Government of India

December 2000

## ***Preface***

*National Sample Survey Organisation (NSSO) conducted an integrated survey of households and non-agricultural enterprises in the informal sector during July 1999 to June 2000. The subjects covered were household consumer expenditure, employment and unemployment and non-agricultural enterprises in the informal sector. The survey on non-agricultural enterprises in the informal sector covered enterprises carrying out activities of manufacturing, construction, trading and repair services, hotels & restaurants, transport, storage and communications, financial intermediation, real estate, renting and business activities, education, health and social work and other community, social & personal service activities. Unincorporated proprietary and partnership enterprises were treated as enterprises belonging to the informal sector. This is the first-ever nation-wide survey on informal sector though in the past NSSO has conducted surveys on unorganized sector enterprises.*

*This report contains information on estimated number of enterprises, workers and other key characteristics of the non-agricultural enterprises in the informal sector at the all India level.*

*Field Operations Division (FOD) of the organisation conducted the fieldwork for the survey and data was processed and tabulated by the Data Processing Division (DPD) of the NSSO. Coordination and Publication Division (CPD) coordinated the overall survey activity. The Survey Design and Research Division (SDRD) of the NSSO developed the survey design and prepared the report.*

*I am grateful to the Chairman and members of the Governing Council of NSSO and Heads of divisions of NSSO and their colleagues for the contribution made in preparing this report.*

*Comments and suggestions for improvement will be most welcome.*

*New Delhi  
December 2000*

**Non-Agricultural Enterprises in the Informal Sector in India**  
**55<sup>th</sup> round (July 1999 – June 2000)**  
**Key Results at a glance**

Indicator	Rural	Urban	Combined
1. Number of first stage units (villages/ urban blocks) surveyed	6046	4124	10170
2. Number of enterprises* surveyed			
i) Own Account Enterprises	102124	60852	162976
ii) Establishments	12390	22283	34673
iii) All	114514	83135	197649
3. Estimated number of enterprises ( <i>in lakhs</i> )			
i) Own Account Enterprises	236.0	151.4	387.4
ii) Establishments	14.1	42.0	56.1
iii) All	250.1	193.4	443.5
4. Distribution of enterprises by type (%)			
i) Own Account Enterprises	94.4	78.3	87.4
ii) Establishments	5.6	21.7	12.6
iii) All	100.0	100.0	100.0
5. Rural-urban distribution of enterprises (%)			
i) Own Account Enterprises			
ii) Establishments	60.9	39.1	100.0
iii) All	25.1	74.9	100.0
	56.4	43.6	100.0
6. Estimated number of workers ( <i>in lakhs</i> )			
i) Own Account Enterprises	340.8	221.1	561.9
ii) Establishments	56.6	178.6	235.2
iii) All	397.4	399.7	797.1
7. Distribution of workers by enterprise type (%)			
i) Own Account Enterprises	85.8	55.3	70.5
ii) Establishments	14.2	44.7	29.5
iii) All	100.0	100.0	100.0
8. Rural-urban distribution of workers (%)			
i) Own Account Enterprises	60.6	39.4	100.0
ii) Establishments	24.1	75.9	100.0
iii) All	49.9	50.1	100.0
9. Estimated number of workers by gender (in lakhs)			
i) Male	293.4	342.4	635.8
ii) Female	104.0	57.3	161.3
iii) All workers	397.4	399.7	797.1
10. Estimated number of workers by type of worker (in lakhs)			
i) Full-time	335.4	366.7	702.1
ii) Part-time	62.0	33.0	95.0
iii) All workers	397.4	399.7	797.1

Indicator	Rural	Urban	Combined
11. Average number of workers per enterprise			
i) Own Account Enterprises	1.4	1.5	1.5
ii) Establishments	4.0	4.2	4.2
iii) All	1.6	2.1	1.8
12. Percentage of enterprises furnishing information from books of accounts			
i) Own Account Enterprises	1.8	4.4	2.8
ii) Establishments	9.3	25.5	21.4
iii) All	2.2	9.0	5.2
13. Percentage distribution of enterprises by type of ownership			
i) Proprietary (male)	86.0	86.2	86.1
ii) Proprietary (female)	13.0	10.5	12.0
iii) Partnership (same household)	0.6	2.0	1.2
iv) Partnership (different households)	0.4	1.2	0.7
v) Not reported	0.0	0.0	0.0
vi) Total	100.0	100.0	100.0
14. Percentage of enterprises registered with any Act / Authority	11.6	31.3	20.2
15. Percentage distribution of enterprises by nature of operation			
Perennial	95.6	98.4	96.9
Seasonal	3.8	1.1	2.6
Casual	0.6	0.5	0.5
Not reported	0.0	0.0	0.0
Total	100.0	100.0	100.0
16. Percentage distribution of enterprises by location-			
Within household premises	44.9	24.4	35.9
Outside household premises but with fixed location	31.5	56.2	42.2
Outside household premises but without fixed location	23.5	19.4	21.8
Not reported	0.1	0.0	0.1
Total	100.0	100.0	100.0
17. Distribution of enterprises by growth status (over last 3 years)			
Expanding	18.5	22.3	20.2
Stagnant	65.9	58.7	62.8
Contracting	9.2	10.3	9.7
Operated less than 3 years	6.3	8.7	7.3
Not reported	0.1	0.0	0.1
All	100.0	100.0	100.0
18. Percentage of enterprises working on contract	12.1	9.4	10.9
19. Percentage of enterprises facing no specific problem in operation	28.5	30.9	29.5

\*: Enterprise means non-agricultural enterprise in the informal sector belonging to NIC-1998 (see Annex-I) tabulation categories 'D' to 'O' (except tabulation categories 'E' and 'L'). The term 'enterprises' mentioned at sl. no. 11-19 above, represents own account enterprises and establishments collectively.

## Section One

### Introduction, Concepts and Definitions

**1.0 Introduction:** The term ‘informal sector’ has been debated much during the last few years for want of universally acceptable definition. Various issues relating to the concept and definition of the informal sector were discussed in the fifteenth International Conference of Labour Statisticians at Geneva (January, 1993) and a resolution (Resolution-II) concerning statistics of employment in the informal sector was adopted at the end of the conference. Later, the System of National Accounts (1993) recommended by United Nations also endorsed this resolution with regard to the concept of informal sector.

The concept and definition of the informal sector as per the resolution adopted at the fifteenth International Conference of Labour Statisticians (1993) is briefly presented below in paragraphs 1.0.1 and 1.0.2.

**1.0.1 Concept of informal sector:** (a) Informal sector may be broadly characterized as consisting of units engaged in the production of goods or services with the primary objective of generating employment and incomes to the persons concerned. These units typically operate at low level of organization, with little or no division between labour and capital as factors of production and on a small scale. Labour relations, where they exist, are based mostly on casual employment, kinship, or personal or social relations rather than contractual arrangements with formal guarantees.

(b) The production units in informal sector have characteristic features of household enterprises (see para 1.0.3). The owners of these production units have to raise the necessary finance at their own risk and are personally liable, without limit, for any debts or obligation incurred in the production process. Expenditure for production is often indistinguishable from household expenditure. The capital goods such as building or vehicles may be used indistinguishably for the business and household purpose. The fixed and other assets used do not belong to the production units as such but to their owners.

(c) Activities performed by production units of the informal sector are not necessarily performed with the deliberate intention of evading the payment of taxes or social security contributions, or infringing labour or other legislations or administrative provisions. Accordingly, the concept of informal sector activities should be distinguished from the concept of activities of the hidden or underground economy.

**1.0.2 Definition of informal sector:** (a) For statistical purpose, the informal sector is regarded as a group of production units, which form part of the household sector as household enterprises or equivalently, unincorporated enterprises owned by households.

(b) Within the household sector, the informal sector comprises of ‘*informal own account enterprises*’ and the ‘*enterprises of informal employers*’.

(c) The informal sector is defined irrespective of the kind of work place where the productive activities are carried out, the extent of fixed capital assets used, the duration of the operation of enterprise (perennial, seasonal or casual), and its operation as a main or secondary activity of the owner.

1.0.3 According to the United Nations System of National Accounts (Rev. 4), *household enterprises* (or equivalently unincorporated enterprises owned by households) are units engaged in the production of goods or services, which are not constituted as separate legal entities independently of the households or household members that own them, and for which no complete sets of accounts are available which would permit a clear distinction of the production activities of the enterprises from the other activities of their owners. The household enterprises include unincorporated enterprises owned and operated by individual household members or by two or more members of the same household as well as unincorporated partnerships formed by members of different households.

**1.1 Informal sector in the Indian context:** (a) In India, the term ‘informal sector’ has not been used in the official statistics or in the National Accounts Statistics (NAS). The terms used in the Indian NAS are ‘**organised**’ and ‘**unorganised**’ sectors. The *organised sector* comprises of enterprises for which the statistics are available regularly from the budget documents or reports, annual reports in the case of Public Sector and through Annual Survey of Industries in case of registered manufacturing. On the other hand, the *unorganised sector* refers to those enterprises whose activities or collection of data is not regulated under any legal provision and / or which do not maintain any regular accounts. Non-availability of regular information has been the main criteria for treating the sector as unorganised. This definition helps to demarcate organised from the unorganised. For example, units not registered under the Factories Act 1948 constitute unorganised component of manufacturing on account of activity not regulated under any Act. In case of the sectors like trade, transport, hotels & restaurants, storage and warehousing, and services, all non-public-sector operating units constitute the unorganised sector. However, the enterprises covered under Annual Survey of Industries do not fall under the purview of unorganised sector.

(b) The National Sample Survey Organisation conducted the first ever nation-wide survey on informal sector non-agricultural enterprises during 55<sup>th</sup> round (July 1999 - June 2000). In this survey, all unincorporated proprietary and partnership enterprises have been defined as **informal sector** enterprises. This definition differs from the concept of unorganised sector used in National Accounts Statistics. In the unorganised sector, in addition to the unincorporated proprietary or partnership enterprises, enterprises run by cooperative societies, trusts, private and public limited companies (Non ASI) are also covered. The informal sector can therefore be considered as a subset of the unorganised sector.

## 1.2 Other concepts and definitions used in the present survey:

1.2.1 **Enterprise:** An enterprise is an undertaking which is engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly, or by an institutional body.

**1.2.2 Own account enterprise (OAE):** An own account enterprise is an undertaking run by household labour, usually without any hired worker employed on a 'fairly regular basis'. By 'fairly regular basis' it is meant the major part of the period of operation(s) of the enterprise during the last 365 days.

**1.2.3 Establishment:** Those enterprises, which have got at least one hired worker on a 'fairly regular basis' are called establishments.

**1.2.4 Proprietary enterprises:** Proprietary enterprises are those where an individual is the sole owner of the enterprise.

**1.2.5 Partnership Enterprises:** Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. Partners may be from the same household or they may be from different households.

**1.2.6 Seasonal enterprise:** Seasonal enterprises are those, which are usually run in a particular season or fixed months of a year.

**1.2.7 Non-agricultural enterprise:** All enterprises covered under Tabulation Categories 'A' and 'B' of the National Industrial Classification, NIC-1998 (see Annex-I), are "agricultural enterprises" while the others covered under Tabulation Categories 'C' to 'Q' are "non-agricultural enterprises". However, in the 55<sup>th</sup> round survey, the enterprises falling under tabulation categories D to O (except E and L) have only been covered. Therefore, the non-agricultural enterprises belonging to mining & quarrying (Tabulation category C), electricity, gas and water (Tabulation category E), public administration and defence, compulsory social security (Tabulation category L), private households with employed persons (Tabulation category P), and extra territorial organisation and bodies (Tabulation category Q), have not been covered in this survey.

Extract of NIC 1998 giving activities covered under different tabulation categories (A-Q) is given at **Annex-I**. Detailed activities coverage and their definition used in this survey are given in **Annex-II**.

**1.2.8 Self-employed:** Persons who are engaged in their own farm or non-farm enterprises are defined as self-employed. There are different types of self-employed persons. Some may operate their enterprises without hiring any labour. Others normally work on their own but occasionally hire a few labourers. There is also a third category who by and large regularly run their enterprises by hiring labour. The first two groups of self-employed are known as 'own account workers' and the third as 'employers'.

**1.2.9 Worker:** A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/ salaries in return to his/ her work incidental to or connected with the entrepreneurial activity.

**1.2.10 Hired worker:** A hired worker is a person employed directly or through any agency on payment of regular wage/ salary in cash or kind. Apprentices, paid or unpaid, are to be treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also considered as hired workers.

**1.2.11 Other worker/ helper:** This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers/ helpers who are associated with the activities of the enterprise during the reference month are considered against this category.

**1.2.12 Mixed activity:** There are enterprises, which carry out a number of activities simultaneously. For example, a grocery shop owner may also sell oil from his own *ghani*, a doctor may have a medical shop attached to his dispensary, a restaurant may run an STD booth in its premises, etc. Each of such activity is treated as a separate enterprise if information for them is separately available. If the accounts are not separable then the data pertains to the enterprise as a whole and the enterprise will be classified as having mixed activities and the activities of such enterprises are a mixture of NIC's. The appropriate NIC in such cases is determined on the basis of **major** activity. Major activity refers to the activity, which yields maximum income / turnover / employment. The above criteria is applied in the given order, i.e. income first, then turnover and then employment, to determine the major activity. The activities may be mixed at any level of NIC, but for the present survey it is restricted to 2-digit level of NIC-98.

**1.2.13 Reference Period:** *Last month* has been used as the reference period to collect most of the data on enterprises. Various receipts and expenses as well as employment, emoluments, rent, interest, net surplus and value added for the enterprises has been collected for the last month only. *Last month refers to the last 30 days (preceding the date of survey) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, last month refers to the last 30 days (preceding the date of survey), if they have worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which have worked for less than 30 days in the current season, last month refers to an average month in the last working season. If some enterprise is unable to give information for the last 30 days and is able to give information for the last calendar month, figures for the same have been taken.* For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period is 'as on the date of survey'. For some other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the reference period is the 'last 365 days preceding the date of survey'.

## Section Two

### Coverage, Sample Design and Estimation Procedure

#### 1. General

**1.1 Subject coverage:** The 55<sup>th</sup> round of NSS conducted during July 1999 to June 2000 was an integrated survey on household consumer expenditure, employment-unemployment and informal sector non-agricultural enterprises.

**1.2 Geographical coverage:** The survey covered the whole of the Indian Union except (i) Ladakh and Kargil districts of Jammu & Kashmir, (ii) villages situated beyond 5 Kms. of bus route in the state of Nagaland and (iii) inaccessible villages of Andaman and Nicobar. As in the previous rounds, all the uninhabited villages of the country, according to 1991 census, are left out of the coverage of NSS 55<sup>th</sup> round.

**1.3 Sub round:** The fieldwork of the survey was carried out during 1<sup>st</sup> July 1999 to 30<sup>th</sup> June 2000. The entire survey period is divided into four sub-rounds of three months' duration each as indicated below and equal number of sample villages and blocks were allocated to each sub-round. Each FSU is surveyed during the sub-round period to which it is allocated. Within a particular sub-round, the fieldwork is spread out uniformly over different months to the extent possible.

- Sub-round 1: July-September 1999
- Sub-round 2: October-December 1999
- Sub-round 3: January-March 2000
- Sub-round 4: April-June 2000

#### 2. Sample Design

**2.1 General:** A stratified sampling design has been adopted for selection of the sample first-stage units (FSUs). The FSUs are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USUs) are households for canvassing consumer expenditure and employment-unemployment schedules and enterprises for canvassing informal sector enterprise schedule. USUs are selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSUs are subdivided into hamlet groups (rural) / sub-blocks (urban) that are grouped into two segments, and USUs are selected independently from each of these segments. In this note, estimation procedure relevant for estimation of characteristics relating to informal non-agricultural enterprises has only been given.

**2.2 Sampling Frame:** List of villages (panchayat wards for Kerala) as per 1991 Census and latest lists of UFS blocks are respectively used for selection of rural and urban sample FSUs. For selection of sample villages from the State of Jammu & Kashmir, list of villages as per 1981 Census has been used as the sampling frame. It may be mentioned that all the uninhabited villages of the country as per 1991 Census, interior villages of Nagaland situated beyond 5 kms. of a bus route

and inaccessible villages of Andaman & Nicobar Islands are left out of the survey coverage of the NSS 55th round.

**2.3 Sample size (FSUs):** A total number of 10,384 FSUs were selected for survey in the *central sample* at all-India level (rural & urban combined) in the 55th round. Sample size for the whole round for each State/UT and Sector (i.e. rural/ urban) are allocated equally among the four sub-rounds. Sample FSUs for each sub-round are selected afresh in the form of two independent sub-samples. Out of the 10384 FSUs selected for the survey, 10170 were actually surveyed. This comprises of 6046 villages and 4124 urban blocks.

## 2.4 Stratification

**2.4.1 Rural:** Two special strata are formed at the **State/ UT level**, viz.

Stratum 1: all FSUs with population between 1 to 100, and

Stratum 2: FSUs with population more than 15,000.

[Note: The above two strata are spread across a given state and are not confined to any particular administrative division within the state.]

Above strata of either type are formed if at least 50 such FSUs are there in the respective frames. Otherwise, they are merged with the general strata.

While forming general strata (consisting of FSUs other than those covered under strata 1 & 2), efforts have been made to treat each district as a separate stratum. If limitation of sample size does not allow forming so many strata, smaller districts within a particular NSS region are merged to form a stratum. Each district with rural population of 2 millions or more as per 1991 Census (1.8 millions or more as per 1981 Census in case of Jammu & Kashmir) is as usual split into a number of strata.

**2.4.2 Urban:** Strata are formed within **NSS Regions** as follows:

Stratum number	Composition of strata by considering population of various towns as per the 1991 Census
1, 3, 5 *	'hospital area' (HA) / 'industrial area' (IA) / 'bazaar area' (BA) blocks taken together of each single city with a population of 10 lakhs or more (there could be a maximum of 3 such cities within an NSS Region)
2, 4, 6 *	Other blocks of each single city with a population of 10 lakhs or more
7	HA or IA or BA blocks of all towns with population greater than or equal to 50,000 but less than 10 lakhs
8	Other blocks of all towns with population greater than or equal to 50,000 but less than 10 lakhs
9	HA or IA or BA blocks of all towns with population less than 50,000
10	Other blocks of all towns with population less than 50,000

\* Stratum numbers 3, 4, 5 & 6 remain void if there is only one city in an NSS region with a population of 10 lakhs or more.

If limitation of sample size does not allow forming so many strata, all blocks of stratum 7 are merged with those of stratum 8 and all blocks of stratum 9 are merged with those of stratum 10.

**2.5 Allocation of FSUs:** State/ UT level rural sample size is allocated among the rural strata in proportion to population. State/ UT level urban sample size is first allocated among the three classes of towns (i.e. 10 lakh +, 50000 to less than 10 lakhs and less than 50,000) in proportion to population. Then sample allocation for each of the three classes of towns, within an NSS region, is further allocated between two strata types consisting of - (i) HA/ IA/ BA blocks and (ii) the rest in proportion to total number of FSUs in the respective frames with double weightage given to the first category of blocks. Stratum level allocations for both rural and urban areas of a sub-round are made in even numbers in order to facilitate selection of FSUs in the form of 2 independent sub-samples. Sub-sample numbers are 1 & 2 for sub-round 1; 3 & 4 for sub-round 2; 5 & 6 for sub-round 3 and 7 & 8 for sub-round 4.

**2.6 Selection of FSUs:** For each sub-round, sample FSUs from each stratum are selected in the form of 2 independent sub-samples by following circular systematic sampling with (a) probability proportional to population for all rural strata other than stratum 1, and (b) equal probability for rural stratum 1 as well as all urban strata.

**2.7 Formation of hamlet-group (hg's) in large villages and sub-block (sb's) in large urban blocks:** Depending upon the values of approximate present population (P) and approximate total number of non-agricultural enterprises (E), decision is taken to divide the FSU into a fixed number of hamlet-groups (hg's - the term applicable for rural samples) / sub-blocks (sb's - the term applicable for urban samples) as per the rules given below:

Population (P)	No. of hg's/ sb's formed in the FSU as per population criterion	Number of enterprises (E)	no. of hg's/ sb's formed in the FSU as per enterprise criterion
(1)	(2)	(3)	(4)
Less than 1200	1 @	Less than 100	1 @
1200 – 1999	5	100 – 249	5
2000 – 2399	6	250 – 299	6
2400 – 2799	7	300 – 349	7
2800 – 3199	8	350 – 399	8
(and so on)		(and so on)	

@ no. of hb's/ sb's = '1' means the whole FSU is considered for listing.

[For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of Jammu & Kashmir, number of hg's formed in the village as per population criterion is : 1 for P < 600, 5 for P = 600 to 999, 6 for P = 1000 to 1199, 7 for P = 1200 to 1399, 8 for P = 1400 to 1599, and so on (procedure remains unchanged as per enterprise criterion)]

The number (D) of hamlet-groups (hg)/ sub-blocks (sb) formed in the FSU is such that the higher of the two values as per population and enterprise criteria is chosen. If value of P is less than 1200 (600 for certain hilly areas specified above) as well as value of E is less than 100 for an FSU, hg/ sb

### 3. Estimation Procedure:

#### 3.1 General procedure of selection of enterprises

Sample enterprises are selected by circular systematic sampling with equal probability. Enterprises under each stratum (i.e. segment x broad industry group x enterprise class) are arranged in the ascending order of NIC 2-digit codes (3-digit codes for hotels & restaurants) before sampling.

**3.2 Approach:** This estimation procedure fulfils the twin objectives of providing (a) estimates on sub-round basis, and (b) the estimate of error from the sub-sample replicates. Tabulated estimate for a sub-round is obtained by combining the estimates of the corresponding sub-sample replicates. Similarly, a tabulated estimate of the Round is obtained by combining the four sub-round-wise estimates.

3.3 The following notations are being used in this section:

- a = subscript for the a-th stratum
- r = subscript for the r-th sub-sample replicate ( r=1,2,...,8)
- q = subscript for the q-th sub-round (q=1,2,3 & 4)
- f = subscript for the f-th sampled village/ block as First Stage Unit ( FSU )
- s = subscript for the s-th segment of sampled village/ block ( s= 1 & 2)
- g = subscript for the g-th broad group of industry (g=1,2,3,...,6)
- t = subscript for the t-th enterprise class (t= 1 & 2)
- k = subscript for the k-th sampled enterprise
- p = subscript for pooled estimate
- z = size used for selection of an FSU from the sampling frame
- Z = total of sizes in the sampling frame for the stratum
- [Note: For urban sector, z=1 and Z=N which is the total number of UFS blocks (FSUs) in the frame.]
- n = number of sampled FSU surveyed within a stratum and a sub-sample replicate (including zero cases but excluding casualty and not reported cases) and used for tabulation
- L = number of sub-sample replicates surveyed and used for tabulation
- D = number of hamlet-groups/ sub-blocks formed in rural/ urban sampled FSU
- E = total number of enterprises listed in the appropriate frame
- e = number of sampled enterprises surveyed and used for tabulation from the frame
- y, x = value of characteristic y, x obtained in the sample
- $\hat{Y}$ ,  $\hat{X}$  = estimated value of characteristic y, x obtained from the sample.

**3.4 Estimates of aggregates:** In the formulae given in this section,  $\hat{Y}$  is the estimate of aggregate of any characteristic y for a given stratum (a), and for a particular sub-round (q) and sub-sample replicate (r). These formulae are provided for the general case of FSUs having 2 segments, 1 & 2. For the FSUs requiring no hg/ sb formation, the formula is identical to that given for segment 1 while the contribution from segment 2 is taken as zero. Formulae for estimating a characteristic of enterprises for a stratum of a sub-sample replicate from the selection frame based on a broad group of industry (g) x enterprise class (t) are given below:

$$\text{Rural: } \hat{Y}_{gt} = \frac{Z}{n} \sum_{f=1}^n \frac{1}{Z_f} \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{e_{fsgt}} y_{fsgtk} \quad \dots(1)$$

Here  $B_{fsgt} = \frac{E_{fsgt}}{e_{fsgt}}$ , for segment 1 (s=1) and  $B_{fsgt} = \frac{D_f - 1}{2} \times \frac{E_{fsgt}}{e_{fsgt}}$ , for segment 2 (s=2).

$$\text{Urban: } \hat{Y}_{gt} = \frac{Z}{n} \sum_{f=1}^n \sum_{s=1}^2 B_{fsgt} \sum_{k=1}^{e_{fsgt}} y_{fsgtk} \quad \dots(2)$$

Here  $B_{fsgt} = \frac{E_{fsgt}}{e_{fsgt}}$ , for segment 1 (s=1) and  $B_{fsgt} = \frac{D_f - 1}{2} \times \frac{E_{fsgt}}{e_{fsgt}}$ , for segment 2 (s=2).

Note: For tabulating any characteristic from this detailed schedule,  $\hat{Y} = \sum_g \sum_t \hat{Y}_{gt}$  is to be used.

### 3.4.1 Combined estimate from sub-samples

In the previous section, the estimate of a characteristic  $\hat{Y}$  as obtained for a stratum (a), for a particular sub-round (q) and a sub-sample replicate (r), actually represent  $\hat{Y}_{aqr}$ . The combined /pooled estimate for a particular stratum and a particular sub-round is computed as the average of sub-sample replicate estimates and is given below:

$$\hat{Y}_{aq} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{aqr} \quad \dots(3)$$

### 3.4.2 Estimate of aggregates for a sub-round at State / UT / Region level

If  $\hat{Y}_{qr}$  be the State / UT / Region level aggregate from the r-th sub-sample replicate and q-th sub-round, and  $\hat{Y}_{qp}$ , the combined/ pooled estimate of the aggregate based on the whole sample, for a given sub-round/ quarter q, then

$$\hat{Y}_{qr} = \sum_a \hat{Y}_{aqr} \quad \dots(4) \quad \text{based on sub-sample replicate group r,}$$

and

$$\hat{Y}_{qp} = \frac{1}{L} \sum_{r=1}^L \hat{Y}_{qr} \quad \dots(5) \quad \text{based on all sub-sample replicates.}$$

### 3.4.3 Estimates of aggregates for the round (i.e. all the 4 sub-rounds/ quarters together) at State/ UT/ Region level

The estimates of aggregates for the whole round are computed as the simple average of the sub-round estimates derived in different sub-rounds and are given below:

$$\hat{Y}_r = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qr} \quad \dots(6) \text{ based on sub-sample replicate 1 and 2*},$$

and

$$\hat{Y}_p = \frac{1}{4} \sum_{q=1}^4 \hat{Y}_{qp} \quad \dots(7) \text{ based on whole sample.}$$

**\*Note:** In the Round, sub-samples 1, 3, 5 & 7 (in sub-rounds 1 to 4) are combined together to form sub-sample replicate 1 (annual) while sub-samples 2, 4, 6 & 8 (in sub-rounds 1 to 4) are combined together to form sub-sample replicate 2 (annual). Stratum level estimate for the Round is obtained similarly.

### 3.5 Estimates of ratio

If  $\hat{X}$  &  $\hat{Y}$  be the State/ UT/ Region level aggregate estimate corresponding to variables x and y, then the estimate of ratio is given below:

$$\hat{R}_r = \frac{\hat{Y}_r}{\hat{X}_r} \quad \dots(8) \text{ based on sub-sample group r,}$$

and

$$\hat{R}_p = \frac{\hat{Y}_p}{\hat{X}_p} \quad \dots(9) \text{ based on the whole sample.}$$

(The formulae for  $\hat{X}$  are obtained similarly by replacing  $\hat{Y}$  by  $\hat{X}$  and y by x in the above formulae stated in previous sections.)

**Note:** Estimates for the sub-round (/quarter)  $\hat{R}_{qr}$  and  $\hat{R}_{qp}$  are also obtained by replacing  $\hat{Y}_r$  and  $\hat{Y}_p$  by  $\hat{Y}_{qr}$  and  $\hat{Y}_{qp}$ , respectively and  $\hat{X}_r$  and  $\hat{X}_p$  by  $\hat{X}_{qr}$  and  $\hat{X}_{qp}$ , respectively.

### 3.6 Error Estimate

The estimated variances of pooled estimates (as computed above) are calculated on the basis of sub-sample replicate estimates of strata over State / UT / Region and obtained as follows:

$$\hat{Var}(\hat{Y}_p) = \frac{1}{L(L-1)} \sum_a \sum_{r=1}^L (\hat{Y}_{ar} - \hat{Y}_{ap})^2 \quad \dots(10)$$

$$\hat{MSE}(\hat{R}_p) = \frac{1}{L(L-1)\hat{X}_p^2} \sum_a \sum_{r=1}^L [(\hat{Y}_{ar} - \hat{Y}_{ap})^2 + \hat{R}_p^2 (\hat{X}_{ar} - \hat{X}_{ap})^2 - 2\hat{R}_p(\hat{Y}_{ar} - \hat{Y}_{ap})(\hat{X}_{ar} - \hat{X}_{ap})]$$

(approx.)                      ... (11)

**Note:** Such estimates for the quarter are also obtained by suitable replacement as stated in section 3.5.

**4. Treatment for casualty**

- i). If  $E_{fsgt} > 0$  but  $e_{fsgt}=0$  for a particular frame of enterprises (i.e. for a broad industry group x enterprise class) in a FSU with no hamlet-group/ sub-block formation (i.e.  $D_f=1$ ), it is a case of casualty and the value of n is reduced by 1.
- ii). If  $D_f > 1$  and  $E_{fs'gt} > 0$  but  $e_{fs'gt}=0$  for  $s=1$  (say,  $s'$ ) and if it is not a case for the entire FSU, here n is not reduced by 1 and in this case  $[(D_f-1)/2]x E_{fsgt}$  is replaced by  $\{ E_{fs'gt} + [(D_f-1)/2]x E_{fsgt} \}$  in the formula for  $s=2$ .
- iii). III) If  $D_f > 1$  and  $E_{fs'gt} > 0$  but  $e_{fs'gt}=0$  for  $s=2$  (say,  $s'$ ) and if it is not a case for the entire FSU, here n is not reduced by 1 and in this case  $E_{fsgt}$  is replaced by  $\{ E_{fsgt} + [(D_f-1)/2]x E_{fs'gt} \}$  in the formula for  $s=1$ .
- iv). IV) If  $E_{fsgt} > 0$  but  $e_{fsgt}=0$  in a particular frame of enterprises (i.e. for a broad industry group x enterprise class) for both the segments ( $s = 1$  &  $2$ ) in an FSU, it is a case of casualty and the value of n is reduced by 1.

**Mathematical expression for the multiplier at FSU (f) level in differing cases for a given first stage stratum, sub-round and sub-sample**

Sl.	Schedule	Sector	Broad industry group (g)**	Enterprise class (t)**	segment -I s=1	Segment - II s=2	Stratum weight (common to FSU)	Sub-sample replicate weight for combining together
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
1.	2.0	R	g	t	$E_{fsgt}/e_{fsgt}$	$[(D_f-1)/2] x E_{fs'gt}/e_{fs'gt}$	$Z/(z_f x n)$	$1/2^*$
2.	2.0	U	g	t	$E_{fs'gt}/e_{fs'gt}$	$[(D_f-1)/2] x E_{fs'gt}/e_{fs'gt}$	$Z/n$	$1/2^*$

\* Here the number of sub-sample replicates is 2, i.e.  $L = 2$ , for the State/ Central sample processed separately.

\*\* As per selection frame.

Note: Multiplier is modified for treatment of casualty as per rules stated in section 4.

## Section Three

### Non-Agricultural Enterprises in the Informal Sector

**3.0 Evolution of surveys on non-agricultural enterprises:** The importance of unorganised sector and the need for statistical information about it had been realised by the Indian planners and policy makers long back in 1950. The National Sample Survey Organisation (NSSO) has been conducting periodic surveys on household-based non-agricultural activities since its inception. The household approach of identifying the units excluded the units not owned by households, i.e. cooperative societies, trusts, incorporated units etc. A review of the surveys conducted by NSSO indicated that a better sampling frame was necessary to generate more useful statistics on unorganised sector. The need for basic information on enterprises on census basis and also the need for identifying areas of concentration of enterprises for developing more efficient sampling designs culminated in conducting of periodic Economic Censuses and follow-up sample surveys on non-agricultural enterprises.

3.0.1 The first economic census was conducted in 1977. It was limited to non-agricultural enterprises employing at least one hired worker on a fairly regular basis. The enterprises employing at least one hired worker are called 'establishments'. Following this census, small establishments and enterprises not employing any hired worker on a fairly regular basis (these units are called 'Own Account Enterprises' (OAEs)) engaged in manufacturing and repairing activities were surveyed in 33rd round of NSS during 1978-79. In the next round (i.e., 34<sup>th</sup> round (July 1979-June 1980)), an integrated survey, covering activities of trade, transport, hotels & restaurants and services was conducted.

3.0.2 The second economic census was undertaken in 1980 along with the house-listing operations of the 1981 population census. The scope and coverage of the second economic census was enlarged in the sense that it covered the own account enterprises (OAEs) also. The establishments were divided into two categories as (i) Directory Establishments (DEs) and (ii) Non-Directory Establishments (NDEs), the difference being that the former employed a total of six or more workers, while the latter employed a total of five or less workers. Thus, in the second economic census three types of enterprises were formed, viz., (i) OAEs, (ii) NDEs and (iii) DEs. As a follow-up to the second economic census, OAEs and NDEs engaged in manufacturing and repairing activities were surveyed in the 40<sup>th</sup> and 45<sup>th</sup> rounds of NSS during July 1984-June 1985 and July 1989-June 1990 respectively. The trading enterprises (OAEs and NDEs) were covered in 41<sup>st</sup> (July 1985-June 1986) and 46<sup>th</sup> round (July 1990-June 1991). The Directory manufacturing and trading Establishments (DEs) were, however, surveyed by field staff of NSSO under the technical guidance of CSO.

3.0.3 A third economic census was conducted in 1990 along with the house listing operations of the 1991 population census. As a follow-up to the third economic census, the first integrated survey on unorganised manufacture covering own account manufacturing and repairing enterprises (OAMEs), Non-Directory manufacturing and repairing establishments (NDMEs) and Directory manufacturing and repairing establishments (DMEs) was undertaken during the 51<sup>st</sup> round (July 1994-June 1995) by NSSO. However, during 53<sup>rd</sup> round (January-December 1997) only Own account (OAE) and

Non-Directory trading enterprises (NDE) were covered by NSSO whereas the Directory Trading Enterprises (DTE), were surveyed by field staff of NSSO under the technical guidance of CSO. Besides, CSO also conducted follow-up surveys of economic census covering activities other than manufacturing, repairing and trade through field staff of NSSO.

3.0.4 The NSSO has mainly been designing and conducting surveys to cover manufacturing and trading enterprises (OAEs and NDEs) in the unorganised sector. For the first time, an integrated survey, covering wide spectrum of non-agricultural enterprises in the informal sector has been carried out during 55<sup>th</sup> Round (July 1999-June 2000). The main difference between informal and unorganised sector, as already pointed out in Section One, is that, while in the usual unorganised sector surveys, all enterprises other than those belonging to public sector are covered, in the informal sector, only unincorporated proprietary and partnership enterprises are covered. Enterprises covered under Annual Survey of Industries (ASI) are excluded from both; the unorganised as well as informal sector surveys.

3.0.5 The main aim of the surveys of non-agricultural enterprises has been to estimate the total number of enterprises, number of workers, gross value added per worker in addition to other related characteristics of enterprises.

3.1 **Results:** In this report, information on estimated number of enterprises, workers and other characteristics of the enterprises has been presented at the all India level. The results are based on the data collected during 55<sup>th</sup> round (July 1999-June 2000) from a representative sample of 6046 villages and 4124 urban blocks spread over all the States/UTs of the Indian Union. Non-agricultural enterprises carrying out activities relating to tabulation categories 'D' to 'O' (except E and L) have been surveyed. Statement 0 shows the non-agricultural activities covered along with their tabulation category and two-digit NIC<sup>1</sup> codes:

**Statement 0: Activities covered in the survey and their tabulation categories**

Activity	tabulation category	NIC-1998 divisions (2 digits)
1. manufacturing	D	15 - 37
2. construction	F	45
3. trading and repair services	G	50-52
4. hotels and restaurants	H	55
5. transport, storage and communications	I	60-64
6. financial intermediation	J	65-67
7. real estate, renting and business activities	K	70-74
8. education	M	80
9. health and social work	N	85
10. other community, social and personal service activities (excluding domestic services)	O	90-93

The summary of the results has been presented in the present section of the report. Detailed tables have been given in **Annex-III** for rural, urban and combined at the all India level. These table gives

<sup>1</sup> National Industrial Classification, 1998

tabulation category-wise information relating to Own Account Enterprises (OAEs), Establishments as well as both combined. The totals and proportions presented in detailed tables may vary slightly, in some cases, due to rounding of figures.

The term enterprise has been used in general to represent both ‘OAEs’ and Establishments.

**3.1.1 Number of sample enterprises:** Statement 1 gives information on the number of sample enterprises, activity-wise and by type of enterprises (‘OAEs’ or ‘Establishments’) for rural, urban and combined. A total of 197649 enterprises were surveyed all over India. Of them, 114514 (i.e., 58%) were from rural areas and 83135 from urban areas. Out of the total number of sample enterprises, 1.63 lakhs (82%) were OAEs and the rest were Establishments. Of the rural 1.14 lakhs sample enterprises, 89% were OAEs and the rest were Establishments. In the urban areas, 73% of the sample enterprises were OAEs and the rest were Establishments.

**Statement 1: number of sample enterprises in different tabulation categories**

activity	number of enterprises surveyed								
	rural			urban			combined		
	OAE	establishments	all	OAE	establishments	all	OAE	establishments	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. manufacturing	30931	4412	35343	14235	6945	21180	45166	11357	56523
2. construction	5421	582	6003	3165	748	3913	8586	1330	9916
3. trading and repair services	35009	2872	37881	20463	6409	26872	55472	9281	64753
4. hotels and restaurants	6910	1377	8287	4919	2597	7516	11829	3974	15803
5. transport, storage and communications	9007	1563	10570	8461	1821	10282	17468	3384	20852
6. financial intermediation	181	73	254	399	132	531	580	205	785
7. real estate, renting and business activities	1064	286	1350	1937	998	2935	3001	1284	4285
8. education	1031	493	1524	1353	771	2124	2384	1264	3648
9. health and social work	2541	276	2817	1181	803	1984	3722	1079	4801
10. other community, social and personal service activities (excluding domestic services)	10029	456	10485	4739	1059	5798	14768	1515	16283
all activities	102124	12390	114514	60852	22283	83135	162976	34673	197649

**3.1.2 Estimated number of enterprises:** Statement 2 gives the estimated number of enterprises, activity-wise and by type of enterprises separately for rural, urban and combined. At the all India level, the number of non-agricultural enterprises has been estimated as 443.5 lakhs. Of these, 250.1 lakh (i.e., 56%) enterprises are located in rural areas and 193.4 lakh in the urban areas.

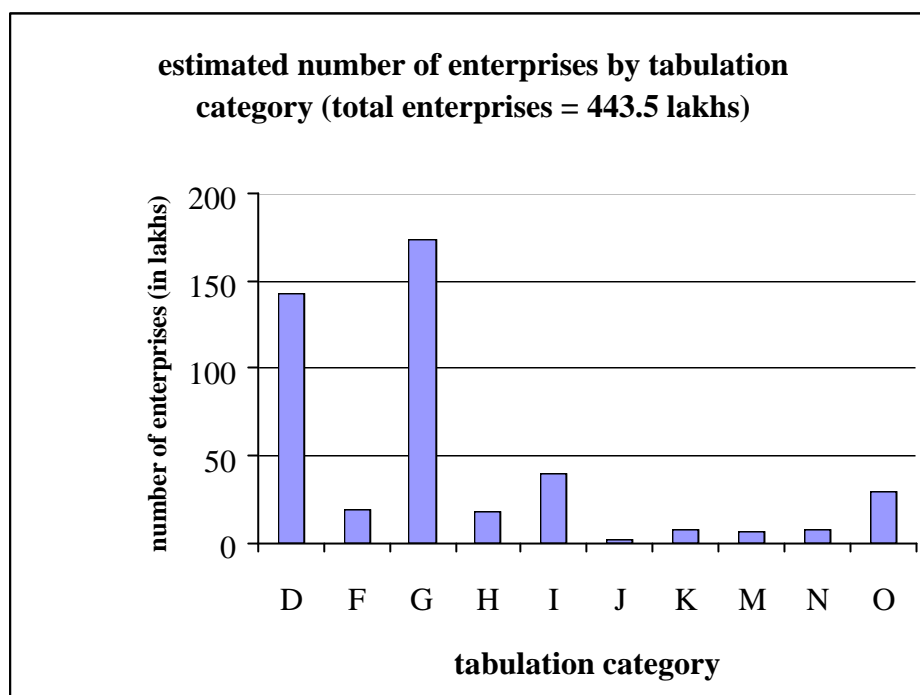

The number of enterprises estimated in 55<sup>th</sup> round has been found to be higher than the number of enterprises found in the fourth Economic Census conducted during 1998. In the Economic Census 1998, 209.1 lakh non-agricultural enterprises were found as compared to the 55<sup>th</sup> round estimate

of 443.5 lakh enterprises. The difference is because a higher number of OAEs have been estimated both in rural and urban areas in the present survey. However, there has been underestimation of establishments in the rural areas in the present survey as compared to the Economic Census. The Economic Census figures exclude the states of West Bengal and Andhra Pradesh. The estimate of 55th round is based on all the States/UTs but includes only the informal sector enterprises belonging to tabulation categories D-O (except E and L). Further, the Economic Census figures include all non-agricultural enterprises in the organised and unorganised sector.

### Statement 2: Estimated number of enterprises

activity	estimated number of enterprises (000)									
	rural			urban			combined			
	OAE	establishments	all	OAE	establishments	all	OAE	establishments	all

number of non-agricultural enterprises in Economic Census 1998*		8060	2781	10841	6315	3756	10071	14376	6536	20912

\* Source: Provisional results, Fourth Economic Census, Central Statistical Organisation, New Delhi

**3.1.3 Distribution of enterprises by enterprise type:** Statement 3 gives distribution of enterprises in each activity by enterprise type separately for rural, urban and combined. At the all India level, 87% enterprises are OAEs and nearly 13% are establishments. In the rural areas, the OAE and Establishments are respectively 94% and nearly 6% respectively. In the urban areas the OAE and Establishments are 78% and 22% respectively.

**Statement 3: Distribution of enterprises by enterprise type**

activity	Percentage distribution of enterprises by type								
	rural			urban			combined		
	OAE	establishments	all	OAE	establishments	all	OAE	establishments	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
1. manufacturing	93.7	6.3	100.0	71.9	28.1	100.0	86.6	13.4	100.0
2. construction	94.1	5.9	100.0	87.1	12.9	100.0	91.6	8.4	100.0
3. trading and repair services	96.6	3.4	100.0	80.8	19.2	100.0	88.6	11.4	100.0
4. hotels and restaurants	88.5	11.5	100.0	67.1	32.9	100.0	77.4	22.6	100.0
5. transport, storage and communications	90.9	9.1	100.0	88.7	11.3	100.0	89.8	10.2	100.0
6. financial intermediation	84.6	15.4	100.0	69.5	30.5	100.0	73.2	26.8	100.0
7. real estate, renting and business activities	86.0	14.0	100.0	69.9	30.1	100.0	74.0	26.0	100.0
8. education	75.0	25.0	100.0	66.4	33.6	100.0	69.7	30.1	100.0
9. health and social work	92.9	7.1	100.0	61.9	38.1	100.0	79.8	20.2	100.0
10. other community, social and personal service activities (excluding domestic services)	98.0	2.0	100.0	85.8	14.2	100.0	93.8	6.2	100.0
all activities	94.4	5.6	100.0	78.3	21.7	100.0	87.4	12.6	100.0

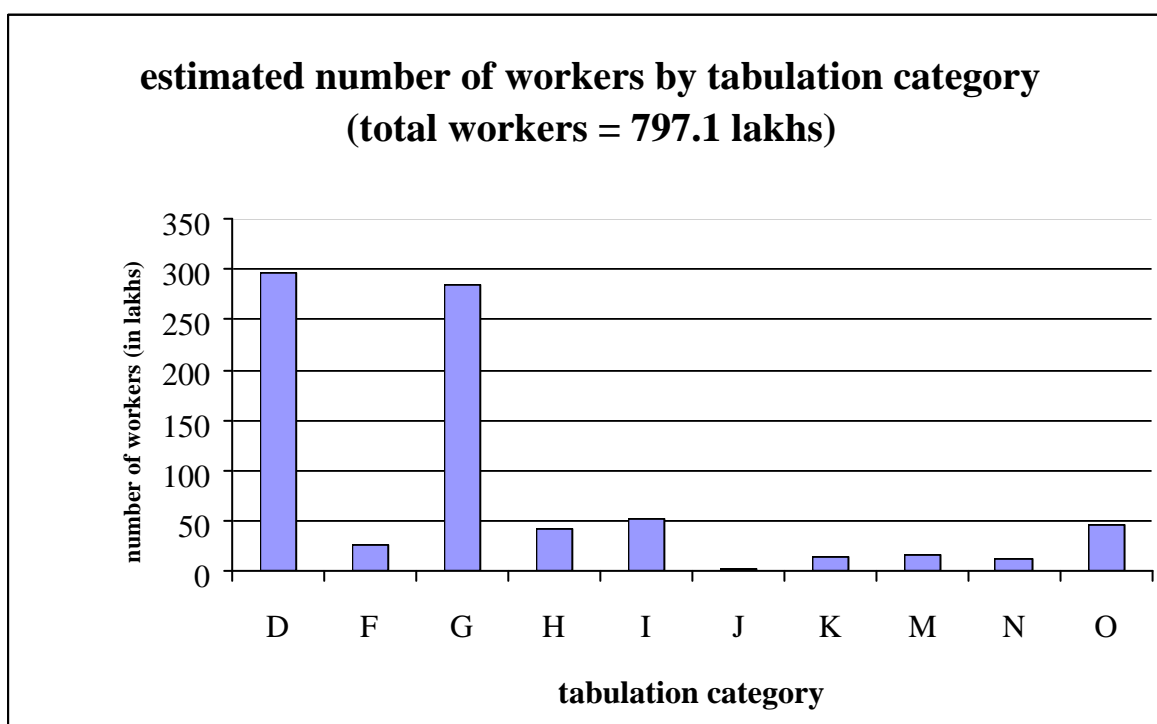

**3.1.5 Estimated number of workers:** Statement 5 gives the estimated number of workers, activity-wise and by type of enterprises separately for rural, urban and combined. At the all India level, the number of non-agricultural workers has been estimated as 797.1 lakhs. Of these, 397.4 lakh (i.e., 50%) workers work in enterprises located in rural areas and 399.7 lakh in enterprises located in the urban areas.

Considering rural, urban and combined, the number of workers estimated in 55<sup>th</sup> round are higher than the number of workers found in the fourth Economic Census - 1998. In the Economic Census 1998, 594.8 lakh non-agricultural workers were found as compared to the 55th round estimate of 797.1 lakh workers. As mentioned earlier, the Economic Census-1998 figures exclude the states of West Bengal and Andhra Pradesh. The estimate of 55th round is based on all the States/UTs but includes worker belonging to informal sector enterprises in tabulation categories D-O (except E and L) only. Further, the Economic Census figures include all non-agricultural workers in the organised and unorganised sector enterprises.

**Statement 5: Estimated number of workers**

activity	estimated number of workers (00000)								
	rural			urban			combined		
	OAE	establishments	all	OAE	establishments	all	OAE	establishments	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

**3.1.6 Activity-wise share of workers in total estimated number of workers:** Statement 6 gives tabulation category-wise share of workers in total estimated number of workers. Majority of the workers belong to the manufacturing and trading enterprises both in rural and urban areas. Collectively, they account for about 73 % of the total estimated workers. The percentage share of workers in the total estimated number of workers is highest for manufacturing in the rural areas and for trade in the urban areas.

**Gender ratio of workers in informal sector**

**3.1.8 Distribution of workers by gender and by type of worker:** Statement 8 gives the percentage distribution of workers by gender and by type of worker. Out of the total estimated workers, the percentage of part time workers is 12%. The percentage of part-time workers is higher in the OAEs as compared to the Establishments. The percentage of female part time workers to all female workers is higher than the percentage of male part time workers to all male workers.

**3.1.9 Distribution of enterprises by number of workers :** Statement 9 gives the percentage distribution of enterprises by number of workers. About 87% of the 'OAEs' have two or less workers and about 8% of the 'OAEs' have 3-5 workers while 5% have 6-9 workers. On the other hand the proportion of 'Establishments' with 6 or more workers is about 80%. The proportion of 'Establishments' with six or more workers is higher in urban areas as compared to the rural areas.

3.1.12 **Nature of operation:** Statement 12 gives distribution of enterprises by nature of operation of the enterprise. About 97% of the total enterprises are run on perennial basis. The seasonal and casual enterprises constitute only about 3% of the total enterprises. The casual enterprises comprise only a small fraction (0.5%) of the total enterprises. The seasonal enterprises are more prevalent in the rural areas as compared to the urban areas.

**Statement 12: Distribution of enterprises by nature of operation**

3.1.13 **Maintenance of accounts:** Statement 13 gives percentage of enterprises maintaining accounts. In this survey, an enterprise has been considered to have maintained accounts if it has maintained usable books of accounts and made them available to the investigator. The percentage of such enterprises has been estimated to be 5% only. As expected, the maintenance of accounts is higher (21%) in the case of Establishments and quite low (about 3%) in the case of OAEs. The

proportion of enterprises maintaining accounts is higher in urban areas as compared to the rural areas.

### Statement 13: Distribution of enterprises by maintenance of accounts

3.1.14 **Status of registration:** Statement 14 gives distribution of enterprises by status of registration. A little over 20% of the total enterprises have been estimated to be registered with any registration agency. The percentage of OAE registered is 15% whereas it is 54% in the case of Establishments. The overall proportion of registered enterprises is higher in urban areas as compared to the rural areas. Among the registered enterprises, majority have registered with local bodies (10.6% of all enterprises), followed by shops and establishments act (5.5% of all enterprises) and sales tax act (2.4% of all enterprises).

**3.1.17 Other economic activities undertaken:** Statement 17 gives the distribution of enterprises by number of other economic activities undertaken during the last 365 days. Since many of the enterprises in the informal sector operate at low level, information on the number of activities carried out by the entrepreneurs simultaneously or at different point of time was collected. These include any economic activity such as self employed in agriculture, wage earning etc. It has been estimated that 95% of the entrepreneurs have not undertaken any additional activity during the last 365 days. Only a small proportion of enterprises have undertaken 2 or more additional activities.

**3.1.18 Types of problem faced:** Information on different types of problems (as listed in column 1 of statement 18) faced by the enterprises in their day-to-day operation was collected. This was a multiple-choice question and information on three major problems faced by the enterprise was collected. About 30% of the total enterprises have not faced any specific problem in their day-to-day operation. The shortage of capital seems to be the problem faced by most of enterprises followed by local problems, competition from larger units and lack of infrastructure facilities.

**3.1.19 Growth status of the enterprise over last three years:** Statement 19 gives information on the status of the enterprise over last three years. The objective of collecting this information was to have the owner's impression about the growth of the enterprise over the last three years. Over 20% of the entrepreneurs felt that their business activities have expanded over the three years preceding the date of survey. However, about 10% entrepreneurs felt that their business has shrunk over the last three years. About 63% of the enterprises felt that their enterprises were stagnant and 7% enterprises started their operation during the last three years.

## Activity coverage in NSS-55<sup>th</sup> Round.

Detailed coverage of various activities in the NSS, 55<sup>th</sup> round, along with their two digit codes is summarised below.

Activity / NIC 2 digit code	Coverage
Manufacturing NIC (15-37)	<p>Manufacturing is the process of transformation of raw materials into final products.</p> <p>All units mainly engaged in manufacturing which are not registered under Sections 2m(i) and 2m(ii) of the Factories Act 1948, are covered under this activity. Enterprises engaged in manufacturing of Bidi and Cigars, other than those covered in ASI, are also covered.</p>
Construction NIC (45)	<p>All units like contractors, sub-contractors, overseers, plumbers, masons, electricians, mistries for mosaic or tiles fitting, etc. connected with the construction activity are covered. However, own-account construction are outside the coverage. The self-employed persons engaged in construction activity will generally be listed in their households. But promoters/ contractors, who have offices of their own, are listed against their main offices, if they have any such office.</p>
Trading and repair services NIC(50-52)	<p>Generally, the activity of trading (wholesale as well as retail) involves only purchase of goods and their disposal by way of sale, without any intermediate physical transformation of goods. In wholesale trade, goods are generally purchased from the producer and sold to the retailer. The activities of intermediaries (commission agents) who do not actually purchase or sell goods but only arrange their purchase and sale and earn remuneration by way of brokerage and commission are also included. In retail trade, goods are generally purchased from the wholesaler and sold to the ultimate consumers.</p> <p>Sale of agricultural produce or manufactured goods directly by the producer is excluded. Also excluded from trade are the agency activities of intermediaries in stock exchange, real estate and other financial matters. Free collection and sale of agricultural produce is excluded. Separate and distinct trading units of manufacturing concerns (like Sale shops of DCM, Bombay Dying, Bata Shoe, etc.) are excluded. However, if private dealers or agents run these units, they are covered.</p>
Hotels and restaurants NIC (55)	<p>A hotel is an enterprise, which provides lodging services with or without arrangements for meals, other prepared food and refreshments. Dharamshala type lodging places are also covered under hotels.</p> <p>A restaurant generally provides eating and drinking services where prepared meals, food and refreshments and other snacks are sold for immediate consumption without any provision for lodging.</p> <p>Such establishments are variously known as restaurants, cafes, cafeteria, snack</p>

Activity / NIC 2 digit code	Coverage
	bars, lunch counters, refreshment stands, milk bar canteens, etc. Bars and other drinking places are also treated as restaurants. Canteens located in offices, factories, etc. are treated as restaurants if private contractors operate them. But departmental canteens run by government are excluded.
Transport, storage and communications NIC(60-64)	<p>Transport means rendering transport service to others as a business proposition. Transport activity relates to the act of carrying passenger and/or goods from one place to another. Supporting services incidental to transport such as packing, freighting, travel agency etc. are also covered under transport. Both mechanised and non-mechanised transport are covered. The following activities are also covered: (i) hackney carriages, carriage by bullock-carts/ ekka/ tonga, etc. (ii) transport by animals like horses, elephants, mules, camels, etc., (iii) transport by man including rickshaw-pullers, cart-operators, etc., (iv) non-mechanized inland/ ocean/ coastal and water transport, (v) pipeline transport, (vi) supporting services to land transport like operation of highway bridges, toll roads, parking lots, etc. and (vii) supporting services to water transport like operation and maintenance of piers, docks, light house, loading and discharging vessels, etc. The operation of storage and warehouses on hire to the farm producer, dealer, trader, processor and manufacturing enterprises, as an independent business is covered in this survey.</p> <p>Warehousing services may be given to the private individuals/households also. Storage and warehousing services in respect of grains, other food articles, oil seeds and other agricultural commodities like cotton, jute and tobacco, are included. Also included are the refrigerated storage facilities on hire to other enterprises for potato, fruits, dairy products, fish and other food products and also refrigerated food locker on rental services chiefly delivered to individual household. Storage of all manufactured products including textiles, machine tools, apparatus and equipment are to be included. Spaces for lumber, waste and scrap materials are included. But farm produce stored by the owner of the farm in his own godown or a dealer or a manufacturer storing his commodities in his own godown or warehouse are excluded from the scope of this survey. Also excluded are the establishments of Central Warehousing corporation, State Warehousing Corporations and the warehousing by the Central and State Governments. Lockers in commercial banks and in other type of enterprises for safe storage of precious belongings are also excluded.</p> <p>All enterprises providing communication services, not owned by government, Public Sector undertakings, local bodies and corporate sector, are covered. This will include courier services, ISD/STD/ PCO booths; Voice Mail Services through computer networking, Video/fax services, phone plus services, voiced and non-voiced leased circuits, telex/FAX/data services through computer network, radio paging, cellular mobile telephone services, and audio services etc.</p>

<b>Activity / NIC 2 digit code</b>	<b>Coverage</b>
Financial intermediation NIC(65-67)	All financial intermediation activities like, financial leasing, activities of hire-purchase financing, life insurance agents, non-life insurance agents, administration of financial markets, stock brokers, actuaries, financial advisors, etc. are covered.
Real estate, renting and business activities NIC (70-74)	Real estate activities are covered under NIC code 70. They include activities like: (i) purchase, sale, letting and operating of real estate i.e. residential/non-residential buildings, (ii) developing and sub-dividing real estate into lots, (iii) lessors of real property and (iv) real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on a contract or fee basis. Letting out of an accommodation is not included except in case of real estate agents running such a business.  Renting of machinery and equipment will be covered under NIC 71. Note that a household hiring out machinery & equipment or household durables are also treated as an enterprise. All business activities classifiable under NIC codes 72 to 74 are covered in this survey.  Stamp vendors are not covered here but covered under retail trade.
Education NIC(80)	Only such educational institutions are included which are under proprietary or partnership control. Research and scientific services rendered by institutions and laboratories are also covered provided they satisfy the above criterion. These may be engaged in research in biological, physical and social sciences. Meteorological institutes and medical research organizations belonging to the informal sector are also included. Management training institutes, computer training centres, Nursing schools, schools of music, drama, dance, modelling, fashion designing, yoga and physical education and general coaching centres (e.g. for various competitive examinations) etc. are to be covered. Private tutors are covered only when the person (tutor) is giving tuition in his own house/coaching centre.
Health and social work NIC (85)	All enterprises engaged in health and medical services other than those owned by government, public sector undertakings, local bodies or corporate sector are covered, irrespective of the system of medicine. All dispensaries, clinics and consultation chambers run by doctors are also covered. The survey also covers activities of veterinary services including bird hospitals. An employed doctor and para-medical person (such as midwife, dai, etc.) doing private practice is covered and his/her private practice alone is considered as an enterprise. Included in this activity are all kinds of health clubs. Big hospitals like Escort, Apollo, Peerless, etc. are not covered as they belong to the corporate sector.
Other community,	This covers the activities like sewage and refuse disposal, activities of membership organizations, recreational, cultural and sporting activities covered

<b>Activity / NIC 2 digit code</b>	<b>Coverage</b>
social and personal service activities (excluding domestic services) NIC (90-93)	under NIC 90 to 93; and other service activities like washing and cleaning of textile products, hair dressing, funeral and related activities, massage saloons, sauna baths, activities of shoe shiners, porters, car parkers etc; activities such as portrait and commercial photographic studios, tailoring, embroidery, etc. classified under NIC 93. Palmists and astrologers are also covered here.  It may be noted that individuals serving as housemaids, cooks, gardeners, governess, baby sitters, chowkidars, night watchmen, etc. are in general outside the coverage of the present survey. However, if such activities are provided by some agencies against prescribed fees, those agencies will be treated as enterprises under NIC 93. For example, an agency, which supplies baby sitters, or night watchmen, with some profit margin, is covered in this survey.

Activities such as agriculture, fishing, mining and quarrying, electricity, gas and water supply, public administration & defence, compulsory social security, private households with employed persons and extra territorial organisations & bodies are excluded in coverage.
