households is, of course, much higher in urban areas, reaching 59% for the highest MPCE class. In rural areas the percentage is under 8% for all but the top two MPCE classes, where it is 8% and 20%, respectively.

**5.16 Sewing machines:** In rural areas (Figure 6R) the percentage of possessor households is under 5% for MPCE classes 1-6 and then rises more steeply, reaching 24% for the highest MPCE class. For urban areas (Figure 6U) the curve is roughly linear and the "propensity" to possess a machine increases only gradually with level of living, **the percentage of possessing households rising by roughly 2.5 percentage points with each successive MPCE class.**

## Other durables

**5.17 Motorcycles/scooters:** The percentage of households with motorcycles or scooters rises smoothly in both rural and urban India. In urban areas the percentage varies from 5% for the 4th MPCE class to 42-43% in the highest MPCE class. In rural areas (Figure 7R) the percentage remains under 5% up to the 9<sup>th</sup> MPCE class and then rises sharply to 24% for the highest MPCE class.

**5.18 Bicycles:** The bicycle, on the other hand, is clearly an “inferior” commodity in urban areas with the possession rate reaching a peak of 47% for the 5<sup>th</sup> MPCE class and declining steadily thereafter. In rural areas, by contrast, the percentage of households with bicycles rises from 22% for the lowest MPCE class and after 5<sup>th</sup> MPCE class the curve flattens.

**5.19 Clocks and watches:** For clocks and watches, the possession rate in rural areas rises steadily from 13% for the lowest MPCE class to 63% for the highest. In urban areas, the percentage of households with clocks and watches rises from 29% for the lowest MPCE class to 72% for the highest.

## 5.20 Average number possessed by households reporting possession

Statement 3 shows, for each of 23 different durable goods, average number possessed by 1000 households in rural and urban areas of the 15 major states and all-India. The following features deserve mention.

**Furniture:** Statement 3 reveals that bedstead is the only item out of the 23 items under consideration for which the average *number* of bedsteads possessed by a rural household (2.5) is more than that in urban areas (2.1). The average number is more or less the same in the two sectors for bicycle (0.4). For all other items, the average number was less in rural compared to urban.

**Television:** In **rural India**, the average number of television sets possessed by the households was 0.2 and that in urban area was 0.6. The average number is the highest in Punjab, followed by Haryana. It is the lowest in Bihar (0.06) and Orissa (0.1). In **urban India** the average number of television sets possessed by a household is relatively high in Haryana (0.7), Maharashtra (0.7), Rajasthan (0.7). It is the lowest, about 0.5, in Bihar, Orissa, Uttar Pradesh and West Bengal.

**VCR/VCP:** The average number of VCR/VCP possessed by households was 0.005 in rural and 0.04 in urban areas. In the rural areas the average number is more than 0.01 in only two States, viz., Kerala and Punjab. In urban areas it is more than 0.06 in only one State, viz., Kerala (0.1).

**Radio:** The inter-state variation in the average number of radio sets possessed by the households is much less compared to other items of durable goods in rural areas of the country. However, it is relatively high in rural areas of Karnataka (0.4), Kerala (0.5) and West Bengal (0.4) and in urban areas of Bihar (0.6) and West Bengal (0.6).

**Tape recorder/CD Player:** The average number of tape recorders/CD players in urban India is three times that in rural areas. It is high only in Kerala (0.3) and Punjab (0.3) among the major States in rural areas while it is low in Bihar, Madhya Pradesh, Orissa, Uttar Pradesh

and West Bengal. In urban areas it is relatively high in Gujarat (0.4), Kerala (0.4) and Punjab (0.4) and low in Orissa (0.2), Uttar Pradesh (0.2), West Bengal (0.2).

**Washing machine:** The average number of washing machines possessed by urban households was fifteen times that of rural households at all India level. Like other items the average number is relatively high in both sectors of Punjab, Haryana and Kerala.

**Bicycle:** A household possessed 0.5 bicycle, on an average, in both rural and urban areas. In the rural areas of the major States the average number is relatively high in Punjab (0.9) and Uttar Pradesh (0.7) and relatively low in Karnataka (0.2) and Kerala (0.2). In the urban areas of major States the average number was relatively high in Madhya Pradesh (0.7), Orissa (0.8) and Punjab (0.7) and low, about 0.3 in Karnataka, Kerala and Maharashtra.

**Other items of durables:** Households in urban areas reported an average of 1.4 fans possessed compared to 0.4 in rural areas. Average number of **stoves** possessed was 0.7 in urban areas and 0.3 in rural areas. In urban areas the percentage of households possessing **pressure cooker** was 0.7 on an average and in rural areas the average was 0.2. Note that in the highest MPCE class of 'Rs.1925 and above', in the urban sector 72% of the households reported possession of any clock or watch and in the rural sector the percentage was 63%.

**Statement 3R: Durable goods: average number possessed per 1000 households in different States**

**Rural**

| code | Item   | Andhra Pradesh | Assam | Bihar | Gujarat | Haryana | Karnataka | Kerala | Madhya Pradesh |
|------|--|----------------|-------|-------|---------|---------|-----------|--------|----------------|
| (1)  | (2)  | (3)            | (4)   | (5)   | (6)     | (7)     | (8)       | (9)    | (10)           |
| 550  | bedstead   | 1431           | 2611  | 2634  | 2604    | 5887    | 676       | 2159   | 2657           |
