

Report No. 510(61/1.0/3)

Public Distribution System and Other Sources of Household Consumption, 2004-05

NSS 61st Round
(July 2004 - June 2005)

Volume - I

National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India

June 2007

Preface

The National Sample Survey Organisation (NSSO) conducts socio-economic surveys covering various subjects on regular basis. Subjects are selected keeping in view their importance. As part of the NSS 61st round during the period July 2004 – June 2005, the Household Consumer Expenditure survey was conducted on large sample basis and this was the seventh quinquennial survey on the subject.

The report is one of a series of seven reports to be brought out on the basis of the data collected through the survey. Reports already published include *Level and Pattern of Consumer Expenditure* (No.508), *Household Consumption of Various Goods and Services in India* (No.509), *Energy Sources of Indian Households for Cooking and Lighting* (No.511), *Perceived Adequacy of Food Consumption in Indian Households* (No.512) and *Nutritional Intake in India* (No.513). This report contains the information on access of the population to the public distribution system in India as shown by percentages of households possessing ration cards of different kinds among households of different social groups, occupational types and other socio-economic categories. For four commodities - rice, wheat/*atta*, sugar and kerosene, the extent of consumption from PDS during a 30-day reference period is presented in detail, with special attention to households holding *Antyodaya* or BPL ration cards. Proportions of households of different socio-economic categories benefiting from four food assistance schemes of the Government – Food for Work, *Annapoorna*, Integrated Child Development Scheme and Midday Meal – are also examined. In addition, for each item of food and fuel, the contribution of different sources of consumption such as purchase, home produce, free collection, etc., to total household consumption is presented. All estimates are provided separately for rural and urban sectors of each State and Union Territory.

Chapter One of the report serves as the introduction. Chapter Two explains the concepts and definitions used in the survey. Chapter Three gives the main findings of the survey. Detailed tables at the State/UT and all-India level are given in Appendix A, while the sample design and the estimation procedure are explained in Appendix B. A facsimile of the schedule used for data collection is given as Appendix C. The report has been divided into two volumes.

Tasks like development of sampling design and survey instruments, and preparation of the report, were undertaken by the Survey Design and Research Division of the NSSO. The field work was handled by the Field Operations Division and the data processing and table generation was taken up by the Data Processing Division. The Coordination and Publication Division was responsible for overall coordination of all activities of NSSO, including the data dissemination and release of the reports. The Chairman and Members of the then Governing Council of NSSO, along with the Chairman and Members of the Working Group set up for this round, provided the technical directions and guidance at every stage of the survey. I am grateful to all of them.

The report, I hope, will be useful to planners, policy makers and researchers. Comments and suggestions are most welcome.

New Delhi
June 2007

P.K. Ray
Director General & Chief Executive Officer (I/C)
National Sample Survey Organisation

Highlights

A sample of 79298 rural households and 45346 urban households spread over the entire country was surveyed in the Consumer Expenditure Survey of the 61st round of NSS (the seventh of the quinquennial series), carried out in 2004-05. Based on this data, this report analyses the public distribution system (PDS) and other sources of household consumption as also beneficiary households of four food assistance schemes of the Government of India, namely, Food for Work, Annapoorna, Integrated Child Development Scheme and Midday Meal Scheme.

HOLDING OF RATION CARDS BY HOUSEHOLDS

● Ration cards were held by 81% of rural households and 67% of urban households. Below Poverty Line (BPL) cards were held by 26.5% of rural households and 10.5% of urban households. Antyodaya card holders formed less than 3% of rural households and less than 1% of urban households.

● In Andhra Pradesh, the proportion of BPL-card-holding households (rural: 54%; urban: 27%) was more than double the national average. The proportion of BPL card holders was above 40% in rural areas of Karnataka and Orissa as well. In urban Kerala, nearly 20% of households had BPL cards.

● In rural areas BPL cards were held by 43% of “agricultural labour” households and 32% of “other labour” households.

● In rural India BPL cards were held by 40% of Scheduled Tribe (ST) households, 35% of Scheduled Caste (SC) households, about 25% of Other Backward Classes (OBC) households, and 17% of the remaining households. In urban areas, however, it was the Scheduled Castes which had the highest percentage (17%) of households holding BPL cards, while ST and OBC households had about 14% each.

● As many as 51% of rural households possessing less than 0.01 hectares of land had no ration card at all, while in all other size classes 77-86% households held a ration card of some type. In respect of ration cards meant for the poor, the class possessing “0.01-0.40 hectares” was the one with the highest proportion of cards for both BPL (32%) and Antyodaya (4%).

● Among the top 5% of rural population ranked by monthly per capita expenditure (MPCE), an estimated 11% of households held BPL ration cards. Among the next 5% of rural population, 14% of households held BPL cards, and among the next 10% of rural population, 18% of households held BPL ration cards.

CONSUMPTION OF RICE, WHEAT, SUGAR AND KEROSENE FROM PDS

● The major State where consumption of rice from PDS was most common was Tamil Nadu (rural: 79% households consuming from PDS; urban: 48%), followed by Andhra Pradesh (rural: 62%; urban: 31%), Karnataka (rural: 59%; urban: 21%) and Kerala (rural: 35%; urban: 23%). Even in Gujarat and Maharashtra, where rice is not the major cereal food, 32% and 28% households, respectively, consumed PDS rice. On the other hand, PDS rice was consumed by only a small proportion of households in West Bengal (rural: 13%; urban: 5%), Assam (rural: 9%; urban: 2%) and Bihar (rural: 1%; urban: 0.7%), though rice is the major cereal food in these States.

● PDS consumption of wheat/*atta* was most common in Karnataka (rural: 46%; urban: 15%), rural areas of Gujarat (29%) and Maharashtra (26%), and in Madhya Pradesh (rural: 20%; urban: 10%).

● As in case of rice, PDS consumption of sugar, too, was most prevalent in Tamil Nadu (rural: 65% households; urban: 64%), followed by Assam (rural: 40%; urban: 16%) and Andhra Pradesh (rural: 36%; urban: 15%). On the other hand, in both rural and urban areas, fewer than 1% households consumed PDS sugar in Punjab, Haryana, Bihar and Jharkhand, and fewer than 2% in Orissa and Uttar Pradesh. The all-India proportions of households were 16% for rural areas and 12% for urban.

● Over 55% of rural households used PDS kerosene in all major States except Punjab and Haryana. Use of PDS kerosene was most common in West Bengal for both rural areas (91%) and urban areas (60%).

● Among the four commodities, kerosene had a much larger share of quantity of consumption coming from PDS – 77% for rural and 57% for urban India. For rice the share of PDS in total quantity consumed was 13% for rural and 11% for urban; for wheat it was 7% for rural and 4% for urban, and for sugar, 9½% for rural and about 6½% for urban India.

● Households holding a BPL or Antyodaya ration card exhibited a much greater degree of dependence on PDS than the population as a whole. This was most marked in case of wheat, where, for both rural and urban areas, as much as 28% of quantity consumed by such households came from PDS compared to 7% for the rural population as a whole and 4% for the overall urban population. For rice and sugar, the percentage contribution of PDS purchases to total consumption (in quantity terms) for these households was double the percentage share of PDS in consumption of the general population in rural areas and three times the percentage share of PDS for the general population in urban areas.

BENEFITS FROM FOOD ASSISTANCE SCHEMES

● The Midday Meal scheme benefited children from an estimated 22.8% of rural households in 2004-05, the Integrated Child Development Scheme (ICDS) benefited 5.7% of rural households, the Food-for-Work Scheme, only 2.7%, and the Annapoorna scheme for the elderly, 0.9%. In urban India, while children from 8% of households benefited from the Midday Meal scheme, and the ICDS scheme benefited 1.8% households, only 0.2% urban households benefited from Annapoorna, and only 0.1% from Food for Work.

● Among household occupational types in rural India, the (mostly manual) labour households – “agricultural labour” and “other labour” – had the highest proportions of households benefiting from each of the four schemes. Similarly, in urban India, “casual labour” households had the highest proportions of beneficiary households from each of the four schemes.

● Among social groups, the Scheduled Tribes had the highest proportion of Food-for-Work beneficiary households in both rural and urban India, and also the highest proportion of ICDS beneficiaries.

● Rural households possessing more than 0.40 hectares of land had a higher representation among recipients of benefits from the schemes than households possessing 0.40 hectares of land or less. The class of households possessing 0.41-1.00 hectares of land had the highest proportions of Food-for-Work and Midday Meal beneficiary households among six classes of rural households formed on the basis of size of land possessed.

- In each of the top four classes among 12 classes of rural households formed on the basis of monthly per capita expenditure level (MPCE), 2-4% of households were ICDS beneficiaries.
- The Midday Meal scheme benefited over 10% of rural households in most State/UTs (between 18% and 33% in 12 major States).
- Among the major States, the highest proportions of (rural) Food for Work beneficiaries were found in Rajasthan (12%) and Orissa (8%).

CONSUMPTION FROM HOME PRODUCE

- As much as 62% of quantity of milk consumed in rural India came from home produce compared to 40% for wheat/*atta*, 30% for rice, and 11-18% for seven common pulse varieties. For eggs, 14% of consumption, and, for chicken, 13%, came from home-grown stock.
- Among common vegetables and fruits, home produce was most important in case of coconuts (37% of quantity consumed in rural India), reported by as many as 28% of rural households. For arum and pumpkin, about a quarter of rural consumption came from home-grown stock.

Chapter One

Introduction

1.0.1 This is a report on some aspects of household consumption in India based on a nationwide sample survey of the National Sample Survey Organisation.

1.0.2 The NSSO conducts regular consumer expenditure surveys as part of its “rounds”, each round normally of a year’s duration and covering more than one subject of study. The surveys are conducted through household interviews, using a random sample of households covering practically the entire geographical area of the country. The present report is based on data collected through the 61st round of NSS (July 2004-June 2005). It is the third report of the consumer expenditure survey of that round.

1.0.3 Nowadays every round of NSS includes a consumer expenditure survey (CES), giving rise to an annual series of consumption data. Every 5 years or so, a larger-than-usual-scale CES is conducted as the main enquiry of a round. This gives rise to a “quinquennial series” of CES’s. The sixth quinquennial CES was conducted in 1999-2000 in the 55th round of NSS and the 61st round CES is the seventh.

1.0.4 The household consumer expenditure schedule used for the survey, besides collecting information on quantity and value of household consumption during a specified reference period, also recorded some other household particulars. These included household characteristics such as household industry and occupation, social group, occupational type and land possessed, and particulars of each household member including age, sex and educational level. Among the questions asked for the household as a whole were: whether the household possessed a ration card and, if so, what kind (BPL/Antyodaya/other).

1.0.5 **Contents of the present report:** The present report covers a number of aspects of household consumption which can broadly be clubbed under the heading of “source of consumption”. The sources of consumption considered here are: (a) food assistance schemes of the Government such as Food for Work, Annapoorna, or Midday Meal; (b) purchase from Public Distribution System (PDS); (c) purchase from other sources; (d) home produce; (e) free collection, wages in kind, gifts, etc.

1.0.6 The report does not, however, give the break-up of consumption of any item by source in the above sense, except for the break-up of consumption of certain commodities into consumption from PDS and consumption from other sources. The report presents:

- (i) the estimated proportions of households which received any benefit during the past one year from four food assistance schemes: Food for Work, Annapoorna, Integrated Child Development Scheme, and Midday Meal;
- (ii) the estimated break-up of households (per 1000 households) by type of ration card possessed: Antyodaya, BPL, other card, none;
- (iii) for each item of consumption, the estimated proportions of households using different sources of consumption: purchase, home produce, free collection, gifts, etc.;
- (iv) for each item of consumption, the estimated proportion of quantity and value of consumption in rural areas coming from home produce;

- (v) for rice, wheat/*atta*, sugar and kerosene, the estimated average monthly consumption per household (both quantity and value) from PDS and from other sources, separately for households in different monthly per capita expenditure classes, and separately for households holding Antyodaya/BPL ration cards;
- (vi) for rice, wheat/*atta*, sugar and kerosene, the estimated proportions of households that made any consumption from PDS during the past 30 days.

1.0.7 All estimates are provided separately for rural and urban sectors of each State and Union Territory. Estimates of the types (i) and (ii) are, further, presented separately for different occupational types of households, different social groups, different monthly per capita expenditure classes, and, for rural areas, for households in different size classes of land possessed. Estimates of types (v) and (vi) are provided separately for households in different monthly per capita expenditure classes.

1.0.8 Appendix B gives details of the sample design and estimation procedure followed and Appendix C is a facsimile of the consumer expenditure schedule ("Schedule 1.0") that was canvassed in the surveyed households.

1.1 Some details of the survey

1.1.1 *Geographical coverage:* The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of a bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.1.2 *Population coverage:* The following rules were followed:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but the residential staff of these institutions were included. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence, was excluded. But persons residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were covered.
3. Foreign nationals were excluded, as well as their domestic servants, if by definition the latter belonged to the foreign national's household (see Chapter Two). A foreign national who had become an Indian citizen for all practical purposes was, however, covered.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF etc.) were kept outside the survey coverage. However, the civilian population residing in their neighbourhood, including the family quarters of service personnel, was covered.
5. Orphanages, rescue homes, ashrams and vagrant houses were outside the survey coverage. However, the persons staying in old age homes, the students staying in ashram/hostels and the residential staff (other than monks/nuns) of these ashrams were covered. Although orphans living in orphanages were excluded, the persons looking after them and staying there were covered.

1.1.3 *Sample size – first-stage units:* As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: a “State sample” was surveyed by State Government officials in addition to the “Central sample” surveyed by NSSO. For rural India, 8128 villages formed the Central sample for this round. Of these, 7999 villages were ultimately surveyed. In the urban sector, the allocation for the Central sample was 4660 blocks, of which 4602 were surveyed. This report is based on the estimates obtained from the Central sample alone.

Table P0: Number of villages/blocks allotted and surveyed for Schedule 1.0 and number of households and persons surveyed: Central sample

State/UT	no. of villages		no. of urban blocks		no. of sample households		no. of sample persons

*Note that as many as 98 out of 129 allotted villages that could not be surveyed belonged to the disturbed areas of Jammu and Kashmir.

1.1.4 Table P0 shows the numbers of villages and urban blocks allotted for survey and actually surveyed, the numbers of rural and urban sample households in which the consumer expenditure schedule, "Schedule 1.0", was canvassed, and the corresponding numbers of sample persons covered.

1.1.5 The household consumer expenditure schedule used for the survey collected information on quantity and value of household consumption with a reference period of last 30 days preceding the date of interview. To minimise recall errors, a very detailed item classification was, as usual, adopted to collect information. For items of clothing, footwear, and durable goods, data with a reference period of "last 365 days" was also collected. The indicator of overall level of living of the household called MPCE (monthly per capita expenditure) used in preparing this report is built up using "last 30 days" data for all goods and services.

1.1.6 The first report on consumer expenditure based on the 61st round survey¹ released information on (a) distribution of households and persons over MPCE classes for each State/UT and all-India (b) averages (State/UT and all-India) of MPCE (c) break-up of these average values by important heads of consumption. The second report² gave estimates of per capita consumption using a much more detailed item classification. All average values were provided not only for the population as a whole but for 12 different groups of population demarcated by MPCE level. All the data were provided separately for rural and urban sectors. The present report is the third in this series. Three more reports of the consumer expenditure survey have, however, already been released, dealing, respectively, with energy used by households for cooking and lighting, perceived adequacy of food consumption, and nutritional intake measured from reported quantities of consumption of food items.

² NSS Report No.509: *Household Consumption of Various Goods and Services in India, 2004-05*

Chapter Two

Concepts and Definitions

2.1 **Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus, a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

2.2 **Adult:** A person who has completed 15 years of age.

2.3 **Household size:** The size of a household is the total number of persons in the household.

2.4 **Household consumer expenditure:** The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. Household consumer expenditure is the total of the monetary values of consumption of various groups of items, namely (i) food, *pan* (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) all other goods and services, including durable articles.

2.4.1 For groups (i) and (ii), the total value of consumption is derived by aggregating the monetary value of goods actually consumed during the reference period. An item of clothing and footwear is considered as consumed at the moment when it is brought into maiden or first use. The consumption may be out of (a) purchases made in cash or credit during the reference period or earlier; (b) home-grown stock; (c) receipts in exchange of goods and services; (d) any other receipt like gift, charity, borrowing and (e) free collection. Home produce is evaluated at the ex farm or ex factory rate. For evaluating the consumption of the items of group (iii), a different approach is followed. In this case, the expenditure made during the reference period for the purchase or acquisition of goods and services is considered as consumption. However, for a few items of expenditure such as rent, telephone charges, consumer taxes and railway season tickets, expenditure during the month is recorded as the amount that was last paid divided by the number of months to which the payment related.

2.4.2 It is pertinent to mention here that the consumer expenditure of a household on food items relates to the actual consumption by the members of the household and also by the guests during ceremonies or otherwise. To avoid double counting, transfer payments like charity, loan advance, etc. made by the household are not considered as consumption for items of groups (i) and (ii), since transfer receipts of these items have been taken into account. However, the item "cooked meals" is an exception to this rule. Meals prepared in the

household kitchen and provided to the employees and/or others would automatically get included in domestic consumption of employer (payer) household. There is a practical difficulty of estimating the quantities and values of individual items used for preparing the meals served to employees or others. Thus, to avoid double counting, cooked meals received as perquisites from employer household or as gift or charity are not recorded in the recipient household. As a general principle, cooked meals purchased from the market for consumption of the members and for guests and employees will also be recorded in the purchaser household.

2.4.3 This procedure of recording cooked meals served to others in the expenditure of the serving households leads to bias-free estimates of average per capita consumption as well as total consumer expenditure. However, donors of free cooked meals are likely to be concentrated at the upper end of the per capita expenditure range and the corresponding recipients at the lower end of the same scale. Consequently, the derived nutrition intakes may get inflated for the rich (net donors) and understated for the poor (net recipients). This point has to be kept in mind while interpreting the NSS consumer expenditure data for studies relating to the nutritional status of households.

2.5 **Value of consumption:** Consumption out of purchase is evaluated at the purchase price. Consumption out of home produce is evaluated at ex farm or ex factory rate. Value of consumption out of gifts, loans, free collections, and goods received in exchange of goods and services is imputed at the rate of average local retail prices prevailing during the reference period.

2.6 **Monthly per capita consumer expenditure (MPCE):** For a household, this is the total consumer expenditure over all items divided by its size and expressed on a per month (30 days) basis. A person's MPCE is understood as that of the household to which he or she belongs.

2.7 **Percentile class of MPCE:** Some tables in Appendix A give estimates separately for households in twelve different ranges of MPCE, called MPCE classes. Because of the wider range of variation in MPCE in urban areas compared to rural areas, the MPCE class limits for the rural and urban tables have been chosen differently. The MPCE classes for the rural sector were, in fact, so formed that the first two and the last two classes each contained about 5% of the rural population according to the present (61st round) survey, and the remaining classes each contained about 10%. The classes for the urban sector were formed similarly. For this reason, the classes are sometimes referred to in Chapter Three as percentile classes of MPCE, and captions such as "0-5%", "20-30%", etc., are used in place of the class limits in rupees, which are used in the detailed tables of Appendix A. Thus the percentile class "10-20%" (or the "second decile group") for rural India (say), denotes the group of households in rural India whose MPCE in 2004-05 exceeded the 10th percentile of the all-India distribution of rural population by MPCE but did not exceed the 20th percentile. Alternatively, the percentile class "10-20%" for rural India can be described as the households of rural India excluding the households forming the bottom 10% of the rural population and the top 80%, ranked by MPCE.

2.8 **Reference periods:** The reference periods used for collection of consumption data for different groups of items are given in the table on the next page. Note that for the relatively infrequently purchased items in Category I, two estimates of aggregate or per capita consumption are possible, one based on "last 30 days" expenditure and the other on "last 365 days" expenditure. In this report, "last 30 days" data on all items, that is, items of both

categories, I and II, have been used to build up the estimate of household MPCE (see above) used for classification of households.

category	item of consumption	reference period
I	clothing, footwear, education, medical care (institutional) and durable goods	"last 30 days" and "last 365 days"
II	all other items (viz all food, pan, tobacco & intoxicants, fuel and light, miscellaneous goods and services including non-institutional medical care, rents and taxes)	last 30 days

2.9 Major States: This refers to the 17 States of India which had a population of 20 million or more according to the Census of 2001. The States are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. Together, these States accounted for nearly 94.7% of India's population in 2001.

2.9.1 Abbreviations for State/UT names: The following abbreviations have been used in some text tables (Chapter Three) for the names of the major States and other State/UTs:

major States

AP	Andhra Pradesh	JHK	Jharkhand	PUN	Punjab
ASM	Assam	KTK	Karnataka	RAJ	Rajasthan
BHR	Bihar	KRL	Kerala	TN	Tamil Nadu
CHH	Chhattisgarh	MP	Madhya Pradesh	UP	Uttar Pradesh
GUJ	Gujarat	MAH	Maharashtra	WB	West Bengal
HAR	Haryana	ORS	Orissa		

other State/UTs

ARU	Arunachal Pradesh	MIZ	Mizoram	CHN	Chandigarh
DEL	Delhi	NAG	Nagaland	DNH	Dadra & Nagar Haveli
HP	Himachal Pradesh	SIK	Sikkim	D&D	Daman & Diu
J&K	Jammu & Kashmir	TRP	Tripura	LAK	Lakshadweep
MAN	Manipur	UTL	Uttaranchal	PON	Pondicherry
MEG	Meghalaya	A&N	Andaman & Nicobar Islands		

2.10 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are self-employed in household enterprises. The essential feature of the self-employed in comparison with those who earn their living by hiring out their labour is that they enjoy *autonomy* (i.e., regarding how, where and when to produce) and *economic independence*. They receive combined remuneration for their labour and enterprise given by surplus of revenues from sales over purchased inputs used in production. In other words, their remuneration is determined by sales of the goods or services which they produce.

2.10.1 Self-employed persons include:

- (i) **own-account workers:** They are the self-employed who operate their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, run their enterprise *without hiring any labour*. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- (ii) **employers:** These are self-employed persons who work on their own account or with one or a few partners and by and large run their enterprise *by hiring labour*.
- (iii) **helpers in household enterprise:** Helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full- or part-time and do not receive any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist a person living in the same household in running the household enterprise.

2.10.2 There is a category of workers who work at a place of their choice which is outside the establishment that employs them or buys their product. Different expressions like “home workers”, “home based workers” and “outworkers” are synonymously used for such workers. For the purpose of this survey, all such workers have been defined as “home workers” and categorised as “self-employed”. The “home workers” have *some degree of autonomy* and *economic independence* in carrying out the work, and their work is not directly supervised as is the case for the *employees*. Like the other self-employed, these workers have to meet certain costs, like actual or imputed rent on the buildings in which they work, costs incurred for heating, lighting and power, storage or transportation, etc., thereby indicating that they have some tangible or intangible means of production. It may be noted that *employees* are not required to provide such inputs for production.

2.11 **Regular wage/salaried employee:** Persons working in others’ farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are termed regular salaried/wage employees. The category not only includes persons getting time-wage but also persons receiving piece-wage or salary and paid apprentices, both full-time and part-time.

2.12 **Casual (wage) labour:** A person engaged in others’ farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual (wage) labourer.

2.13 **Household type:** The household type based on the means of livelihood of a household is decided on the basis of the sources of the household’s income during the 365 days preceding the date of survey. For this purpose, only the household’s income from economic activities is considered; the incomes of servants and paying guests is not taken into account.

2.13.1 For **urban** areas, the household types are:

self-employed	casual labour
regular wage/salary earning	others

Different urban household types correspond to four sources of household income. An urban household is assigned the type corresponding to the major source of its income from economic activities during the last 365 days. A household which does not have any income from economic activities is assigned the type “others”.

2.13.2 For **rural** areas, the household is assigned the appropriate type from the following five, according to the procedure explained below:

self-employed in non-agriculture agricultural labour other labour	self-employed in agriculture others
---	--

2.13.2.1 For a rural household, if a single source (among the five sources of income listed in preceding paragraph) contributes 50% or more of the household's income from economic activities during the last 365 days, it is assigned the type corresponding to that source.

2.13.2.2 For a household to be classified as "agricultural labour" or "self-employed in agriculture" its income from that source must be 50% or more of its total income. If there is no such source yielding 50% or more of the household's total income, it is assigned one of the remaining three types according to the following procedure.

2.13.2.3 To be classified as "self-employed in non-agriculture", the household's income from that source must be greater than its income from rural labour (all wage-paid manual labour) as well as that from all other economic activities put together (a three-way division is considered here).

2.13.2.4 A household not qualifying for the types "agricultural labour", "self-employed in agriculture" or "self-employed in non-agriculture" according to the criteria stated above is classified as "other labour" if its income from rural labour (all wage-paid manual labour) is greater than that from self-employment as well as that from other economic activities (again a three-way division). All other households are assigned the type "others".

2.14 **Social group:** Four social groups are considered:

scheduled tribe scheduled caste	other backward class others
------------------------------------	--------------------------------

In case different members of a household belong to different social groups, the group to which the head of the household belongs is considered as the 'social group' of the household.

2.15 **Land possessed:** The total area of land possessed by the household is worked out as 'land owned' + 'land leased-in' + 'neither owned nor leased-in (but otherwise possessed)' - 'leased-out'. Note that

2.15.1 A piece of land is considered 'owned by the household' if permanent heritable possession with or without the right to transfer the title is vested in a member or members of the household. Land held in owner-like possession under long-term lease or assignment is also considered as land owned. Thus, in determining the ownership of a plot of land, the following basic concepts are involved:

2.15.2 Land owned by the household is land on which the household has the right of permanent heritable possession with or without the right to transfer the title e.g., Pattadars, Bhumidars, Jenmons, Bhumiswamis, Rayat, Sithibans etc. A plot of land may be leased out to others by the owner without losing the right of permanent heritable possession.

2.15.3 Land held under special conditions such as the holder not possessing the title of ownership but the right for long-term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long-term lease for 30 years or more) is considered as being held under owner-like possession. In the States where land reform legislation has provided for full proprietorship to erstwhile tenants, they are considered as having owner-like possession, even if they have not paid the full compensation.

2.15.4 Sometimes a plot may be possessed by a tribal in accordance with traditional tribal rights from local chieftains or village/district council. Again a plot may be occupied by a tenant for which the right of ownership vests in the community. In both the cases the tribal or other individual (tenant) will be taken as owner; for in all such cases, the holder has owner-like possession of the land in question.

2.15.5 Land leased out is defined as land given to others on rent or free by owner of the land without surrendering the right of permanent heritable title. Land leased in is defined as land taken by a household on rent or free without any right of permanent or heritable possession. The lease contract may be written or oral.

2.15.6 Land neither owned nor leased in (but otherwise possessed) is understood to mean all public/institutional land possessed by the household without title of ownership or occupancy right. The possession is without the consent of the owner. Private land (i.e. land owned by the household sector) possessed by the household without title of ownership and occupancy right is *not* included in this category. All private land encroached upon by the household is treated as leased-in land.

2.15.7 For owners found to be living away from their family members who are in possession of the land, the land is treated as leased out by the owner's household to his/her family members' household.

2.15.8 It may be noted that land possessed does not include area of land possessed by the servants/paying guests who are considered as normal members of the household. However, if land is owned/cultivated jointly by two or more households, then land is apportioned suitably in recording land possessed by the surveyed household.

2.16 **PDS:** This stands for Public Distribution System, which is defined as the distribution of some essential commodities by the government *at subsidised rates* through ration shops, fair price shops and control shops. These shops may be owned by the government, local government, a government undertaking, the proprietor of a private firm, co-operatives or private persons (individually or jointly) or other bodies like club, trust, etc. For kerosene, "PDS" also includes kerosene depots selling kerosene *at controlled prices*. "Super Bazaars" and co-operative stores are not generally included in "public distribution system". However, when these also sell rationed commodities at controlled prices against ration cards, they are taken as ration shops for particular commodities. (Presentation of ration card may not, however, be obligatory for some controlled price commodities like kerosene, coal, etc.) Consumption from PDS is considered to occur irrespective of whether the household uses its own ration card or that of some other household. Purchase from PDS shops at prices higher than the PDS prices is also considered as purchase from PDS as long as the price paid is perceptibly lower than the market price. **(This is a departure from the practice followed in earlier rounds.)** To sum up, to qualify as a PDS purchase, the purchase must be against ration card wherever the ration card system exists for supply of controlled price

commodities, and must be made at *a price perceptibly lower than the market price* even if higher than the controlled price.

2.17 Antyodaya: The scheme was launched by the Prime Minister on 25th December 2001. Under the scheme, the 1 crore poorest families among the [B]elow [P]overty [L]ine (BPL) families covered under the Targeted Public Distribution System are identified and 25 kg of foodgrain are made available to each eligible family at a highly subsidized rate of Rs. 2 per kg for wheat and Rs. 3 per kg for rice.

2.18 Food for Work: The Food for Work Programme was started in January 2000-01 as part of the Employment Assurance Scheme (EAS) in eight drought-affected States, viz., Chhattisgarh, Gujarat, Himachal Pradesh, Madhya Pradesh, Maharashtra, Orissa, Rajasthan, and Uttaranchal. The Food for Work Programme (FWP) was later expanded to form a part of any wage employment scheme of the Central or State Governments being implemented in the notified districts during periods of natural calamities, such as drought, flood, cyclone or earthquake. The Government of India makes available an appropriate quantity of foodgrains to each of the affected States. Foodgrains are supplied to the States as an additional aid free of cost. The cost is borne by the Government of India with a view to enabling the State Governments to provide adequate wage employment opportunities to the needy rural poor. The eligibility criteria for employment are relaxed so as to include both BPL and APL (Above Poverty Line) families. The States may make payment of wages partly in kind (up to 5 kg of foodgrains per man-day) and partly in cash. The State Governments are free to calculate the cost of foodgrains paid in wages, at either BPL rates, or APL rates, or any rate between these two rates. The workers are paid the balance wages in cash, so that they are assured of the notified minimum wages. Supply of foodgrains is made to the workers preferably at the worksite. It is stipulated that the payment of wages, cash as well as foodgrains, must be made weekly. Since the Food for Work Programme is meant for providing wage employment in the natural-calamity-affected States, preference is given to labour-intensive works, particularly those which would help in drought-proofing such as moisture conservation works, watershed development works, water harvesting, digging up and de-silting of village ponds/tanks and water courses, construction of rural link roads (*katcha* roads), etc. As far as possible, the works to be taken up are intended to result in durable assets.

2.19 Annapoorna: The Annapoorna Scheme was launched with effect from 1st April 2000. It aims at providing food security to meet the requirement of those senior citizens who, though eligible, have remained uncovered under the National Old Age Pension Scheme (NOAPS). The scheme is targeted to cover 20% (13.762 lakh) of persons eligible to receive pension under NOAPS. The Central assistance under the Annapoorna Scheme is, thus, provided to the beneficiaries on fulfilling the following criteria:

- The age of the applicant (male or female) should be 65 years or above.
- The applicant must be a destitute in the sense of having little or no regular means of subsistence from his/her own sources of income or through financial support from family members or other sources. In order to determine destitution, the criteria, if any, in force in the States/UTs are to be followed.
- The applicant should not be in receipt of pension under the NOAPS or State Pension Scheme.

The beneficiaries are given 10 kg of foodgrains per month free of cost.

2.20 Integrated Child Development Services (ICDS) Scheme: The Integrated Child Development Services (ICDS) Scheme, launched in 1975, is a nationwide programme for the overall development of children below 6 years and of the expectant and nursing mothers. Thus, the scheme aims at improving the nutritional and health status of vulnerable groups including pre-school children, pregnant women and nursing mothers through providing a package of services including supplementary nutrition, pre-school education, immunization, health check-up, referral services and nutrition and health education. In addition, the Scheme envisages effective convergence of inter-sectoral services in the *anganwadi* centres. The Scheme targets the most vulnerable groups of population including children up to 6 years of age, pregnant women and nursing mothers belonging to the poorest of the poor families and living in disadvantaged areas, including backward rural areas, tribal areas and urban slums. The identification of beneficiaries is done through surveying the community and identifying the families living below the poverty line.

2.20.1 The objectives of the scheme are:-

- to improve the nutritional and health status of pre-school children in the age-group of 0-6 years;
- to lay the foundation of proper psychological development of the child;
- to reduce the incidence of mortality, morbidity, malnutrition and school drop-outs;
- to achieve effective coordination of policy and implementation amongst the various departments to promote child development; and

to enhance the capability of the mother to look after the normal health and nutritional needs of the child through proper nutrition and health education.

2.21 Midday Meal: A large number children between the ages of 5 and 14 are victims of malnutrition, associated with food shortages, population expansion, lack of suitable food substitutes, poverty, ignorance, traditional beliefs and customs. The midday meal scheme was launched to lower the widespread incidence of malnutrition, primarily among children of poor families, and to increase their access to education. The scheme was aimed at boosting primary school attendance, by allowing children of parents living below subsistence levels to attain basic literacy levels instead of being pushed into the workforce at an early age.

Chapter Three

Summary of Findings

3.0.1 The results of the survey are discussed in this chapter in the following order:

- o Possession of ration cards of different types;
- o Break-up of consumption of rice, wheat/atta, sugar and kerosene into consumption from PDS and consumption from other sources, with special attention to households holding ration cards meant for the poor; proportions of households consuming these commodities from PDS and from any source;
- o Proportions of households of different socio-economic categories benefiting from four schemes of the Government (Food for Work, Annapoorna, ICDS and Midday Meal) aimed at providing food assistance to the economically disadvantaged;
- o Consumption from home-grown stock in rural areas.

3.1 Possession of ration card

3.1.0.1 Surveyed households were asked whether they possessed any ration card, and, if so, of what kind: the *Antyodaya* ration card meant for the ultra-poor, the BPL card for Below Poverty Line households, or a card belonging to none of these types. The responses, as tabulated for the major States, are shown in Table P1 below.

Table P1: Percentage distribution of households by ration card type: major States

2.9	26.5	51.8	18.7	INDIA	0.8	10.5	55.6	33.1

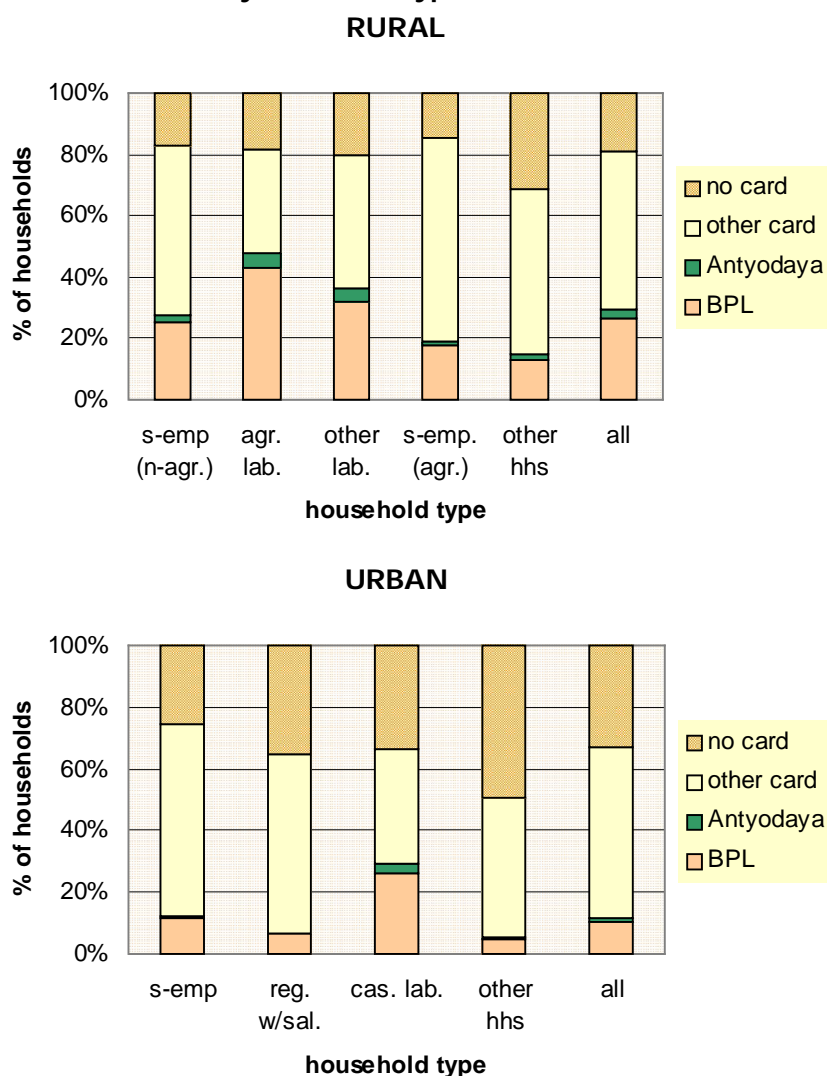

3.1.0.2 At the all-India level 81% of rural households and 67% of urban households held ration cards. BPL cards were held by 26.5% of rural households and 10.5% of urban households. Antyodaya card holders formed less than 3% of rural households and less than 1% of urban households.

3.1.0.3 For both sectors, Andhra Pradesh was the only major State where the proportion of BPL-card-holding households (rural: 54%; urban: 27%) was more than double the national average. The proportion of BPL card holders was above 40% in rural areas of Karnataka and Orissa as well. In these three States, BPL card holders were more common in rural areas than holders of “other cards”. In urban Kerala, nearly 20% of households had BPL cards. In urban Punjab, Rajasthan, Assam and Bihar, on the other hand, the proportion was less than 5%.

3.1.1 Ration card and household type

3.1.1.1 In rural areas 80% or more households of all household types except “other households” held ration cards (Figure 2). BPL cards were held by 43% of agricultural labour households and 32% of other labour households. 5% of agricultural labour households and about 4% of other labour households held Antyodaya cards. Both BPL and Antyodaya cards were reported much less frequently among non-labour than among labour households.

Fig 1
Percentage distribution of households of different occupational types
by ration card type, 2004-05

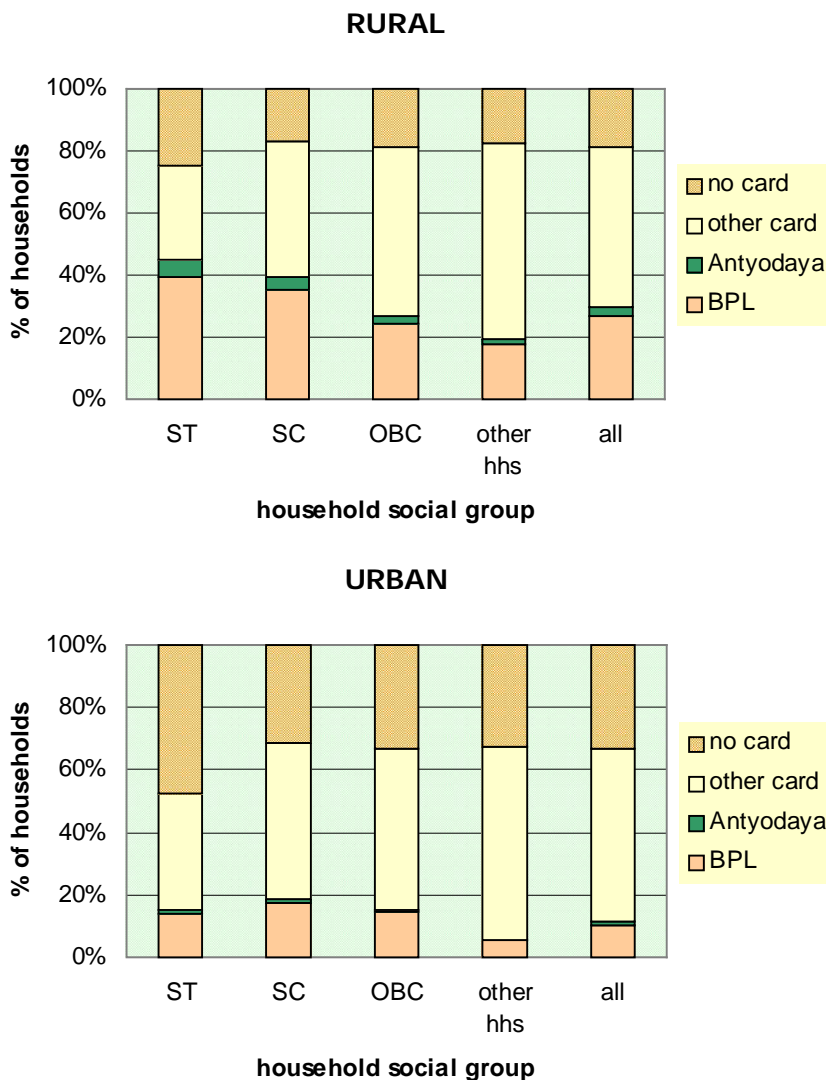

3.1.1.2 Results at State/UT level are presented in Table 2 (R&U) of Appendix A.

3.1.1.3 In urban areas 26% of casual labour households had BPL cards and 3% had Antyodaya cards. The percentage of households holding any kind of ration card was, incidentally, highest among self-employed households, about 11% of which held BPL cards. Among “other households”, only 51% possessed a ration card.

3.1.2 Ration card and household social group

3.1.2.1 In rural areas (see Figure 2) the percentage of households having Antyodaya cards was 5% for Scheduled Tribes (ST), about 4½% for Scheduled Castes (SC), and 2% for the other groups – Other Backward Classes (OBC), and the rest. BPL cards were held by 40% of ST households, 35% for Scheduled Castes (SC), about 25% of OBC households, and 17% of other households. In urban areas, however, it was the Scheduled Castes which had the highest percentage (17%) of households holding BPL cards, while ST and OBC households had about 14% each. In urban India the ST and SC groups had more than 1% of households with Antyodaya cards, while the other groups had less than 1%. (For State-level results, see Table 3 of Appendix A.)

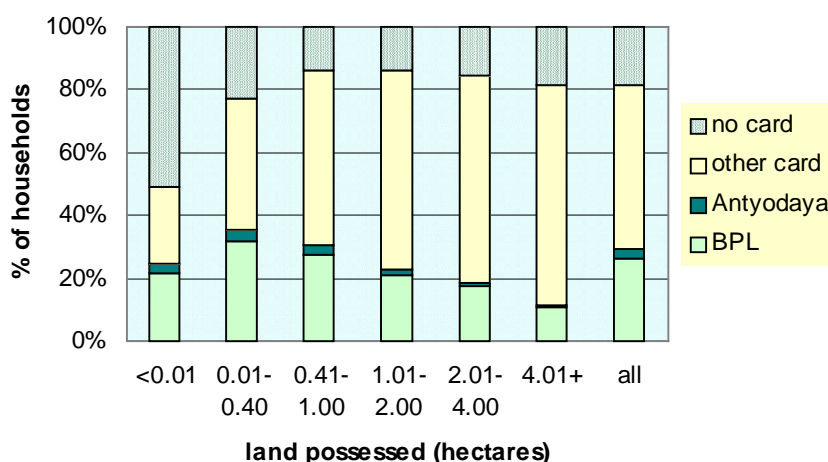

Fig 2
Percentage distribution of households of different social groups by ration card type, 2004-05

3.1.3 Ration card and household land possessed (rural)

3.1.3.1 Figure 3 shows percentage distribution of households in different size classes of land possessed by ration card type. The salient fact revealed by Figure 3 is that 51% of households in the lowest size class "<0.01 hectares" had no ration card at all, while in all other size classes 77-86% households had a ration card of some kind. The highest proportion of households with ration cards was 86%, seen in the classes "0.41-1.00 hectares" and "1.01-2.00 hectares". In respect of ration cards meant for the poor, the class "0.01-0.40 hectares" was the class of households with the highest proportion of cards for both BPL (32%) and Antyodaya (4%). It was followed by the class "0.41-1.00 hectares" (BPL, about 28%, Antyodaya, 3%). The bottom class "<0.01 hectares" had 22% of its members holding BPL cards, but this was smaller than the overall proportion of BPL card holders taking all classes together (26.5%). Likewise, Antyodaya cards were held by 2.7% of households in the bottom class, compared to 2.9% for all households. Results for States/UTs are shown in Table 4R of Appendix A.

Fig 3
Percentage distribution of households in different size classes of land possessed by ration card type, 2004-05
RURAL

3.1.4 Ration card and household monthly per capita expenditure (MPCE)

3.1.4.1 In Figure 4, which shows percentages of households in different MPCE classes holding each type of ration card, twelve MPCE classes are used for both sectors – rural and urban. The bottom two and top two MPCE classes each contain about 5% of the population of rural/urban India, while the remaining classes each contain about 10% of the population.

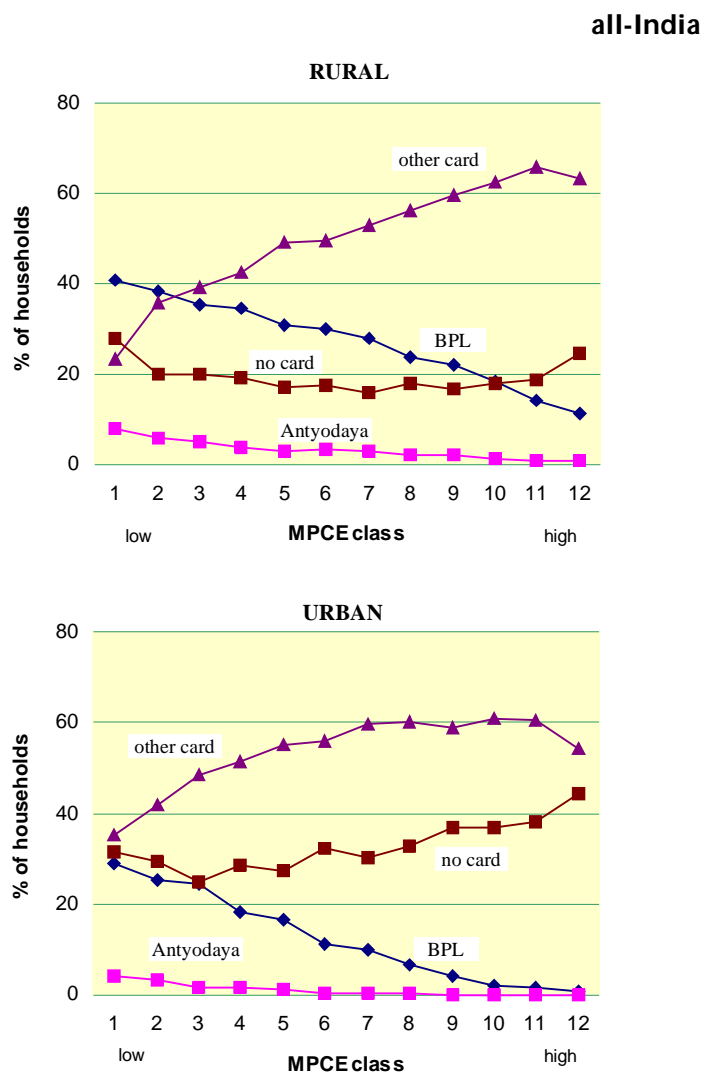

3.1.4.2 In rural India the percentage of households holding BPL cards declines gradually from 41% in the bottom MPCE class (numbered 1) to 11% in the top class (numbered 12). Interestingly, even in the top three MPCE classes, representing MPCE ranges of "Rs.690-890", "Rs.890-1155" and "Rs.1155 or more", 18%, 14% and 11% households respectively were found to hold BPL cards.³ Antyodaya card holders, too, are found in rural India in all the MPCE classes, though in diminishing numbers as MPCE increases. About 8% Antyodaya

³ It should be mentioned here that the MPCE of a household is based on its consumption expenditure during the last 30 days. A poor household that bought a durable good during the 30 days prior to the date of survey might conceivably be placed in a higher MPCE class than the class in which its usual MPCE lies.

card holders were found in the bottom MPCE class, about 6% in the next class, and so on, with the top two classes having about 1% each. The percentage of rural households with “other” ration cards increases from 23% in the bottom MPCE class to over 60% in the top three classes. The percentage of households with no ration card is 28% in the lowest class and 24.5% in the highest, and is 20% or less in all other classes.

3.1.4.3 In urban India the percentage of BPL card holders declines from 29% in the lowest MPCE class to about 1% in the highest. The lowest class had 4% Antyodaya card holders and no class from the sixth upwards had more than 0.5%. The percentage of households with “other” cards increases from 35% in the lowest class to a plateau of 60-61% which it never crosses. In each of the top four MPCE classes, 37% or more households had no ration card.

Fig 4
Percentages of ration card holding households in different MPCE classes by ration card type, 2004-05

3.1.4.4 Results at State/UT level are presented in Tables 5R and 5U of Appendix A.

3.2 Use of PDS in case of four selected commodities: rice, wheat/*atta*, sugar, kerosene

3.2.0.1 For four commodities – rice, wheat/*atta*, sugar and kerosene – which are available to households in India through the Public Distribution System as well as in the open market, Table 1 of Appendix A gives, for households in each MPCE class in each State/UT, average quantity and value of consumption per household from the public distribution system (PDS) and from other sources. Similar figures of average consumption from PDS and other sources are presented in the same table for Antyodaya or BPL card holding households. Average consumption per household is calculated taking all households of the specific cardholder category (or all categories) in the denominator. Estimated proportions of households consuming each commodity from PDS, from other sources, and from any source, are also shown alongside.

3.2.1 Rice, wheat/*atta*, sugar, kerosene: Percentages of households using PDS

3.2.1.1 For rice and wheat/*atta*, Table P2 shows the percentages of households in each sector of the 17 major States which reported consumption (a) from PDS (b) from any source. Table P3 does the same for sugar and kerosene.

Table P2: Rice and wheat/*atta*: Percentages of households reporting consumption during a 30-day period (in 2004-05) from PDS and from any source: major States

State	percentage of hhs reporting consumption during a 30-day period

all-India	24.4	13.1	92	92	11.0	5.8	72	83

3.2.1.2 The major State where consumption of rice from PDS was most common was undoubtedly Tamil Nadu (rural: 79% households; urban: 48%), followed by Andhra Pradesh (rural: 62%; urban: 31%), Karnataka (rural: 59%; urban: 21%) and Kerala (rural: 35%; urban:

23%). Even in Gujarat and Maharashtra, where rice is not the major cereal food, 32% and 28% rural households, respectively, consumed PDS rice. On the other hand, PDS rice was consumed by only a small minority of households in West Bengal (rural: 13%; urban: 5%), Assam (rural: 9%; urban: 2%) and Bihar (rural: 1%; urban: 0.7%), though rice is the major cereal food in these States.

3.2.1.3 PDS consumption of wheat was most common in Karnataka (rural: 46%; urban: 15%), rural areas of Gujarat (29%) and Maharashtra (26%), and in Madhya Pradesh (rural: 20%; urban: 10%). It was also relatively common in urban areas of Kerala and Tamil Nadu. Fewer than 1% households consumed PDS wheat in Assam, Punjab, Andhra Pradesh and Orissa, and fewer than 2% in Bihar.

Table P3: Sugar and kerosene: Percentages of households reporting consumption during a 30-day period (in 2004-05) from PDS and from any source: major States

State	percentage of hhs reporting consumption during a 30-day period

Orissa	1.6	1.2	85	93	76	35	98	73
Punjab	0.1	0.3	99	95	15	5	28	21
Rajasthan	2.7	0.1	99	97	84	35	91	42
Tamil Nadu	64.8	64.1	75	87	79	39	85	49
Uttar Pradesh	1.6	1.3	96	97	84	47	98	66
West Bengal	15.7	8.6	96	92	91	60	99	77
all-India	15.9	11.5	92	93	73	33	90	51

3.2.1.4 Like rice, PDS consumption of sugar, too, was most common in Tamil Nadu (rural: 65% households; urban: 64%), followed by Assam (rural: 40%; urban: 16%) and Andhra Pradesh (rural: 36%; urban: 15%). On the other hand, in both rural and urban areas, fewer than 1% households consumed PDS sugar in Punjab, Haryana, Bihar and Jharkhand, and fewer than 2% in Orissa and Uttar Pradesh. The all-India proportions of households were 16% for rural areas and 12% for urban. (See Table P3.)

3.2.1.5 Over 55% of rural households used PDS kerosene in all major States except Punjab and Haryana, where the majority of households (slightly less than a majority in rural Haryana) did not use kerosene from any source. Use of PDS kerosene was most common in

West Bengal for both rural areas (91%) and urban areas (60%). But dependence on PDS kerosene appeared to be higher in Kerala and Rajasthan, where fewer than 10% households purchased kerosene from the open market (see col.11 of Table 1R/1U of Appendix A, pp.A-115, A-120, A-133 & A-138).

3.2.2 Rice, wheat/*atta*, sugar, kerosene: Percentage of consumption (quantity) coming from PDS

3.2.2.1 For rice and wheat/*atta*, percentage of quantity of consumed coming from PDS is shown in Table P4 for the entire rural or urban population as well as for those households that possessed a BPL or Antyodaya ration card, separately for households in twelve percentile classes of MPCE (see Chapter Two, paragraph 2.7). For sugar and kerosene, the corresponding percentages are shown in Table P5.

3.2.2.2 *Differences among the four commodities:* Among the four commodities, kerosene (Table P5) stands out in having a much larger share of consumption coming from PDS – 77% for rural and 57% for urban India. For rice the share of PDS in total consumption was 13% for rural and 11% for urban; for wheat it was about 7% for rural and 4% for urban, and for sugar, 9½% for rural and about 6½% for urban India.

Table P4: Rice and wheat/*atta*: Percentage of consumption (quantity) coming from PDS for households in different percentile classes of MPCE*

all classes	13.2	11.2	27.4	35.0	7.3	3.8	28.2	28.1

*monthly per capita expenditure (see paragraphs 2.6 and 2.7)

3.2.2.3 *Differences between households holding Antyodaya/BPL ration cards and the rest:* Households holding a BPL or Antyodaya ration card exhibited a much greater degree of dependence on PDS than the population as a whole. The difference was most marked in case of wheat, where as much as 28% of consumption came from PDS for these households in both rural and urban areas, compared to 7% for the entire rural population and 4% for the

urban. In case of rice and sugar, too, there was a substantial difference. For rice and sugar, rural households holding Antyodaya/BPL cards reported a PDS share (share of consumption coming from PDS purchases) which was about twice the share reported by the overall population in rural areas (rice: 27.4% against 13.2%; sugar: 18.5% against 9.5%) while urban households holding such cards reported a PDS share which was more than three times the PDS share reported by the entire urban population (rice: 35.0% against 11.2%; sugar: 20.3% against 6.6%). (It was seen in Section 3.1 that the urban holders of such cards formed only 11.3% of all urban households while rural holders formed 29.4% of rural households.) The difference was least pronounced in case of kerosene, but even here the average PDS share of this category of households differed from the overall population by about 9 percentage points in the rural sector and 17-18 percentage points in the urban.

3.2.2.4 *Variation with MPCE level:* While the proportion of consumption from PDS fell with rise in MPCE level, the fall was least for kerosene in rural India (Table P5). For kerosene in urban areas, the fall was more perceptible but not very systematic. For rice (Table P4), the share of PDS purchases in total consumption fell from 20-21% in the lowest MPCE class to 8% in the topmost class in rural areas and to under 2% in urban areas. For wheat, too, there was a steady decline in share of PDS purchases in total consumption as MPCE increased, and, as in the case of rice, the fall was sharper in the urban sector than in the rural. For households holding a BPL or Antyodaya ration card, on the other hand, there was very little variation in share of PDS with MPCE in rural areas, and though there was a decline in PDS share in urban areas, it was much more gradual than in case of the entire population.

Table P5: Sugar and kerosene: Percentage of consumption (quantity) coming from PDS for households in different percentile classes of MPCE*

95 - 100%	4.8	4.3	11.0	11.7	70.9	52.8	84.0	77.8	
all classes	9.5	6.6	18.5	20.3	77.1	56.6	86.3	74.2	

*monthly per capita expenditure (see paragraphs 2.6 and 2.7)

3.2.2.5 For sugar (Table P5), the fall in percentage of total consumption coming from PDS, as MPCE increased, was less steep than for rice and wheat. For households holding a BPL or

Antyodaya ration card, there was some unsystematic variation but hardly a fall except for the topmost ranges of MPCE.

3.3 Government food assistance schemes: Households benefiting during last 365 days

3.3.0 For each of the four schemes: Food for Work (FFW), Annapoorna (ANN), ICDS and Midday Meal (MDM), the surveyed households were asked whether any member of the household had benefited from the scheme during the last 365 days. The estimated proportions at the all-India level of households having so benefited are shown in Table P6 below as number of benefiting households per 1000 households.

Table P6: Proportions of households benefiting from selected food assistance schemes of the Government by sector

all-India					
sector	per 1000 no. of households with at least one member benefiting during the last 365 days from				
	Food for Work	Anna-poorna	ICDS	Midday Meal	any scheme
(1)	(2)	(3)	(4)	(5)	(6)
rural	27 (2291)	9 (589)	57 (4858)	228 (16298)	280 (21393)
urban	1 (220)	2 (142)	18 (1097)	80 (4417)	95 (5349)

Figures in parentheses indicate total no. of beneficiary households in the sample.

3.3.1 Benefit from food assistance schemes and household type

3.3.1.1 The proportion (number per 1000) of beneficiaries (households) of each of the four schemes in each occupational type of households is shown in Table P7-R for rural India and in Table P7-U for urban India. State-level results are shown in Appendix A, Table 2R/2U.

Table P7-R: Proportions of rural households benefiting* from selected food assistance schemes of the Government by household type

all-India					rural
household type	per 1000 no. of households with at least one member benefiting from				no. of sample households

all	27	9	57	228	79298
	(2291)	(589)	(4858)	(16298)	(21393)

*during the last 365 days. Figures in parentheses indicate total no. of beneficiary households in the sample.

3.3.1.2 For each of the four schemes, the rural labour households – “agricultural labour” and “other labour” – had the highest proportions of beneficiary households. For FFW the proportion of beneficiaries among “other labour” households (54%) was double the overall proportion (27%). For the other schemes, variation over household types was less marked, and was least in case of ICDS. The residual “other” rural households class had the lowest proportions of beneficiaries of all schemes except in case of Annapoorna, where this position was held by the “self-employed in agriculture”.

3.3.1.3 Among urban household types, “casual labour” households had an overwhelmingly larger proportion of beneficiaries of the four government schemes than other types. The

proportion of beneficiaries among the other types were either lower than the average for “all” household types or very close to it, while for “casual labour” the proportion was always well above the average for “all” household types.

Table P7-U: Proportions of urban households benefiting* from selected food assistance schemes of the Government by household type

*during the last 365 days. Figures in parentheses indicate total no. of beneficiary households in the sample.

3.3.2 Benefit from food assistance schemes and household social group

3.3.2.1 The proportion (number per 1000) of beneficiary households of different food assistance schemes among households belonging to each of the four social groups – ST, SC, OBC and Others – is shown in Table P8. For State-level results, see Appendix A, Table 3.

Table P8: Proportions of rural and urban households benefiting* from selected food assistance schemes of the Government by household social group

all-India social group	per 1000 no. of households with at least one member benefiting* from				rural

Others	0	1	12	48	
all	1	2	18	80	

*during the last 365 days

3.3.2.2 For FFW, the ST group clearly had a much larger proportion of beneficiary households in both rural and urban areas than any of the other groups. In respect of ICDS, too, the ST led in proportion of beneficiaries, though not by so wide a margin. There was less disparity among social groups in case of Midday Meal benefits; here the ST group had the

highest proportion of beneficiaries in the rural sector but not in the urban sector, where it was behind both SC and OBC. Proportionately more households received Annapoorna benefits among the SC than among other social groups in rural areas.

3.3.3 Benefit from food assistance schemes and land possessed (rural households)

3.3.3.1 As mentioned in Section 3.1.3 above, rural households were divided into six classes depending on size of land possessed. The proportion (number per 1000) of beneficiary households of different food assistance schemes among households belonging to each of the six classes is shown in Table P9. State-level results are shown in Table 4R of Appendix A.

Table P9: Proportions of rural households benefiting* from selected food assistance schemes of the Government by size class of household land possessed

2.01 – 4.00	32	5	52	236
4.01 and above	34	3	66	230
all	27	9	57	228

*during the last 365 days

3.3.3.2 Except in case of Annapoorna, the higher size classes appear to have fared better, not worse, than the lowest two classes in receipt of benefits from the four schemes. The lowest class “<0.01 hectares” was worse off than the average (“all” classes) in respect of benefits from all four schemes, and especially ICDS and MDM. The remaining classes were more or less evenly placed. The lowest class but one, “0.01-0.40 hectares”, had relatively fewer beneficiary households in case of FFW and relatively more in case of Annapoorna than the higher classes. The class “0.41-1.00 hectares”, which was seen in Section 3.1.3 to have the highest proportions of BPL and Antyodaya card holders, had the highest proportions of beneficiaries in case of two of the schemes – FFW and MDM – and appears to have been generally the most well-placed among all classes when recipients of benefits from all the schemes are considered together.

3.3.4 Benefit from food assistance schemes and household MPCE

3.3.4.1 Table P10 presents the variation in proportion of beneficiary households of the four schemes for twelve different percentile groups of monthly per capita expenditure (MPCE). Results at State/UT level are presented in Tables 5R and 5U of Appendix A.

3.3.4.2 It is interesting to note that even for schemes such as Annapoorna, meant for destitutes (see Chapter Two, paragraph 2.19), and ICDS, which targets the poorest of poor families (paragraph 2.20), the proportion of beneficiaries does not drop very sharply as MPCE levels rise, especially in rural India. Thus, in each of the top four MPCE classes in rural India, 2-4% of households were ICDS beneficiaries.

3.3.4.3 In urban India, of course, the drop in proportion of beneficiaries with rise in MPCE is, for every scheme, steeper, and the proportion of FFW and Annapoorna beneficiaries in all the classes from “40-50%” upwards is 1 per 1000 or less.

3.3.4.4 For all schemes the proportion of beneficiary households is highest in the lowest MPCE class and declines steadily with rise in MPCE level in both rural and urban India.

3.3.5 Benefit from food assistance schemes: inter-State variation

3.3.5.1 State/UT-wise proportions (number per 1000) of rural and urban households benefiting from each of the four schemes are shown in Table P11.

3.3.5.2 Clearly, the Midday Meal scheme benefited over 10% of rural households in most State/UTs (between 18% and 33% in 12 major States). The ICDS appears to have been most

active in a few minor States and UTs: Meghalaya, Mizoram and Nagaland in the North-east, Lakshadweep and Daman & Diu, and also in rural areas of Orissa, Chhattisgarh and Maharashtra. As for the FFW scheme, some minor States such as Mizoram, Tripura and Uttaranchal (rural) reported a much larger proportion of beneficiaries than the national average of 2.7%. Among the major States, the highest proportions of (rural) FFW beneficiaries were found in Rajasthan (12%) and Orissa (8%).

3.3.5.3 Abbreviations used for names of States and UTs are explained in paragraph 2.9.1 of Chapter Two.

3.4 Consumption from home-grown stock

3.4.0.1 For each item of food (including *pan*, tobacco and intoxicants) and fuel for which consumption data was collected through Schedule 1.0, the source of consumption of the reporting household (only purchase/ only home produce/ both purchase and home produce/ only free collection/ only exchange of goods and services/ only gifts and charities/ other) was also ascertained. The estimated break-up of households by source of consumption is given for each item in Table 6 (R&U) of Appendix A. For the rural sector, where consumption from home produce is much more common for many items, the share of home produce in both quantity and value of aggregate consumption of each item is also shown in the same table.

3.4.0.2 For any item of food, the share of consumption from home produce varies widely from one region of the country to another, depending, as it does, mainly on the prevalence of cultivation of the crop or rearing of the livestock or poultry which gives rise to the food item in question. The all-India estimates average out these variations and are therefore of less interest than the State/UT-level estimates. We shall, nevertheless, restrict the discussion in this chapter to the all-India (rural) estimates: for State/UT-level estimates the reader is referred to Table 6, Appendix A. Tables P12 and P13 show items of cereals, pulses, vegetables, fruits and other food for which the share of home produce in total quantity consumed in rural India in 2004-05 was 10% or more. Items which were consumed by fewer than 10% of rural households in rural India during a 30-day period according to the survey (such as jowar, bajra, papaya and jackfruit) are, however, omitted from the list even if more than 10% of their consumption is estimated to have come from home-grown stock.

Table P12: Some aspects of consumption from home produce in rural India: selected items* of cereals, pulses, milk, egg, fish and meat

item	% of consumption (quantity) from home produce	% of consumption (value) from home produce	percentage [@] of hhs consuming item from			percentage of hhs reporting consumption in 30 days
			only home produce	both purchase and home produce	only purchase	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
rice	30	30	24.1	1.5	72.5	85
wheat/ <i>atta</i>	40	37	26.9	0.8	71.0	63
arhar (tur)	18	16	10.4	0.1	88.9	57
gram (split)	14	12	7.4	0.0	92.2	33
gram (whole)	14	11	7.5	0.0	91.7	14
moong	15	13	9.0	0.0	90.4	44
masur	11	9	6.7	0.1	92.8	38
urd	17	14	10.3	0.0	89.1	35
peas	13	11	7.8	0.1	91.8	10
milk (liquid)	62	59	36.1	0.5	62.4	71
eggs	14	15	12.0	1.4	86.1	33
chicken	13	15	11.8	0.2	87.7	20

*Only items for which 10% or more of all-India rural consumption (quantity) came from home produce were considered. For rice and wheat, the percentages were computed from the "rice – other sources" percentages available in Table 6R and other relevant information.

[@] Apart from home produce and purchase, consumption may be from free collection, gifts, etc. Therefore the percentages in columns 4, 5 and 6 will generally add up to less than 100.

3.4.0.3 In Tables P12 and P13, only three source categories are shown (“only home produce”, “both purchase and home produce”, and “only purchase”) instead of the seven categories appearing in Table 6 of Appendix A. The first two practically (though not logically) exhaust all households making any consumption from home produce, and so, the sum of these two entries can be taken as an approximation for the percentage of households which consume the item wholly or partly from home produce. It can be seen that these, together with the next entry (“only purchase”), usually add up to more than 98%, the contributions of the other source categories being generally very small, except for “free collection” in case of a few items such as firewood and chips (not shown here).

3.4.0.4 As Table P12 shows, as much as 62% of quantity of milk consumed in rural India came from home produce compared to 40% for wheat/*atta*, 30% for rice, and 11-18% for seven common pulse varieties. For eggs, 14% of consumption, and, for chicken, 13%, came from home-grown stock.

Table P13: Some aspects of consumption from home produce in rural India: selected items* of vegetables and fruits

item	% of consumption (quantity) from home produce	% of consumption (value) from home produce	percentage [@] of hhs consuming item from			percentage of hhs reporting consumption in 30 days
			only home produce	both purchase and home produce	only purchase	
(1)	(2)	(3)	(4)	(5)	(6)	(7)
potato	10	7	4.1	0.1	95.5	92
radish	15	12	8.1	0.1	90.6	29
arum	26	23	14.0	0.2	83.1	14
pumpkin	23	20	13.2	0.2	84.6	32
gourd	19	15	10.7	0.2	86.8	40
cucumber	11	10	5.4	0.1	93.6	22
jhinga/ torai	18	15	10.1	0.4	88.2	28
palak, etc.	19	17	11.7	2.7	75.4	75
french beans, etc.	16	12	7.4	0.2	91.5	21
coconut	37	33	14.5	1.8	81.1	28
guava	12	11	8.2	0.2	83.8	13
mango	12	9	4.8	0.6	87.1	14

*Only items for which 10% or more of all-India rural consumption (quantity) came from home produce were considered.

[@]Apart from home produce and purchase, consumption may be from free collection, gifts, etc. Therefore the percentages in columns 4, 5 and 6 will generally add up to less than 100.

3.4.0.5 Among vegetables and fruits (Table P13), home produce was most important in case of coconuts (37% of quantity consumed in rural India), consumption of which was reported by as many as 28% of rural households. For arum, and the more widely grown pumpkin, about a quarter of rural consumption came from home-grown stock.

Appendix A

Appendix B

Sample Design and Estimation Procedure

Sample Design and Estimation Procedure

1. Outline of Survey Programme

1.1 **Subject Coverage:** 'Consumer Expenditure' and 'Employment and Unemployment' were the two subjects of enquiry of the 61st round (July 2004-June 2005) of NSS. These two subjects are covered together in the quinquennial series of NSS surveys. The 61st round survey was the seventh in this series, the last one having been conducted in the 55th round (1999-2000) of NSS.

1.2 **Geographical coverage:** The survey covered the whole of the Indian Union except (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of a bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.3 **Period of survey and work programme:** The period of survey was of one year's duration starting on 1st July 2004 and ending on 30th June 2005. The survey period of this round was divided into four sub-rounds of three months' duration each as follows:

sub-round 1 :	July -September 2004
sub-round 2 :	October -December 2004
sub-round 3 :	January -March 2005
sub-round 4 :	April -June 2005

An equal number of sample villages/blocks (FSUs) was allotted for survey to each of these four sub-rounds with a view to ensuring uniform spread of sample FSUs over the entire survey period. Each FSU was surveyed during the sub-round to which it was allotted. Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, and rural areas of Arunachal Pradesh and Nagaland.

1.4 **Schedules of enquiry:** There were three schedules of enquiry:

Schedule 0.0	: list of households
Schedule 1.0	: consumer expenditure
Schedule 10	: employment and unemployment

1.5 **Participation of States:** In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The scale of the survey conducted by a State /UT relative to the Central sample survey in the State/UT was as follows:

Nagaland (U)	: triple
J & K , Manipur & Delhi	: double
Goa, Maharashtra (U)	: one and a half
Remaining States/UTs	: equal

2. Sample Design

2.1 Outline of sample design: A stratified multi-stage design was adopted for the 61st round survey. The first-stage units (FSU) were the 2001 Census villages in the rural sector and Urban Frame Survey blocks in the urban sector. The ultimate stage units, in both sectors, were households. In the case of large villages/ blocks requiring formation of hamlet-groups (hg)/ sub-blocks (sb), the selection of two hg's/ sb's from each FSU formed an intermediate stage of sampling.

2.2 Sampling Frame for First-Stage Units: For the rural sector, the list of 2001 Census villages (panchayat wards for Kerala) constituted the sampling frame. For the urban sector, the list of latest available Urban Frame Survey (UFS) blocks was considered as the sampling frame.

2.3 Stratification: Within each district of a State/UT, two basic strata were formed: i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of these also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. There are 27 towns with population 10 lakhs or more at all-India level as per Census 2001.

2.4 Sub-stratification:

2.4.1 Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/2'. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to 'r/2' were demarcated in such a way that each sub-stratum comprised a group of successive villages of the arranged frame and had more or less equal population.

2.4.2 Urban sector: If 'u' be the sample size for an urban stratum, 'u/2' sub-strata were formed. The towns within a district, except those with population 10 lakhs or more, were first arranged in ascending order of population. Next, UFS blocks of each town were arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/2' sub-strata were formed in such a way that each sub-stratum had more or less equal number of UFS blocks.

2.4.3 For towns with population 10 lakhs or more, the urban blocks were first arranged by IV unit no. × block no. in ascending order. Then 'u/2' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of blocks.

2.5 Total sample size (FSUs): 12784 FSUs were allocated at all-India level on the basis of investigator strength in different States/UTs for the Central sample and 14992 FSUs were allocated for the State sample.

2.6 Allocation of total sample to States and UTs: The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to the availability of investigators ensuring more or less uniform work-load.

2.7 Allocation of State/UT level sample to rural and urban sectors: State/UT level sample size was allocated between the two sectors in proportion to population as per Census 2001 with 1.5 weightage to urban sector subject to the restriction that urban sample size for bigger

States like Maharashtra, Tamil Nadu etc. should not exceed the rural sample size. A minimum of 8 FSUs was allocated to each State/UT separately for rural and urban areas.

2.8 Allocation to strata: Within each sector of a State/UT, the sample size was allocated to the different strata in proportion to the stratum population as per Census 2001. Allocations at stratum level were adjusted to a multiple of 4 with a minimum sample size of 4.

2.9 Selection of FSUs: Two FSUs were selected from each sub-stratum of a district of the rural sector with Probability Proportional to Size With Replacement (PPSWR), size being the population as per Population Census 2001. For the urban sector, two FSUs were selected from each sub-stratum by using Simple Random Sampling Without Replacement (SRSWOR). Within each sub-stratum, samples were drawn in the form of two independent sub-samples in both rural and urban sectors.

2.10 Selection of hamlet-groups/sub-blocks/households: important steps

2.10.1 Criterion for hamlet-group/sub-block formation: Large villages/blocks having approximate present population of 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' (hg) in the rural sector and 'sub-blocks' (sb) in the urban sector. The number of hg's/ sb's to be formed was decided as shown below.

approximate present population of the sample village/block	no. of hgs/sbs to be formed (D)
less than 1200*	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

* i.e., no hamlet-group/sub-block formation

2.10.2 For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

2.11 Each hamlet-group/sub-block was formed by grouping contiguous areas so that the hg's/ sb's had more or less equal population content. To form the sampling frame for selection of households, two hamlet-groups/sub-blocks were selected by SRSWOR from those formed in a large village/block. Listing and selection of the households was done independently in the two selected hamlet-groups/sub-blocks.

3. Formation of Second Stage Strata and allocation of households

For both Schedule 1.0 and Schedule 10, households listed in the selected village/block/hamlet-groups/sub-blocks were stratified into three second-stage strata (SSS) as given below.

3.1 **Rural:** The three second-stage strata (SSS) in the rural sector were formed as follows:

- SSS 1: relatively affluent households
- SSS 2: from the remaining households, households having principal earning from non-agricultural activity
- SSS 3: other households

3.2 **Urban:** In the urban sector, the three second-stage strata (SSS) were formed using information collected on the Monthly Per Capita Expenditure (MPCE) of households, as follows:

- SSS 1: households with MPCE more than A (i.e. $MPCE > A$)
- SSS 2: households with MPCE equal to or less than A but equal to or more than B (i.e. $B \leq MPCE \leq A$)
- SSS 3: households with MPCE less than B (i.e. $MPCE < B$)

where A and B were values of MPCE chosen separately for each NSS Region such that, according to data collected in the 55th round of NSS, the top 10% of households in the region had MPCE more than A and the bottom 30% had MPCE less than B.

3.3 Schedule 1.0 was surveyed in 10 households in each FSU. The allocation of sample households to second-stage strata was as follows:

SSS	composition of SSS	no. of hhs to be surveyed	
		without hg/sb formation	with hg/sb formation (for each hg/sb)
rural			
SSS 1:	relatively affluent households	2	1
SSS 2:	of the rest, households having principal earning from non-agricultural activity	4	2
SSS 3:	other households	4	2
urban			
SSS 1:	households with $MPCE > A$	2	1
SSS 2:	other households with MPCE equal to or less than A but equal to or more than B (i.e. $B \leq MPCE \leq A$)	4	2
SSS 3:	households with MPCE less than B	4	2

4. **Selection of households for Schedule 1.0:** From each SSS the sample households for Schedule 1.0 were selected by SRSWOR.

5. Estimation Procedure

5.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb (j = 1, 2 or 3)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/sb's formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

$= D / 2$ for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum

Z = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a rural sub-stratum)

z = size of sample village used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/ block/ hamlet-group/ sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a village/ block/ hamlet-group/ sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

In terms of the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the kth household in the jth second-stage stratum of the dth hg/sb (d = 1, 2) of the ith FSU belonging to the mth sub-sample for the tth sub-stratum of sth stratum;

However, for ease of understanding, a few symbols are suppressed in the following paragraphs where they are obvious.

5.2 Formulae for estimation of aggregates based on Schedule 1.0 for a particular sub-sample and stratum in rural/urban sector:

5.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For households selected in jth second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

5.2.2 Urban:

Estimation formula for a sub-stratum:

(i) For households selected in j^{th} second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

5.2.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

5.3 Overall Estimate for Aggregates

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

5.4 Overall Estimate of Aggregates at State/UT/All-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

5.5 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) is obtained as.

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

5.6 **Estimates of Error:** The estimated variances of the above estimates are as follows:

5.6.1 **For aggregate \hat{Y} :**

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

5.6.1.1 For strata with PPSWR selection at first stage:

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti}\hat{Y}_{sti}}{Z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

$$\text{where } \hat{Y}_{sti} = \sum_j Y_{stij},$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

5.6.1.2 For strata with SRSWOR selection at first stage:

$$V\hat{a}r_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

5.6.2 **For ratio \hat{R} :**

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

5.6.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{Z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij}, \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij},$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{s1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{s2j}} y_{i2jk} \right],$$

$$\hat{X}_{stij} = D_{stii}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{s1j}} x_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{s2j}} x_{i2jk} \right]$$

5.6.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[(\hat{Y}_{s't1} - \hat{Y}_{s't2})^2 + \hat{R}^2 (\hat{X}_{s't1} - \hat{X}_{s't2})^2 - 2\hat{R}(\hat{Y}_{s't1} - \hat{Y}_{s't2})(\hat{X}_{s't1} - \hat{X}_{s't2}) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

5.6.3 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\text{Var}(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

6. Multipliers

The formulae for multipliers for a sub-sample are given below for Schedule 1.0:

sub-stratum	formula for multipliers	
	hg / sb 1	hg / sb 2
rural	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$ j = 1, 2, 3	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$ j = 1, 2, 3
urban	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$ j = 1, 2, 3	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$ j = 1, 2, 3

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable is used.

(ii) Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
