

Household Assets and Liabilities in India (as on 30.06.2002)

NSS 59th Round
(January to December 2003)

National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India

November 2005

PREFACE

The National Sample Survey Organisation (NSSO) has been conducting All-India surveys on Debt and Investment decennially since its 26th round (1971-72) in both rural and urban areas. These surveys generate basic quantitative information on assets, liabilities and capital expenditure in the household sector of the economy. The All-India Debt and Investment Survey (AIDIS), which was carried out as part of the 59th round of the National Sample Survey (NSS) during the period January to December 2003, was the sixth such survey conducted at the all-India level. Prior to 1971-72, two surveys namely 'All-India Rural Credit Survey' and 'All-India Rural Debt and Investment Survey' had been completed in 1951-52 and in 1961-62 respectively by the Reserve Bank of India (RBI) for rural areas only.

The present report is the first in the series of five reports planned to be brought out on the basis of data collected in the NSS 59th round (January to December 2003). Some basic estimates on assets and liabilities (cash loans) of rural and urban households as on 30th June 2002 are presented in this report. The report consists of three Chapters and three Appendices. Chapter one deals with the introduction and chapter two with concepts and definitions that have been used in the survey. Chapter three deals with summary results of the survey and their comparison with the results of the previous surveys.

The Survey Design and Research Division of NSSO developed the survey methodology and drafted the report. The fieldwork for the survey was handled by the Field Operations Division of NSSO. While the data processing and tabulation work was handled by the Data Processing Division of NSSO, the Coordination and Publication Division of NSSO coordinated various activities pertaining to the survey.

I am thankful to the Chairman and the Members of the Working Group for the NSS 59th round as well as to the Chairman and the Members of the Governing Council of NSSO for their overall guidance at various stages of survey work. The report, I hope, will be useful to the planners and policy makers.

Comments and suggestions from readers will be most welcome.

New Delhi

Ministry of Statistics and Programme Implementation

HIGHLIGHTS

Household Assets

According to the survey estimates, about 73% of the households in India were located in the rural areas and, among them, nearly 60% were cultivator households. Among the urban households about 36% were self-employed households.

Almost all the households in India owned some physical and financial assets as on 30.06.02. Average value of assets (AVA) owned by a household was Rs. 2.66 lakh for the rural areas and Rs. 4.17 lakh for the urban areas.

A rural cultivator household, on an average, owned assets of Rs. 3.73 lakh, which was three-and-half time that owned by a non-cultivator household (Rs. 1.07 lakh). In urban areas, a self-employed household, on an average, owned assets of Rs. 5.55 lakh while other category of households owned assets of Rs. 3.39 lakh.

Among the rural households, AVA was the highest in Punjab (Rs. 9.04 lakh), followed by Haryana (Rs. 7.16 lakh), Jammu & Kashmir (Rs.6.15 lakh) and Kerala (Rs. 5.10 lakh) while Orissa had the lowest AVA with Rs. 0.98 lakh per household and close to it were Andhra Pradesh (Rs. 1.35 lakh), Assam (Rs. 1.46 lakh), West Bengal and Jharkhand (each Rs. 1.52 lakh).

Among the urban households, AVA was the highest for Jammu & Kashmir (Rs. 10.67 lakh), followed by Kerala (Rs. 7.62 lakh), Haryana (Rs. 6.73 lakh) and Delhi (Rs. 5.74 lakh). Jharkhand reported lowest ownership of assets amounting to Rs. 2.44 lakh preceded by Orissa (Rs. 2.50 lakh), Assam (2.77 lakh), Chhatisgarh (Rs. 2.80 lakh), Bihar, West Bengal and Tamil Nadu (each of Rs. 3.22 lakh).

Composition of household Assets

Land and building were found to be the two major components of household assets. In the rural areas, land and buildings together, accounted for 87% share in the total value of assets at the national level - with land 63 percentage points and buildings 24 percentage points. In the urban areas, land and buildings together, accounted for about 76% share in the total value of assets -with land and buildings each holding about 38 percentage points.

Size distribution of Assets

In 2002, in the rural areas, about 7.6% of the households owned assets as low as Rs. 15000 or even less, while about 23% of the households owned assets amounting to rupees 3 lakh and more. In the urban areas, corresponding percentages of households were 17 and 34, respectively.

Household Indebtedness

About 27% of the rural households and 18% of the urban households reported debt (cash loan) outstanding as on 30.6.02. The average amount of debt (AOD) for a rural household was Rs. 7,539 and that for an urban household was Rs. 11,771.

Both incidence of indebtedness (IOI) and average amount of debt (AOD) are seen to have increased steadily with the increase of asset holdings. The AOD of a household belonging to the lowest asset holding class (less than Rs. 0.15 lakh) was lower by 23 times that of a household in the top asset holding class (Rs. 8 lakh and above) in the rural areas. This ratio was nearly one-twenty eighth in the case of urban areas.

Among the major states in rural India, in 2002, the highest IOI is noticed in Andhra Pradesh (42%) closely followed by Kerala (39%), Rajasthan (34%) and Tamil Nadu and Karnataka (each with 31%). On the other hand, states like Jammu & Kashmir (4%), Uttaranchal (6%) and Assam (8%) are found to report very low IOI. As regards AOD, among the major states in rural India, Kerala is found to top the list with cash loan of Rs. 19,663 per household followed by Punjab (Rs. 16,502), Haryana (Rs. 12,359) and Rajasthan (Rs. 12,031). On the other hand, the lower values of AOD are observed in many of the states like Assam (Rs. 643), Uttaranchal, Jharkhand and Jammu & Kashmir (each with around Rs. 1100).

Among the major states in urban India, the extent of indebtedness was to be found the highest in Kerala (37%) followed by Andhra Pradesh (30%), Tamil Nadu (26%) and Gujarat (21%). On the other hand, Delhi (2%) is at the bottom rung, being closely accompanied by Jammu & Kashmir (5%), Assam (6%), Jharkhand and Uttaranchal (each with 7%). Among the major states, Kerala showed the highest value of AOD (Rs.28,446) in the urban sector. The other states, in that order, are Himachal Pradesh (Rs. 25,951), Andhra Pradesh (Rs. 19,901) and Gujarat (Rs. 15,715). At the other end, Delhi, Assam and Bihar are at the bottom league with average values of Rs. 1,441, Rs.2,126 and Rs. 2,616, respectively.

In the rural areas, the incidence of indebtedness (IOI) at the all-India level has somewhat increased steadily since 1981 - from 20% in 1981 to 23% in 1991 and then, to 27% in 2002. The increase in the AOD among the rural households during 1971 to 1981 appears to have been negligible - the increase being from Rs 500 to Rs. 661 in a period of ten years, but it increased at a faster rate during 1981 to 1991 and then accelerated further during 1991 to 2002 and reached Rs. 7,539 per household. The AOD among the urban households increased from Rs. 1,030 to Rs. 3,618 during 1981 to 1991 and then, increased to Rs. 11,771 in 2002.

As on 30.6.02, the 'debt-asset' ratio at the all-India level was 2.82% for urban areas and 2.84% for rural areas. The ratio was 4.65% for the non-cultivator households and 2.49% for the cultivator households in the rural areas. In the urban areas, the ratio was 2.19% for self employed households and 3.42% for other households.

Chapter One

Introduction

1.1 The Report in Perspective

1.1.1 The All-India Debt and Investment Survey (AIDIS) was carried out as a part of the 59th round survey of the National Sample Survey Organisation (NSSO) during January to December 2003. This was the sixth such survey conducted at the all-India level. The main objective of the AIDIS is to generate reliable estimates on assets, liabilities and capital expenditure of the household sector. At present, the decennially conducted AIDIS is the only nation-wide enquiry providing data on household assets, indebtedness and capital expenditure. In the 59th round, information on assets and liabilities of the households as on 30.6.02, amount of capital expenditure incurred by the household during the agricultural year 2002-03 (July 2002-June 2003), cash borrowings and repayments made by the household, sale and loss of assets of the household during the agricultural year 2002-03 was collected through the Debt and Investment Schedule (Schedule 18.2). The present report contains the survey results of the 59th round on value and composition of the household assets as also extent of indebtedness and average amount of cash loans as on 30th June 2002.

1.2 Background

1.2.1 In order to study both the demand and supply sides of credit in the household sector, the Reserve Bank of India (RBI) had conducted the "All-India Rural Credit Survey" in 1951-52. Information on assets, economic activities, particulars of credit operations and the incidence of indebtedness in the rural areas was collected in the survey to assess the demand for rural credit. Further, data on the extent and mode of operations of different credit agencies were also collected to examine the supply side of the credit.

1.2.2 The first Rural Credit Survey was followed by a similar survey in 1961-62 by the RBI. The scope of the survey was extended to include capital expenditure in the household sector and other associated indicators of the rural economy. The second survey was thus called the "All-India Rural Debt and Investment Survey".

1.2.3 The responsibility of conducting the third such survey was given to the National Sample Survey Organisation (NSSO). This organisation undertook the All-India Debt and Investment Survey (AIDIS), after integrating it with the Land and Livestock Holding Survey (LHS), in its 26th round survey during July 1971-September 1972. During this survey, for the first time since its inception, the scope of the Debt and Investment Survey was extended by including urban areas as well. Since then, the NSSO has been regularly conducting AIDIS once in ten years along with LHS. The fourth decennial survey on Debt and Investment was conducted in the NSS 37th round during the calendar year 1982 and the fifth one was conducted in the NSS 48th round during the calendar year 1992.

1.2.4 The present AIDIS was also carried out along with the LHS in the NSS 59th round (2003). Although the objectives of the survey remained the same as those of the earlier surveys, some changes were made in the sampling design. For the first time in the AIDIS of NSSO, sample households in this round were selected separately for LHS and AIDIS for both the rural and urban sectors.

1.3 Scope

1.3.1 Items of enquiry: In the present AIDIS (2003), information on the assets and liabilities of the households was collected as on 30.6.2002. Along with the liabilities of the households, the details of all financial transactions, particularly cash borrowings and repayments, made by the household during the agricultural year 2002-03 (AY 02-03) were also collected. Besides, the survey gathered information on the amount of capital expenditure incurred by the households during the AY 02-03, under different heads, like residential plots, houses and buildings, farm business and non-farm business. Data on sale and loss of assets during this period were also collected in this survey.

1.3.2 Geographical coverage: The 59th round survey covered the whole of Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland located beyond five kilometres of any bus route, and (iii) villages in Andaman & Nicobar Islands which remain inaccessible throughout the year.

1.4. Method of data collection

1.4.1 The Debt and Investment Schedule (Schedule 18.2) was canvassed in a sample of 14 households selected randomly in each village/block. The field workers paid two visits to each sample household during the period of survey with a gap ranging 4 to 8 months. Two separate and slightly different schedules of enquiry were used for collection of data in the two visits.

1.4.2 The survey period for the 59th round was the calendar year 2003. In order to reduce recall error, particulars relating to the entire agricultural year 2002 - 03 were collected by visiting each sample household twice during the survey period. The first visit to the sample households was made during the first 8 months of the survey period, i.e., from January 2003 to August 2003, while the second visit was made during the next 4 months, i.e., between September 2003 and December 2003.

1.4.3 During the first visit to a sample household, the investigator collected information on assets owned on the date of survey as well as acquisition and disposal of assets during the period from 1st July 2002 to the date of survey. These data were used to get assets owned by the households as on 30.6.2002. The survey used the same procedure for assessing the indebtedness of households as on 30.6.2002. The estimates of cash loan outstanding as on 30.6.02 presented in this report are based on the first-visit data on dues outstanding on the date of survey and repayments made and amounts written off between 1st July 2002 and the date of survey, both days inclusive.

1.4.4 In addition, the schedule canvassed during the first-visit provided for collection of data on the amount and other particulars of borrowings and repayments made during the first half of the AY 02-03, i.e., during 1.7.2002 to 31.12.2002. The data on capital expenditure and acquisition, sale and loss of assets of the households during 1.7.2002 to 31.12.2002 were also collected in the first visit.

1.4.5 During the second visit to the sample households, data were collected to assess the borrowing and repayments made and loans written off during the second half of the AY 02-03, i.e., during 1.1.2003 to 30.6.2003. Similarly, data on capital expenditure and acquisition, sale and loss of assets during 1.1.2003 to 30.6.2003 were collected in the second visit. No provision was kept for the collection of information on physical assets, except durable assets, in the schedule of the second visit.

1.5 Reference Period for the Estimates

1.5.1 All the estimates of assets and liabilities presented in this report are for a fixed reference date, viz. 30.6.2002. These are entirely based on the data collected during the first visit to the sample households. The position of assets and liabilities of sample households as on 30.6.2002 was derived from the stock data on the date of survey and the data on transactions during the period 1.7.2002 to the date of survey.

1.5.2 The estimates of number of households presented in this report are based on data with a moving reference point, from 1.1.2003 to 31.8.2003, which spans a period of eight months. These estimates, therefore, may be taken to represent the number of households existing as on 30.4.2003, the mid-point of the eight-month period. The estimates for assets and liabilities for the 59th round are obtained as on 30.6.02 and the average value of assets and liabilities are obtained by considering the number of households obtained from visit 1 data. Following the convention of the earlier rounds, in the summary tables of Chapter Three of the report, the reference period for the estimated number of households of the 59th round has also been stated as 2002.

1.6 Sample Design

1.6.1 The sample design adopted for the survey was essentially a stratified two-stage one for both rural and urban areas. The census villages and urban blocks were the first stage units (FSUs) for the rural and urban sectors, respectively, while households were the second stage sampling units (SSUs) in both the sectors. The selection of villages was done with probability proportional to size with replacement (PPSWR), size being the population as per the population census 1991 in all the strata for rural sector except stratum 1 (see Appendix -B for details of stratification). In stratum 1 of rural sector and in all the strata of urban sector, selection was done using simple random sampling without replacement (SRSWOR). For the AIDIS, 14 households - 2 from each second stage stratum (SSS) - were planned to be surveyed in every sample village/urban block. Selection of SSUs in each SSS of a FSU was done by SRSWOR. The details of the sample design and estimation procedure adopted for the survey are given in Appendix -B of this report. In the 59th Round, 10,309 FSUs (6,552 in rural sector and 3,757 in urban sector) and 1,43,285 SSUs (91,192 in rural sector and 52,093 in urban sector) were surveyed in the country for the AIDIS.

1.7 Contents of the Report

1.7.1 This report contains three chapters and three appendices. Chapter One gives an introduction to the report, and Chapter Two describes the concepts and definitions used for the survey. Chapter 3 discusses the main findings on household assets and liabilities obtained from the survey data. The discussions in Chapter 3 have been confined to the major states and all India while the detailed results, on which this report is based, are presented for all the states and union territories in Appendix A. The sample design and estimation procedure followed in the survey are presented in Appendix B and a facsimile of the Debt and Investment schedule is given in Appendix C.

1.7.2 Appendix A of the report contains tables providing estimates of various items of assets as also of the total assets and liabilities of the households as on 30th June, 2002 at the state and all-India level separately for rural and urban areas. Current liabilities are excluded from the purview of this report. As such, for this report, liabilities denote cash loans outstanding as on 30.6.02, which are hereafter referred to, in brief, as debts of households. The term "indebted households" stands for those households, which had some outstanding cash loans on 30.6.02.

1.7.3 All the estimates presented in this report are based on the central sample data only and also based on combined estimate of the two sub-samples. It would be in order to mention here that the cell figures in any of these detailed tables, when added up, may not exactly equal the figure shown against the 'total' column (or line) due to (i) rounding off and/or (ii) the presence of non-response cases.

1.8 Plan for release of results

1.8.1 The present report is the first in a series of five reports to be brought out on the AIDIS conducted in the NSS 59th round. This report gives the survey estimates on assets and liabilities (cash loans) of rural and urban households as on 30th June 2002. In general, the estimates are provided – separately for rural and urban areas – for the country as a whole, as well as for all the states and union territories.

1.8.2 The second report of the series will be brought out in two parts – one for rural areas and the other for urban areas. It will cover several aspects of household indebtedness like number of households reporting cash loans and current liabilities, average amount of current liabilities, estimated number of households reported having kisan credit card and amount of credit received through it, distribution of cash loans by various characteristics, such as rate of interest, duration of loan, credit agency, etc. The third report would examine different aspects of the related flow variables by tabulating the number of households reporting current borrowings and repayments, amount of borrowings and repayments, etc., classified by different variables like type of loan, credit agency, purpose of loan, type of security, etc. The fourth report will deal with selected aspects of household assets and liabilities for different social groups. In the fifth report, some broad features of capital expenditure, sale and loss of physical assets of the rural and urban households during the agricultural year 2002-2003 will be discussed.

Chapter Two

Concepts and Definitions

2.0 The concepts and definitions of some of the important terms used in the survey and relevant to this report are explained below:

2.1 Household: A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb –normally” means that temporary visitors were excluded but temporary stay-aways were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident employee or a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together’ was given more importance than “sharing food from a common kitchen’ in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments.

2.2 Household assets: Household assets represented all that were owned by the household and had money value. This included physical assets like land, buildings, livestock, agricultural machinery and implements, non-farm business equipment, all transport equipment, durable household goods and financial assets like dues receivable on loans advanced in cash or in kind, shares in companies and cooperative societies, banks, etc., national saving certificates and the like, deposits in companies, banks, post offices and with individuals. The AIDIS does not include crops standing in the fields and stock of commodities held by the household in the household assets. As in the 48th round of the NSS, in the present AIDIS, currency notes and coins in hand were considered assets. The estimates of household assets, presented in this report, include the amount of cash held by the households as on the date of survey.

2.3 Household durable assets: Articles which are used for domestic purposes and have a longer expected life, say, one year or more and which cannot be purchased at a nominal price were defined as household durables. Such goods are usually purchased infrequently or they have a longer interval of purchase. However, minor items like bottles, knives, etc., though expected to last for a longer period, were excluded from household durable assets.

2.4 Liabilities: All claims against a household held by others were considered liabilities of the household. Thus all loans payable by the household to others, irrespective of whether they were cash loans or kind loans were deemed as liabilities of the households. Unpaid bills of grocers, doctors, lawyers, etc., were also considered liabilities of the household. Different kinds of liabilities are defined below.

2.4.1 Cash loans: All loans taken in cash were considered to be cash loans, irrespective of whether those loans were repaid or proposed to be repaid in cash or in kind. Cash loans, generally, covered borrowings at specific rates of interest for specific periods of time. However, if a loan was taken even at "nil" rate of interest from relatives and friends, it was considered to be a cash loan. The loans may be taken against a security or without any security. Dues payable by the household owing to purchase of goods under a hire-purchase scheme were treated as cash loans.

2.4.2 Kind loans: All loans taken in kind (except the cases of hire-purchase) irrespective of whether those were already repaid or yet to be repaid in cash or in kind were considered to be kind loans payable.

2.4.3 Other liabilities: As distinguished from cash loans, "other liabilities" comprised all kind loans payable by the household and also liabilities arising out of goods and services taken from doctors, lawyers, etc. Similarly, outstanding taxes, rent payable to Government, other public bodies, landlords etc., were included under 'other liabilities'. Trade debt arising out of commercial transactions of the household was also included under "other liabilities". Goods from grocers, milkman, etc., taken on credit by the household and for which payment is made at frequent intervals, were considered as "other liability", if they were not paid within due dates.

2.4.4 Current Liabilities: All "kind loans" and "other liabilities" of a household, as defined above, taken together constituted its current liabilities.

2.5 Household Type: The report presents estimates of assets and liabilities for different types of households. Two different classifications have been adopted for the rural and urban areas.

2.6 Classification of rural households: The rural households are initially classified into two types, namely, cultivator and non-cultivator households.

Cultivator households: All rural households operating at least 0.002 hectare of land during the 365 days preceding the date of survey are treated as 'cultivator households'.

Non-cultivator households: All rural households operating no land or land less than 0.002 hectare are considered to be non-cultivator households. They are further classified into 'agricultural labour', 'artisan' and 'other' households according to the principal household occupation as per the National classification of occupations (NCO), 1968. Out of the occupations pursued by the members as their principal or subsidiary (on the basis of income) occupations, that accounting for the maximum earnings to the household in the reference year was considered to be the principal household occupation.

Agricultural labour: A person was considered to be an agricultural labourer, if he/she followed one or more of the following agricultural occupations in the capacity of a manual labour:

- (a) farming,
- (b) dairy farming,
- (c) production of any horticultural commodity,
- (d) raising of livestock, bees or poultry,
- (e) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market of farm produce.

Artisans: Own-account skilled workers and handicraftsmen engaged in any of the following occupations were considered to be artisans:

- (a) spinners, weavers, knitters, dyers, winders, wrappers, carpet makers, etc.;
- (b) tailors, dress makers, upholsterers, sewers, etc.;
- (c) shoe makers, repairers and cutters and other leather workers, etc.;
- (d) carpenters, cabinet makers, wood working machine operators, cart builders, wheel wrights, coach & body builders, ship-wrights & boat builders and related workers;
- (e) stone cutters & carvers;
- (f) blacksmiths, tool-makers, and machine-tool operators;
- (g) sheet metal workers;
- (h) jewelry & precious metal workers and metal engravers;
- (i) glass formers, potters and related workers;
- (j) printers, compositors, type-setters and photo-type setters, printing press man, stereotypers, electro-typers, engravers, book binders, photographic & dark-room workers;
- (k) construction painters;
- (l) makers of musical instruments, turners basketry and brush makers, non-metallic mineral product makers, doll makers, etc.;
- (m) brick layers, stone masons, plasterers, tile-setters, cement finishers, roofers, insulators, glaziers, hut builders, thatchers and other construction workers.

Own-account workers were those who operated their enterprises without hiring anyone on salary or wages except occasionally.

Other rural households: All the remaining households were considered to be 'other households'.

2.7 Classification of urban households: In urban areas, each household was first categorised in one of the four groups self-employed, regular wage/ salaried employee, casual labour and 'others' as per the definitions given below :

Self-employed: Persons engaged in the farm or non-farm enterprises of their households are called self-employed workers. In urban areas, a household was considered self-employed, if the major source of its income during the 365 days preceding the date of survey was self-employment of its members.

Regular wage/salaried household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting salary or wages on a regular basis (i.e. not on daily basis or on periodic renewal of work contract) are treated as regular salaried/wage employees. An urban household reporting that its major source of income during the 365 days preceding the date of survey was regular wage/salaried employment of members were treated as a 'regular wage/ salaried' households.

Casual labour household: Persons working in farm or non-farm enterprises not run by their own households and, in return, getting wages under terms of daily or periodic work contract are treated as casual wage labourers. An urban household reporting that major source of its income during the 365 days preceding the date of survey was casual wage employment of members was treated as a 'casual labour' household.

Other urban household: All the remaining urban households were treated as 'other' households.

2.8 Major household type: The term refers to cultivator and non-cultivator (i.e. other than cultivator) households for the rural areas. For the urban areas, self-employed and other households (i.e. households with household type codes either 2 or 3 or 9) are the two major household types.

2.9 Household consumer expenditure: It is the expenditure of a household on domestic consumption only. It is the same as the expenditure covered in the consumer expenditure survey of the NSSO. Any expenditure incurred by the household on its enterprise account was excluded from consumer expenditure. Unlike the regular Consumer Expenditure Survey of the NSSO, the present survey collected data on the household consumer expenditure through two direct questions on household consumption under two broad categories, viz. (i) out of purchases and (ii) out of home grown, home produced stock, free collection, transfer receipts, etc.

2.10 Household monthly per capita consumer expenditure (MPCE): This was obtained from the household's total consumer expenditure during last 30 days divided by the household size and recorded in two places of decimals.

2.11 Valuation of assets: The survey evaluated a physical asset acquired prior to 30th June, 2002 at the current market price of such an asset in its existing condition prevailing in the locality. An asset acquired prior to 30th June 2002 that was disposed of during the reference period (i.e., during 1.7.2002 to the date of survey) in a manner other than by sale was also evaluated at the current market price. If an asset acquired prior to 30th June, 2002 was disposed of through sale during the reference period, the sale price was regarded as the disposal value of the asset.

2.11.1 On the other hand, if a physical asset was acquired by way of purchase or construction during the reference period, the purchase price or the total expenditure incurred on construction, including the value imputed at current market price of labour and materials supplied from household stock, was considered as its value.

2.11.2 For evaluation of an asset acquired in a manner other than by purchase or construction during the reference period, the current price of the asset in its existing condition prevailing in the locality was considered to be its value.

2.11.3 If an asset acquired during the reference period was owned on the date of survey, the value of acquisition was considered to be the value of the asset on the date of survey. Similarly, if an asset acquired during the reference period was disposed of during the same period, the value considered for acquisition was also considered for disposal of the asset.

2.12 Household assets holding class: Ten household assets holding classes have been decided by examining the distribution of sample households over the asset holding classes for all India. Total value of assets owned as on 30.6.02 was derived for each of the sample households by adding the values of different items of assets. One of the household asset holding classes have been assigned to each of the households depending upon the class in which the total value of assets so derived and rounded off (to Rs. thousand) falls.

2.13 Farm business: Farm business comprised household economic activities like cultivation, including cultivation of plantation and orchard crops, and processing of produce on the farm, e.g. paddy hulling and gur making. Although gur making is a manufacturing activity, this was covered under farm business only when such activity was carried out in the farm by indigenous method. Farm business also included activities ancillary to agriculture, like livestock raising, poultry, fishing, dairy farm activities, bee keeping and other allied activities coming under Tabulation Categories A and B of the National Industrial Classification 1998.

2.14 Non-farm business: Non-farm business was defined as all household economic activities other than those covered in the farm business. This cover manufacturing, mining & quarrying, trade, hotel & restaurant, transport, construction, repairing and other services. For the purpose of this survey, non-farm business shall exclude such activities when they are carried out in non-household enterprises. Non-farm business enterprises, which were registered under section 2m(i) or 2m(ii) and section 85 of Factories Act, 1948 and Bidi and Cigar manufacturing establishments registered under Bidi and Cigar Workers (condition of employment) Act, 1966 were kept outside the coverage of the survey.

2.15 Major states: The discussion on summary of survey results in Chapter 3, besides covering the national level estimates, deals with the estimates for relatively large states - in terms of population - as well. These states are referred to as major states in the discussion. They are as follows: Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. In addition, the discussion also covers the estimates of urban Delhi.

Chapter Three

Summary of Findings

3.0.1 In India, Debt and Investment Surveys of NSSO, often called all-India Debt and Investment Survey (AIDISs), are the principal sources of data on assets, liabilities and capital expenditure of the household sector. As mentioned earlier, this survey is done once in ten years by NSSO. The present report pertains to the results obtained from the sixth AIDIS conducted by the NSSO in its 59th round during January to December, 2003. The report contains the results on value and composition of household assets as also estimates of the extent of indebtedness of the households and amount of debt per household as on 30th June, 2002.

3.0.2 This chapter summarises the major findings of the survey and discusses the salient features relating to assets and cash liabilities of the households as on 30th June, 2002. The observations are mainly confined to all-India estimates followed by an examination of the disparities in ownership of assets and incidence of indebtedness across the major states and its rural-urban sectors. The estimates for the smaller states and union territories (UTs) have not been presented separately. The reason is that the sample sizes for the smaller states and UTs may not be adequate for getting a sufficiently reliable estimates at least for measuring change or inter-state comparison. The estimates for those states and UTs have, however, been given in the Appendix. The major states that are considered here, are those with populations of one crore or more in respect of rural or urban sector separately. The discussion starts with the observation on distribution of households by occupational categories as defined in respect of different types of households. This is followed by a discussion of the assets and liabilities of the households for the different occupational categories of households. Composition of the households by household asset holdings has then been taken up for discussion. The variations in household asset holdings over various correlates like monthly per capita consumer expenditure, land owned by the households, etc., are discussed in some detail. Finally, the chapter concludes with a brief discussion on household indebtedness, amount of debt per household in terms of cash dues and debt-asset ratio of the households as on 30.6.2002.

3.0.3 To have an idea of the change of household asset holdings and indebtedness over the years since 1971, the results of the earlier surveys of the NSSO on Debt and Investment, viz. the 26th (July 1971 to June 1972), 37th (January to December 1982) and 48th (January to December 1992) rounds, are also presented in this report. The estimates for assets and liabilities for the 26th round, 37th round and 48th round were obtained as on 30.6.71, 30.6.81 and 30.6.91, respectively, and the corresponding estimates for the 59th round have been obtained as on 30.6.02. In the 59th round, estimates for the number of households have been obtained from the data of first visit (collected during January to August, 2003) only and, therefore, the estimates refer to the mid-point of the survey period of Visit 1, i.e. 30.4.03. But to indicate a uniform reference period for the estimates of a round, in the summary tables of this chapter, the reference periods for the 26th, 37th, 48th and 59th rounds are stated as 1971, 1981, 1991 and 2002, respectively. Estimates for the 26th round have not been presented in the summary tables for the urban sector as the results for the urban sector were not released for that round.

3.0.4 For the purpose of report, the major states, which are relatively large in terms of population, are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu &

Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, Uttaranchal, West Bengal and urban Delhi. However, the estimates for all-India presented in the statement tables of this chapter as well as other tables of the report are based on the data of all the states and union territories. Moreover, it is important to note that, generally, the estimates of household, etc., obtained from NSS surveys are found to be lower than those of the census or projections. The differences are mainly due to differences in coverage and methods adopted in NSS in comparison to census operation. However, the ratios obtained from NSS surveys are expected to provide a closer approximation to the true values. Thus, the estimated marginal aggregates of households, assets, etc., presented in the detailed tables in the appendix may be used as weights for combining the ratios.

3.0.5 The states of Chhattisgarh, Jharkhand and Uttaranchal have emerged in the recent past out of the partition of erstwhile Madhya Pradesh, Bihar and Uttar Pradesh, respectively. The estimates on assets and liabilities for these new states are available for the first time from the 59th round survey. Therefore, while presenting comparable figures with the earlier rounds at the state level, figures for these new states are shown as "-". It may be noted that for the earlier rounds, estimates shown for the states of Madhya Pradesh, Bihar and Uttar Pradesh correspond to the erstwhile state boundaries that existed before the new states were carved out.

3.1 Estimated number of households

3.1.1 In the 59th round survey on Debt and Investment, 10,309 fsus (6,552 villages in rural areas and 3,757 UFS blocks in urban areas) and 1,43,285 ssus (91,192 households in rural areas and 52,093 households in urban areas) were surveyed in the country. The number of households in India as estimated from the 59th round survey was about 203.4 million, of which about 73% were in the rural areas. Statement 1 presents the distribution of households over the major states in India, separately for the rural and urban areas. The major states accounted for a little over 98% of all households in the country. In many major states, the proportions of households in the rural areas to all households in the state exceeded 80% and such states were Assam (89%), Bihar (89%), Himachal Pradesh (89%), Orissa (86%) and Chhattisgarh (85%). The corresponding proportions were comparatively low in Gujarat (64%), Maharashtra (57%) and Delhi (15%) - indicating that these states are more urbanized than the others.

3.2 Occupational categories of the households

3.2.1 In this report, all the estimates of assets and liabilities are presented for different occupational categories of households defined in terms of types of households. For this purpose, two different classifications have been used for identifying the occupational categories of the households in the rural and urban areas. It would, therefore, be appropriate to mention the concepts and definitions involved in classifying the households into occupational categories in the rural and urban areas.

Statement 1: Percentage distribution of households in India over the major states

State	rural	urban	combined	% of rural households
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	9.6	9.1	9.5	74
Assam	2.8	0.9	2.3	89
Bihar	7.9	2.6	6.5	89
Chhattisgarh	2.5	1.2	2.1	85
Delhi	0.3	4.3	1.4	15
Gujarat	4.2	6.4	4.8	64
Harayana	2.1	2.2	2.1	72
Himachal Pradesh	0.8	0.3	0.7	89
Jammu & Kashmir	0.7	0.6	0.7	76
Jharkhand	2.5	1.7	2.3	80
Karnataka	4.7	6.3	5.1	67
Kerala	3.4	3.1	3.3	74
Madhya Pradesh	6.4	5.4	6.1	76
Maharashtra	8.0	16.1	10.2	57
Orissa	4.5	1.9	3.8	86
Punjab	2.0	2.9	2.3	65
Rajasthan	4.7	3.9	4.5	76
Tamil Nadu	7.5	9.8	8.1	67
Uttaranchal	0.8	0.6	0.7	80
Uttar Pradesh	15.0	11.3	14.0	78
West Bengal	8.2	7.5	8.0	75
Other states/UTs	1.4	1.9	1.5	66
All-India	100.0	100.0	100.0	73

3.2.2 Categories of rural households: The households in the rural areas are broadly classified as cultivator and non-cultivator households. The cultivator households are defined as those who operated an area of land 0.002 hectare or more during the agricultural year 2002-03. Those who did not operate any land or operated an area of land less than 0.002 hectare during the agricultural year 2002-03, are considered non-cultivator households and are further classified as (i) agricultural labour households, (ii) artisan households and (iii) other rural households depending upon the principal occupation code of the households obtained from the survey. The above definitions are the same as those followed in the 48th round survey, but are somewhat different from those adopted in the 37th and 26th rounds. In these surveys, cultivators were defined as in the 59th round, but non-cultivators were classified in the three categories mentioned above depending upon the major source of income of the households during the 365 days preceding the date of survey, with occupations differing somewhat from those adopted for the

48th and 59th round surveys. However, the different criterion adopted in the 48th and 59th round surveys for classifying the households into occupational categories (see Para 2.6 of Chapter Two) is not expected to affect significantly the comparison with the estimates obtained from the 26th or 37th round surveys.

3.2.3 Categories of urban households: Depending upon the income of the households from the different sources during last 365 days, each of the urban households is classified in one of the four household types: self-employed, regular wage/salaried employee, casual labour and others. The households in the urban areas are broadly categorized into two occupational groups such as self-employed and other. The broad category other comprises households with household type regular wage/salaried employee, casual labour and others. Those households for which household type could not be recorded are classified neither as self-employed nor as other but are considered in the count of total number of households. The self-employed urban households are further sub-classified into seven occupational groups considering the entry for principal occupation code of the households.

These groups are:

1. professional, technical and related workers,
2. administrative, executive and managerial workers,
3. clerical & related workers,
4. sales workers,
5. service workers,
6. farmers, fishermen, hunters, loggers and related workers,
7. production and related workers, transport operators and labourers.

3.2.4 Statement 2 presents the percentage distribution of rural households by occupational category as obtained from the present survey and that from the earlier Debt and Investment Surveys of NSSO. The

household occupational category	all-India percentage of households			
	1971 (26 th)	1981 (37 th)	1991 (48 th)	2002 (59 th)
(1)	(2)	(3)	(4)	(5)
cultivators	72.4	76.3	66.1	59.7
non-cultivators:				
agr. labour	14.6	11.3	14.2	14.4
artisans	2.4	1.6	3.8	5.2
others	10.6	10.8	15.8	20.7
all non-cultivators	27.6	23.7	33.9	40.3
all households	100.0	100.0	100.0	100.0

Note: The estimates of households shown in this table actually refer to the periods 1972, 1982, 1992 and 2003, respectively.

results indicate that during 2002, about 60% of the households in the rural areas were cultivator households and the proportion of households of this category shows a systematic decline over the three decennial time points since 1981, but at a slower rate between the periods 1991 and 2002. The remaining 40% of the households in the rural areas could be termed, according to the definitions adopted in the AIDIS 2002, as non-cultivator households with the composition, among them, of about 36% agricultural labour households, about 13% artisan households and 51% other households. The percentage of non-

household occupational category	all-India percentage of households		
	1981 (37 th)	1991 (48 th)	2002 (59 th)
(1)	(2)	(3)	(4)
self-employed:			
professional etc.	1.7	1.6	1.7
administrative etc.	2.4	3.9	8.0
clerical etc.	0.8	0.2	0.3
sales workers etc.	10.6	11.2	11.5
service workers etc.	1.9	2.1	2.7
farmers etc.	4.0	3.7	1.7
production workers etc.	10.8	11.0	10.0
all self-employed	32.6	34.0	36.1
others	67.4	66.0	63.8
all households	100.0	100.0	100.0

Note: The estimates of households shown in this table actually refer to the periods 1982, 1992 and 2003, respectively.

cultivator households, along with its two important components in terms of their shares, viz., other and artisan households, shows an increasing trend over the periods 1981 to 2002 except for agriculture labour households for which the percentage share remained almost stationary between 1971 and 2002 with a dip of about 3% point in 1981. In respect of the different categories of households discussed above, the trend in the estimates between the periods 1971 and 1981 was not the same as for the periods 1981 to 2002.

3.2.5 Similar to that for the rural areas, the distribution of households by the occupational categories, obtained from the 37th, 48th and 59th round surveys of the NSSO, is given in Statement 3 for the urban

areas. More than one-third of the urban households in India were self-employed in 2002. Among the self-employed households, whose members were engaged as 'sales workers' or those engaged as 'production and related workers', 'transport equipment operators and labourers' or those engaged as 'administrative, executive and managerial workers' constituted the major part of the group. These three occupational categories of the urban households constituted more than 29% of all households in the urban areas.

3.2.5.1 The pattern in the distribution of households over the occupational categories have been quite similar among the last three AIDISs. The percentage of self-employed households increased from 33% in 1981 to 34% in 1991 and then had a lead by about 2 percentage points in 2002. As in 1981 and 1991, the two occupational categories, viz. 'sales workers' and 'production & related workers, etc.' were the two major groups among the categories of households in the urban areas in 2002. These two

Statement 4: Percentage of cultivator households in rural areas during 1971, 1981, 1991 and 2002

State	1971 (26 th)	1981 (37 th)	1991 (48 th)	2002 (59 th)
(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	61.6	65.8	55.8	43.0
Assam	81.6	86.8	71.7	62.8
Bihar	80.4	77.4	69.8	60.5
Jharkhand	-	-	-	76.1
Gujarat	64.0	79.6	60.4	56.4
Harayana	60.0	57.0	57.3	58.9
Himachal Pradesh	92.4	87.4	84.2	75.3
Jammu & Kashmir	93.9	83.3	86.3	88.6
Karnataka	68.7	75.1	69.3	57.4
Kerala	89.7	93.2	78.2	49.6
Madhya Pradesh	82.0	80.3	70.8	66.1
Chhattisgarh	-	-	-	75.3
Maharashtra	68.8	67.4	60.2	55.0
Orissa	77.2	83.8	68.5	64.5
Punjab	42.9	63.3	43.7	53.7
Rajasthan	86.8	84.8	80.4	74.6
Tamil Nadu	55.4	68.9	43.8	34.8
Uttaranchal	-	-	-	74.0
Uttar Pradesh	77.8	78.4	76.4	74.9
West Bengal	65.8	78.4	65.2	56.6
India	72.4	76.3	66.0	59.7

Note: The estimates of households shown in this table actually refer to the periods 1972, 1982, 1992 and 2003, respectively.

observed from Statement 4, there is a wide inter-state variation in the percentage of cultivator households. The percentage ranged from as low as 35 (in Tamil Nadu) to as high as 89 (in Jammu & Kashmir) in 2002. Among the major states, the proportion of cultivator households to all rural households was below the all-India level (60%) for the states Tamil Nadu (35%), Andhra Pradesh

categories of self-employed households accounted for about 22% of the urban households both in 1991 and in 2002. As observed from Statement 3, the share of urban households whose members were engaged as 'administrative, executive and managerial workers' or engaged as 'service workers' increased during the two decades ending 2002. The share of the occupational group 'administrative, executive and managerial workers' increased by nearly 6 percentage points and that of the occupational group 'service workers' increased by about 1 percentage point during the two decades. On the other hand, a decrease of about 2 percentage points is observed in the proportion of the farmer households in the urban areas during the two decades ending 2002.

3.2.6 Occupational Categories - Inter-state Comparison

3.2.6.1 The percentage of cultivator households to the total households in the rural areas for the periods 1971, 1981, 1991 and 2002 is given in Statement 4 for 20 major states in order to study the changes during the three decades ending 2002. As

(43%), Kerala (50%), Punjab (54%), Maharashtra (55%), Gujarat (56%), Karnataka (57%), West Bengal (57%) and Haryana (59%). The states with a very high percentage of cultivator households were Jammu & Kashmir (89%), Jharkhand (76%), Chhattisgarh (75%), Himachal Pradesh (75%), Rajasthan (75%) and Uttar Pradesh (75%).

3.2.6.2 In India, the proportion of cultivator households to all rural households during 1971, 1981, 1991 and 2002 were 72%, 76%, 66% and 60%, respectively. Keeping aside the estimates for 1971, the declining trend observed in the all-India estimates over the period 1981 to 2002 is generally revealed in most of the major states under consideration. The variability, in terms of range, in the percentage of cultivator households to all rural households across the major states was very high during 1971 and 1991, and was somewhat moderate during 1981. The said percentage ranged from 43 (in Punjab and Tamil Nadu) to 94 (in Jammu & Kashmir) in 1971, 57 (in Haryana) to 93 (in Kerala) in 1981, and from 44 (in Tamil Nadu) to 86 (in Jammu & Kashmir) in 1991. As compared to the 1991 estimates, there has been a steady fall in the percentage of cultivator households in 2002 for all the major states excepting Haryana, Jammu & Kashmir and Punjab where a rise in this percentage is noted.

3.2.6.3 Statement 5 presents the percentage of self-employed households among all urban households

Statement 5: Percentage of self-employed households in urban areas during 1981, 1991 and 2002

state	1981 (37 th)	1991 (48 th)	2002 (59 th)
(1)	(2)	(3)	(4)
Andhra Pradesh	34.6	32.4	34.0
Assam	38.9	39.9	46.7
Bihar	36.6	39.0	50.4
Jharkhand	-	-	27.3
Delhi	30.6	30.6	35.4
Gujarat	32.8	34.5	37.2
Haryana	40.0	46.3	40.3
Himachal Pradesh	29.0	32.4	29.6
Jammu & Kashmir	44.5	28.2	50.1
Karnataka	36.0	29.2	30.5
Kerala	31.1	34.4	33.0
Madhya Pradesh	32.0	29.1	35.0
Chhattisgarh	-	-	26.1
Maharashtra	25.9	29.0	28.5
Orissa	25.3	32.3	33.9
Punjab	44.5	43.1	44.4
Rajasthan	37.8	34.9	37.4
Tamil Nadu	27.5	28.4	31.1
Uttaranchal	-	-	38.4
Uttar Pradesh	42.1	47.9	49.9
West Bengal	24.3	33.4	40.0
India	32.6	34.0	36.1

Note: The estimates of households shown in this table actually refer to the periods 1982, 1992 and 2003, respectively.

for the 21 major states (including Delhi) as obtained from the 37th, 48th and 59th round surveys of the NSSO on Debt and Investment. As observed, there is a wide inter-state variation in the percentage of self-employed households. The percentage ranged from a low 26 (in Chhattisgarh) to a high 50 (in Jammu & Kashmir, Bihar and Uttar Pradesh) in 2002. Among the major states, the percentage of self-employed households to all the urban households was much below the all-India level (36) for states like Chhattisgarh (26), Jharkhand (27), Maharashtra (28) and it was very high for the states like Jammu & Kashmir, Bihar, Uttar Pradesh (each with 50), Assam (47), Punjab (44), etc.

3.2.6.4 The all-India estimate of percentage of self-employed households to all the urban households during 1981, 1991 and 2002 were 33, 34 and 36, respectively. In all the AIDISs, the estimates reveal a wide inter-state variation in respect of the percentage of self-employed households. The percentage in the urban ranged from 24 (in West Bengal) to 45 (in Jammu & Kashmir and Punjab) in 1981. In 1991, it varied between 28 (in Jammu & Kashmir and Tamil Nadu) to 48 (in Uttar Pradesh).

During the period 1981 to 2002, there was a rise in the proportion of self-employed households in the urban areas for most of the states excepting a few states like Andhra Pradesh (where dropped from 35% to 34%), Karnataka (where dropped from 36% to 31%).

3.3 Average Assets Holdings of the Households

3.3.1 Information on both physical and financial assets owned by the households as on 30th June, 2002 were collected in the 59th round survey on Debt and Investment. Under physical assets, land, buildings, livestock, agricultural implements & machinery, non-farm business equipment, transport equipment and household durables were taken into account while shares, deposits, etc., and cash and kind dues receivable and cash in hand were considered under

financial assets. All these assets owned by the households constitute the asset holdings of the households.

3.3.2 The average assets holdings (AVAs) of the households, i.e. average values of all physical and financial assets per household, are presented in Statement 6 separately for each occupational category in the rural and urban areas of India. The statement also gives, along with AVAs, the percentage of households reporting ownership of some assets. As expected, almost all households, except 1 in 1000 rural households and 2 in 1000 urban households, owned some kind of physical or financial assets. The average value of assets owned by a rural household was Rs. 2.66 lakh and by an urban household Rs. 4.17 lakh – nearly 57% more than a rural household. Large differences in AVA is observed among the occupational categories in both the rural and urban areas. A rural cultivator household, on an average, owned assets of Rs. 3.73 lakh, which were three-and-half times than those owned by its rural counterpart (Rs. 1.07 lakh). The differences in the urban areas in this respect were narrower: AVA of self-employed household at Rs. 5.55 lakh was 64% higher than AVA of other urban households at Rs. 3.39 lakh.

Statement 6: Percentage (P) of households owning assets and average value of total assets (AVA) owned as on 30.6.02

occupational category	P	all-India
		AVA (Rs.)
(1)	(2)	(3)
		rural
cultivator	100.0	372632
non-cultivator	99.8	107230
all rural households	99.9	265606
		urban
self-employed	100.0	554844
others	99.7	339002
all urban households	99.8	417158

3.3.3 Inter-state comparison of AVA

3.3.3.1 In rural areas: Statement 7 shows the AVAs as on 30th June, 2002 separately for cultivator and non-cultivator households in 20 major states. A state-wise analysis of AVA shows that it was the highest in Punjab (Rs. 9.04 lakh), followed by Haryana (Rs. 7.16 lakh), Jammu & Kashmir (Rs.6.15 lakh) and Kerala (Rs. 5.10 lakh). Orissa had the lowest AVA with Rs. 0.98 lakh per household and close to it were Andhra Pradesh (Rs. 1.35 lakh), Assam (Rs. 1.46 lakh), West Bengal and Jharkhand (each Rs. 1.52 lakh). In all the states, AVA for cultivator households is found to be much higher than that for non-cultivator households. Moreover, the differences in the AVA values between the two categories do not reveal any relationship with the overall magnitude of AVA.

Statement 7: Average value of assets (AVA) (in Rs.) per household by household category in rural areas of major states

state	cultivator	non-cultivator	all
(1)	(2)	(3)	(4)

Uttar Pradesh	399427	338936	370084
West Bengal	335112	313485	322023
India	554844	339002	417158

The AVA of cultivator households was 5.72 times that of non-cultivator households in Punjab, 5.20 times in Haryana, 2.14 times in Jammu & Kashmir, 3.16 times in Kerala, 3.40 times in Andhra Pradesh, 2.52 times in Assam, 2.35 times in Jharkhand and 2.84 times in West Bengal. The corresponding number was the lowest in Orissa with the AVA for cultivator household being 1.99 times.

3.3.3.2 In urban areas: Statement 8 shows the AVAs of the urban households as on 30th June, 2002 for 21 major states. This gives the AVAs separately for self-employed and other households in the states. Similar features in respect of household categories are observed in the case of urban households as in the case of the rural. The AVA of self-employed households was higher than that of other urban households in all the states. The differential in respect of AVA in these two urban categories of households was smaller than the corresponding rural household categories of cultivator and other. The states that reported very high AVA were Jammu & Kashmir (Rs. 10.67 lakh), Kerala (Rs. 7.62 lakh), Haryana (Rs. 6.73 lakh) and Delhi (Rs. 5.74 lakh). Punjab, which topped in the rural areas, reported lower urban AVA of Rs. 5.61 lakh. Incidentally, rural Haryana is also better in respect of AVA per household than its urban parts. On the other hand, Jharkhand reported lowest ownership of assets (Rs. 2.44 lakh), preceded by Orissa (Rs. 2.50 lakh), Assam (Rs. 2.77 lakh), Chhattisgarh (Rs. 2.80 lakh), Bihar, West Bengal and Tamil Nadu (Rs. 3.22 lakh each).

3.3.3.3 Changes in Average Value of Assets (AVA) of Rural Areas: The changes in the average value of assets (AVA) of the rural households over the two decades beginning with 1981 are shown in Statement 9 for 20 major states and all India. It may be seen that there is a very little change in the relative position of the states in respect of AVA during the two decades. Punjab, Haryana, Kerala, Jammu and Kashmir and Himachal Pradesh have maintained their high AVAs in all the periods 1981, 1991 and 2002, and on the other hand, Orissa, Andhra Pradesh, Assam, West Bengal and Tamil Nadu are found with low AVAs in these periods. In fact, the relative positions of the states in 1991 are observed to be roughly the same as in 1981. Some new states have emerged through partitioning of some big states during 1991 and 2002. In that sense, although strict comparison between the periods 1991 and 2002 is not possible, the relative positions of the states observed in 1991 have remained nearly the same in 2002.

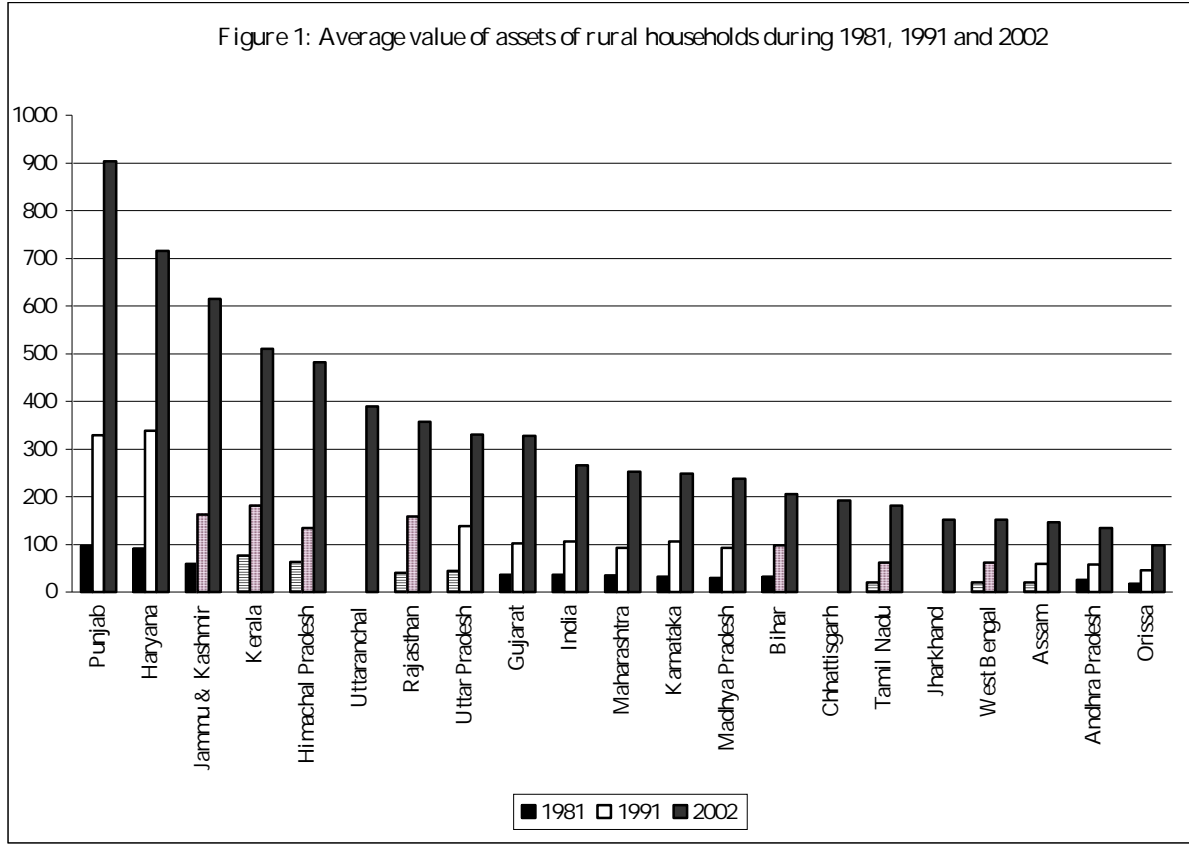

Statement 9: Average value of assets (AVA) per rural household during 1981, 1991 and 2002

state	Rural		
	AVA (Rs.000)		
	1981 (37 th)	1991 (48 th)	2002 (59 th)
(1)	(2)	(3)	(4)

West Bengal	28	101	322
India	41	144	417

3.3.3.4 In urban areas: Statement 10 shows the changes in the AVA of the urban households over the decade ending 2002 for 21 major states and all India. A state-wise analysis of AVA in the urban shows similar features as for that in the rural areas. The relative position of the states in respect AVA in the urban areas did not change much during the two decades, except in the case of Andhra Pradesh and Madhya Pradesh. These two states show a significant upward movement in terms of AVA. The change in the case of Madhya Pradesh could be due to its partition to form Chhattisgarh, where the AVAs was lower.

3.3.4 Average value of assets by land owned

3.3.4.1 Statement 11 shows the average value of assets (AVA) as on 30th June, 2002 for households of different land ownership classes separately for cultivator and non-cultivator households in the rural areas. It is seen that the AVA increased with the size class of land owned for rural India as a whole. This is also true for cultivator and non-cultivator households. Secondly, the AVA for cultivator households has been, as expected, higher in the size classes than that for non-cultivator households. This picture was only to be expected, given the overwhelming importance of land as an item of asset in rural India.

size class of land owned (ha)	occupational categories of the households		
	cultivator	non-cultivator	all
(1)	(2)	(3)	(4)
nil	45614	24849	26256
less than .002	65751	45856	46491
.002 - 1.00	212651	106482	165255
1.00 - 2.00	455667	463986	456143
2.00 - 10.00	902458	754907	895071
≥ 10.0	2705407	2086224	2699565
all	372632	107230	265606

3.3.4.2 State-wise Pattern of Rural Areas: Statement 12 shows that the pattern seen at the national level holds good for most of the states. However, in some states like Chhattisgarh, Himachal Pradesh, Jharkhand and Orissa, the AVA is seen to fall slightly in second lowest ownership class, viz. 'less than 0.002 ha.' compared to the lowest class, viz. 'nil'.

state	size class of land owned (ha.)						
	nil	less than .002	.002 - 1.00	1.00 -2.00	2.00-10.00	≥10.0	all

Note: "-" is used to indicate that no sample household was obtained in that land class for that state

3.3.5 Average value of assets by monthly per capita consumer expenditure (mpce)

3.3.5.1 The average value of assets (AVA) as on 30th June, 2002 for households of different monthly per capita consumer expenditure (mpce) classes are given in Statement 13 for rural areas of 20 major states and all India. Similar results are given in Statement 14 for urban areas of 21 major states and all India. There are 12 mpce classes in the detailed tables given in the Appendix. However, these estimates have been summarized further into 4 mpce size-categories, separately for the rural and the urban areas, for the purpose of inter-state comparison. These categories correspond to roughly 20% , 30% , 30% and 20% of all households and may be termed as poor, middle class, upper middle class and rich households in the rural and urban areas.

Statement 13: Average value of assets (AVA) (in Rs.) per household by size class of MPCE					
state	monthly per capita consumer expenditure				rural
	less than 300	300 - 420	420-615	≥615	all
(1)	(2)	(3)	(4)	(5)	(6)
Andhra Pradesh	79572	87383	137174	227508	135146
Assam	70339	99411	158350	229177	145782

India	114700	166893	257943	525885	265606

3.3.5.2 Changes in Average Value of Assets (AVA) over mpce Categories of Rural Areas: Statement 13 shows that, in rural India, AVA rises with increase in mpce. The AVA of a rural rich household (mpce greater than or equal to Rs. 615) of about Rs. 5.26 lakhs, is found to be nearly five times that of a poor household (mpce less than Rs. 300). Between the mpce classes, the rise of AVA is observed to be the steepest from the upper middle class to the rich. This rises a little over two times, from about Rs. 2.58 lakhs to nearly Rs. 5.26 lakhs. The picture is more or less the same in the rural areas of all the states. The inter-state disparity in the AVA values is found to be very much pronounced in the poor and rich categories of households than that observed in the AVA values as a whole. It ranges from Rs. 0.58 lakh in Orissa to Rs. 2.45 lakh in Uttaranchal in the case of poor households, and from Rs. 2.28 lakh in Andhra Pradesh to Rs. 13.40 lakh in Punjab in the case of rich categories.

Statement 14: Average value of assets (AVA) (in Rs. 000) per household by size class of MPCE

state	monthly per capita consumer expenditure				urban
	less than 425	425 - 665	665 - 1120	≥ 1120	all
	(1)	(2)	(3)	(4)	(5)
Andhra Pradesh	77975	117448	260962	964528	356656
Assam	55477	194131	243432	482967	276793

Tamil Nadu	91488	132247	275952	651128	322129
Uttaranchal	197469	185461	468221	918544	438424
Uttar Pradesh	162891	267588	376322	871718	370084
West Bengal	96889	158653	285144	654231	322023
India	128617	203193	337617	855254	417158

3.3.5.3 Changes in Average Value of Assets (AVA) over mpce Categories of Urban Areas: Urban India shows a very similar trend. As in the rural sector, AVA shows a continuous rise with mpce. The AVA among the rich households (mpce above Rs.1120) is about 6.65 times (Rs. 8.55 lakh) that of a poor category of household (less than Rs. 425) - the figure for AVA in the lowest mpce category being Rs. 1.29 lakh. The rise in the AVA is steepest from an upper middle class household to a rich household - it rises by 1.58 times between the poor to the middle category, 1.66 times between the middle to the upper middle category and then, 2.53 times between the upper middle to the rich category of households. All the states show a similar pattern over the mpce categories as observed for all-India. Interestingly, the AVA for the households with mpce less than Rs. 425 in the urban areas is seen to be lower than the AVA for the households with mpce Rs. 300 in the rural areas of some states like Andhra Pradesh, Assam, Chhattisgarh, Himachal Pradesh, Karnataka, Madhya Pradesh, Rajasthan, Uttaranchal and Uttar Pradesh, etc.

3. 3.6 Size Distribution of Household Assets Holdings

Statement 15: Percentage distribution of households by household assets holdings as on 30.6.02

household assets holding class (Rs. 000)	rural			urban		
	cultivator	non-cultivator	all	self-employed	other	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)
less than 15	1.0	17.4	7.6	10.2	20.3	16.7
15 - 30	2.9	16.3	8.3	5.6	6.8	6.3
30 - 60	8.8	23.6	14.8	8.1	9.5	9.0
60 - 100	13.5	16.3	14.6	9.5	9.6	9.5
100 - 150	14.4	9.3	12.3	8.8	9.2	9.0
150 - 200	11.3	4.8	8.7	6.9	5.9	6.3
200 - 300	14.8	5.1	10.9	10.4	9.0	9.5
300 - 450	11.8	3.1	8.2	9.4	8.1	8.6
450 - 800	11.4	2.7	7.9	13.0	10.0	11.1
800 & above	10.2	1.4	6.7	18.3	11.6	14.0
all	100.0	100.0	100.0	100.0	100.0	100.0

3.3.6.1 Statement 15 presents the distribution of households over household assets holding classes separately for each occupational category of rural and urban sectors of all-India. The distribution is expected to reveal the relative importance of different assets holding groups.

3.3.6.2 Rural Areas: In the rural areas, it is seen that 7.6% of the households owned assets as low as Rs. 15000 or even less, valued at 2002 prices. Another 8.3% households belonged to the asset group of Rs. 15,000 to 30,000. Thus, in 2002, less than one-sixth of the rural households owned assets worth Rs. 30,000 or less. On the other hand, about 23% of rural households owned assets amounting to rupees

three lakh and more. More than 60% were found to be distributed in the middle five asset groups ranging from Rs. 30 thousand to Rs. 3 lakh.

3.3.6.3 Among the different categories of households, cultivators (60%), numerically the most dominant type in the rural areas, are found to be more prosperous than non-cultivators. As mentioned earlier, the value of total assets per cultivator household was Rs. 3.73 lakh, which was about three-and-half times than the average value of total assets (Rs. 1.07 lakh) held by the non-cultivator households. The pattern of assets holding reflects the sad plight of the non-cultivator households. As high as 34% of the non-cultivators, are seen to own assets worth only Rs. 30,000 or less. The corresponding number for the cultivators is 4% only. Among the non-cultivator households, on the other hand, merely 7% own assets worth Rs. 3 lakh or more compared to 33% among the cultivator households.

3.3.6.4 Urban Areas: It is seen from Statement 15 that in the urban areas, the percentages of households in the two terminal groups of the size-distribution of assets holding are far more than those in the rural areas. However, in most of the middle groups the percentages are more in the rural areas. The proportion of urban households owning a meager amount of less than Rs. 15,000 worth of assets is found to be 17% in 2002, which is more than two times the proportion of rural households falling in the same asset group. At the other end of the size bracket of assets holding of Rs. 3 lakh and above, the concentration of urban households is considerably more than that of the rural households. The proportion of households in this upper extreme group is seen to be 34% in the urban areas against 23% in the rural areas.

3.3.6.5 The percentage of urban households falling in the assets groups up to Rs. 30,000 is found to be less among the self-employed than among the other urban households. Between the two categories of households, the self-employed are seen to exhibit a better performance in the sense that the distribution

for the self-employed households is located to the right of the distribution for other households with a more or less identical distribution pattern. Note that the average value of total assets per self-employed household is much higher (about Rs. 5.55 lakh) than that per non-self employed households.

Statement 16: Percentage distribution of rural households by household assets holdings as on 30.6.02

State	household assets holding class (in Rs. 000)					all
	less than 30	30-100	100-200	200-450	≥ 450	
(1)	(2)	(3)	(4)	(5)	(6)	(7)

Uttaranchal	9.1	12.3	25.1	31.7	21.9	100.0
Uttar Pradesh	8.3	23.8	22.6	25.0	20.3	100.0
West Bengal	23.3	34.5	19.4	15.2	7.6	100.0
India	15.9	29.4	21.0	19.1	14.6	100.0

3.3.6.6 Inter-state Comparison of Rural Areas: For the sake of inter-state comparison, the detailed assets holding classes have been merged into five broad classes and these are: less than Rs. 30 thousand, Rs. 30 thousand to 1 lakh, Rs. 1 lakh to 2 lakh, Rs. 2 lakh to 4.5 lakh, and greater than or equal to 4.5 lakh. The distribution of households over the broad assets holding classes is given in Statement 16 for rural areas of major states. It may be seen that there is no definite pattern in the distribution of households for all the states. However, one noticeable pattern is in the distribution of the distribution is generally positively skewed in the states where the overall AVA is low like Orissa, Andhra Pradesh, Chhattisgarh, West Bengal, and is negatively skewed in the states where the overall AVA is high like Punjab, Kerala, Jammu & Kashmir, etc.

3.3.6.7 Inter-State Comparison of Urban areas: The distribution of households over the broad assets holding classes is given in Statement 17 for urban areas of major states. As in the case for the rural areas, the distributions of households for states

reporting low AVA values are generally positively skewed and are negatively skewed for the states with high AVA values.

3.3.7 Composition of Household Assets Holdings

3.3.7.1 Rural Areas: It may be mentioned that in the survey, information on value of assets, physical or financial, was collected in respect of various items constituting the assets. These items are listed in Statement 18 along with the distribution of assets by item of assets separately for each household category of rural and urban India.

Land and building together, in the rural areas, are clearly the predominant component of assets or jointly holding 87% share in the total value of assets at the national level - with land having 63 percentage points and buildings 24 percentage points. The share of other items of assets is not significant except for durable assets in the rural areas (5%). Noticeably, in the total assets, the shares of household durables and deposits are seen to be higher among the non-cultivator households than among the cultivator households. The shares are 10% and 5%, respectively for the non-cultivator households, and 4% and nearly 2%, respectively, for the cultivator households. A similar distribution over the main items of assets (land, building and others) is given in Statement 19 for rural areas of 20 major states.

3.3.7.2 Urban Areas: In the urban areas, about 76% share in the total value of assets is held in the form of land and building together. This apart, shares of household durables and deposits are about 8% and 9%, respectively. The share of all transport equipment is about 4%

compared to about 2% in the rural areas. The shares of other items are negligible. Between the household categories, there is no significant difference in the distribution. The distribution of value of assets over the main items of assets (land, building and others) is given in Statement 20 for urban areas of 21 major states.

3.3.7.3 It would be of interest to study the relative importance of different items of assets over the two decades ending with 2002. The percentage shares of different items in the total assets derived from the present survey data along with those obtained from the earlier surveys in 1971, 1981 and 1991 for the rural sector and in 1981 and 1991 for the urban sector (since NSS 26th round results for urban sector were not released) have been presented for all India in Statement 21. Land and building have remained the most important components of assets owned by rural as well as urban households. In the rural areas, the percentage of the value of land and building to the value of total assets varied in between 83 to 87 during 1971 to 1991. The corresponding range for land and building in the urban areas was 68 to 76 per cent during the period 1981 to 2002. The relative position of land or building or any other item of assets in the total value of assets did not change considerably during the period 1971 to 2002. The

Statement 17: Percentage distribution of urban households by household assets holdings as on 30.6.02

India	23.0	18.5	15.3	18.1	25.1	100.0

share of livestock and poultry in the total value of assets appears to have reduced in the rural areas during the two decades. In the urban, share of land in the total assets revealed an increasing trend during the two decades, while the share of household durable assets showed a somewhat declining trend.

Statement 18: Percentage share of different components of assets in the total value of assets for each occupational category of households

3.4 Household Indebtedness

3.4.1 Incidence of Indebtedness (IOI) and Average Amount of Debt (AOD)

Statement 22: Incidence of indebtedness (IOI) and average amount of debt per household (AOD) as on 30.6.02

occupational categories of the households	IOI (%)	AOD per household (Rs.)	all-India AOD per indebted household (Rs.)
(1)	(2)	(3)	(4)
rural			
cultivator	29.7	9261	31182
non cultivator	21.8	4991	22894
all	26.5	7539	28449
urban			
self employed	17.9	12134	67788
others	17.8	11577	65039
all	17.8	11771	66129

3.4.1.1 In the 59th round survey on Debt and Investment, a household was considered to be indebted if the household had any cash loan outstanding on 30.6.02. This report also deals with some of the basic estimates of the indebtedness of the households. It may be noted that like most of the NSS estimates, these are based on information collected through the interview method and hence, in fact, refer to "reported indebtedness". The percentage of the indebted households, representing incidence of indebtedness (IOI) and average amount of debt (AOD) per household as on 30.6.02 for the rural and urban areas of India are presented in Statement 22. The results of the survey show that the IOI was about 27% among the rural households and 18% among the urban households. The AOD per household is seen to be less in the rural sector than in the urban, the

values being Rs. 7,539 and Rs. 11,771, respectively. Compared to this, the AOD per indebted household was Rs. 28,449 and Rs. 66,129 in the rural and urban sectors, respectively.

3.4.1.2 IOI and AOD across Occupational Categories of Households: Indebtedness is found to be more widespread among the cultivator households than among their non-cultivator counterparts in the rural. At the all-India level, 30% and 22% of the cultivator and non-cultivator households, respectively, were indebted. Also, compared to the cultivator households, the AOD is observed to be much less among the non-cultivators. The AOD for cultivator households was found to be Rs. 9,260. The differences in IOI and AOD for the household categories were found to be insignificant in the urban.

Statement 23: Incidence of indebtedness (IOI) and average amount of debt per household (AOD) by household assets holding classes

assets class (000)	all-India

450 - 800	31.0	15090	22.5	19961	28.0	16772
800 & above	32.9	33414	21.4	40895	27.8	36712
all classes	26.5	7539	17.8	11771	24.1	8694

3.4.1.3 IOI and AOD across Assets Holding Class: The percentage of the indebted households (IOI) and average amount of debt (AOD) per household as on 30.6.02 for each assets holding class are presented in Statement 23 separately for the rural and the urban areas of India. Both IOI and AOD are

seen to have increased steadily with the increase of assets holdings. The AOD of a household belonging to the lowest assets holding class (less than Rs. 0.15 lakh) is about 1/23 that of a household in the top assets holding class (Rs. 8 lakh and above) in the rural sector. This ratio is nearly 1/28 in the case of the urban areas.

3.4.2 IOI and AOD across States

3.4.2.1 IOI and AOD in Rural Areas of States: The IOI and AOD for different occupational categories of rural households are presented in Statement 24 for the major states. The statement shows a wide variation in both IOI and AOD for the rural households, as on 30.6.02, over the occupational categories and over the states.

Statement 24: Incidence of indebtedness (IOI) and average debt per household (AOD) for different occupational categories as on 30.6.02

state	IOI (%)			AOD (Rs.)		
	cultivator	non-cultivator	all	cultivator	non-cultivator	all
	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	54.0	33.5	42.3	16154	6401	10590
Assam	6.7	8.9	7.5	641	647	643
Bihar	22.5	20.8	21.8	3336	2467	2992
Jharkhand	12.9	9.2	12.0	1021	1454	1124

Punjab	28.5	22.5	25.7	25211	6387	16502
Rajasthan	36.7	25.4	33.8	13261	8413	12031
Tamil Nadu	40.3	26.6	31.3	14823	6354	9304
Uttaranchal	3.9	10.0	5.5	693	2308	1113
Uttar Pradesh	24.1	21.4	23.4	5363	4149	5059
West Bengal	24.7	18.0	21.8	3820	2378	3194
India	29.7	21.8	26.5	9261	4991	7539

3.4.2.2 State-wise IOI: Among the states in rural India, in 2002, the highest IOI was noticed in Andhra Pradesh (42%), followed by Kerala (39%), Rajasthan (34%) and Tamil Nadu and Karnataka (each with 31%). On the other hand, states like Jammu & Kashmir (4%), Uttaranchal (6%) and Assam (8%) were found to report very low IOIs.

3.4.2.3 State-wise AOD: As regards the AOD, Kerala was found to top the list with cash loan of Rs. 19,663 per household followed by Punjab (Rs. 16,502), Haryana (Rs. 12,359) and Rajasthan (Rs. 12,031). On the other hand, the lower values for these averages were observed in many of the states like Assam (Rs. 643), Uttaranchal, Jharkhand and Jammu & Kashmir (each with around Rs. 1100).

Statement 25: Incidence of indebtedness (IOI) and average debt per household (AOD) by assets holding class

state	household assets holding (Rs. 000)											rural
	IOI (%)						AOD (Rs.)

Uttaranchal	5.7	15.5	2.9	4.5	4.5	5.5	1211	1437	324	635	2483	1113
Uttar Pradesh	20.2	28.0	23.3	21.0	22.3	23.4	2287	4360	3064	4283	10190	5059
West Bengal	14.5	21.5	25.7	24.5	30.3	21.8	904	1761	2692	4653	15123	3194
India	17.1	25.8	28.8	28.7	31.9	26.5	1850	3724	5463	8263	23493	7539

3.4.2.4 Occupational categories: Within the rural sector, indebtedness was found to be more prevalent among the cultivator households than among their non-cultivator counterparts in all the states except in Assam and Uttaranchal. Also, compared to the cultivator households, the AOD was observed to be much less among the non-cultivators except in Assam, Jharkhand and Uttaranchal where the AOD for non-cultivators marginally exceeded that for cultivators.

3.4.2.5 Assets Holding Class: The Statement 25 reveals that the trend in IOI over the assets holding classes that was observed at the all-India level, was not found in all the major states. The states that follow the all-India pattern are Andhra Pradesh, Gujarat, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Tamil Nadu and West Bengal. The rest of the major states showed a somewhat erratic pattern over the assets holding classes. The observations in respect of AOD follow the same line as for IOI.

3.4.2.6 IOI and AOD in Urban Areas of States: Statement 26 gives the IOI and AOD for different occupational categories of urban households in the major states as on 30.6.02.

Statement 26: Incidence of indebtedness (IOI) and average debt per household (AOD) for different occupational categories as on 30.6.02

states	IOI (%)			AOD (Rs.)		
	self-employed	others	all	self-employed	others	all
	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	30.8	29.3	29.8	21787	18928	19901
Assam	5.3	6.6	6.0	1156	2992	2126
Bihar	9.5	9.5	9.5	2051	3184	2616
Jharkhand	5.3	7.0	6.6	5081	4402	4587
Delhi	3.3	0.6	1.5	2784	705	1441
Gujarat	21.8	21.2	21.4	14856	16224	15715
Harayana	17.6	14.9	16.0	17712	9700	12929
Himachal Pradesh	11.6	9.5	10.1	29788	24339	25951
Jammu & Kashmir	4.6	5.4	5.0	1806	7084	4438
Karnataka	19.8	18.0	18.6	12546	9666	10544
Kerala	41.1	35.4	37.3	35349	25036	28446
Madhya Pradesh	14.9	19.2	17.7	8685	18494	15029
Chhattisgarh	17.2	11.8	13.2	11385	7897	8809
Maharashtra	15.2	15.6	15.5	19170	13614	15192
Orissa	19.0	19.2	19.2	14488	12852	13406
Punjab	11.6	14.3	13.1	12181	8791	10297
Rajasthan	17.1	16.1	16.5	10223	8478	9130
Tamil Nadu	30.0	23.5	25.5	14769	10672	11936
Uttaranchal	4.4	8.3	6.8	2653	5623	4484
Uttar Pradesh	14.1	12.0	13.0	4522	4044	4275
West Bengal	15.6	18.2	17.1	6197	9337	8071
India	17.9	17.8	17.8	12134	11577	11771

3.4.2.7 State-wise IOI: In the urban sector, the extent of indebtedness was found to be the highest in Kerala where 37% of the households were indebted during 2002. The other states where indebtedness was very high are Andhra Pradesh (30%), Tamil Nadu (26%) and Gujarat (21%). Delhi (2%) was at the bottom rung, being closely accompanied by Jammu & Kashmir (5%), Assam (6%), Jharkhand and Uttaranchal (each with 7%).

3.4.2.8 State-wise AOD: Among the major states, Kerala showed the highest value of AOD (Rs.28,446) in the urban sector. The other states in the rung were Himachal Pradesh (Rs. 25,951), Andhra Pradesh (Rs. 19,901) and Gujarat (Rs. 15,715). On the other side, Delhi, Assam and Bihar were at the bottom with average values of Rs. 1,441, Rs.2,126 and Rs. 2,616, respectively.

3.4.2.9 Occupational Categories: In the urban sector, wide variation was noticed among the states in the cases both of IOI and AOD. The values of IOI among the self-employed and that among the other

urban households are seen to be more or less of the same order in most of the states, except in Chhattisgarh, Himachal Pradesh, Madhya Pradesh and Tamil Nadu. In regard to AOD, Assam, Bihar, Jammu & Kashmir, Jharkhand, Madhya Pradesh and Uttaranchal are the states that reported higher averages for the other households, while in the remaining major states; the averages were higher for the self-employed households.

3.4.2.10 Assets Holding Class: It may be seen from Statement 27 that unlike the rural households, the urban households in only a few states followed the pattern in the incidence of indebtedness across the assets holding classes. The states that followed the distinct all-India pattern are Andhra Pradesh, Chhattisgarh, Maharashtra and to some extent Orissa. The rest of the states did not reveal any definite trend in IOI values in respect of assets holding class.

Statement 27: Incidence of indebtedness (IOI) and average debt per household (AOD) by assets holding classes

state	household assets holding (Rs. 000)											urban
	IOI (%)						AOD (Rs.)

3.4.3 Changes in Household Indebtedness

3.4.3.1 Rural Households: A comparison of the present survey results with those of the surveys in 1971, 1981 and 1991 is given in Statement 28. It may be noted in this context that in surveys of 1971

Statement 28: Incidence of indebtedness (IOI), average amount of debt per household (AOD) during 1971, 1981, 1991 and 2002

occupational categories of households	all-India							
	IOI (%)				AOD(Rs.)			
	1971	1981	1991	2002	1971	1981	1991	2002
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	Rural							
cultivator	46.1	22.3	25.9	29.7	605	803	2294	9261
non cultivator	34.3	12.4	18.5	21.8	223	205	1151	4991
all	42.8	20.0	23.4	26.5	500	661	1906	7539
	Urban							
self employed	-	16.9	19.9	17.9	-	1473	4434	12134
others	-	17.6	18.9	17.8	-	816	3198	11577
all	-	17.4	19.3	17.8	-	1030	3618	11771

and 1981, "other liabilities" were also included in the "debt" of a household, over and above cash loans taken by it. To that extent, the figures on the incidence and amount of indebtedness obtained from surveys in 1971 and 1981 are not strictly comparable with those of 1991 and 2002. The statement shows that IOI at the all-India level has somewhat increased

steadily since 1981 in the rural areas – from 20% in 1981 to 23% in 1991 and then, to 27% in 2002. This is true for both the categories of household in the rural sector. However the 2002 estimate is still far lower than the 1971 estimate of 43%. On the other hand, the increase in AOD during 1971 to 1981 appears to be negligible in true sense, but it increased at a faster rate over the period from 1981 to 1991 and then, accelerated further during 1991 to 2002 reaching Rs. 7,539 per household. Incidentally, for the non-cultivator households, the growth in AOD is seen to be negative between 1971 and 1981.

3.4.3.2 Changes in IOI in Rural Areas of States: The estimates of IOI obtained from the AIDIS-71, AIDIS-81, AIDIS-91 and AIDIS-02 are given in Statement 29 for the rural areas of the major states. The estimates show that the IOI increased steadily during the period 1981 to 2002 in states like Andhra Pradesh, Karnataka, Kerala, Maharashtra, Madhya Pradesh, Orissa, Punjab, Rajasthan, Tamil Nadu and Uttar Pradesh. The IOI dropped during the period 1991 to 2002 in Haryana, Himachal Pradesh, Jammu & Kashmir and West Bengal.

3.4.3.3 Urban Households: For urban households, the comparison is limited to the estimates obtained from the surveys in 1981, 1991 and 2002 since the survey results of NSS 26th round (1971) have not been published. The percentage of indebted households, at the all-India level, is found to have marginally increase from 17.4% in 1981 to 19.3% in 1991 and then, to have declined to 17.8% in 2002. This pattern of change in IOI over the years holds good for both the categories of households. The pace of increase in the value of AOD in the urban sector appears to be systematic during these periods.

3.4.3.4 Changes in IOI in urban areas of States: Statement 30 compares the estimates of percentage of indebted urban households obtained from AIDIS-81, AIDIS-91 and AIDIS-02. The pattern of inter-state variation of indebtedness in 2002 is seen to have remained almost the same as in 1991. Of the 21

major states, about 8 states maintained the same level of IOI during the period 1991 to 2002, and another 4 states showed increasing trends during the period 1981 to 2002.

3.5 Debt-asset Ratio

3.5.1 Debt-asset Ratio across Household Categories: At any point of time, the outstanding debt of a household is potentially a charge upon its assets - whether or not these are mortgaged or hypothecated

			all-India
occupational categories of the households	average asset holding (Rs.)	AOD (Rs.)	debt-asset ratio (%)
(1)	(2)	(3)	(4)
Rural			
cultivator	372632	9261	2.49
non cultivator	107230	4991	4.65
all	265606	7539	2.84
Urban			
self employed	554844	12134	2.19
others	339002	11577	3.42
all	417158	11771	2.82

to a person or an agency. For a given group of households, a question naturally arises – how was the debt outstanding for them related to their assets on any given date? A study of the 'debt-asset' ratio is likely to provide an answer to this query. The 'debt-asset' ratio is defined as the average amount of debt outstanding on a given date for a group of households expressed as a percentage of the average value of assets owned by them on the given date. Thus, this ratio reflects the burden of debt on any particular group of households on a given date. It may be seen from Statement 31 that as on 30.6.02, the 'debt-asset' ratio at the all-India level is found to be 2.82% for the urban areas and 2.84% for the rural areas. The same ratio is 4.65% for the non-cultivator households and 2.49% for the cultivator households in the rural sector. In the urban sector, the differences in the ratios for household occupational categories

are somewhat narrower or being 2.19% for self-employed households and 3.42% for other households.

3.5.2 Debt-asset Ratio across Asset Holding Classes: The 'debt-asset' ratio, as seen in Statement 32, decreased almost monotonically with the increase in assets. The ratio is seen to be 20.12% for the asset holding class 'less than Rs. 15000' and reduces to 2% for the assets holding class 'Rs. 8,00,000 and above' in the rural sector. It declines from 27.19% in the lowest class to 2.20% in the highest class in the

West Bengal	1.81	3.19	2.10	1.85	2.98	2.51
India	2.49	4.65	2.84	2.19	3.42	2.82

3.5.3.1 Debt-asset Ratio in Occupational Categories: Statement 33 presents the debt-asset ratio by household occupational categories for the rural and urban areas of the major states. As in the case of all India, the 'debt-asset' ratio was, in general, higher for the non-cultivator households than that for the cultivator households in the rural areas. In the urban areas, burden of debt as compared to asset is greater among the other households. Among the non-cultivator households, the 'debt-asset' ratio was the highest in Andhra Pradesh (9.63%) followed closely by Gujarat (7.71%), Maharashtra (6.47%) and Tamil Nadu (6.27%), and was lowest in Jammu & Kashmir (0.15%) followed by Assam (0.87%) and Uttaranchal (1.13%). In the urban areas, Andhra Pradesh picked up the highest ratio of 5.58% and was very close to Orissa (5.36%), and at the other end, Delhi had the lowest ratio among the other category of households.

3.5.3.2 Debt-asset Ratio in Assets Holding Classes: Statement 34 shows the 'debt-asset' ratio for different assets holding classes in the rural and urban areas of 20 major states. The "debt-asset" ratio in the rural areas of Assam, Chhattisgarh, Jammu & Kashmir, Jharkhand and Karnataka did not change with the increase in assets size. This is also observed in the urban areas of Delhi, Jammu & Kashmir, Madhya Pradesh, Orissa and Uttaranchal. For rest of the states, the ratio shows a decreasing trend with the increase in assets.

Statement 34: Debt-asset ratio (in %) of households for different assets holding classes as on 30.6.02

3.5.4 Changes in debt-asset ratio

3.5.4.1 Occupational Categories: Statement 35 shows the changes in debt-asset ratio during 1971, 1981, 1991 and 2002 by occupational category of households at the all-India level. In the rural sector, there has been a significant fall in the ratios between the periods 1971 and 1981. Thereafter, it remained steady till 1991 and then had a rise in all the categories of households. The urban ratios did not show changes during 1981 to 2002 except in the case of other category of households. The ratios for other category of households that was 2.44% in 1981, rose to 2.64% in 1991 and then ended with 3.42% in 2002.

3.5.4.2 Changes in Debt-asset Ratio in States: A state-wise analysis for this ratio (see

Statement 36) obtained from the four AIDISs reveals that in the rural areas of most states, it fell in the 80s. This fall between the periods 1971 and 1981 is found to be on the higher side for states like Andhra Pradesh (8.21% to 3.58%), Gujarat (7.21% to 2.37%), Karnataka (7.32% to 3.78%), Maharashtra (5.12% to 2.44%), Rajasthan (7.02% to 2.88%) and Tamil Nadu (10.18% to 5.18%). The ratio, since 1981, remained static in the rural areas of as many as 9 major states till 2002. Contrary to this, in the urban areas, the ratio did not seem to change between 1981 and 2002, except marginally in some states.

Statement 35: Debt-asset ratio of households during 1971, 1981, 1991 and 2002

Appendix B

Sample Design and Estimation Procedure

Appendix -B

Sample Design and Estimation Procedure

1 Sample Design

1.1 A stratified multi-stage sampling design for rural as well as urban areas was adopted for selection of the sample units for the 59th round survey. The first stage units (FSUs) were the census villages (panchayat wards for Kerala) for rural areas and the NSSO Urban Frame Survey (UFS) blocks for urban areas. The ultimate stage units (USUs) were the households for both rural and urban areas. Hamlet-groups/ sub-blocks constituted the intermediate stage whenever these were formed in the selected FSU.

1.2 Selection of the first-stage units: The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within an FSU.

1.2.1 Sampling frame for first stage units (FSUs): For rural areas, the list of villages as per population census 1991 constituted the sampling frame for selection of sample FSUs for most of the states. For the rural areas of Kerala, however, the list of panchayat wards was used as the sampling frame for selection of panchayat wards. For Nagaland, the list of villages located within 5 kilometers of a bus route constituted the sampling frame, whereas, the list of accessible villages constituted the sampling frame for Andaman & Nicobar Islands. For the urban areas, the latest UFS frame was used as the sampling frame for selection of FSUs. The Leh (Ladakh) and Kargil districts of Jammu & Kashmir were kept outside the survey coverage.

1.2.2 Stratification of first-stage units in rural areas: For formation of strata in the rural areas, village population as per census 1991 was considered. From the list of villages of each State/Union Territory (UT), initially, two special strata were formed at the State/UT level as stated below:

Stratum 1: all FSUs with population between 0 and 50;

Stratum 2: FSUs with population more than 15,000.

In a state/UT, special stratum 1 was formed whenever at least 50 such FSUs were found in a State/UT and special stratum 2 was formed if at least 4 such FSUs were found in a State/UT. Otherwise, such FSUs were merged with the general strata.

From FSUs other than those covered under special strata 1 and 2, general strata were formed and its numbering started from 3. Each district of a State/UT was normally treated as a separate stratum. However, if the census rural population of the district was greater than or equal to 2 million as per population census 1991 or 2.5 million as per population census 2001, the district was split into two or more strata by grouping contiguous tehsils. However, in Gujarat, some districts were not wholly included in an NSS region. In such cases, the part of the district falling in an NSS region constituted a separate stratum.

1.2.3 Stratification of first-stage units in urban areas: In the urban sector, strata were formed within each NSS region on the basis of size class of towns as per population census 2001. For stratification of towns by size class, provisional population of towns as per census 2001 has been used. The stratum numbers and their composition (within each region) are given below.

stratum number	size class of town
1	all towns with population less than 50,000
2	all towns with population 50,000 or more but less than 2 lakhs
3	all towns with population 2 lakhs or more but less than 10 lakhs
4, 5, 6,...	each city with population 10 lakhs or more

The stratum numbers remained as above even if, in some regions, some of the strata did not exist.

1.2.4 Allocation of FSUs among strata: A total of 10608 FSUs (6,784 villages and 3,824 UFS blocks) were allocated at the all-India level on the basis of investigator strength and this was allocated to the different States and UTs in proportion to provisional population as per census 2001 subject to the availability of investigator, ensuring more or less uniform workload. The State/UT level sample size was then allocated between the rural and urban areas in proportion to provisional population as per census 2001 with an weightage of 1.5 to urban areas subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. would not exceed the rural sample size. The FSUs allocated for rural and urban areas of each State/UT are given in Table A at the end of this chapter.

Within each of the rural and urban sectors of a State/UT, the respective sample size was allocated to the different strata in proportion to the provisional population of the stratum as per census 2001. Allocations at stratum level were adjusted to a multiple of 2 with a minimum sample size of 2. However, a multiple of 4 FSUs was allocated to a stratum wherever possible.

1.2.5 Selection of first stage units: FSUs were selected with probability proportional to size with replacement (PPSWR), size being the population as per population census 1991 in all the strata for rural sector except for stratum 1. In stratum 1 of the rural sector and in all the strata of the urban sector, selection was done using simple random sampling without replacement (SRSWOR). Samples were drawn in the form of two independent sub-samples both in rural and in urban sectors.

1.3 Selection of ultimate stage units within an FSU: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within an FSU.

1.3.1 Selection of hamlet-groups/sub-blocks: Large villages and blocks having an approximate present population of 1,200 or more were divided into a suitable number of hamlet-groups and sub-blocks, as given below:

approximate present population	no. of hamlet-groups/sub-blocks formed
--------------------------------	----------------------------------------

of the sample village/block	
less than 1200	1 @
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	
@ no hamlet-group/sub-block formed.	

For rural areas of Himachal Pradesh, Sikkim, Nagaland, and Poonch, Rajouri, Udhampur and Doda districts of Jammu and Kashmir, the number of hamlet-groups formed was as follows.

approximate present population of the sample village	no. of hamlet-groups formed
less than 600	1 @
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	
@ no hamlet-group/sub-block formation	

Hamlet-groups / sub-blocks were formed by more or less equalising populations. Two hamlet-groups / sub-blocks were selected from a large village or block by SRSWOR. Listing and selection of the households were done independently in the two selected hamlet-groups/sub-blocks so formed.

1.3.2 Stratification of households: All the households listed in a village/UFS block in case there was no hamlet group/ sub-block formation and all the households listed in a hamlet group/ sub-block in case of hamlet group/ sub-block formation were stratified into seven second stage strata (SSSs). Second stage strata in rural and urban sectors were formed as follows:

(a) Second stage strata in rural sector: The households of a sample village/ hamlet group were classified into seven second-stage strata for the All-India Debt and Investment Survey (AIDIS) on the joint consideration of "land possessed" and "indebtedness status" of the households. First, all the households of the sample village/ selected hamlet groups were divided into four second-stage strata used for Land Holding Survey (LHS SSSs) based on the area of land possessed by them. The composition of the households for the four LHS SSSs are as specified below:

LHS SSS number	households with
-------------------	-----------------

1	$L < 0.005$
2	$0.005 \leq L < X$
3	$X \leq L < Y$
4	$Y \leq L$

Where L is area of land in hectares possessed by the household and X and Y were determined at the state/UT level in the following ways:

From the data of NSS 48th round, the households having land area 0.005 hectare or more were considered. Two cut-off points, X and Y, were determined at State/UT level in such a way that 40% of these households possess land area less than X, 40% possess land area between X & Y and 20% possess land area greater than Y.

The seven second-stage strata for AIDIS were formed for rural sector with the composition of the households as follows:

AIDIS SSS number	composition of households
1	indebted households belonging to rural LHS SSS 1
2	non-indebted households belonging to rural LHS SSS 1
3	indebted households belonging to rural LHS SSS 2
4	non-indebted households belonging to rural LHS SSS 2
5	households indebted to institutional agencies with or without being indebted to non-institutional agencies and belonging to rural LHS SSSs 3 & 4
6	households indebted to non-institutional agencies only and belonging to rural LHS SSSs 3 & 4
7	non-indebted households belonging to rural LHS SSSs 3 & 4

For stratification of households at the listing stage, a household was considered to be indebted on the date of survey if the household had at least one cash loan with outstanding amount Rs. 300 or more. However, for the purpose of Debt & Investment survey, a household was considered as indebted if the household had any cash loan outstanding on 30.6.02 irrespective of its amount.

(b) Second-stage strata in urban sector: The households of a sample block/sub-block were classified into seven second-stage strata for AIDIS, considering the monthly per capita consumption expenditure (mpce) and indebtedness status of the households. For this, the households were first grouped in to four mpce classes as follows:

LHS SSS number	households with	
1	$mpce < A$	Three cut-off points, viz. A, B & C, at state/UT level were determined using the NSS 55 th round data in such a way that 30% of the households had MPCE less than A, 30% had MPCE more than or equal to A but less than B, 30% had MPCE more than or equal to B but less than C, and the rest 10% of the households had MPCE more than or equal to C.
2	$A \leq mpce < B$	
3	$B \leq mpce < C$	
4	$mpce \geq C$	

The seven second-stage strata for AIDIS were formed for the urban sector with the composition of the households as follows:

AIDIS SSS number	composition of households
1	indebted households belonging to MPCE class 1
2	non-indebted households belonging to MPCE class 1
3	indebted households belonging to MPCE class 2
4	non-indebted households belonging to MPCE class 2
5	households indebted to institutional agencies with or without being indebted to non-institutional agencies and belonging to MPCE classes 3 & 4
6	households indebted to non-institutional agencies only and belonging to MPCE classes 3 & 4
7	non-indebted households belonging to MPCE classes 3 & 4

1.3.3 Selection of households: 14 households were selected from each sample village/block. Two households were selected from each SSS in case there was no hamlet group/sub-block formation. In case of hamlet group/sub-block formation, one household was selected from each hamlet group/sub-block. The households were selected from each SSS by simple random sampling without replacement (SRSWOR). Each sample FSU was visited twice in the 59th round. Visit 1 and Visit 2 schedules were canvassed in the same set of sample households during the first and second visits respectively.

1.4 FSUs and SSUs allocated and surveyed: A total of 10,608 FSUs (6,784 villages and 3,824 UFS blocks) were allocated at the all-India level, out of which 6552 villages and 3757 blocks were surveyed. The survey covered 143285 households - 91192 in rural sector and 52093 in urban sector. The number of sample villages and blocks surveyed, and the number of sample households surveyed, for different state/u.t.'s and all-India are given in Table A at the end of this chapter.

2 ESTIMATION PROCEDURE

Procedure for obtaining estimates of aggregates, ratios, and their RSEs is briefly indicated below:

2.1 Notation:

s = subscript for stratum

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for FSU [village (panchayat ward) /block]

d = subscript for a hamlet-group/sub-block ($d = 1, 2$)

j = subscript for second stage stratum of an FSU /hg/sb

k = subscript for sample household under a particular second stage stratum within an FSU /hg/sb

D = total number of hamlet group/sub-block formed in the sample village (panchayat ward) /block

$D^* = 1$ if $D = 1$

$= D / 2$ for FSUs with $D > 1$

N = total number of FSUs in rural stratum 1 or in any urban stratum

Z = total size of a rural stratum other than stratum 1 (= sum of sizes for all the FSUs of a rural stratum other than stratum 1)

z = size of sample village used for selection.

n = number of sample villages / blocks surveyed including zero cases but excluding casualty for a particular sub-sample and stratum.

H = total number of households listed in a second-stage stratum of a hamlet-group/sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a hamlet-group/sub-block of sample FSU

x, y = observed values of characteristics x, y under estimation

\tilde{X}, \tilde{Y} = estimates of population totals X, Y for the characteristics x, y

Under the above symbols,

y_{smidjk} = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the s -th stratum;

However, for ease of understanding, a few symbols have been suppressed in the following paragraphs where they are obvious.

2.2 Estimation of aggregates for a particular sub-sample(m) and stratum(s) in rural sector:

For a SS:

(a) Estimation formula for stratum 1:

(i) For households selected in j -th second stage stratum:

$$\tilde{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{2j}} y_{i2jk} \right] : j = 1(1)7$$

(ii) For all selected households:

$$\tilde{Y} = \sum_{j=1}^7 \tilde{Y}_j$$

(b) Estimation formula for other strata:

(i) For households selected in j -th second stage stratum:

$$\tilde{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{Z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{2j}} y_{i2jk} \right] : j = 1(1)7$$

(ii) For all selected households:

$$\tilde{Y} = \sum_{j=1}^7 \tilde{Y}_j$$

2.3 Estimation of Aggregates for a particular sub-sample(m) and stratum(s) in urban sector:

For an SS: Estimation formula for a stratum:

(i) For households selected in j -th second stage stratum:

$$\tilde{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{2j}} y_{i2jk} \right] ; j = 1(1)7$$

(ii) For all selected households:

$$\tilde{Y} = \sum_{j=1}^7 \tilde{Y}_j$$

2.4 Overall estimates for aggregates: Overall estimate for aggregate for a stratum (\tilde{Y}_s) based on two sub-samples is obtained as:

$$\tilde{Y}_s = \frac{1}{2} \sum_{m=1}^2 \tilde{Y}_{sm}$$

2.5 Overall Estimate of aggregate at State/UT/all-India level: The overall estimate \tilde{Y} at the State/UT/all-India level is obtained by summing the stratum estimates \tilde{Y}_s over all strata belonging to the State/UT/all-India.

2.6 Estimates of ratios: Let \tilde{Y} and \tilde{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/UT/all-India level.

Then the combined ratio estimate (\tilde{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\tilde{R} = \frac{\tilde{Y}}{\tilde{X}}$$

2.7 Estimates of error:

The estimated variances of the above estimates will be as follows:

A) For aggregate \tilde{Y} :

$$\text{Vār}(\tilde{Y}) = \sum_s \text{Vār}(\tilde{Y}_s)$$

where $\text{Vār}(\tilde{Y}_s)$ are as given below.

a) For strata with PPSWR selection at first stage (i.e. for all rural strata except stratum 1):

$$\text{Vār}_{\text{ppswr}}(\tilde{Y}_s) = \sum_j \text{Vār}(\tilde{Y}_{sj})$$

$$\text{where } \text{Vār}_{\text{ppswr}}(\tilde{Y}_{sj}) = \frac{1}{n_{sj}(n_{sj} - 1)} \left[\sum_{i=1}^{n_{sj}} \frac{Z_s^2 \tilde{Y}_{sj}^2}{Z_{si}^2} - n_{sj} \tilde{Y}_{sj}^2 \right],$$

$$\tilde{Y}_{sj} = D_{si}^* \left[\frac{H_{i1j}}{h_{11j}} \sum_{k=1}^{h_{11j}} y_{i1jk} + \frac{H_{i2j}}{h_{12j}} \sum_{k=1}^{h_{12j}} y_{i2jk} \right]$$

b) For strata with SRSWOR selection at first stage (i.e. for rural stratum 1 and all urban strata):

$$\text{Var}_{\text{srswor}}(\tilde{Y}_s) = \frac{1}{4} (\tilde{Y}_{s1} - \tilde{Y}_{s2})^2 ,$$

where \tilde{Y}_{s1} and \tilde{Y}_{s2} are the estimates for sub-sample 1 and sub-sample 2, respectively, for stratum "s".

B) For ratio \tilde{R} :

$$\text{MSE}(\tilde{R}) = \frac{1}{(\tilde{X})^2} \left[\sum_s \text{MSE}_s(\tilde{R}) + \sum_{s'} \text{MSE}_{s'}(\tilde{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

a) For strata with PPSWR selection at first stage (i.e. for all rural strata except stratum 1):

$$\text{MSE}_s(\tilde{R}) = \frac{1}{n_s(n_s - 1)} \sum_{i=1}^{n_s} \left[\frac{Z_s}{Z_{si}} (\tilde{Y}_{si} - \tilde{R}\tilde{X}_{si}) - \frac{1}{n_s} \sum_{i=1}^{n_s} \frac{Z_s}{Z_{si}} (\tilde{Y}_{si} - \tilde{R}\tilde{X}_{si}) \right]^2$$

where

$$\tilde{Y}_{si} = \sum_j \tilde{Y}_{sij} , \quad \tilde{X}_{si} = \sum_j \tilde{X}_{sij} ,$$

$$\tilde{Y}_{sij} = D_{si}^* \left[\frac{H_{si1j}}{h_{si1j}} \sum_{k=1}^{h_{si1j}} y_{si1jk} + \frac{H_{si2j}}{h_{si2j}} \sum_{k=1}^{h_{si2j}} y_{si2jk} \right] ,$$

$$\tilde{X}_{sij} = D_{si}^* \left[\frac{H_{si1j}}{h_{si1j}} \sum_{k=1}^{h_{si1j}} x_{si1jk} + \frac{H_{si2j}}{h_{si2j}} \sum_{k=1}^{h_{si2j}} x_{si2jk} \right]$$

b) For strata with SRSWOR selection at first stage (i.e. for rural stratum 1 and all urban strata):

$$\text{MSE}_{s'}(\tilde{R}) = \frac{1}{4} \left[(\tilde{Y}_{s'1} - \tilde{Y}_{s'2})^2 + \tilde{R}^2 (\tilde{X}_{s'1} - \tilde{X}_{s'2})^2 - 2\tilde{R}(\tilde{Y}_{s'1} - \tilde{Y}_{s'2})(\tilde{X}_{s'1} - \tilde{X}_{s'2}) \right]$$

C) Estimates of RSE :

$$\text{RSE}(\tilde{Y}) = \frac{\sqrt{\text{Var}(\tilde{Y})}}{\tilde{Y}} \times 100$$

$$\text{RSE}(\tilde{R}) = \frac{\sqrt{\text{MSE}(\tilde{R})}}{\tilde{R}} \times 100$$

Table A: Sample villages and blocks allotted and surveyed and households surveyed

GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY

CENTRAL	
STATE	

*

FIFTY-NINTH ROUND : JANUARY TO DECEMBER 2003
HOUSEHOLD SCHEDULE 18.2: DEBT AND INVESTMENT

VISIT NUMBER cC1

[0] descriptive identification of sample household	
1. state/u.t.:	5. hamlet name:
2. district:	6. ward/inv. unit/block**:
3. tehsil/town* :	7. name of head of household:
4. village name:	8. name of informant:

[1] identification of sample household							
item no.	item	code			item no.	item	code
1.	sl. number of sample village/block				11.	FOD sub-region	
2.	round number	5		9	12.	sample hamlet-group/sub-block number	
					13.	second stage stratum	
3.	schedule number	1	8	2	14.	visit number	1
4.	sample (central-1, state-2)				15.	sample household number	
5.	sector (rural-1, urban-2)				16.	sl. no. of informant (as in col.1, block 4)	
6.	state-region				17.	response code	
7.	district				18.	survey code	
8.	stratum number				19.	reason for substitution of original household	
9.	sub-round						
10.	sub-sample						

CODES FOR BLOCK 1

item 17: response code : co-operative & capable-1, co-operative but not capable-2, busy-3, reluctant-4, others-9.

item 18: survey code : household surveyed: original -1, substitute -2, casualty -3.

item 19: reason for substitution of original household : informant busy-1, members away from home-2, informant non-co-operative-3, others-9.

* tick mark (✓) may be put in the appropriate place.

** delete whichever is not applicable.

[2] particulars of field operation												
srl. no.	item	investigator			assistant superintendent			superintendent				
(1)	(2)	(3)			(4)			(5)				
1.	i) name (block letters)											
	ii) code											
2.	date(s) of :	DD	MM	YY	DD	MM	YY	DD	MM	YY		
	(i) survey/inspection											
	(ii) receipt											
	(iii) scrutiny											
	(iv) despatch											
3.	no. of addl. sheets attached											
4.	total time taken to canvass schedule 18.2 (in minutes)											
5.	signature											

[19] remarks by investigator

[20] remarks by supervisory officer (s)

[3] household characteristics										
1.	household size					9.	Whether any household member has any Kisan credit card (yes-1, no-2)			
2.	principal industry (NIC-1998)	description:				10.	If yes in item 9, then amount (Rs.) received during last 365 days			
		code (5-digit)					household consumer expenditure (Rs.) during last 30 days (items 11 to 13)			
3.	principal occupation (NCO-1968)	description:				11.	out of purchase			
		code (3-digit)					out of home-grown, home produced stock, free collection and transfer receipts etc			
4.	household type (code)					12.	total (items 11+12)			
5.	religion (code)									
6.	social group (code)									
7.	whether operated any land for agricultural activities during last 365 days (yes-1, no-2)					14.	household monthly per capita consumer expenditure (Rs. 0.00) (item13 /item1)			
8.	if yes in item 7, area operated by the household (hectares 0.000)									

Codes for Block 3

<p>item 4: household type: for rural areas: self-employed in non-agriculture-1, agricultural labour-2, other labour-3, self-employed in agriculture-4, others-9.</p> <p>for urban areas: self-employed-1, regular wage/salary earning-2, casual labour-3, others-9.</p>	<p>item 5: religion: Hinduism-1, Islam-2, Christianity -3, Sikhism-4, Jainism-5, Buddhism-6, Zoroastrianism-7, others-9</p>	<p>item 6 : social group: scheduled tribe-1, scheduled caste-2, other backward class-3, others-9.</p>
