# Appendix B

**RSE of the Estimates**

## *Appendix B: RSE of the Estimates*

Table No.	Title
1RSE_State	RSE (in percent) of participation rate in activities of major divisions of TUS activity classification in a day irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
1RSE_India	RSE (in percent) of participation rate in activities of major divisions of TUS activity classification in a day irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
2RSE_State	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in the activities of major divisions of TUS activity classification irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
2RSE_India	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in the activities of major divisions of TUS activity classification irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
3RSE_State	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per person in the activities of major divisions of TUS activity classification irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
3RSE_India	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per person in the activities of major divisions of TUS activity classification irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
4RSE_State	RSE (in percent) of participation rate in a day in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
4RSE_India	RSE (in percent) of participation rate in a day in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
5RSE_State	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per person in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
5RSE_India	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per person in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
6RSE_State	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT

Table No.	Title
6RSE_India	RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in self development activities, unpaid activities and paid activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level
7RSE_State	RSE (in percent) of participation rate and RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in SNA activities, Non-SNA activities and residual other activities where the activity was a major activity (considering only the major activity of the time slots) for each broad principal activity status for each State/UT
7RSE_India	RSE (in percent) of participation rate and RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in SNA activities, Non-SNA activities and residual other activities where the activity was a major activity (considering only the major activity of the time slots) for each broad principal activity status at all-India level
8RSE_State	RSE (in percent) of participation rate and RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in SNA production/Non-SNA production/residual other activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) for each State/UT
8RSE_India	RSE (in percent) of participation rate and RSE (in percent) of estimates of time (in minutes) spent in a day on an average per participant in SNA production/Non-SNA production/residual other activities irrespective of whether it is a major activity or not (considering all the activities in a time slot) at all-India level

# Appendix C

**Sample Design and Estimation Procedure**

## Appendix - C

### Sample Design and Estimation Procedure

#### 1. Introduction

1.1 National Statistical Office (NSO) in India conducted the first Time Use Survey during January – December 2019 to measure participation rates and time spent on various activities, like paid activities, unpaid activities, care activities, etc.

**2 Geographical coverage:** The survey covered the whole of the Indian Union *except the* villages in Andaman and Nicobar Islands which were difficult to access.

#### 3. Sample Design

##### 3.1 Formation of sub-units (SUs) in rural areas

3.1.1 A rural village was notionally divided into a number of sub-units (SU) of more or less equal population during the preparation of frame. Census 2011 population of villages was projected by applying suitable growth rates and the number of SUs formed in a village was determined apriori. The above procedure of SU formation was implemented in the villages with population *more than or equal to 1000 as per Census 2011*. In the remaining villages, no SU was formed.

3.1.2 The number of SUs formed in the villages (with Census 2011 population 1000 or more) of the frame was decided before selection of the samples following the criteria given below:

projected population of the village	no. of SUs formed
less than 1200	1
1200 to 2399	2
2400 to 3599	3
3600 to 4799	4
4800 to 5999	5
.....and so on	....

##### 3.1.3 Special case

3.1.3.1 For rural areas of (i) Himachal Pradesh, (ii) Sikkim, (iii) Andaman & Nicobar Islands, (iv) Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar), (v) Punch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban, Ladakh region (Leh and Kargil districts) of Jammu and Kashmir and (vi) Idukki district of Kerala, numbers of SUs formed in a village were determined in such a way that each SU contains 600 or less projected population. Further, SUs were not formed in the villages in the above mentioned districts/States with population less than 500 as per Census 2011. In the remaining villages, the number of SUs formed for these States/districts was as follows:

---

projected population of the village	no. of SUs formed
less than 600	1
600 to 1199	2
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
.....and so on	....

---

3.1.3.2 For rural parts of Kerala, similar procedure as mentioned in para 3.1.2 above was adopted with the modification that the SUs were formed within Panchayat Wards instead of villages.

### 3.2 Formation of sub-units (SUs) in urban areas

SUs were formed in urban sector also. The procedure was similar to that adopted in rural areas except that SUs were formed on the basis of households in the UFS frame instead of population, since UFS frame does not have population. Each UFS block with number of households more than or equal to 250 was divided into a number of SUs. In the remaining UFS blocks, no SU was formed.

**4 Outline of sample design:** A stratified two stage design was adopted for the TUS. *The first stage units (FSU) are villages/UFS blocks/sub-units (SUs) as per the situation.* The ultimate stage units (USU) are households in both the sectors.

#### 4.1 Sampling Frame for First Stage Units

4.1.1 There was no SU formation in uninhabited villages and villages (Panchayat wards for Kerala) with population less than 1000 as per Census 2011 (less than 500 as per Census 2011 for the areas mentioned in para 3.1.3.1) and entire village was considered as one FSU. All such villages (Panchayat wards for Kerala) were the First Stage Units (FSUs).

4.1.2 In the remaining villages, notional sub-units (SUs) following the procedure as described in para 3.1 were formed. Such SUs were considered as First Stage Units (FSUs).

4.1.3 For the UFS blocks with less than 250 households, the entire UFS block was considered as one FSU. In the remaining UFS blocks, the SUs were considered as First Stage Units (FSUs).

4.1.4 List of FSUs as described above was the sampling frame for respective cases

### 5 Stratification of FSUs:

#### 5.1 Rural sector:

- (a) All inhabited villages within each NSS State region constituted a rural stratum.

- (b) A special stratum, in the *rural areas* only, was formed at all-India level before the strata are formed in each State/UT. This stratum comprised all the uninhabited villages as per Census 2011 belonging to all States/UTs.

**5.2 Urban sector:** In urban areas, strata were formed within each NSS State region on the basis of size class of towns as per Census 2011. The stratum numbers and their composition (within each NSS State region) were as follows:

stratum 1 :	all towns with population less than 50,000
stratum 2 :	all towns with population 50,000 or more but less than 3 lakhs
stratum 3 :	all towns with population 3 lakhs or more but less than 15 lakhs
stratum 4, 5, 6,... :	each city with population 15 lakhs or more

## 6 Sub-stratification:

### 6.1 Rural sector:

Three groups of villages were formed within each stratum (except special rural stratum):

Group 1: all villages (Panchayat wards for Kerala) with Census 2011 population less than 250

Group 2: all villages (Panchayat wards for Kerala) with Census 2011 population more than or equal to 250 but less than 500

Group 3: remaining villages

The sample size for a rural stratum was allocated among 3 groups in proportion to population. Let  $r_1$ ,  $r_2$  and  $r_3$  be the allocations to Group 1, Group 2 and Group 3 respectively. The villages within each group were first arranged in ascending order of population. For all the three groups within each strata, ' $r_1/4 > 1$ ', ' $r_2/4 > 1$ ' and ' $r_3/4 > 1$ ', implying formation of 2 or more sub-strata in each group. Sub-strata was demarcated in Group 1, Group 2 and Group 3 respectively in such a way that each sub-stratum comprised a group of villages (all SUs of a village considered together) of the arranged frame and have more or less equal number of population within the respective group.

The sub-strata in Group 1 numbered as 11, 12, 13,..... The numbering of sub-strata in Group 2 were 21, 22, 23,..... Finally, for Group 3, sub-strata numbers started from 31.

If number of FSUs in a particular Group was very small, no sub-stratum was formed in that Group. Further, in those strata where allocations were very small, minimum allocation for Group 1 and Group 2 was 1 each.

### 6.2 Urban sector

Let ' $u$ ' be the sample size allocated for an urban stratum. For all strata, if ' $u/4 > 1$ ', implying formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS blocks as per urban frame. Then sub-strata were demarcated in such a way that each sub-stratum comprised a group of UFS blocks (all SUs within the block taken together) having more or less equal number of households.

**7 Total sample size (FSUs):** 10004 FSUs were allocated for survey at all-India level. Sample FSUs allotted and surveyed and number of households surveyed and number of persons in Time Use Survey are given in Table 1 at the end of this write-up.

**8 Allocation of total sample to States and UTs:** The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2011 subject to a minimum sample allocation of 16 FSUs to each State/UT.

**9 Allocation of State/ UT level sample to rural and urban sectors:** State/UT level sample size was allocated between two sectors in proportion to population as per Census 2011 with 1.5 weightage to urban sector. A minimum of 4 FSUs, each for rural and urban sector separately, were allocated to each State/UT. For more urbanised big States like Maharashtra, Tamil Nadu etc., the urban allocation was limited to rural sample size to avoid undue weightage to urban sector.

**10 Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per Census 2011. Stratum level allocation was adjusted to multiples of 4 with a minimum sample size of 4.

*For special stratum formed at state level as mentioned in para 5.1(b), 4 FSUs were allocated.*

## **11 Allocation to sub-strata**

11.1 Allocation was 4 for each sub-stratum in the rural sector and urban sector.

## **12 Selection of FSUs within a stratum/sub-stratum:**

12.1 From all the sub-strata in both rural and urban sector within each stratum, required number of FSUs was selected by Simple Random Sampling Without Replacement (SRSWOR) scheme.

## **13 Formation of sub-units and listing of households**

**13.1 Procedure of formation of SUs:** After identification of the boundaries of the village/ UFS block which contains the sample FSU, the village/ UFS block was divided into the number of SUs (say, D) as given in the sample list by more or less equalising the present population of the village/UFS block in which the sample FSUs were located. It was ensured that SUs formed were clearly identifiable in terms of physical landmarks. For villages/blocks where the number of SUs formed was 1 as per the sample list, no SU formation was required.

**13.2 Listing of households:** All the households of the sample FSU were listed. Temporarily locked households were also listed after ascertaining the temporariness of locking of households through local enquiry.

**13.3 Selection of households:** A total number of 14 households were planned to be selected from each FSU for canvassing Schedule 10.6 during 7 days with 2 households to be canvassed on each day of the week. The sample households were selected by SRSWOR.

## 14. Estimation Procedure

### 14.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

i = subscript for i-th FSU [SU/ village (panchayat ward)/ block]

j = subscript for j-th sample household within an FSU

N = total number of FSUs in any rural/urban sub-stratum

n = number of sample FSUs surveyed including 'uninhabited' and 'zero cases' but excluding casualty for a particular sub-stratum

H = total number of households listed in a FSU

h = number of households surveyed in a FSU

x, y = observed value of characteristics x, y under estimation

$\hat{X}$ ,  $\hat{Y}$  = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stij}$  = observed value of the characteristic y for the j-th household of the i-th FSU for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

### 14.2 Formulae for Estimation of Aggregates for a stratum $\times$ sub-stratum:

#### 14.2.1 Schedule 0.0T:

- (i) For estimating the number of households in a stratum  $\times$  sub-stratum possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n y_i$$

where  $y_i$  is the total number of households possessing the characteristic y in i-th FSU respectively.

#### 14.2.2 Schedules 10.6:

14.2.2.1 For a stratum  $\times$  sub-stratum:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \left[ \frac{H_i}{h_i} \sum_{j=1}^{h_i} y_{ij} \right]$$

**14.3 Overall Estimate for Aggregates for a stratum:**

Overall estimate for a stratum ( $\hat{Y}_s$ ) is obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

**14.4 Overall Estimate of Aggregates at State/UT/all-India level:**

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

**14.5 Estimates of Ratios:**

Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) is obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

**14.6 Estimation of Errors:****14.6.1 Formula for estimated variance (for Rural/Urban):**

14.6.1.1 The sampling scheme for the Time Use Survey was SRSWOR. However, if the sampling fraction is small, then the difference between variance estimates using the SRSWR and SRSWOR becomes negligible. In such case, samples can be treated as drawn with SRSWR and variance estimates becomes simpler in form and easy to calculate. It has been observed that overall sampling fraction is quite low in the current situation and hence there is not much loss in accuracy of variance estimates if SRSWR is assumed.

With this view, formulae for estimates of variances are given below based on SRSWR scheme.

(a) Formula for aggregate  $\hat{Y}$  (for Rural/Urban):

$$\begin{aligned} \hat{V}ar(\hat{Y}) &= \sum_s \hat{V}ar(\hat{Y}_s) = \sum_s \sum_t \hat{V}ar(\hat{Y}_{st}) \\ \hat{V}ar(\hat{Y}_{st}) &= \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} (N_{st} \hat{Y}_{sti} - \hat{Y}_{st})^2 \end{aligned}$$

(b) Formula for ratio  $\hat{R}$  (for Rural/Urban):

$$M\hat{S}E(\hat{R}) = \frac{1}{\hat{X}^2} \sum_s \sum_t M\hat{S}E_{st}(\hat{R})$$

$$M\hat{S}E_{st}(\hat{R}) = \frac{1}{n_{st}(n_{st} - 1)} \sum_{i=1}^{n_{st}} \left[ N_{st} (\hat{Y}_{sti} - \hat{R} \hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R} \hat{X}_{st}) \right]^2,$$

where  $N_{st} \hat{Y}_{sti} = \sum_j \sum_k y_{stij} \times n_{st} \times multiplier$ ,

$$N_{st} \hat{X}_{sti} = \sum_j \sum_k x_{stij} \times n_{st} \times multiplier$$

in the formula in (a) and (b) above.

Multiplier is as given in the table in Para 15 below.

#### 14.7 Estimates of Relative Standard Error (RSE):

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\hat{V}ar(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

#### 15. Multipliers:

The formulae for multipliers at stratum/sub-stratum for a schedule type are given below.

sch type	sector	formula for multipliers
0.0T	Rural/urban	$\frac{N_{st}}{n_{st}}$
10.6	Rural/urban	$\frac{N_{st}}{n_{st}} \times \frac{H_{sti}}{h_{sti}}$

#### Note:

- For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.
- Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

#### 16. Treatment for zero cases, casualty cases etc.:

16.1 While counting the number of FSUs surveyed ( $n_{st}$ ) in a stratum/sub-stratum, all the FSUs with survey codes 1 to 6 in schedule 0.0T was considered.

16.2 However, if household were available in the frame of the FSU but none of these could be surveyed then that FSU was treated as casualty and it was not treated as surveyed.

16.3 *Casualty cases*: FSUs with survey code 7 as per schedule 0.0T were treated as casualties.

16.4 *All the FSUs with survey codes 1 to 6 as per schedule 0.0T minus the number of casualties households was taken as the number of surveyed FSUs ( $n_{stj}$ ) for that (stratum/sub-stratum).*

## **17. Treatment in cases of void sub-strata /strata**

17.1 A stratum/sub-stratum may be void because of the casualty of all the FSUs belonging to the stratum/sub-stratum.

17.2 When a stratum/sub-stratum is void, the following procedure was used:

- (i) If a rural sub-stratum is void then it was merged with the other sub-stratum of the same Group of the stratum or a suitable sub-stratum of the nearest Group.
- (ii) If an urban sub-stratum is void, it was merged with other suitable sub-stratum of the same stratum or suitable sub-stratum of the nearest stratum.
- (iii) If a complete rural/urban NSS Region is void due to all FSUs being casualty, it was excluded from the coverage of the survey. The state level estimates was based on the estimates of regions for which estimates are available.

**Table 1: Allocation of sample FSUs allotted and surveyed and number of households surveyed and number of persons in Time Use Survey**

State/UT	number of sample FSUs allotted for survey		number of sample FSUs surveyed		number of households surveyed FSUs surveyed		number of persons of age 6 years and above surveyed

**Schedule 10.6: Time Use**

RURAL	*
URBAN	

GOVERNMENT OF INDIA  
NATIONAL SAMPLE SURVEY OFFICE  
SOCIO-ECONOMIC SURVEY

CENTRAL

TIME USE SURVEY: JANUARY, 2019 - DECEMBER, 2019

SCHEDULE 10.6: TIME USE

<b>[0] descriptive identification of sample household</b>			
1. state/u.t.:		5. investigator unit number /block number:	
2. district:		6. sample sub-unit (SU) number	
3. sub-district/tehsil/town*:		7. name of head of household:	
4. village name:		8. name of informant:	

<b>[1] identification of sample household</b>									
item no.	item	code				item no.	item	code	
1.	srl. no. of sample FSU					5.	serial number of informant <sup>#</sup> (as in column 1 of block 3)		
2.	schedule number	1		0		6.	response code		
3.	survey year	2		0		7.	survey code		
4.	sample household number					8.	reason for substitution of original household (code)		

**CODES FOR BLOCK 1**

item 6: **response code**: informant: co-operative and capable -1, co-operative but not capable -2, busy -3, reluctant -4, others -9.

item 7: **survey code**: original -1, substitute -2, casualty -3.

item 8: **reason for substitution of original household**: informant busy -1, members away from home -2, informant non-cooperative -3, others -9.

\* tick mark (✓) may be put in the appropriate place.

<sup>#</sup>if the informant is not a household member, code 99 will be recorded.

[3] demographic particulars of all the household members and usual principal activity particulars of household members of age 6 years and above									
srl. no.	name	relation- ship to head (code)	gender (male-1, female-2, transgender-3)	age (years)	marital status (code)	highest level of education (code)	usual principal activity particulars of household members of age 6 years and above		
							status code	for codes 11 to 51 in col. 8	
								description of the industry of work	industry of work (2-digit code of NIC- 2008)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

**CODES FOR BLOCK 3**

**col. (3): relation to head:** self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/mother/father-in-law/mother-in-law -7, brother/sister/brother-in-law/sister-in-law/other relatives -8, servants/ employees/ other non-relatives -9

**col. (6): marital status:** never married – 1, currently married – 2, widowed – 3, divorced/separated – 4

**col. (7) : highest level of education:** not literate: -01, literate: below primary-02, primary -03, upper primary/middle -04, secondary -05, higher secondary -06, diploma /certificate course (up to secondary)-07, diploma/certificate course (higher secondary)-08, diploma/certificate course(graduation & above) -10, graduate -11, post graduate and above -12.

**col. (8): status code:**

worked in household enterprise (self-employed): own account worker -11, employer-12, worked as helper in household enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, rentiers, pensioners , remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.

**col. (10): industry:** 2-digit code (excluding 98) as per NIC -2008.

<b>[4] household characteristics</b>		
1.	household size	
2.	religion (code)	
3.	social group (code)	
4.	land possessed as on date of survey (code)	
<b>household's usual monthly consumer expenditure (Rs.): items 5 to 9</b>		
5.	usual consumer expenditure in a month for household purposes out of purchase (A)	
6.	imputed value of usual consumption in a month from home grown stock (B)
