

Education in India: 2007-08

Participation and Expenditure

NSS 64th Round
(July 2007 – June 2008)

National Sample Survey Office
National Statistical Organisation

Ministry of Statistics and Programme Implementation
Government of India

May 2010

Preface

The National Sample Survey Office (NSSO) of the National Statistical Organisation conducted an all-India survey of rural and urban households in the 64th round of NSS during July 2007 - June 2008. The survey comprised household enquiries on (i) participation and expenditure in education (ii) employment-unemployment and migration (iii) consumer expenditure. This report presents the results of the survey on participation in education and private educational expenditure. Comprehensive data on this subject was last collected by NSSO in its 52nd Round (July 1995 - June 1996), more than a decade earlier.

The major purposes of the survey were to study (i) the extent of use of educational infrastructure, as reflected in current attendance status of population in educational institutions, and of educational incentives received by students from the government or private sector (ii) the magnitude and nature of private expenditure on education; (iii) the extent of educational wastage in terms of dropout and discontinuance, and its causes.

Chapter I of the report is introductory. Major definitions and concepts related to the survey are given in Chapter II. Literacy and completed educational level for the population and the current attendance/ enrolment status of persons of age 5-29 in educational institutions are discussed in Chapter III. A detailed analysis of participation rates by education level, type and nature of institution, incentives availed of and private expenditure incurred on education, for persons aged 5-29 years, is made in Chapter IV. Non-enrolment and educational wastage in terms of drop-out or discontinuance, and the reasons thereof, are discussed in Chapter V. Detailed statistical tables at national/state level are presented in Appendix A. The sampling design and estimation procedure are explained in Appendix B and a facsimile of the schedule of enquiry canvassed in the field is provided as Appendix C.

The Survey Design and Research Division (SDRD) of the NSSO undertook the development of the survey methodology and survey instruments, and the drafting of the report. The field work was carried out by the Field Operations Division (FOD) of NSSO and the data processing and tabulation work by the Data Processing Division (DPD) of NSSO. The Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

I sincerely thank the members of the Steering Committee of National Sample Surveys and those of the Working Group for NSS 64th round and National Statistical Commission for their valuable guidance at various stages of survey activities from designing of the survey to the preparation of this report. I would also like to place on record my appreciation of the strenuous efforts made by the officers and staff from different divisions of NSSO and express my thanks to them in bringing out this report in its present form.

I hope the report will be found useful by policy makers, academicians and researchers. Suggestions for improvement of the content of the report will be greatly appreciated.

मुख्य परिणाम

रा.प्र.स. के 64वें दौर (जुलाई 2007 से जून 2008) में 'शिक्षा में भागीदारी एवं व्यय' पर एक सर्वेक्षण किया गया। पूरे देश में फैले 63318 ग्रामीण परिवारों से एवं 37263 नगरीय परिवारों से 445960 व्यक्तियों के एक प्रतिदर्श का सर्वेक्षण किया गया।

सर्वेक्षण के कुछ मुख्य परिणाम नीचे दिए गए हैं :-

A. साक्षरता एवं शिक्षा पूरा करने का स्तर

उम्र-वर्ग	साक्षरता दर(%)								
	ग्रामीण			नगरीय			ग्रामीण + नगरीय		
	महिला	पुरुष	कुल	महिला	पुरुष	कुल	महिला	पुरुष	कुल
सम्पूर्ण उम्र (शून्य एवं उससे ऊपर उम्र)	51.1	68.4	60.0	71.6	82.2	77.1	56.3	72.1	64.5
7 वर्ष एवं उससे ऊपर उम्र	56.7	77.0	67.0	78.1	89.9	84.3	62.3	80.5	71.7
15 वर्ष एवं उससे ऊपर उम्र	47.5	71.8	59.7	74.6	88.7	82.0	54.9	76.7	66.0

प्रमुख राज्यों में 7 वर्ष एवं उससे ऊपर आयु की जनता की साक्षरता दर :

अपेक्षाकृत उच्च साक्षरता वाले राज्य - केरल (94%), असम (84%), महाराष्ट्र (81%)

अपेक्षाकृत निम्न साक्षरता वाले राज्य - बिहार (58%), राजस्थान (62%), आन्ध्रप्रदेश (64%)

15 वर्ष एवं उससे अधिक आयु के व्यक्तियों के शिक्षा स्तर का प्रतिशत वितरण

- 34% साक्षर नहीं थे, 24% प्राइमरी स्तर पूर्ण किये हुए थे, 16% मध्य स्तर एवं शेष 26% माध्यमिक एवं उसके ऊपर के स्तर पूर्ण किये हुए थे।

B. परिवार की रूपरेखा :-

औसतन परिवार का आकार: 4.5 (ग्रामीण-4.7, नगरीय-4.2)

प्रत्येक परिवार की 5 से 29 वर्ष की आयु के व्यक्तियों की औसत सं.: 2.1 (ग्रामीण-2.2, नगरीय-1.9)

प्रत्येक परिवार के वर्तमान में शिक्षा ग्रहण कर रहे व्यक्तियों की औसत संख्या (5-29 वर्ष): 1.1 (ग्रामीण-1.1, नगरीय-1.0)

C. उन स्कूलों की दूरी जिनमें प्राइमरी/मिड्ल/एवं सेकेण्डरी स्तर की कक्षाएं हैं।

98% ग्रामीण परिवार और 99% नगरीय परिवारों के लिए 2 कि.मी. के भीतर प्राइमरी कक्षाओं के स्कूल हैं।

79% ग्रामीण परिवार एवं 97% नगरीय परिवारों के लिए 2 कि.मी. के भीतर मिड्ल कक्षाओं के स्कूल हैं।

47% ग्रामीण परिवार एवं 91% नगरीय परिवारों के लिए 2 कि.मी. के भीतर सेकेण्डरी कक्षाओं के स्कूल हैं।

D. 5-29 वर्ष वर्ग के व्यक्तियों का वर्तमान में कक्षा में नामांकन एवं उनका उपस्थिति दर

कुल जनसंख्या के करीब 47%, 5-29 आयु वर्ग में थे एवं क्षेत्रकों तथा लोगों में कोई उल्लेखनीय भिन्नता नहीं थी।

5-29 के आयु वर्ग के व्यक्तियों के बीच : 46% किसी शैक्षिक संस्था में वर्तमान में नामांकित नहीं थे

2% वर्तमान में नामांकित थे परंतु उपस्थित नहीं हो रहे थे

52% वर्तमान में शैक्षिक संस्थाओं में उपस्थित हो रहे थे।

5-29 वर्ष वर्ग के व्यक्तियों का वर्तमान में शैक्षिक संस्था में नामांकन एवं उनका उपस्थिति स्तर :-

प्राइमरी एवं उसके ऊपर शिक्षा ग्रहण कर रहे 5-29 वर्ष आयु वर्ग के व्यक्तियों के उपस्थिति स्तर : प्राइमरी में 49%
मिड्ल में 24%
सेकेण्डरी/हाईअर सेकेण्डरी में 20%
हाईअर सेकेण्डरी एवं उसके ऊपर 7%

E. शिक्षा का प्रकार :-

प्रमुख पाठ्यक्रम के हिसाब से : सामान्य शिक्षा में 97.8% थे, तकनीकी शिक्षा में 1.9%, एवं व्यावसायिक शिक्षा में 0.3% थे ।

जिन्होंने प्रमुख पाठ्यक्रमों में भाग लिया उनमें से केवल 0.1% ने द्वितीय पाठ्यक्रम में भाग लिया । द्वितीय पाठ्यक्रम में जिन्होंने भाग लिया उनमें से सामान्य शिक्षा में 3%, तकनीकी शिक्षा में 75.2% एवं व्यावसायिक शिक्षा में 21.7% थे ।

F. उपस्थिति अनुपात :-

सकल उपस्थिति अनुपात (%) :	कक्षाएं	सभी	ग्रामीण	नगरीय
	I-V	104 %	105%	103%
	V-VIII	84 %	82%	90%
	IX-X	70 %	66%	85%
	XI-XII	48 %	41%	65%

उम्र के अनुसार उपस्थिति अनुपात(%) :	वर्ष 6-10	88%	87%	91%
	वर्ष 11-13	86%	85%	89%
	वर्ष 14-17	64%	61%	72%
	वर्ष 18-24	18%	15%	27%

निवल उपस्थिति अनुपात(%) :	कक्षा I-V	84%	84%	85%
	कक्षा V-VIII	59%	57%	65%
	कक्षा IX-X	41%	38%	51%
	कक्षा XI-XII	27%	23%	40%

निवल उपस्थिति अनुपात कक्षाएं I-VIII के लिए (सम्पूर्ण-भारत): 86%

अपेक्षाकृत उच्च नि.उ.अ. वाले प्रमुख राज्य (I-VIII) : हिमाचल प्रदेश (96%), केरल (94%), तमिलनाडू (92%)

अपेक्षाकृत निम्न नि.उ.अ. वाले प्रमुख राज्य (I-VIII) : बिहार (74%), झारखण्ड (81%), उत्तर प्रदेश (83%)

G. जिस संस्था में भाग लिया उसका प्रकार :-

प्राइमरी स्तर के विद्यार्थियों के लिए, संस्था का प्रकार था	सरकारी में 67%, स्थानीय निकाय में 6%, सहायता प्राप्त गैर-सरकारी में 7%, गैर-सहायता प्राप्त गैर-सरकारी में 20%
मिड्ल स्तर विद्यार्थियों के लिए, संस्था का प्रकार था	सरकारी में 65%, स्थानीय निकाय में 5%, सहायता प्राप्त गैर-सरकारी में 12%, गैर-सहायता प्राप्त गैर-सरकारी में 17%
माध्यमिक/उच्चमाध्यमिक स्तर वाले विद्यार्थियों के लिए संस्था का प्रकार था	सरकारी में 56%, स्थानीय निकाय में 3%, सहायता प्राप्त गैर-सरकारी में 21%, गैर-सहायता प्राप्त गैर-सरकारी में 18%

H. गैर-सहायता प्राप्त गैर-सरकारी संस्थाओं में मान्यता प्राप्त संस्थाओं में उपस्थित विद्यार्थियों की संख्या (%) :

प्राइमरी स्तर पर - गैर-सरकारी गैर-सहायता संस्थाओं के 73% विद्यार्थियों ने मान्यता प्राप्त संस्थाओं में पढ़ाई की ।

मिड्ल स्तर पर -गैर-सरकारी गैर-सहायता संस्थाओं के 78% विद्यार्थियों ने मान्यता प्राप्त संस्थाओं में पढ़ाई की ।

I. मुफ्त शिक्षा प्राप्त करने वाले विद्यार्थियों का अनुपात :-

प्राईमरी स्तर पर - 71% विद्यार्थियों को निःशुल्क शिक्षा प्राप्त हुई (ग्रामीण-80%, नगरीय-40%)

मिड्ल स्तर पर -68% विद्यार्थियों को निःशुल्क शिक्षा प्राप्त हुई (ग्रामीण-75%, नगरीय-45%)

माध्यमिक/उच्च माध्यमिक स्तर पर -48% विद्यार्थियों ने निःशुल्क शिक्षा प्राप्त की (ग्रामीण-54%, नगरीय-35%)

J. विद्यार्थियों का अनुपात जिन्हें शैक्षिक प्रोत्साहन प्राप्त हो रहे हैं :-

विद्वता/छात्रवृत्ति : 14% विद्यार्थियों ने प्रोत्साहन प्राप्त किया (ग्रामीण-17%, नगरीय-6%)

मुफ्त/आर्थिक सहायता प्राप्त पुस्तकें : 51% विद्यार्थियों ने प्रोत्साहन प्राप्त किया (ग्रामीण-58%, नगरीय-29%)

मुफ्त/आर्थिक सहायता प्राप्त लेखन सामग्री : 7% विद्यार्थियों ने प्रोत्साहन प्राप्त किया (ग्रामीण-8%, नगरीय-5%)

सरकार से प्राप्त मध्याह्न भोजन : प्राईमरी स्तर पर 67% एवं मिड्ल स्तर पर 29% विद्यार्थियों ने इसे प्राप्त किया ।

परिवहन किराए में रियायत : ग्रामीण एवं नगरीय क्षेत्र दोनों में 4.6% विद्यार्थियों ने प्रोत्साहन प्राप्त किया ।

K. शिक्षा का प्रकार एवं स्तर के आधार पर शिक्षा पर प्रति छात्र औसत वार्षिक निजी व्यय :-

सामान्य शिक्षा :	प्राईमरी	- रु.1413 (ग्रामीण-रु. 826, नगरीय-रु.3626)
	मिड्ल	- रु.2088 (ग्रामीण-रु.1370, नगरीय-रु.4264)
	माध्यमिक/उच्चमाध्यमिक	- रु.4351 (ग्रामीण-रु.3019, नगरीय-रु.7212)
	उच्च माध्यमिक के ऊपर	- रु.7360 (ग्रामीण-रु.6327, नगरीय-रु.8466)
	समग्र	- रु.2461 (ग्रामीण-रु.1551, नगरीय-रु.5128)

तकनीकी शिक्षा : रु.32112 (ग्रामीण-रु.27177, नगरीय-रु.34822)

व्यवसायिक शिक्षा : रु.14881 (ग्रामीण-रु.13699, नगरीय-रु.17016)

‘ग्रामीण’ (‘नगरीय’) के आंकड़े ग्रामीण (नगरीय) क्षेत्रों में रहने वाले विद्यार्थियों के लिए अनुमान हैं ।

L. संस्था के प्रकार के आधार पर सामान्य शिक्षा पर प्रति छात्र औसत वार्षिक निजी व्यय ।

सरकारी रु.1267 (ग्रामीण-रु. 987, नगरीय-रु.2744)

स्थानीय निकाय रु. 949 (ग्रामीण-रु. 689, नगरीय-रु.1999)

सहायता प्राप्त गैर-सरकारी रु.4220 (ग्रामीण-रु.2955, नगरीय-रु.5737)

गैर-सहायता प्राप्त गैर-सरकारी रु.5689 (ग्रामीण-रु.3876, नगरीय-रु.7867)

‘ग्रामीण’ (‘नगरीय’) के आंकड़े ग्रामीण (नगरीय) क्षेत्रों में रहने वाले विद्यार्थियों के लिए अनुमान हैं ।

M. निजी व्यय* के प्रमुख संघटक एवं कुल व्यय में उनका हिस्सा ।

	ग्रामीण	नगरीय
ट्यूशन शुल्क	25%	40%
परीक्षा शुल्क, अन्य शुल्क एवं भुगतान	15%	15%
पुस्तकें एवं लेखन सामग्री	25%	15%
पोशाक	12%	6%
परिवहन	8%	8%
निजी कोचिंग	10%	13%

* सभी प्रकार की शिक्षाओं को ध्यान में रखते हुए : सामान्य, तकनीकी एवं व्यवसायिक

N. 5-29 वर्ष वर्ग के व्यक्तियों का अनुपात जो कभी भी शैक्षिक संस्था में भर्ती नहीं हुए :

5 वर्ष	38% (ग्रामीण-42%, नगरीय-25%)
6-10 वर्ष	9% (ग्रामीण-10%, नगरीय- 6%)
11-13 वर्ष	6% (ग्रामीण- 7%, नगरीय- 4%)
14-17 वर्ष	8% (ग्रामीण-10%, नगरीय- 5%)
18-24 वर्ष	17% (ग्रामीण-20%, नगरीय- 8%)
25-29 वर्ष	24% (ग्रामीण-29%, नगरीय-12%)

O. भर्ती नहीं होने के मुख्य कारण :-

अभिभावक का अपने बच्चों की शिक्षा में रुचि का अभाव	33%
शिक्षा को आवश्यक नहीं माना जाता	22%
आर्थिक दिक्कतें	21%

P. आखिरी नामांकन स्तर के अनुसार 5-29 वर्ष आयु वर्ग के पढ़ाई बंद कर देने वाले व्यक्तियों का प्रतिशत ब्यौरा

प्राइमरी के नीचे :	2%
प्राइमरी :	24%
मिड्ल् :	28%
माध्यमिक :	25%
उच्च माध्यमिक :	11%
उच्च माध्यमिक के ऊपर (डिप्लोमा सहित) :	10%

Q. पढ़ाई नहीं जारी रखने/छोड़ देने के मुख्य कारण :-

आर्थिक दिक्कतें	21%
बच्चे का पढ़ाई में रुचि का अभाव	20%
पढ़ाई का बोझ लेने में असफलता या फेल होना	10%
पढ़ाई का इच्छानुसार स्तर समापन	10%
अभिभावक का पढ़ाई में रुचि का अभाव	9%

Highlights

A survey on 'Participation and Expenditure in Education' was conducted in NSS 64th round (July 2007 - June 2008). A sample of 445960 persons, from 63318 rural households and 37263 urban households spread over the country, was surveyed.

Some of the key findings of the survey are given below:

A. Literacy and completed educational level of population for different age-groups

Age-group	Literacy rate (%)								
	Rural			Urban			Rural +Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
All ages (age 0 & above)	51.1	68.4	60.0	71.6	82.2	77.1	56.3	72.1	64.5
Age 7 & above	56.7	77.0	67.0	78.1	89.9	84.3	62.3	80.5	71.7
Age 15 & above	47.5	71.8	59.7	74.6	88.7	82.0	54.9	76.7	66.0

Literacy rate for population of age 7 & above in major states:

States with relatively high literacy- Kerala (94%), Assam (84%), Maharashtra (81%)

States with relatively low literacy- Bihar (58%), Rajasthan (62%), Andhra Pradesh (64%)

Percentage distribution of persons of age 15 & above by completed level of education

- 34% were not literate, 24% were literates of level up to primary, 16% of level middle and remaining 26% were of level secondary & above.

B. Household profile

Average household size: 4.5 (Rural- 4.7, Urban- 4.2)

Average no. of persons aged 5-29 per household: 2.1 (Rural- 2.2, Urban- 1.9)

Average no. of currently attending persons (age 5-29) per household: 1.1 (Rural- 1.1, Urban- 1.0)

C. Distance to schools having primary/ middle/ secondary level classes

98% of rural households & 99% of urban households have school with primary classes within 2 km

79% of rural households & 97% of urban households have school with middle classes within 2 km

47% of rural households & 91% of urban households have school with secondary classes within 2 km

D. Current enrolment & attendance status of persons in the age-group 5-29

About 47% of the total population was in the age-group 5-29 with no major variation between sectors or between sexes

Among persons in age-group 5-29: 46% were not currently enrolled in any educational institution

2% were currently enrolled but not attending

52% were currently attending educational institutions

Current enrolment & attendance status of persons in the age-group 5-29 (contd.)

Among persons aged 5-29 attending education of level primary & above - 49% were in Primary
 24% were in Middle
 20% in Secondary/HS
 7% in above-HS level

E. Type of education

For major course attended: type of education was General in 97.8%, Technical in 1.9%, Vocational in 0.3% cases.

Out of those who attended major course, only 0.1% attended a second course. For the second course attended, type of education was General in 3%, Technical in 75.2%, Vocational in 21.7% cases.

F. Attendance ratios

		<u>All</u>	<u>Rural</u>	<u>Urban</u>
Gross Attendance Ratio (%):	Classes I-V	104%	105%	103%
	Classes VI-VIII	84%	82%	90%
	Classes IX-X	70%	66%	85%
	Classes XI-XII	48%	41%	65%
Age-specific Attendance Ratio (%):	Age 6-10	88%	87%	91%
	Age 11-13	86%	85%	89%
	Age 14-17	64%	61%	72%
	Age 18-24	18%	15%	27%
Net Attendance Ratio (%):	Classes I-V	84%	84%	85%
	Classes VI-VIII	59%	57%	65%
	Classes IX-X	41%	38%	51%
	Classes XI-XII	27%	23%	40%

Net Attendance Ratio for Classes I-VIII (All-India): 86%

Major states with relatively high NAR (I-VIII): Himachal Pr. (96%), Kerala (94%), Tamil Nadu (92%)

Major states with relatively low NAR (I-VIII): Bihar (74%), Jharkhand (81%), Uttar Pradesh (83%)

G. Type of institution attended

For Primary level students, type of institution was govt. in 67%, local body in 6%, private aided in 7%, private unaided in 20% cases

For Middle level students, type of institution was govt. in 65%, local body in 5%, private aided in 12%, private unaided in 17% cases

For Secondary/ HS level students, type of inst. was govt. in 56%, local body in 3%, private aided in 21%, private unaided in 18% cases

H. Students attending recognized institutions among those in private unaided institutions (%)

At Primary level – 73% of students in private unaided institutions attended recognized institutions

At Middle level – 78% of students in private unaided institutions attended recognized institutions

I. Proportion of students getting free education

At Primary level:	71% students got free education (Rural- 80%, Urban- 40%)
At Middle level:	68% students got free education (Rural- 75%, Urban- 45%)
At Secondary/ HS level:	48% students got free education (Rural- 54%, Urban- 35%)

J. Proportion of students getting educational incentives

Scholarship/ stipend:	14% students got the incentive (Rural- 17%, Urban- 6%)
Free/ subsidised books:	51% students got the incentive (Rural- 58%, Urban- 29%)
Free/ subsidised stationery:	7% students got the incentive (Rural- 8%, Urban- 5%)
Mid-day meal from govt.:	At Primary level 67% and at Middle level 29% students got it
Concession in transport fare:	4.6% students in both Rural and Urban sector got the incentive

K. Average annual private expenditure per student on education by level and type of education

General Education:	Primary	- Rs. 1413 (Rural- Rs. 826, Urban- Rs.3626)
	Middle	- Rs. 2088 (Rural- Rs.1370, Urban- Rs.4264)
	Secondary/ HS	- Rs. 4351 (Rural- Rs.3019, Urban- Rs.7212)
	Above HS	- Rs. 7360 (Rural- Rs.6327, Urban- Rs.8466)
	Overall	- Rs. 2461 (Rural- Rs.1551, Urban- Rs.5128)
Technical Education:	Rs.32112 (Rural- Rs.27177, Urban- Rs.34822)	
Vocational Education:	Rs.14881 (Rural- Rs.13699, Urban- Rs.17016)	

'Rural' ('urban') figures are estimates for students living in rural (urban) areas

L. Average annual private expenditure per student on general education by type of institution

Govt.	Rs.1267	(Rural- Rs. 987, Urban- Rs.2744)
Local body	Rs. 949	(Rural- Rs. 689, Urban- Rs.1999)
Private aided	Rs.4220	(Rural- Rs.2955, Urban- Rs.5737)
Private unaided	Rs.5689	(Rural- Rs.3876, Urban- Rs.7867)

'Rural' ('urban') figures are estimates for students living in rural (urban) areas

M. Major components of private expenditure* and their shares in the total

	<u>Rural</u>	<u>Urban</u>
Tuition fee	25%	40%
Examination fee, other fees & payment	15%	15%
Books & stationery	25%	15%
Uniform	12%	6%
Transport	8%	8%
Private coaching	10%	13%

* considering all types of education: general, technical and vocational

N. Proportion of persons of age 5-29 never enrolled

Age 5	38% (Rural- 42%, Urban- 25%)
Age 6-10	9% (Rural- 10%, Urban- 6%)
Age 11-13	6% (Rural- 7%, Urban- 4%)
Age 14-17	8% (Rural- 10%, Urban- 5%)
Age 18-24	17% (Rural- 20%, Urban- 8%)
Age 25-29	24% (Rural- 29%, Urban- 12%)

O. Major reasons for non-enrolment

Parents not interested in education of children	33%
Education not considered necessary	22%
Financial constraints	21%

P. Percentage break-up of education-discontinued population of age 5-29 by level of last enrolment (whether completed or not)

Below Primary	2%
Primary:	24%
Middle:	28%
Secondary:	25%
Higher Secondary:	11%
Above HS (incl. diploma):	10%

Q. Major reasons for Discontinuance/ drop-out

Financial constraints	21%
Child not interested in studies	20%
Unable to cope up or failure in studies	10%
Completed desired level or class	10%
Parents not interested in studies	9%

Chapter I

Introduction

1.0.1 The report is based on the findings of the 64th Round all-India survey on ‘Participation and Expenditure in Education’, conducted during the period July 2007 - June 2008 by the National Sample Survey Organisation (NSSO). Comprehensive data on this subject was last collected by NSSO in its 52nd Round (July 1995 – June 1996), more than a decade earlier.

1.0.2 In most countries, the government spends substantial amounts on the creation as well as the functioning of the educational infrastructure. But to avail themselves of such facilities, individuals, too, have to incur expenditure in the form of tuition fees, examination fees, cost of books and stationery etc. While information is available in budget documents on the expenditure incurred by governments, there is an increasing role of non-government organisations as well as individuals in the education sector. The generation of information on education and the expenditure by individuals through a specialised survey, therefore, has special significance in the contemporary context.

1.0.3 The NSS 64th Round was designed to collect information on (a) participation of persons aged 5-29 years in the education system of the country (b) private expenditure incurred by households on education and (c) the extent of educational wastage in terms of dropout and discontinuance, and its causes. The purpose was to study (i) the extent of use of educational infrastructure, or facilities and incentives provided by the government and private sector as reflected in current attendance status of population in educational institutions (ii) the magnitude and nature of private expenditure on education; (iii) the incidence and causes of dropping out, non-enrolment etc.

1.1 Coverage

1.1.1 For the purpose of this survey, ‘education’ covers the following:

- I. School education including that under the Education Guarantee Scheme (EGS) from Class I to X or XII, irrespective of the recognition status of the educational institution,
- II. Higher secondary / pre-university education leading to certificate/diploma/degree etc. It also includes enrolment in private unrecognised institutions which have regular classes and follow the syllabus and pattern of education as in recognised schools or colleges, and which sponsor students for public examinations as private or external candidates,
- III. General university education, whether full-time or part-time, leading to certificate/diplomas, degrees, etc. Universities not recognised by University Grant Commission are not covered,
- IV. Correspondence courses conducted by universities, deemed universities or institutions authorised by competent authorities for awarding regular degrees or diplomas or certificates,

- V. Higher secondary/ pre-university/ under-graduate/ post-graduate/ professional/ technical education leading to certificates, diplomas, degrees etc. conducted by recognised open universities/schools,
- VI. Technical or professional courses, leading to degrees/ diplomas/ certificates, conducted by Universities, Deemed Universities, or institutes like National Institute of Fashion Technology, National School of Drama, Satyajit Ray Film and Television Institute, Film and Television Institute of India, Lok Nayak Jayaprakash Narayan National Institute of Criminology and Forensic Science, etc. or Institutions authorised by competent authorities like All India Council of Technical Education (AICTE), Medical Council of India (MCI), etc.,
- VII. Professional courses conducted by Institutes like the Institute of Chartered Accountants of India, the Institute of Cost and Works Accountants of India, the Institute of Company Secretaries of India, Actuarial Society of India, etc.,
- VIII. All types of vocational courses of duration three months or more, conducted by institutions like Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes, etc., authorised by competent authorities,
- IX. All the courses at primary level and above, whether recognised or not, conducted by recognised educational institutions, and not covered under the above-mentioned categories.

1.1.2 The following courses are specifically excluded:

- *Art, music and similar types of course conducted by individuals in their houses or unrecognised/ unaffiliated institutions,*
- *Classes taken by private tutors,*
- *Education at nursery/ kindergarten/preparatory levels – except for information on enrolment status and drop-out / discontinuance status.*
- *The non-formal system of education being implemented through various programmes by government or other agencies - except for information on enrolment status and drop-out / discontinuance status.*

1.2 NSS surveys on education

1.2.1 The NSSO conducted first all-India survey on social consumption in its 35th round (July 1980 - June 1981) to obtain data on nature & quantum of benefits received by the people from public expenditure on various services such as **health services** (including mass immunisation and family welfare programmes), **educational services**, public distribution, etc. Subsequently, the subject of social consumption was covered by the NSSO in its 42nd round (July 1986 - June 1987) and 52nd round (July 1995 - June 1996). These surveys were conducted on the same lines as the 35th round survey with some modifications in subject coverage. The surveys covered both qualitative and quantitative aspects of educational services received by households. Qualitative aspects included literacy, educational level attained, current attendance/enrolment,

drop-out, reason for drop-out, etc. Quantitative aspects of educational services included expenditure incurred by households in availing themselves of these services with its break-up into tuition fees, transport costs, etc.

1.2.2 It may be worthwhile to mention here that in NSS 47th round (July-December 1991), data on qualitative aspects of educational services were also collected. A novel feature of that survey was a test in several Indian languages, conducted on the spot on persons of age 15 years or more who were reported as literates but had not completed primary education. This was done to identify the cases of literates who had lapsed into illiteracy and in turn, to develop an adjustment factor for the overall literacy rates. Moreover, information on numeric ability (addition, subtraction, multiplication and division) was collected to identify the functional literates.

1.2.3 This apart, person-wise information on literacy and educational attainment is nevertheless collected for each surveyed household in all the household surveys of NSSO. In the quinquennial surveys of employment and unemployment, particulars of attendance in educational institutions are also recorded. The last few such surveys had collected information on type of institution, nature of institution for those currently attending, and reason for not attending educational institution for those not attending.

1.3 New features of NSS 64th Round

1.3.1 The survey on 'Participation and Expenditure in Education' conducted during July 2007 - June 2008 was broadly similar to that undertaken in the 52nd round (July 1994 - June 1995) of NSS with the following new additions or modifications.

- The survey collected detailed information on education for **persons in the age group 5-29 years** (as in the last quinquennial NSS employment-unemployment survey), compared to 5-24 years in the 52nd round,
- The NSS 52nd round covered only general and technical education whereas the 64th round covered vocational education as well,
- In the technical/professional category specific information on courses like MBA, Chartered Accountancy, etc. was collected,
- Information was collected on distances from nearest school having primary/ upper primary/ secondary level classes, rather than on distance from nearest primary/ upper primary/ secondary school,
- Information on household consumption expenditure (Rs.) during last 30 days was collected through a set of five questions, in place of the detailed worksheet used in the 52nd round,
- Information on expenditure on education was collected for at most two courses instead of one course as was done in the 52nd round,
- The block used in the 52nd round for recording the details of expenditure on dependants studying away from home was dropped; instead, two items of information, viz. *number of dependants studying away from home*, and *amount sent to them*, were included in the block on household characteristics,
- A new question "Changed educational institution during last one year?" was added,

- To get an idea of the proportion of students repeating the year in the same class, information on the class/grade/year in the current academic session and in the previous academic session was collected,
- For Class X and below, questions on *grade completed before dropping out / discontinuance* and *type of school last attended* were introduced.

1.4 The 64th round survey (July 2007 - June 2008)

1.4.1 The 64th Round of NSS was a multi-subject household survey round covering 'Employment-unemployment and Migration', 'Household Consumer Expenditure', and 'Participation and Expenditure in Education'. The three detailed household enquiry schedules used in the round were Schedule 10.2, on employment-unemployment and migration, Schedule 1.0, on consumer expenditure, and Schedule 25.2, on participation and expenditure in education.

1.4.2 The survey covered the whole of the Indian Union except for Leh (Ladakh) and Kargil districts of Jammu & Kashmir (for the Central sample, which is surveyed by NSSO staff), (ii) interior villages of Nagaland situated beyond five kilometres of a bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.4.3 Like all regular rounds of NSS, this survey too had most of the States and Union Territories participating through 'State samples' surveyed by the State Statistical Directorates, in addition to the 'Central sample' surveyed by NSSO. In the Central sample, out of 7984 villages and 4704 urban blocks selected for this round, 7953 villages and 4682 sample blocks were finally surveyed in rural and urban India. This report is based on the Central sample only. Statement 1.0 presents the number of villages and urban blocks allotted and finally surveyed for NSS 64th round besides the numbers of sample households and persons surveyed for Sch. 25.2: 'Participation and Expenditure in Education'.

1.4.4 From each sample village or urban block, eight households were selected for the survey on 'Participation and Expenditure in Education'. For each sample household some general particulars such as age, sex, educational level attained, current attendance and enrolment status, etc. were collected from all the household members. For persons of age 5-29 years, who formed the main target group of the survey, further information on current attendance and enrolment status in educational institutions was obtained. More detailed data on education was collected from the persons in the target age-group who were reported to be currently attending at primary level or above. This included information on type of education, details of course, level of current attendance, class/ grade/ year of study, type of management of educational institution, whether the institution is recognised, details of benefits received, if any, such as fee waiver, scholarship, free study materials and free mid-day meals, and detailed break-up of private educational expenditure for each person. Those currently not attending any educational institution were asked whether they had ever been enrolled, and if so whether they had completed their education or discontinued midcourse, and what was the main reason for dropping out or for non-enrolment.

1.5 Layout of the report

1.5.1 Major definitions and concepts related to the survey are given in Chapter II. A summary of the findings of the survey are presented in the three subsequent chapters. Literacy and completed educational level for the population and the current attendance/ enrolment status of persons of age 5-29 in educational institutions are discussed in Chapter III. A detailed analysis on participation in the education system of the country, various incentives availed and private expenditure incurred on education, for persons in the age-group 5-29 years currently attending at primary level and above, is presented in Chapter IV. Non-enrolment and the educational wastage in terms of drop-out or discontinuance, and the reasons thereof, are discussed in Chapter V. The detailed all-India statistical tables, are presented in Appendix A. The sampling design and estimation procedure is given in Appendix B while a facsimile of the schedule of enquiry canvassed in the field is in Appendix C.

1.5.2 The analysis has been done primarily at all-India level while the corresponding state level estimates of major parameters have been summarised in the state-level statements placed at the end of each chapter. By and large, ratios obtained from the survey are presented, while the aggregates of population/household are given as marginal row/column totals in the detailed Appendix tables.

1.5.3 *Use of estimated aggregates:* The estimates, in this report, are generally presented as ratios. However, the estimates of aggregates are also given in the margin of the detailed tables in Appendix A. It may be noted that estimates of ratios are generally expected to be robust and the estimates of aggregates may be used only to combine the ratios but not for generating estimates of absolute numbers for a characteristic. To estimate an absolute number in any category, it is advisable to apply the survey estimates to the Census population or projections¹. It may also be noted that the estimated proportions and ratios are generally presented as per 1000 numbers, with the figures rounded off. Therefore, the accuracy of the aggregates derived from the estimates of ratios provided in this report will be limited to the number of significant digits available in the ratio or percentage estimates used.

¹ In Appendix D, the projected population as on 1st March 2007 and 1st March 2008 supplied by the RGI Office have been presented along with those projected for 1st January 2008 using compound rate of growth. The projections have been given separately for male and female population of rural and urban sectors.

Chapter II

Concepts and Definitions

2.1 Important concepts and definitions used in this survey as given in the instructions to field staff conducting the survey are stated below.

2.1.1 Household: A group of persons normally living together and taking food from a common kitchen constitute a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but excludes temporary visitors and guests (expected total period of stay less than 6 months).

2.1.2 Household monthly per capita expenditure (MPCE): Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It also includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Monthly per capita expenditure (MPCE) is the household consumer expenditure over a period of 30 days divided by household size.

2.1.3 Educational level: It refers to the stage of educational attainment. It is the highest level a person has completed successfully. The levels are:

- not literate
- literate without any schooling;
- literate without formal schooling
- literate with formal schooling:
 - below primary,
 - primary,
 - upper primary/middle,
 - secondary,
 - higher secondary,
 - diploma/ certificate course,
 - graduate,
 - post-graduate and above.

It may be noted that if a person has successfully passed the final year of a given level, then and only then will he/ she be considered to have attained that level of education. For example, for a person studying in Class IX the educational level will be middle and not secondary.

2.1.4 Level of current attendance: The term in the present report refers to the stage of education that a student is currently pursuing, if any. For example, the level of current attendance of a person studying in Class IX will be secondary. Here the categories are:

- never attended;
- ever attended but currently not attending;
- currently attending in:
 - non-formal education,

- pre-primary (nursery/ kindergarten, etc.),
- primary,
- upper primary or middle,
- secondary,
- higher secondary,
- diploma or certificate (below graduate level)
- diploma or certificate (graduate and above level)
- graduation level degree courses
- post-graduation and above degree courses

In the schedule used for data collection, the ‘levels’ of current attendance, at the higher stages of education, referred to more specific categories indicating not only stage of education but also subject of study. Thus, graduate in agriculture and graduate in medicine were given different ‘level codes’.

2.1.5 Literate: A person is considered literate if he/she can read and write a simple message in at least one language with understanding.

2.1.6 School education levels: A uniform pattern across the country for the number of years of schooling at primary level, upper primary/middle level, secondary level and a higher secondary level is yet to be achieved. Generally, the primary level refers to Classes I-V, the middle to Classes VI-VIII, the secondary to Classes IX-X and the higher secondary to Classes XI-XII. While in many states, this system is being followed, there are some states where the primary level comprises Classes I- IV, the middle Classes V to VII or VIII, the secondary Classes VIII-X, etc., and the higher secondary in some states is taught in colleges. The information pertaining to a state is recorded according to the pattern followed in that state¹.

2.1.7 Type of education: Education is broadly divided into three categories: (i) general education, (ii) technical and professional education and (iii) vocational education. General education, in this survey, includes general school education from the primary to the higher secondary level, normal university education for a degree, whereas technical/professional courses involve the hands-on training in addition to theoretical classes. Engineering, Medicine, Agriculture, Management, Chartered Accountancy, Cost Accountancy, etc. are examples of technical/ professional courses. The education which aims at imparting training in very specific fields through providing significant ‘hands-on’ experience in acquiring necessary skill, which will make them employable or create for them opportunities of self employment and the degree/ diploma/ certificate awarded by the institute which have recognition by State/ Central Government/ public sector or similar employers is included under vocational education. Education offered by ITIs, polytechnics, etc. are examples of vocational courses.

2.1.8 Course: A course a) is a structured educational programme having a specified syllabus, duration, level, etc. and b) necessarily involves appearing in some kind of examination/ performance appraisal for getting the degree/ diploma/ certificate or advancing to the next class/ level. Depending upon the subjects covered and the mode of instruction, the courses can be

¹ In Appendix E, the state-specific structure of levels of elementary education is given for ready reference (Source: NUEPA publication: Elementary Education in India, State Report Cards 2007-08.)

categorised broadly as (a) general, (b) technical/ professional and (c) vocational. For the purpose of this survey, only those courses covered under the definition of 'education' above are considered.

2.1.9 Basic course: When a particular member is undertaking more than one course, the basic course is identified as per following criteria –

- The course which is in the highest level is considered as the basic course.
- If all the courses simultaneously pursued currently are in the same level, then the course of the general education is the basic course.
- In absence of any general education, the course which involves higher cost, is taken as the basic course.
- If a person is enrolled both in regular course and course through distance learning then regular course is treated as the basic course irrespective of the cost involved.

2.1.10 Second course: If an individual is pursuing more than one course, then the basic course is taken as the first course in the way suggested above. After the first course is selected then from the remaining courses, the course which involves highest cost is taken as the *second course*.

2.1.11 Academic session: The academic session is defined in relation to the duration of the course in which one is enrolled in the following manner –

- i) If duration of the course is less than one year, the academic session covers the full duration of the course,
- ii) If duration of the course is more than one year, then generally at the end of every year there is an evaluation process through examination or otherwise, the passing of which enables the individual for to continue the course further. In such cases, the academic session is of 1 year. For the educational institutions pursuing three to six months semester system, too, academic session is taken as one year.

2.1.12 Nature of institution: This refers to whether the institution is recognised or not. A recognised school/ institution is one in which the course(s) of study followed is/ are prescribed or recognised by the government or a university or a board constituted by law or by any other agency authorised in this behalf by the central or state government.

2.1.13 Type of institution: This refers to the type of management by which the institution is run. It may be run by government or a local body or a private body either receiving or not receiving government aid. Thus, the four types are: (a) government, (b) local body, (c) private aided and (d) private unaided. All schools/ institutions run by central and state governments, public sector undertakings or autonomous organisations completely financed by government are treated as government institutions. All institutions run by municipal corporations, municipal committees, notified area committees, zilla parishads, panchayat samitis, cantonment boards, etc., are treated as local body institutions. A private aided institution is one which is run by an individual or a private organisation and receives maintenance grant from a government or a local body. A private unaided institution is one which is managed by an individual or a private organisation and is not receiving maintenance grant either from a government or from a local body.

2.1.14 Free education: Education is free of tuition fee in government schools in most of the states and also in private schools in some states up to certain levels of education. There are some schools where students up to a certain level are not required to pay tuition fees. Nevertheless, a fixed sum of money has to be paid such as development fee, library fee, etc. Education in such schools is still considered to be free. This applies to the institution as a whole and not to the specific situation obtaining for the student.

2.1.15 Exemption from tuition fees: This refers to exemption from payment of tuition fees granted to some students on some special consideration in those institutions where it is reported that the education is not free. The exemption may be full or partial.

2.1.16 Private expenditure on education: It is the sum total of all the expenditures incurred by the student on education (towards fees, books & stationery, uniform, transport, private coaching, study tours, etc.). This include all the expenditures incurred and/or to be incurred during the **current academic year/ session** on the education of the household members, aged 5-29 years who are currently attending at primary level and above.

2.1.17 Attendance and enrolment: The current attendance status refers to whether a person is currently attending any educational institution or not. While every person, who is attending an educational institution, is necessarily enrolled in that institution, it may so happen that a person, who is enrolled is not currently attending the institution. While most of the official educational statistics are based on enrolment, NSSO survey, because of its household approach, bases its analysis on the current attendance status.

2.1.18 Drop-out/ discontinuance: An ever-enrolled student currently not pursuing the education may be due to either: (i) he/ she has discontinued after completing the last level of education for which he/ she was enrolled or (ii) he/ she has discontinued education before attaining a specific level. For the first category, for example, if a person has completed the middle level but does not enrol for the next higher level of education, he/ she is not considered as a 'drop-out'. It is considered as a case of 'discontinuation'. However, if the person enrolls for the secondary level but does not complete it, then he/ she is considered a 'drop-out'. For this survey, 'drop-outs' and 'discontinuations' are treated alike.

2.1.19 Usual activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (major time criterion) during the 365 days preceding the date of survey is considered the *usual principal activity status* of the person.

2.2 Some concepts/ indicators used in the report:

2.2.1 Literacy rate: Percentage of literates in a population is taken as its literacy rate.

2.2.2 Adult literacy: Literacy rate for population of age 15 and above.

2.2.3 Decile class of MPCE: In the distribution of population of any domain by MPCE level, the first decile is the level of MPCE below which 10% of the population lie, the second decile, the

level below which 20% of the population lie, and so on. Thus the population can be divided into 10 decile classes (%) of MPCE: from 0 to the first decile (called 0-10%), from the first decile to second decile (called 10-20%), and so on. Averages of other variables of interest, computed separately for the 10 decile classes, help to portray the variation in the variable with the behaviour of MPCE. In this round decile classes are used in all-India tables separately for rural sector, urban sector and for rural and urban sectors combined.

2.2.4 Quintile class of MPCE: Similarly, the population of a domain can be divided into five quintile classes of MPCE. The first quintile of MPCE means the level of MPCE below which 20% of the population lie, the second quintile, the level below which 40% of the population lie, and so on. In this round quintile classes are obtained separately for rural sector, urban sector and for rural and urban sectors combined in each state.

2.2.5 Educated persons: Persons with completed education level secondary and above.

2.2.6 Student: A person in the age-group 5-29, who is currently attending formal education at primary level or above, is referred as 'student' in the discussion here.

2.2.7 Gross attendance ratio (GAR): For each class-group, this is the ratio of the number of persons in the class-group to the number persons in the corresponding official age-group. For example, for Class group I-V the ratio (in %), corresponding to normative age-group of 6-10, is

$$= \frac{\text{Number of persons attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

For the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, the corresponding official age-groups are taken as 11-13, 14-15 and 16-17 respectively.

2.2.8 Age-specific attendance ratio: For each age-group this measure gives an idea of proportion of persons of a particular age-group currently attending educational institutions, irrespective of the level or class in which they are studying. For example, for age-group 6-10, this attendance ratio is

$$= \frac{\text{Number of persons in age-group 6-10 currently attending educational institutions}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

2.2.9 Net attendance ratio: For each education class-group, this is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in the age-group. For example, for Class group I-V the ratio (in %) is

$$= \frac{\text{Number of persons of age 6-10 years currently attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

Similarly it can be obtained for the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, with the corresponding official age-groups as 11-13, 14-15 and 16-17 respectively.

2.2.10 Repeater: A student is taken as a 'repeater', if he/ she reported present class attended to be the same as the previous class attended.

Chapter III

Level of Education, Current Attendance & Enrolment Status

3.0.1 In the 64th Round survey, information on *level of education* attained was obtained for all the members of the selected sample households. These details are also available from other household surveys conducted by NSSO, such as surveys on employment-unemployment. But obviously, the performance of the educational infrastructure, facilities and incentives provided by the government as well as the private sector is best studied through the current attendance status of the school- and college-going population. The focus of the survey was on the persons of age-group 5-29 and their current attendance or enrolment status as this group contains the main beneficiaries of the education system in its *current* state. Accordingly, the survey generated detailed information on the nature of participation in education, various incentives availed of, and private expenditure incurred on education for persons aged 5-29 who were reported to be currently attending educational institutions at primary-or-above levels.

3.0.2 Our education system is also characterised by a high rate of early discontinuance of education, in addition to the sizeable portion of the population who do not enter the education system at all. To study the dimensions of discontinuance and non-enrolment, some information including reasons for discontinuance or non-enrolment, as the case might be, was collected from those in the age-group 5-29 who were not currently attending any educational institution.

3.0.3 Details of educational participation of those (in the target age-group) currently attending and the details of discontinuance or non-enrolment from those currently not attending any educational institution are dealt with in the next two chapters. The present chapter discusses the following specific aspects of literacy and access to school facilities:

- the major survey findings on literacy and level of education of the population
- current attendance and enrolment status of persons in the age-group 5-29 years
- distance of households to the nearest schools having primary/ middle/ secondary level.

3.1 Literacy and level of education of population

3.1.1 In NSS surveys, a person who can read and write a simple message in any language with understanding is considered *literate*. The proportions of literates among various age-groups of the population, with rural-urban and male-female classification, serve as key indicators of the socio-economic progress of the country. The current survey estimates (Statement 3.1) indicate that in 2007-08, less than two-thirds (64.5%) of the population of all ages were literate. The overall disparity in literacy across the population is heightened by the presence of both rural-urban and male-female disparity. However, the survey results over the years also reveal the diminishing of disparities across the segments. The literacy rate (i.e. percentage of literates) for all ages among rural female (RF), rural male (RM), urban female (UF) and urban male (UM)

populations was found to be 51.1%, 68.4%, 71.6% and 82.2% respectively. The corresponding rates two decades ago as estimated in NSS 42nd round (1986-87) were 24.8%, 47.6%, 59.1% and 74.0% respectively. Thus there has been quantum leap in the female literacy rates over the last two decades, with the rural female rate having more than doubled, although nearly half the female population of rural India still remains illiterate.

Statement 3.1: Literacy rate (%) for persons in different age-groups during 2007-08										
Age-group	Rural			Urban			Rural +Urban			All-India
	Female	Male	Total	Female	Male	Total	Female	Male	Total	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	
Age 15 & above	47.5	71.8	59.7	74.6	88.7	82.0	54.9	76.7	66.0	
Age 7 & above	56.7	77.0	67.0	78.1	89.9	84.3	62.3	80.5	71.7	
Age 5 & above	57.3	76.8	67.3	78.1	89.7	84.2	62.7	80.3	71.8	
All age (age 0 & above)	51.1	68.4	60.0	71.6	82.2	77.1	56.3	72.1	64.5	
Age 15 & above: NSS 52 nd Rd. (1995-96)	31.7	60.6	46.4	67.3	85.7	77.0	40.7	67.3	54.3	
Age 7 & above: NSS 61 st Rd. (2004-05)*	50.6	72.7	61.9	75.9	88.8	82.7	57.0	77.0	67.3	
All ages (age 0 & above): NSS 42 nd Rd. (1986-87)	24.8	47.6	36.6	59.1	74.0	67.0				

Ref: Table 5 in Appendix-A

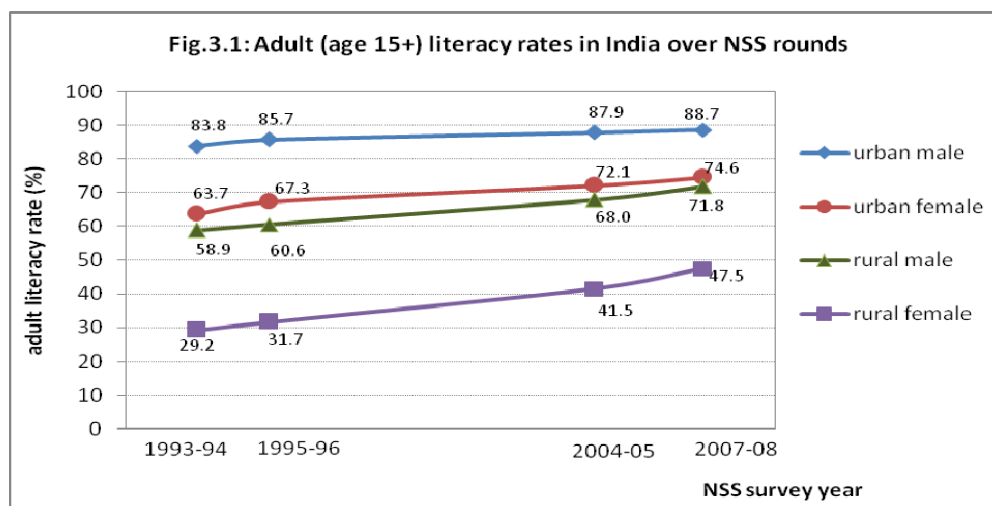

* quinquennial round of EUS

3.1.2 The literacy rates among the population of age 5 & above, 7 & above or 15 & above are, arguably, more meaningful indicators than literacy of persons of all ages. The 7-plus literacy rate facilitates comparison with estimates from the Population Census and also with past NSS rounds. In this round, rates for the 5-plus population were separately generated. The rates for these two age brackets (5-plus and 7-plus) were estimated to be more or less the same in the current round not only at all-India level but also at sub-category level, i.e. rural female, rural male, urban female and urban male. In fact, for rural females, the literacy rate for age 5+ exceeded that for age 7+, indicating that the proportion of literates among rural females in the age-group 5-6 exceeded the proportion for the age-group 7 & above. For age 7 & above, the literacy rate in rural India was 67% (56.7% for females and 77% for males) while in urban India it was 84.3% (78.1% for females and 89.9% for males). Some improvement in literacy appears to have taken place in recent years, especially in the rural sector, where the 7-plus literacy rate for males has increased by over 4 percentage points and the rate for females by about 6 percentage points since 2004-05.

3.1.3 Among the major states, the literacy rate for population aged 7 & above varied from 58.1% in Bihar to 93.9% in Kerala (Statement 3.1.1). Other low-literacy states included Rajasthan (61.7%), Andhra Pradesh (63.5%), Jharkhand (64.6%), Uttar Pradesh (66.2%), J&K (67.7%) and Orissa (68.3%), while Assam (83.8%) and the other North-Eastern States, Maharashtra (80.9%), Himachal Pradesh (80.4%) and Tamil Nadu (80%) were among the more literate ones.

3.1.4 **Adult literacy:** 66% of the country's adult population (population of age 15 & above) was found to be literate. Among rural females, rural males, urban females and urban males, the adult literacy rates were 47.5%, 71.8%, 74.6% and 88.7% respectively. Comparison with past NSS

rounds indicates that both the rural-urban and the male-female disparities have reduced over time but nevertheless remain significant (Fig. 3.1).

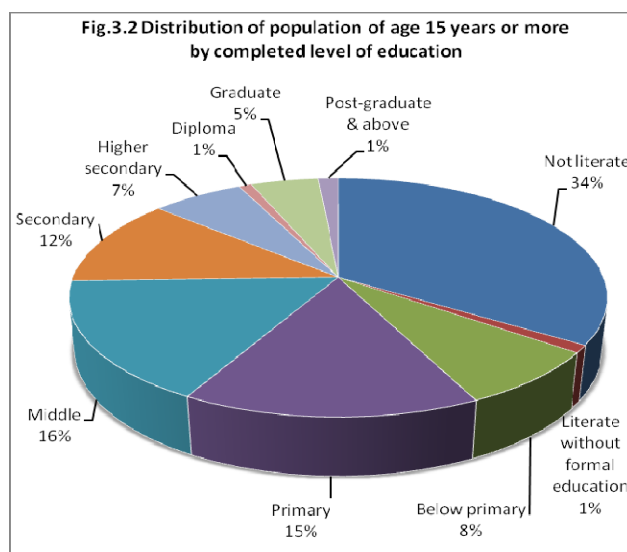

Note: 1993-94 (EUS, 50th rd.), 1995-96 (Social Consumption Survey, 52nd rd.), 2004-05 (EUS, 61st rd.) & 2007-08 (current survey)

3.1.5 Distribution of population by educational level is a dynamic phenomenon, the study of which refines the measurement of social development. In NSS surveys the highest completed level of education is reported for each member of the surveyed household after taking into consideration the education attained by her/ him in general, technical, and vocational streams. The levels of education include non-formal education, below primary, primary, middle/ upper primary, secondary, higher secondary (HS), diploma/ certificate courses, graduate level degree courses, post-graduate-and-above level degree courses, etc.

Statement 3.2 : Percentage distribution of persons of age 15 years & above by completed level of education									
Level of education	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Not literate	52.5	28.2	40.3	25.4	11.3	18.0	45.1	23.3	34.0
Literate:									
Without formal education	0.8	1.1	1.0	0.9	0.9	0.9	0.9	1.1	1.0
Below primary	7.8	9.4	8.6	5.9	5.5	5.7	7.3	8.3	7.8
Primary	14.4	17.7	16.0	13.2	13.3	13.2	14.0	16.4	15.3
Middle	12.3	19.9	16.2	15.9	18.8	17.4	13.3	19.6	16.5
Secondary	7.2	12.6	9.9	15.6	18.4	17.0	9.5	14.3	11.9
Higher Secondary	3.1	6.4	4.7	10.0	12.1	11.1	5.0	8.0	6.5
Diploma	0.3	0.8	0.6	0.8	2.4	1.7	0.5	1.3	0.9
Graduation	1.3	3.0	2.2	9.3	13.3	11.4	3.5	6.0	4.8
Post-graduation & above	0.3	0.8	0.5	3.0	3.9	3.5	1.1	1.7	1.4
Total	100	100	100	100	100	100	100	100	100

Ref: Table 5 in Appendix-A

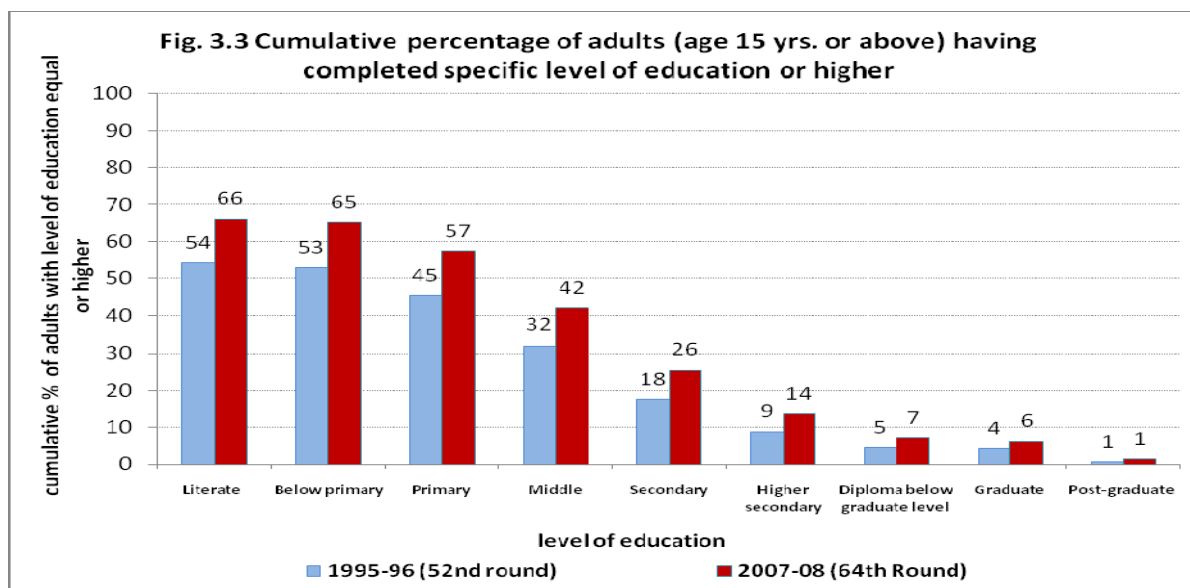

3.1.6 The distribution of population of age 15 & above across levels of education in the current survey indicates (Statement 3.2) that the literates (66%) included 1% who had no formal education and 7.8% who had not completed primary level. The highest level of education successfully completed was primary for 15.3%, middle level for 16.5%, secondary for 11.9%, higher secondary (HS) for 6.5%, diploma for 0.9%, graduation for 4.8% and post-graduation and above for the remaining 1.4% of the adult (15+) population. The proportion of persons having completed graduate (or above) level was only 1.6% among rural females, 3.8% among rural males, 12.3% among urban females and 17.2% among urban males. The distribution of the entire adult (age 15 & above) population of the country by completed level of education can be seen at a glance from Fig.3.2.

Statement 3.3: Percentage distribution of population (15 years & above) by educational attainment levels in 1995-96 (52nd round) and 2007-08 (64th round)								
Category	All-India							
	Not literate		Literate and up to primary		Middle		Secondary and above	
	1995-96	2007-08	1995-96	2007-08	1995-96	2007-08	1995-96	2007-08
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Rural female	68.3	52.5	17.0	23.0	8.7	12.3	6.0	12.2
Rural male	39.4	28.2	27.9	28.2	16.8	19.9	15.9	23.6
Urban female	32.7	25.4	21.0	20.0	17.1	15.9	29.2	38.7
Urban male	14.3	11.3	22.1	19.7	20.6	18.8	43.0	50.1

Ref: Table 5 in Appendix-A

3.1.7 As compared to the 52nd round, there has been a shift in the distribution towards higher levels of educational attainment not only for the entire population, but also for each of the four population categories (Statement 3.3 and Fig.3.3).

3.1.8 Further, the distribution of adult literates (age 15 & above) by completed level of education revealed wide disparity not only in the proportion of literates, but also in the completed educational level of the literates among the above-mentioned four population categories (viz. RF, RM, UF & UM). The rural-urban and female-male disparities accentuate as one moves up along the education levels. The gender disparity is more pronounced in the rural areas than in the urban. Also, the disparity widens with increase in level of education.

Statement 3.4: Percentage distribution of literates of age 15 years & above by completed level of education
All-India

Level of education	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Literate but below primary	18.1	14.6	16.1	9.1	7.2	8.1	14.9	12.3	13.3
Primary	30.3	24.7	26.8	17.7	15.0	16.1	25.4	21.4	23.1
Middle	25.9	27.8	27.1	21.3	21.2	21.2	24.1	25.6	25.0
Secondary	15.2	17.6	16.6	20.9	20.8	20.8	17.2	18.6	18.0
Higher Secondary	6.5	8.9	7.9	13.4	13.7	13.6	9.1	10.4	9.8
Above Higher Secondary	4.0	6.4	5.5	17.6	22.1	20.3	9.3	11.7	10.7
Total	100	100	100	100	100	100	100	100	100

Ref: Table 5 in Appendix-A

3.1.9 About 48% of rural female adult literates, compared to only 22.2% of urban male literates, were of level primary or below. On the other hand the proportion of adult literates at above-HS level varied from 4% for rural females and 6.4% for rural males, to 17.6% for urban females and 22.1% for urban males. For the adult literate population of the country as a whole, 36.4% were of level primary and below and only 10.7% were of level above-higher-secondary.

3.1.10 To classify the population by economic level, information on monthly consumption expenditure was recorded for each surveyed household. This enabled the monthly per capita expenditure (MPCE) of the household to which a person belonged to be used as an indicator of his or her economic level. In Statement 3.5, the analysis of Statement 3.4 is done separately for

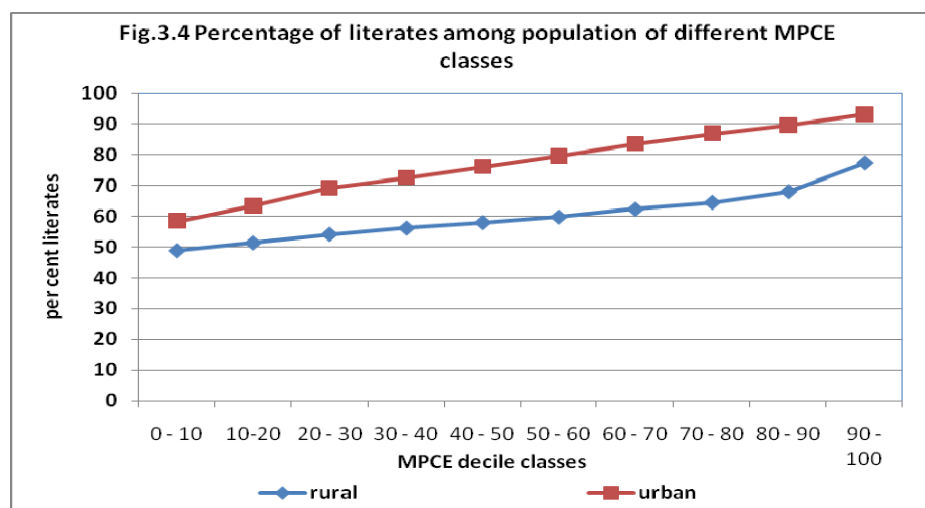

persons (males and females together) at ten different economic levels (ten decile classes of MPCE) It is seen that the economically disadvantaged sections of population were also disadvantaged on account of their educational levels.

Statement 3.5: Percentage distribution of persons of MPCE decile classes by completed level of education										
All-India										
Level of education	Decile class (%) of MPCE*									
	0 - 10	10 - 20	20 - 30	30 - 40	40 - 50	50 - 60	60 - 70	70 - 80	80 - 90	90 - 100
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)

*Classes formed separately for rural and urban population

3.1.11 In rural India, 51.2% of the population in the lowest decile class of MPCE were not literate. Even in the highest decile class, 22.8% persons were not literate. The proportion of *educated* persons (i.e. those with education level secondary and above), increases along the decile classes of expenditure from 4.2% in the lowest to 31.3% in the highest decile class.

3.1.12 In urban India the situation was not very different either. The proportion of not-literate persons decreased steadily from 41.7% in the poorest class to 6.9% in the richest decile class of MPCE while the proportion of *educated* persons increased steeply from 9.4% in the lowest to 70.3% in the highest MPCE decile class. The disparities in literacy in the respective economic levels were higher in the urban than in the rural sector. The difference in literacy rates between lowest and highest decile class of MPCE was 28 percentage points in rural areas whereas the corresponding difference in urban areas was 35% (Fig.3.4).

3.2 Distance to nearest school having primary/ middle/ secondary level classes

3.2.1 Logistics in education system, in terms of distance from school is one of the important factors affecting access to education and attendance. In this survey information was obtained from all the sample households on their distance from the nearest school providing school education at (a) primary (b) middle and (c) secondary level. As shown in Statement 3.6, more than 90% of rural as well as urban households reported having a school with primary classes within 1 km. But availability of schools with middle or secondary level classes differed considerably between rural and urban sectors. Only 61.6% of rural households, compared to 82.5% of urban households, had a school within a km providing middle level classes. For secondary level classes, the proportion was 30.7% for rural compared to 68.6% for urban households. Further, about 33% of rural households did not have any secondary school within a distance of 3 km.

Statement 3.6: Percentage distribution of households by distance to schools having (a) primary (b) middle (c) secondary educational level in rural and urban India							All-India
Sector	Level	Distance (d) to nearest school					Total
		d<1km	1km≤d<2 km	2km≤d<3 km	3km≤d<5km	d≥5 km	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Rural	Primary	91.7	6.5	1.2	0.2	0.1	100
	Middle	61.6	17.1	12.2	5.8	3.1	100
	Secondary	30.7	16.6	19.7	15.8	17.1	100
Urban	Primary	92.3	6.7	0.9	0.1	0.0	100

	Secondary	68.6	22.1	5.6	2.5	1.0	100

Ref: Table 2 in Appendix-A

3.2.2 A summary of information on availability of schools with primary, middle and secondary level classes in rural and urban sectors of the states/ UTs is presented in Statements 3.6.1R and 3.6.1U.

3.2.3 The logistics of educational access across MPCE decile classes were found to be distinctly revealing, particularly in rural sector (Statement 3.6a). The availability of primary schools at a distance less than 2 km was uniform at around 98% of households of various levels of living. However, the logistic access was noted to be inversely elastic to level of living. The availability of middle level schools in close proximity of household was less for lower decile classes of MPCE and was gradually increasing in successive decile classes of MPCE. The inverse trend was more pronounced in case of secondary education in rural India. In rural India, only 39% households in the lowest decile class of MPCE, had a school with secondary level classes at a

distance of 2km. or less whereas in the highest decile class 59% of households had such educational access. Similar phenomenon was observed in urban sector as well, but the range of disparity between the poorer and richer households was less compared to that in its rural counterpart.

Statement 3.6a: Percentage of households belonging to different MPCE decile classes in rural and urban India with distance less than 2 km. to school having primary/ middle/ secondary level classes						
All-India						
Decile class* (%) of MPCE	Percentage of rural households with distance less than 2 km to school having classes of level			Percentage of urban households with distance less than 2 km to school having classes of level

Ref: Table 2 in Appendix-A

*Classes formed separately for rural and urban population

3.3 Current Attendance and Enrolment Status

3.3.1 Current attendance status refers to whether a person is currently attending any educational institution or not. In this survey, current attendance status was recorded for persons in the age-group 5-29 years. Persons attending educational institutions were asked whether their level of attendance was informal or formal and, if formal, whether at pre-primary, primary or higher level. While persons attending must necessarily be enrolled in educational institutions, those not attending may or may not be enrolled in any institution. Therefore only the persons not attending were asked about their current educational enrolment status.

Statement 3.7 : Percentage of population in the age-group 5-29 years and the proportion of persons currently attending in the age-group									
All-India									
Characteristic	rural			urban			rural+urban		
	female	male	all	female	male	all	female	male	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Percentage population in age-group 5-29 years	46.1	48.1	47.2	45.4	47.2	46.3	45.9	47.9	46.9
Percentage of persons currently attending any education in the age-group 5-29 years	47.1	55.4	51.5	51.6	54	53	48.4	55.1	51.9

Ref: Table 1 and 15 in Appendix-A

3.3.2 Statement 3.7 indicates that about 47% of the entire population belonged to the age-group 5-29 years and 52% of persons in the age-group were currently attending educational institutions. There was no noticeable rural-urban disparity in either respect, but there was some gender

disparity with 48.4% of females and 55.1% of males in the target age-group reported to be attending education currently.

3.3.3 On the whole, our target population for the survey (age 5-29) included almost half of the population of the country and a little over half of the target population were currently attending any educational institution. The statewise proportions of population in this particular age-group and the percentage currently attending in rural and urban areas are given in Statement 3.7.1.

3.3.4 The current attendance and enrolment status of persons in the age-group 5-29 years can be summarised as below.

Statement 3.8: Percentage distribution of persons of age 5-29 years by current enrolment and attendance status									
All-India									
Sector	Sex	Percentage of persons							
		currently not enrolled	currently enrolled but not attending	currently attending					Total
				below primary	primary	middle	secondary	HS & above	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Rural	female	51.2	1.5	0.8	25.2	11.7	5.3	4.1	47.1
	male	42.8	1.6	0.9	27.8	13.5	6.8	6.4	55.4
	person	46.8	1.6	0.9	26.6	12.6	6.1	5.3	51.5
Urban	female	46.9	1.3	1.2	19.6	12.0	6.7	12.1	51.6
	male	44.4	1.5	1.3	20.8	12.0	7.2	12.7	54.0
	person	45.6	1.4	1.2	20.3	12.0	7.0	12.5	53.0

	male	43.2	1.6	1.0	26.0	13.1	6.9	8.1	55.1
	person	46.5	1.6	1.0	25.0	12.5	6.3	7.1	51.9

Ref: Table 7 in Appendix-A

3.3.5 As shown in Statement 3.8, 46.5% of population in the target age-group (5-29 years) was currently not enrolled in any educational institution, 1.6% was enrolled but not attending and 51.9% were currently attending educational institutions. A major gap remained between male and female attendance position, especially in the rural sector with 55.4% of rural males, compared to 47.1% of rural females of the target age-group, currently attending education. Among all the persons who were currently attending, a majority (26%) were in the primary level or below.

3.3.6 Among States, as evident from Statements 3.8.1R, 3.8.1U and 3.8.1C, the overall proportion of persons currently attending in the age-group 5-29 years was found to be least in case of larger states like Orissa (45.5%), Gujarat (46.5%), etc. and as high as 60% or more for States like Kerala, Himachal Pradesh, Uttarakhand, and Jammu & Kashmir, besides a few small North-Eastern States. The ordering of States in this respect does not vary significantly between male and female populations or between rural and urban sectors of the states.

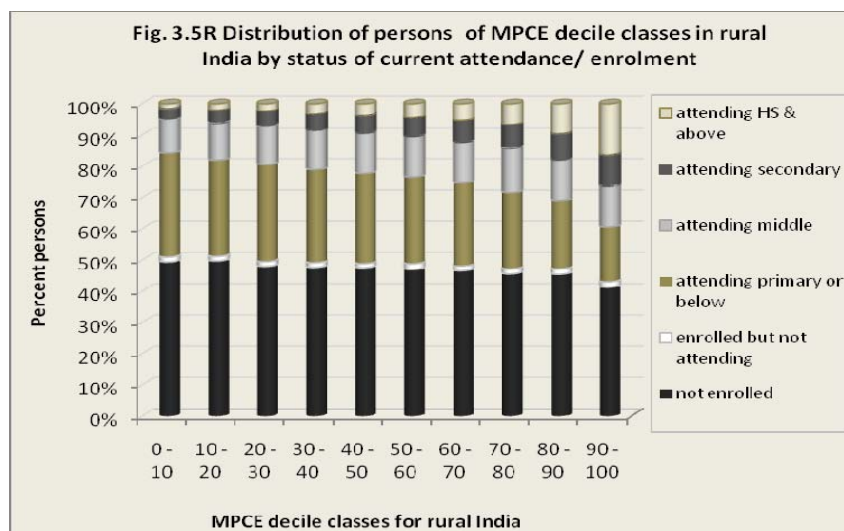

3.3.7 Variation in current participation and enrolment status of persons across economic levels is shown in Statement 3.9, separately for rural and urban sectors.

Statement 3.9: Percentage distribution of persons of age 5-29 years for MPCE decile classes by current enrolment and attendance status

Ref: Table 8 in Appendix-A

*Classes formed separately for rural and urban population

3.3.8 The proportion of persons in the age-group 5-29 years currently attending educational institutions increases at a steady but gradual pace with increase in economic level – from 48.9% for the bottom 10% of population to 57% for the top 10%, ranked by MPCE, in the rural sector and from 45.7% for the bottom 10% to 62.7% for the top 10% in the urban sector. As in the NSS 52nd Round, the proportion of persons currently enrolled but not attending was found to be very low in general, contradicting the common perception that the rolls of the educational institutions include a good number of children who have discontinued attendance due to various reasons. It is possible, of course, that many such students existed but were not reported by their households as enrolled, though they remained on the school rolls.

3.3.9 Figures 3.5R & 3.5U show that proportion of persons currently not enrolled has been very high even in the highest decile class in both the rural and the urban sector. This might be because of the presence of persons who were enrolled in the past but were currently not enrolled as they had completed the desired level of education.

3.3.10 In NSS surveys, information on social group and religion is collected at household level, all the members of the household being classified according to the religion and social group of the head of the household. Percentage distribution of population by current attendance and enrolment status is presented in Statement 3.10 for persons belonging to different social groups and in Statement 3.11 for persons belonging to various religious groups. The overall percentage of persons of age 5-29 years currently attending varied between 48% and 54.7% for different social groups and between 46.2% and 58.3% for different religious groups. The disparity among religious groups in this respect was greater in urban India than in rural India.

Statement 3.10: Percentage distribution of persons of age 5-29 years by current enrolment and attendance status for each social group

* includes Jainism, Zoroastrianism etc.

3.3.11 In the next chapter, Chapter IV, the discussion will focus on only those persons of age 5-29 who were reported as currently attending at primary level and above, while Chapter V will cover persons of age 5-29 who have either never attended any educational institution or were not attending any educational institution currently though they might have done so in the past.

3.3.12 *Age-structure of population:* Many of the results on participation rates across sectors and states in part reflect differences in the age composition of the population in the age-group 5-29 in different sectors and states. A full understanding of the behavior of the ratios relating to participation in education of the population in the age-interval 5-29 years at national and state level therefore requires some familiarity with the age-structure of this population in terms of sub-age-groups, in India and the states. Statement 3.12 below gives the percentages of all-India rural and urban population in the 5 age-groups 5, 6-13, 14-17, 18-24 and 25-29 as estimated from this survey. Similar information at state/UT level is given in Statements 3.12.1R and 3.12.1U.

Statement 3.12 : Percentage of total population in different age-groups between ages 5 and 29

Chapter IV

Details of Participation and Expenditure in Education

4.0.0 The primary focus of the survey is on persons of age 5-29 years who are considered to be the main users of the formal education system. In the previous chapter, the discussion on current attendance status or enrolment status of persons of age 5–29 years took all levels of education, including informal and pre-primary, into consideration. For studying the details of participation and expenditure in education, however, the focus is only on persons of the age-group currently attending formal education at primary level or above, who will be referred to as ‘students’ in the discussion that follows. This chapter provides an analytical synthesis based on the survey findings in its three sections detailing on participation in education, educational incentives and private household expenditure on education.

A. Participation in Education

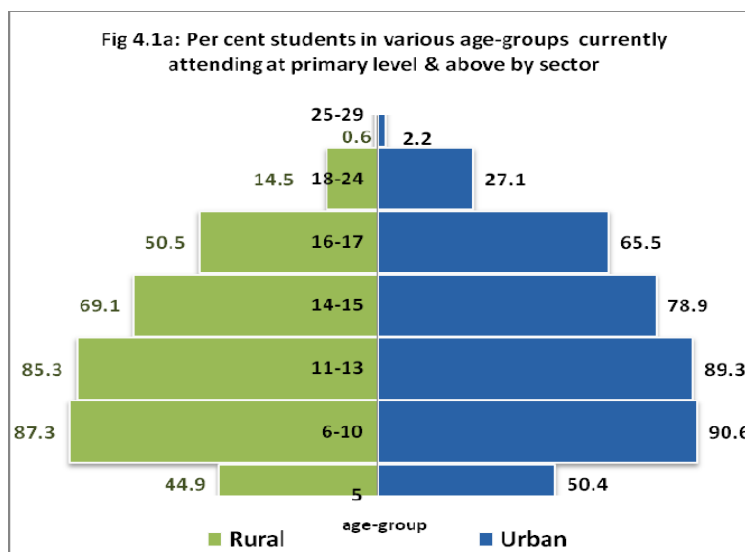

4.0.1 For each ‘student’ in the surveyed households, detailed particulars of participation have been obtained for at most two courses attended. Besides the number of courses attended by the person, the information profile for each course attended covered the following items:

- type of current education (general/ technical/ vocational),
- course or broad subject category
- level of current attendance (primary/ middle/ secondary etc.),
- type of institution attended (government/ local body/ private aided/ private unaided),
- nature of institution (whether recognized) – for private unaided institutions only,
- present and previous class/ grade/ year of study,
- whether repeating in the same class,
- whether changed educational institution, etc.

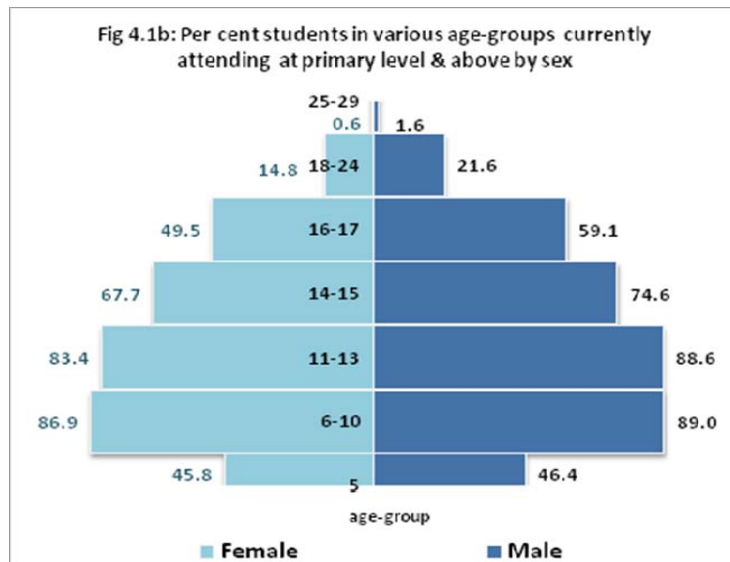

4.0.2 Based on these, an analysis of participation in education of school- and college-going population has been attempted in the first part of this chapter.

4.1 Age-group-wise pattern of current attendance

4.1.1 Figs. 4.1a and 4.1b show variation in the proportion of students (currently attending in educational institutions at primary-and-above level) over different age-groups within the broad age-group 5-29 by sector and by sex respectively.

4.1.2 About 45% of rural children and 50% of urban children of age 5 were currently attending. Among children in the age-group 6-10 and 11-13, the percentage was between 85 and 91 and there was no major differences between female and male, or rural and urban. As one moves to higher age-groups, the percentage begins to fall rapidly, reaching 50% at the age-group 16-17 in rural areas. In the age-group 18-24, the percentage of students was 27% in urban areas but less than 15% in rural areas. The gap between rural and urban percentage of students widens with increase in age, and, to a lesser extent, so does the gap between female and male percentage.

4.1.3 General school education is divided into primary, middle or upper primary, secondary and higher secondary levels. In most states these terms refer to Classes I-V, VI-VIII, IX-X and XI-XII respectively, but in some states there are slight deviations. As the number of years corresponding to primary, middle, secondary and higher secondary is not uniform in all the states, class-wise grouping is more appropriate for studying current attendance rates.

4.1.4 Age-specific current attendance in education not only provides demographic cross-section of participation in education but also envisions its short to medium term perspective for the population.

Statement 4.1 : Percentage of 'students' in various age-groups¹ between 5 – 29 years and their per cent distribution across broad class groups of education								All-India

Ref.: Table 15 in Appendix-A

including diploma with minimum entry requirement below HS

4.1.5 Statement 4.1 shows that the majority of students in each age-group belong to a particular class-group. For example, children in the age-group 6-10 were mostly in classes I-V, those aged

¹ Most of the age-groups have, in fact, been formed according to the official ages for each class-group.

11-13 were in classes VI-VIII, those aged 14 -15 in IX-X, those aged 16-17 in XI-XII (including diploma with minimum entry requirement below-higher-secondary) and those of age 18 & above at post-higher-secondary level. Also, there was some indication that many of the rural students were attending classes at relatively higher age compared to their urban counterparts. Although there was some difference in the proportion of male and female students attending educational institutions in the higher age-groups, there was not much difference between their distributions across the class-groups.

4.1.6 Percentage of students of different age-groups currently attending at primary level and above in each state/ UT has been presented separately for rural and urban sectors in Statements 4.1.1R& 4.1.1U. There is marked variation in proportion of 'students' among the states, especially at age 5 and in the highest three age-groups 16-17, 18-24 and 25-29. More than 90% of rural children of age 5 in Tamil Nadu were found to be attending primary level classes compared to 45% for all-India. However, in the higher age-groups, Kerala was the major state with the highest proportions of students. In urban areas the scenario was not very different. Kerala had only about 31% of age-5 children in primary education compared to more than 80% in Tamil Nadu, Himachal Pradesh, etc. But in the subsequent age-groups, Kerala had noticeably high proportions of students attending primary-or-above level classes.

4.1.7 The distribution of students of all ages between 5 and 29 years by level of current attendance is summarised separately for the four categories of population - rural female, rural male, urban female and urban male - in Figure 4.2.

4.1.8 In the rural areas, among both females and males, more than 50% of students were at primary level while another 25% were at middle level. In the urban areas the proportion of males and females in the primary classes was about 38-39%, while the proportion of students at higher secondary level and above (including diploma of various levels) was more than double the rural proportions. The middle and secondary levels together claimed more or less the same share (36 to 37%) for all the four categories of students.

4.1.9 The rural-urban differentiation in the distribution of students in terms of level of current attendance may also need to be viewed in the context of access to schools of population in these two sectors. As mentioned in Statement 3.6 in the previous chapter, access to school with secondary level classes within 3 km was available to only two-thirds of rural households, compared to more than 96% of urban households.

Ref: Table 11 in Appendix-A

4.2 Current Attendance by Type of Education

4.2.1 Education is broadly divided into three categories: (i) general education, (ii) technical and professional education and (iii) vocational education. General education in this survey included school education at primary, middle, secondary and higher secondary level, and normal university education at graduate and post-graduate level. Technical or professional education included courses involving hands on training in addition to theoretical classes, viz. Engineering, Medicine, Agriculture, Management, Chartered Accountancy, Cost Accountancy, Computer courses of various levels etc. Vocational education covered courses imparting training in specific fields through significant ‘hands-on’ exercises for acquiring necessary skill in order to create employment opportunity. Courses offered at ITIs, polytechnics, etc. were examples of vocational education. Also, information on type of education was collected separately for the ‘major or basic course’ and the ‘second course’ as defined in Chapter II.

4.2.2 It is important to note that in the NSS 52nd round (July 1995 – June 1996), education was categorized into either (i) general education or (ii) technical and vocational education. Moreover, the normal university education for Engineering and Medicine was taken as a part of general education and only technical/ vocational courses at ITIs and polytechnics were included in the technical and vocational education category. In the 52nd round the number of sample persons pursuing technical or vocational education netted in the survey was very low even at all-India level, which gave an estimate of 6.45 lakh students, or just about 1.7% of total post-middle-level attendance. Not surprisingly, therefore, the discussion on participation and expenditure in that round concentrated on general education only.

4.2.3 The present survey has taken note of emerging changes in the education system with a significant increase in the aggregate attendance in technical and vocational education at post-middle level. The estimated number of students attending technical and vocational education has soared to almost nine times the estimate from the 52nd round, contributing about 8.2% of total post-middle-level attendance in major course. The inclusion of even normal university education in engineering and medicine in technical education in this round is likely to have contributed significantly to this increase in number.

Statement 4.2: Percentage distribution of students of age 5-29 years by type of education received through the major course attended					
					All-India
Sector	Sex	Percentage distribution of students in type of education			
		General	Technical	Vocational	All
(1)	(2)	(3)	(4)	(5)	(6)
Rural	Female	99.3	0.6	0.1	100
	Male	98.5	1.2	0.3	100
	Person	98.9	0.9	0.2	100
Urban	Female	95.3	4.4	0.3	100
	Male	94.6	5.0	0.4	100
	Person	95.0	4.7	0.3	100
Rural+Urban	Female	98.2	1.6	0.2	100
	Male	97.5	2.2	0.3	100
	Person	97.8	1.9	0.3	100

Ref: Table 31, Appendix-A

4.2.4 Statement 4.2 shows percentage distribution of students aged 5-29 by the type of education they received in the major or basic course they were attending. The high share of general education (97.8%, with 99% in rural areas and 95% in urban areas) is not surprising, considering the fact that more than 93% of students were in level HS or below, which essentially comes under general education. Therefore, at post-HS level, the proportion of students in general education was another 4.8%, while only 1.9% was in technical education and 0.3% were in vocational education. The percentage of students pursuing technical education was 4.7% in urban areas (with little difference in the percentage for females and males) and only 0.9% in rural areas (1.2% among rural males and 0.6% among rural females). The proportion receiving vocational education was 0.2% for rural students and 0.3% for urban students.

4.2.5 A small fraction (0.1%) of students were reported to be attending a second course. But about 75% of second courses attended were under technical education – 63% in case of rural and 81% in case of urban sector. Another 22% of second courses were under vocational education,

the rural proportion being 34% and the urban, 16%. Only 3% of second courses attended were under general education.

4.3 Attendance Ratios

4.3.1 In most of the official educational statistics, enrolment ratios are taken as important indicators which give an idea of the proportion of a population enrolled in educational institutions. Gross enrolment ratio, age-specific enrolment ratio and net enrolment ratio are taken as three principal indicators. Now the NSS surveys because of their household approach have the advantage of being able to collect information on attendance, rather than that on enrolment, in the educational institutions. Therefore, instead of enrolment ratios, the corresponding attendance ratios are obtained.

Gross attendance ratio (GAR)

4.3.2 For each class-group, this is the ratio of the number of persons in the class-group to the number persons in the corresponding official age-group. For example, for Class group I-V the ratio (in %), corresponding to normative age-group of 6-10, is

$$= \frac{\text{Number of persons attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

4.3.3 For the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, the corresponding official age-groups are taken as 11-13, 14-15 and 16-17 respectively. Accordingly, for broader class-groups like I-VIII, I-XIII and post-HS (higher secondary) the age-groups taken are 6-13 years, 6-17 years and 18-24 years.

4.3.4 In the gross attendance ratio, the denominator consists of all persons in the official age-group, whether attending or not, while the numerator includes both the over-aged and the under-aged students as long as they are studying in Classes I to V. Therefore, it can work out to more than 100 as well. In spite of this shortcoming, this indicator is used quite widely, for comparison with gross enrolment ratio.

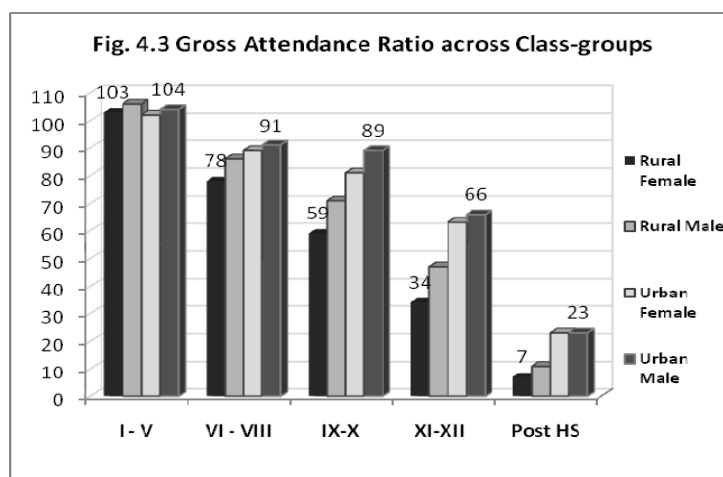

Statement 4.3: Gross attendance ratio by broad class group in any education									
Class Group	Rural			Urban			Rural+Urban		
	Female	Male	Person	Female	Male	Person	Female	Male	Person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
I - V	103	106	105	102	104	103	103	106	104
VI - VIII	78	86	82	89	91	90	81	87	84
I-VIII	94	99	97	97	99	98	95	99	97
IX-X	59	71	66	81	89	85	64	75	70
XI-XII #	34	47	41	63	66	65	42	53	48
Post-HS	7	11	9	23	23	23	11	15	13

Ref: Table 16A in Appendix-A

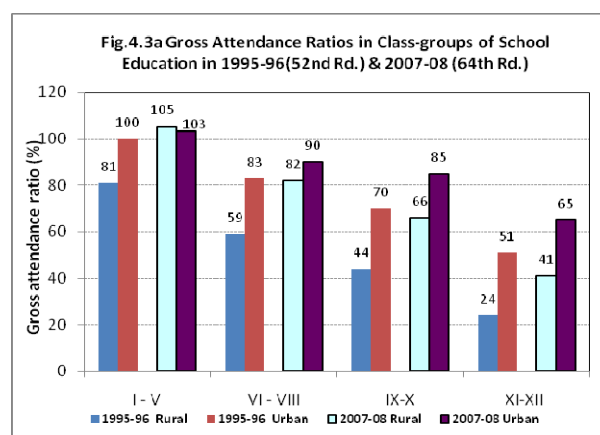

including diploma with minimum entry requirement below HS

4.3.5 Statement 4.3 presents the gross attendance ratios for four class-groups of school education and for the combined class-groups I-VIII and 'post-HS' level. In the first class-group, i.e. Classes I-V, the gross attendance ratio for all the categories (viz. rural female, rural male, etc.) is more than 100.

4.3.6 For the Class-group I-VIII, which corresponds to elementary education as a whole, the GAR was 97% in the rural and 98% in the urban sector. For females, the ratio was marginally lower – 94% in rural and 97% in urban – compared to 99% for males in both the sectors. However, there was sharp decline in GAR in the subsequent class-groups, i.e. IX-X, XI-XII and post-HS. Further both the rural-urban and the female-male disparity in GAR increased in the higher class-groups.

4.3.7 In Statement 4.3.1 gross attendance ratio has been presented for the Class-group I-VIII as a whole with 6-13 years as the corresponding age-group, for all the broad population categories, i.e. rural, urban, female, male, etc. in each state/ UT. This ratio describes the attendance in elementary education in totality and therefore has special significance. In a large number of states the ratio was more than 100 in almost all the population categories, which would indicate presence of under-aged and over-aged students even in the broader class-group of elementary education.

4.3.8 Noticeable improvement² was seen in GAR from the 52nd round levels, especially in rural areas, where the GARs increased by about 20 percentage points for all the class-groups of

² While comparing the estimates with those of the 52nd round, it is to be kept in mind that in that round all the three attendance ratios (viz. gross, age-specific and net attendance ratios) were obtained considering general education only. In the current round these ratios have been obtained separately for general education as well as for all education since the attendance in technical/professional and vocational education is no longer insignificant. However for the first three class groups of school education (up to Class X), which are always under general education, there would not be any difficulty in comparison.

school education (Fig.4.3a). Comparison with the 52nd round data shows, in fact, that not only rural- urban, but also female-male differences in GAR came down considerably during 1995-96 to 2007-08.

Age-specific attendance ratio (AAR)

4.3.9 For each age-group this measure gives an idea of proportion of persons of a particular age-group currently attending educational institutions, irrespective of the level or class in which they are studying. For example, for age-group 6-10, the attendance ratio is

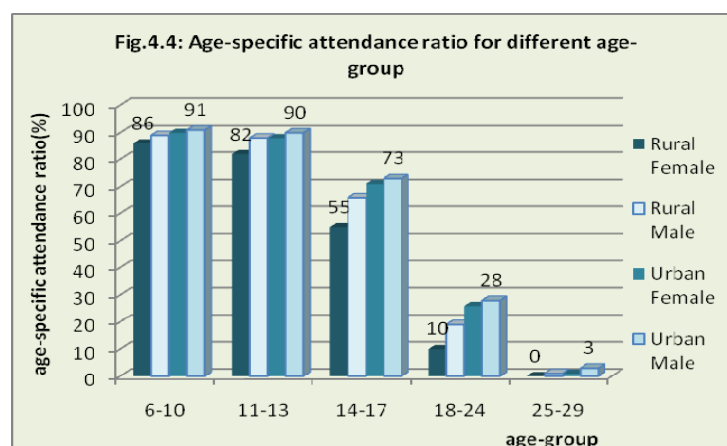

$$= \frac{\text{Number of persons in age-gr. 6-10 currently attending educational institutions}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

4.3.10 But it needs to be noted that often a high and apparently encouraging age-specific attendance ratio might be due to a large number of persons actually studying in a lower class-group than is desirable at their age.

Statement 4.4: Age-specific attendance ratio by broad age group for any education										All-India
Age Group	Rural			Urban			Rural+Urban			
	Female	Male	Total	Female	Male	Total	Female	Male	Total	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	
6-10	86	89	87	90	91	91	87	89	88	
11-13	82	88	85	88	90	89	83	89	86	
14-17	55	66	61	71	73	72	59	67	64	
18-24	10	19	15	26	28	27	15	22	18	
25-29	0	1	1	1	3	2	1	2	1	

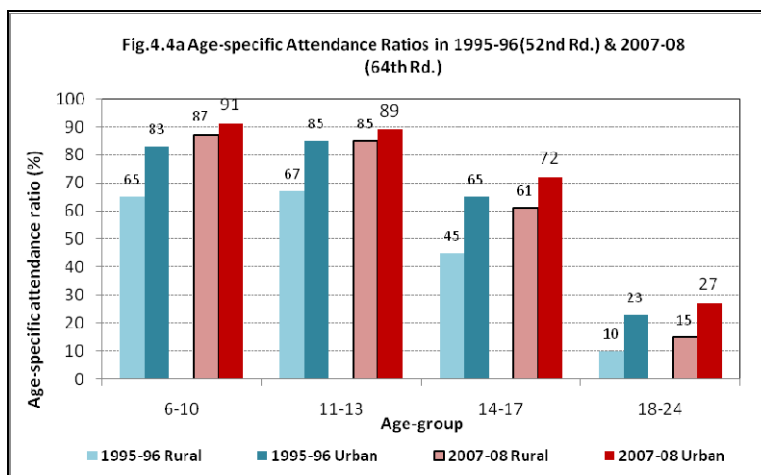

Ref: Table 17A in Appendix-A

4.3.11 The overall age-specific attendance ratio drops steadily from 88% in age-group 6-10 and 86% at age 11-13, to 64% for age 14-17, 18% for the age-group 18-24, and finally to only 1% for age 25-29 (Statement 4.4). Rural-urban differences are more pronounced here than male-female differences, especially in the higher age-groups.

4.3.12 Compared to the 52nd round, there has been a marked improvement in the age-specific attendance ratios, especially for the age-groups 6-10 and 11-13 in the rural sector. For age 6-10 the attendance ratio has risen from 65% to 87% in the rural sector and from 83% to 91% in the

urban sector. In the next age-group 11-13, too, the attendance ratio has moved up considerably for rural India - from 67% to 85%.

Net attendance ratio (NAR)

4.3.13 For each education class-group, this is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in the age-group. For example, for Class group I-V the ratio (in %) is

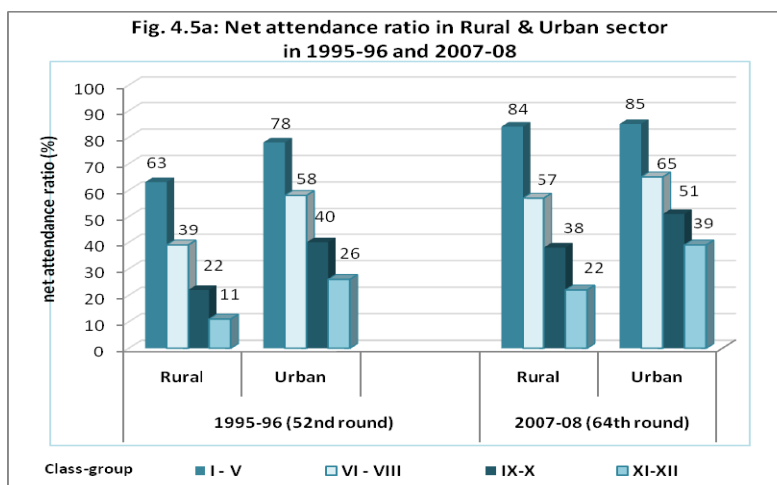

$$= \frac{\text{Number of persons in age-gr. 6-10 currently attending Classes I-V}}{\text{Estimated population in the age-group 6-10 years}} \times 100$$

4.3.14 Similarly it can be obtained for the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, with the corresponding official age-groups as 11-13, 14-15 and 16-17 respectively. This indicator overcomes the deficiencies of both gross attendance ratio and age-specific attendance ratio.

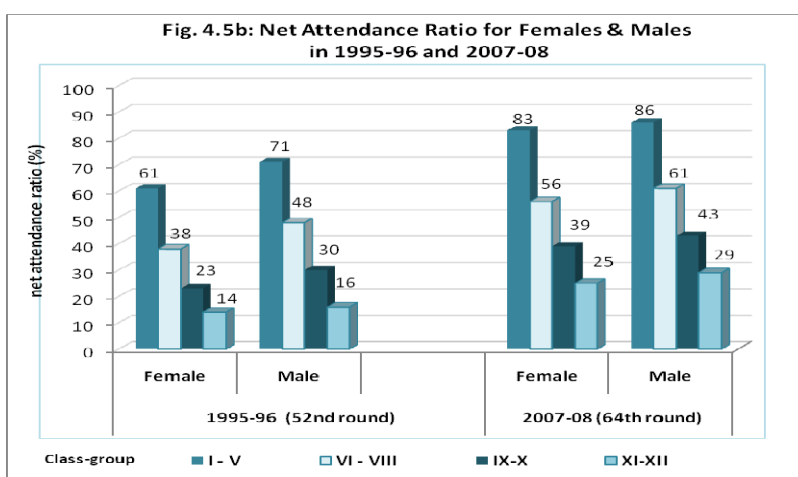

Statement 4.5: Net attendance ratio by broad class group										
Class Group	Rural			Urban			Rural+Urban			All-India
	Female	Male	Total	Female	Male	Total	Female	Male	Total

XI-XII (general edn.)	8	13	11	28	25	26	14	16	15	

Ref: Table 18 and 18A in Appendix-A # includes diploma with minimum entry requirement below HS

4.3.15 Like age-specific attendance ratio, net attendance ratios from this survey (Statement 4.5), too, point to a significant increase in attendance, especially in the rural sector, for almost all the class-groups. In the current survey net attendance ratio at XI-XII and post-HS level are obtained by two methods: one, considering general education only (which means estimates are comparable to those of the 52nd round) and two, for all types of education combined.

4.3.16 For the country as a whole, 84% children in the age-group 6-10, the official age-group for Classes I-V, were reported to be attending Classes I-V. There was no major rural-urban or male-female disparity. Viewed together with the fact that 46% of children aged 5 were currently attending at primary level (Statement 4.1), these attendance ratios indicate that the country may not be very far off from achieving universal primary education. For the class-group VI-VIII, although there has been some improvement since the 52nd round, the net attendance ratio remains below 60%. For IX-X, XI-XII and post-HS level covering all education, the attendance ratios were still lower: 41%, 27% and 12% respectively.

4.3.17 Thus, the results of the two NSS surveys indicate a remarkable growth in the current attendance of the school-going population in the educational institutions of the country between 1995-96 and 2007-08. Moreover, Fig.4.5a and Fig.4.5b show that rural-urban and female-male differentials in attendance have narrowed considerably during the period.

Fig.4.5.1 Net Attendance Ratio (NAR) in Class-group I-VIII in 2007-08

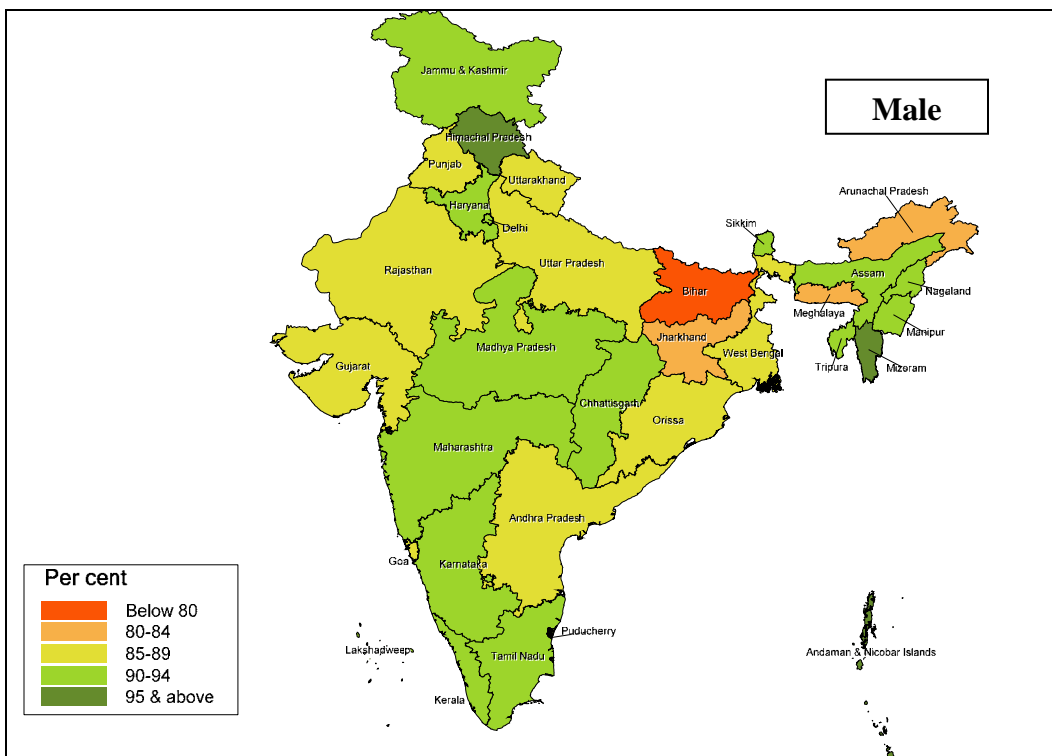

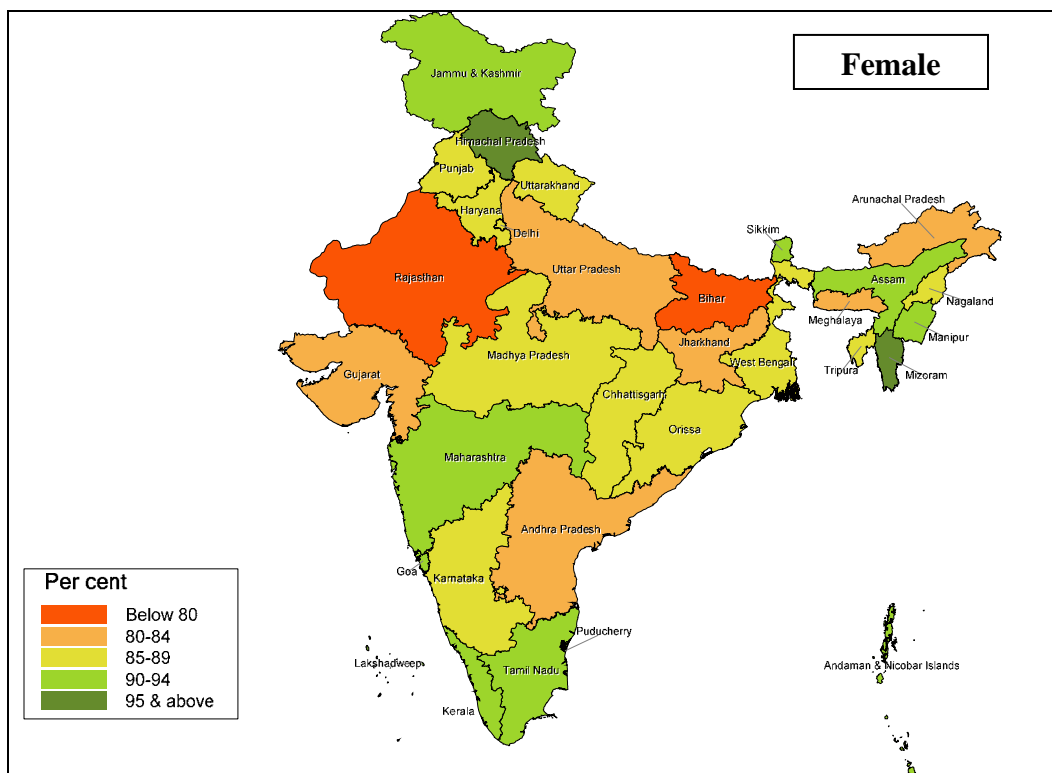

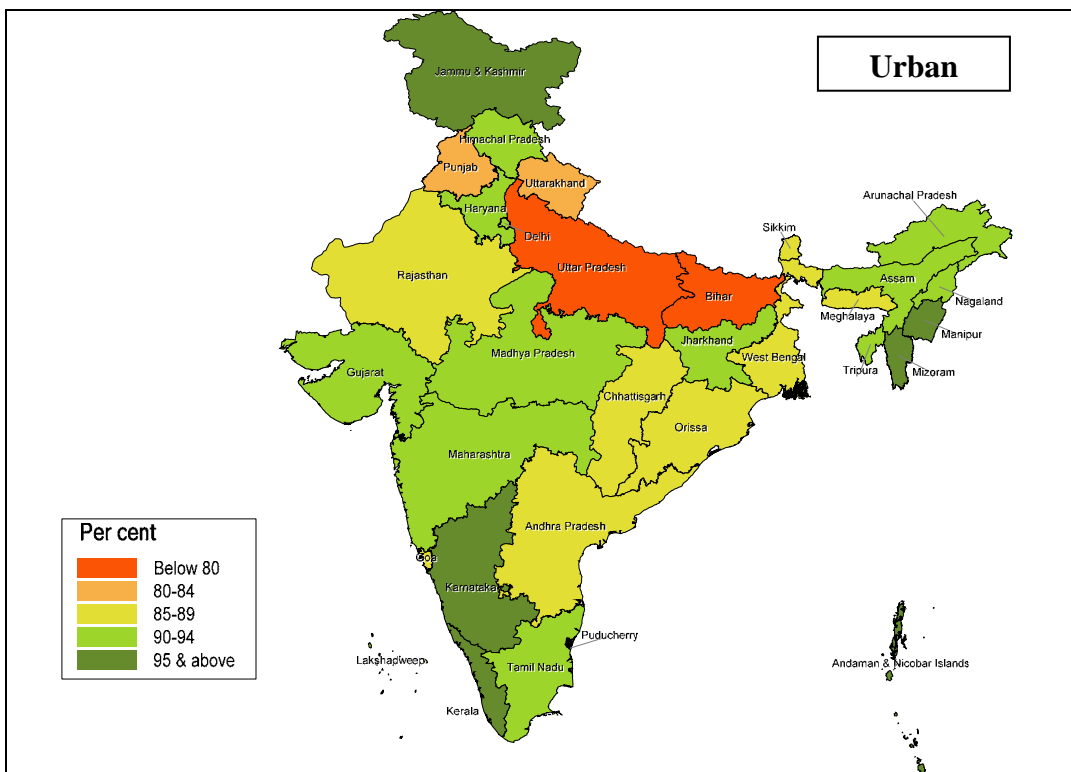

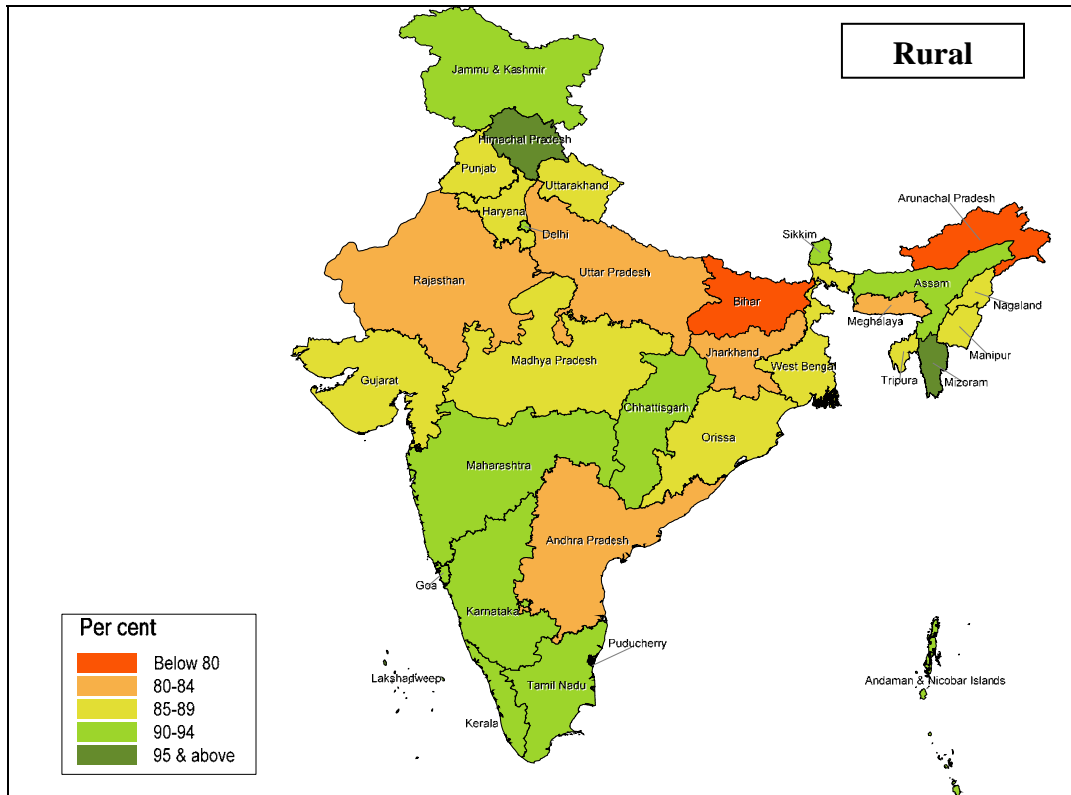

Fig.4.5.1 Net Attendance Ratio (NAR) in Class-group I-VIII in 2007-08

4.3.18 Inter-state variation in the net attendance ratio in elementary education, i.e. proportion of students of age-group 6-13 years in the class-group I-VIII, is shown in Statement 4.5.1 and Fig. 4.5.1. The overall ratio – 86% at all-India level – was over 80% in all states and UTs except Bihar, where it was 74%. Among major states, it was highest in Kerala at 94%. Male-female differences were greatest in Rajasthan and Bihar, while the rural-urban differential was prominent in Jharkhand, among the major states.

4.4 Attendance by type of educational institution

4.4.1 Type of institution, as defined in Chapter II, refers to the type of management of the educational institution. Accordingly the types are (i) government, (ii) local body, (iii) private body receiving aid from government and (iv) private body not receiving aid from government. The distribution of students by type of institution attended (as reported by the surveyed household) for different levels of school education is presented in Statement 4.6.

Statement 4.6: Percentage distribution of currently attending students aged 5-29 years pursuing various levels of school education by type of institution attended									
All-India									
Type of institution	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Ref: Table 19 of Appendix-A

*incl. n.r. & 'not known' case

4.4.2 In rural areas, the majority of students were attending government schools – 76% of primary level students, 73% of middle level students, and 62% of secondary and HS level students. Schools run by local bodies accounted for 5-6% of students at primary and middle level and less than 4% at secondary/ HS level. The remaining students were in private schools.

4.4.3 In urban areas, on the other hand, 59% of students at primary level were in private schools. At middle and secondary/ HS level, 54-55% was in private schools. Government schools

accounted for only 35% of primary level students, 40% of middle level students, and 43% of secondary/ HS level students. Students in unaided private schools outnumbered those in aided private schools at primary and middle level in both rural and urban sector. Among girls, the percentage attending government schools was a few percentage points higher than the percentage among boys at the same level of schooling.

4.4.4 In making these inferences, one needs to take into consideration the fact that more than 75% of rural students, both male and female, had their current attendance at primary or middle level, whereas about 40% of urban students were found to be attending at above-middle level.

4.4.5 Statement 4.6.1 shows wide variation across the states in the percentages of students attending different types of institutions. While in states like Assam, Bihar, Chhattisgarh and Orissa, more than 90% of students at primary level attended schools run by government or local bodies, the corresponding proportion was only 35% in Kerala and 45% in Punjab. In these two states, the majority of students, even at primary level, were in private schools – aided or unaided.

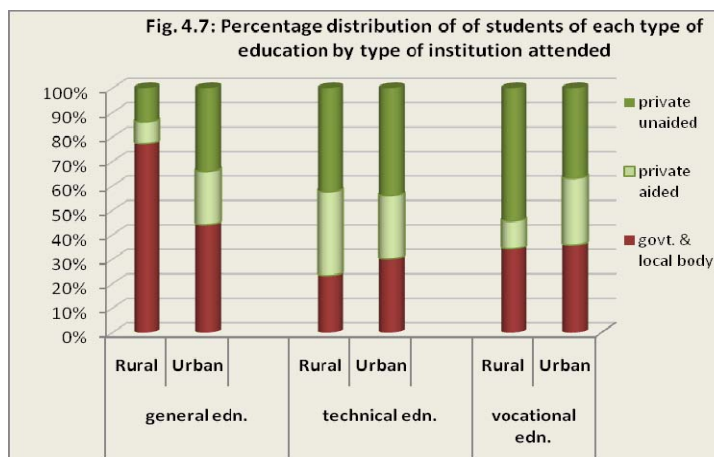

Statement 4.7: Percentage distribution of currently attending students aged 5-29 years pursuing different types of education by type of institution										
										All-India
Type of education (1)	Type of institution (2)	Rural			Urban			Rural+Urban		
		Female (3)	Male (4)	Total (5)	Female (6)	Male (7)	Total (8)	Female (9)	Male (10)	Total (11)

Ref: Tables 35, 38 and 41 in Appendix-A.

*incl. n.r. & 'not known' cases

4.4.6 Distributions of students by type of institution for different types of education (general/ technical/ vocational) are presented in Statement 4.7 and Fig. 4.6. These reveal that in technical and vocational education more than two-thirds of students were in either aided or unaided private institutions although for general education as a whole, less than a third of the students were in private institutions. Again, among private institutions, the contribution of private institutions in attendance was more than that of aided private ones, for all types of education.

4.4.7 All these indicate a significant presence of private institutions not only in school education in urban areas, but more prominently in higher technical and vocational education in both rural and urban areas.

4.5 Attendance by nature of institution

4.5.1 In this survey round, information was collected on nature of the institution, i.e. whether the institution is recognized or not, only for the unaided private institutions. However, the 52nd round NSS report (Report No. 439) gives the proportion of students attending recognized educational institutions considering all institutions attended for general education. Those proportions, naturally, are not comparable with those presented in Statement 4.8, which gives the percentage of students attending recognised and unrecognised private unaided institutions at primary or middle level.

Statement 4.8: Percentage of students aged 5-29 years attending recognized and unrecognised private unaided institutions at primary or middle level education										
										All-India
Level of education	Nature of institution	Rural			Urban			Rural+Urban		
		Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Primary	Recognised	67.3	66.8	67.0	81.2	80.3	80.7	73.7	72.7	73.1
	Unrecognised	17.0	18.2	17.7	9.2	10.0	9.7	13.4	14.7	14.2
	Not known & n.r.	15.7	14.9	15.2	9.6	9.7	9.7	12.9	12.7	12.8
	All *	100	100	100	100	100	100	100	100	100
Middle	Recognised	73.3	72.7	72.9	82.3	83.2	82.8	77.8	77.5	77.6
	Unrecognised	12.3	9.7	10.7	4.7	5.2	5.0	8.5	7.7	8.0
	Not known & n.r.	14.4	17.5	16.4	13.0	11.6	12.2	13.7	14.9	14.4
	All *	100	100	100	100	100	100	100	100	100

Ref: Table 20 in Appendix-A.

* private unaided institutions only

4.5.2 Almost three-fourths of the students attending private unaided institutions at primary and middle level were attending recognized institutions. Rural-urban difference in this respect was greater at primary level, with 81% of the students attending recognized institutions in urban areas as against only 67% in rural areas. At middle level the rural-urban difference narrowed to about 10 percentage points.

4.5.3 In case of about 16% of rural students of private unaided institutions and 12% of urban students of such institutions, the informants did not know whether the institution was recognized or not.

4.6 Change in educational institution

4.6.1 In the survey the students currently attending were asked whether they had changed their educational institution during the last one year, and if so, what the nature of the change was. The tabulated results are shown in Statement 4.9.

Statement 4.9: Percentage distribution of students aged 5-29 by nature of change in educational institution during last one year separately for different levels of school education					
All-India					
Level of education	Nature of change in educational institution				
	No change	Govt. to govt.	Private to govt.	Govt. to private	Private to private
(1)	(2)	(3)	(4)	(5)	(6)
Primary	97.5	0.6	0.5	0.8	0.6
Middle	88.6	7.1	1.0	2.0	1.2
Secondary	90.8	4.6	1.0	2.3	1.3
Higher Secondary	80.0	8.5	2.1	4.6	4.8

Ref: Table 61 in Appendix-A.

4.6.2 At primary level, the instances of change in education were very few. Even at middle or secondary level almost 90% of students did not report any change in institution. However, at higher secondary level about 20% students reported a change in educational institution. The number of students for whom the change was 'govt. to private' was more than double the number of those who had changed from private to government institutions at almost all levels of education.

4.7 Proportion of repeaters in school education

4.7.1 In this survey round, for each person in the target age-group (5-29 years) who were reported to be attending at primary-or-above levels, information on both present class and previous class attended, was obtained. This enabled estimation of proportion of 'repeaters' in the various class-groups of school education. A student was taken as a 'repeater', if he/ she reported present class attended to be the same as the previous class.

4.7.2 Statement 4.10 reveals that among class-groups, the proportion of repeaters was in the range 2-6% for nearly all the population categories and class-groups. It was highest in the classes IX and X, followed by the primary classes. In rural areas the incidences were marginally higher compared to urban areas in all the class-groups above primary. Another notable feature is that the proportion of girls repeating in a class was nearly always less than the proportion of boys repeating, especially in rural areas.

Statement 4.10: Percentage of repeaters among currently attending students aged 5-29 years by broad class-group of school education									
Class-group	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
I-V	4.3	4.6	4.5	5.3	5.4	5.4	4.5	4.8	4.7
VI-VIII	2.6	2.8	2.7	2.7	2.1	2.4	2.6	2.6	2.6
IX-X	4.9	6.2	5.7	4.3	5.9	5.2	4.8	6.1	5.5
XI-XII	3.2	4.0	3.7	3.3	2.8	3.1	3.3	3.6	3.5

Ref: Table 60 in Appendix-A.

B. Educational Incentives Received by Students

4.8.0 In this survey information was obtained for each 'student' on various educational incentives received by them, viz.

- free education or tuition fee waiver,
- scholarship or stipend,
- subsidised books or stationery,
- mid-day meal,
- students' concession in public transport etc.

The second part discusses the various incentives received by the 'students'.

4.9 Free education and exemption from tuition fee

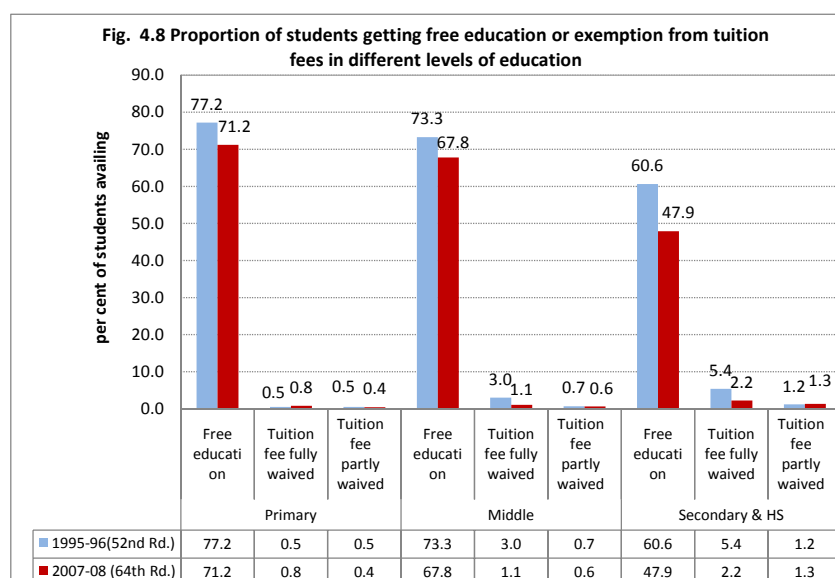

4.9.1 Education is free of tuition fees in government schools in most of the states, as also in private schools in some states, up to a certain level of education. All such cases where tuition fee is not required to be paid for any student of the institution up to a particular level are considered to be instances of free education. Again, there are cases where certain students of an institution are exempted from payment of tuition fees, fully or partly, on some special considerations like merit, financial limitations, etc. These are referred to as cases of tuition fee exemption, fully or partly. The proportion of students receiving these facilities (viz. free education and tuition fee exemption – fully or partly) among the students currently attending at various levels of school education is given in Statement 4.11.

4.9.2 It is interesting to note that the proportion of students receiving free education at primary or middle level matched well with the proportion of students attending schools run by central or state government or local bodies as presented in Statement 4.6. Thus nearly 80% of rural students and about 40% of urban students attending primary level classes got free education. At middle level, education was free for 75% of rural and 45% of urban students. At secondary and higher secondary level, it was free for 54% of rural and 35% of urban students. The proportion receiving free education was higher among rural students compared to urban students and also higher among girls than among boys.

Statement 4.11: Percentage of currently attending students aged 5-29 years getting free education or exemption from tuition fees at different levels of school education										
										All-India
Level of education	Type of waiver	Rural			Urban			Rural+Urban		
		Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Primary	Free education	82.4	77.2	79.6	43.6	36.4	39.7	74.3	68.6	71.2
	Tuition fee fully waived	0.9	0.7	0.8	1.0	0.8	0.9	0.9	0.8	0.8
	Tuition fee partly waived	0.3	0.3	0.3	0.5	0.8	0.7	0.3	0.4	0.4
Middle	Free education	78.5	72.5	75.2	47.7	43.2	45.3	70.6	65.4	67.8
	Tuition fee fully waived	1.5	1.0	1.2	0.9	0.7	0.8	1.3	0.9	1.1
	Tuition fee partly waived	0.5	0.6	0.5	0.5	1.0	0.8	0.5	0.7	0.6
Secondary & HS	Free education	58.2	51.0	53.9	40.1	31.0	35.1	52.0	45.0	47.9
	Tuition fee fully waived	2.4	2.3	2.4	2.1	1.5	1.8	2.3	2.1	2.2
	Tuition fee partly waived	1.3	1.2	1.3	1.0	1.6	1.4	1.2	1.3	1.3

Ref: Table 21 in Appendix-A

4.9.3 As compared to the 52nd round, there has been a drop in the proportion of students getting free education at all levels of school education (Fig.4.8).

4.9.4 The percentage of students getting exemption from tuition fees, either fully or partly, at both primary and middle level, was less than 2%. Even at secondary level only 3.5% of students got a tuition fee waiver, either partly or in full.

4.9.5 Statement 4.11.1 shows wide variation among the states in the proportion of students getting free education and the proportion exempted from payment of tuition fees. At primary level, for instance, more than 90% students in Assam, Chhattisgarh, Orissa and West Bengal received free education, compared to only 25% in Punjab and 35% in Haryana. Inter-state differential were no less marked at other levels of school education. In respect of proportion of students for whom tuition fees were exempted, differentials across the states were considerable.

4.9.6 Statement 4.12 depicts the proportion of beneficiaries of these educational incentives in different MPCE decile classes in rural and urban sectors. As expected, the proportion of students availing free education was high in the lower decile classes but gradually reduced as one moved up along MPCE decile classes in both the sectors. Thus, in rural India, the proportion of students receiving free education dropped from more than 80% in the poorest decile class to 50% or less in the richest class at primary and middle levels of education. The drop was even sharper in the urban sector for primary and middle level, from more than 60% to less than 10%. In case of tuition fee exemption, however, a similar pattern was not observed. This could be because such waivers are not always accorded on economic considerations alone.

Statement 4.12: Percentage of currently attending students aged 5-29 years getting free education or exemption from tuition fees in MPCE decile classes											
											All-India
Level of education	Type of incentive	MPCE decile group (%)									
		0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90	90-100

Ref: Table 22 in Appendix-A

4.10 Other Incentives

4.10.1 Some students are awarded scholarships or stipends in cash as long as they continue their studies or are provided with free or subsidized books and/ or stationery as educational incentives. In many states, schools provide the students with mid-day meals or concession in public transport fare for the students. In Statement 4.13 the proportion of students who reported having availed themselves of these incentives has been presented for different categories of population.

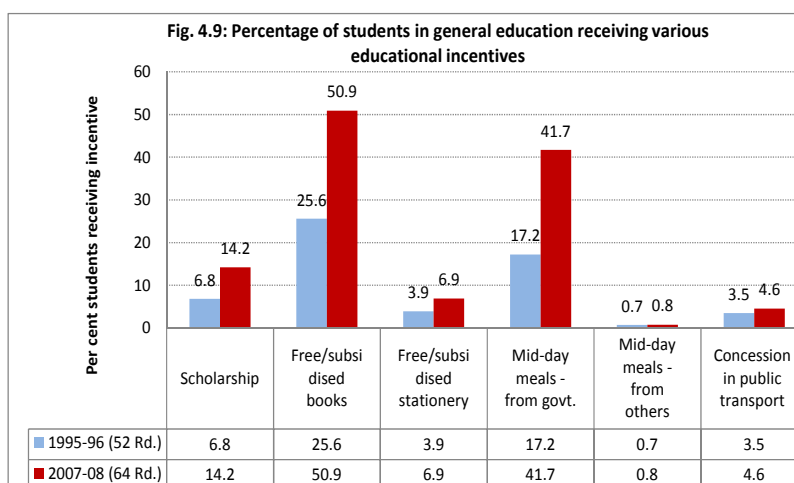

4.10.2 Of the students of age 5-29 and pursuing general education, 14.2% received scholarships, 50.9% received free or subsidized books, 6.9% got free or subsidized stationery, 42.5% received mid-day meals and 4.6% got concession in public transport fare.

Statement 4.13: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education									
Type of incentive	All-India								
	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Scholarship	18.8	15.5	17.0	7.1	5.5	6.2	15.7	13.0	14.2
Free/subsidised books	64.2	54.1	58.5	31.9	26.2	28.8	55.7	47.1	50.9
Free/subsidised stationery	8.0	7.1	7.5	5.4	4.5	4.9	7.3	6.5	6.9
Mid-day meals -by govt.	52.1	46.0	48.7	22.5	19.9	21.1	44.4	39.5	41.7
Mid-day meals -by others	0.8	0.8	0.8	0.8	0.8	0.8	0.8	0.8	0.8
Mid-day meals (total)	52.9	46.8	49.5	23.3	20.7	21.9	45.2	40.3	42.5
Concession in public transport fare *	4.3	4.7	4.6	4.7	4.6	4.6	4.5	4.6	4.6

Ref: Table 24 in Appendix-A

*obtained by multiplying the proportion of students using public transport by the proportion availing concession among them.

4.10.3 Rural students benefited more from these incentives, especially in respect of scholarship, free/ subsidized books, mid-day meals from government, etc. Thus, out of 1000 students in rural areas, 170 received scholarships compared to only 62 in urban areas, 585 received free or subsidised text books compared to 288 in urban areas, and 487 received mid-day meals from government compared to 211 in urban areas. The proportions of beneficiaries among female students were a few percentage points higher than among male students.

4.10.4 There has been a noticeable increase since 1995-96 in the proportion of students receiving these incentives, as depicted in Fig.4.9. The percentage of students in general education getting free or subsidised books has doubled from 25.6% to 50.9%. But the most spectacular rise has been in the proportion of students receiving mid-day meals from government, which increased from 17.2% in 1996-96 to 41.7% in 2007-08. However, if the proportions of students receiving mid-day meals are seen separately for levels of school education, the proportions appear much larger for primary level (66.6%) as given in statement 4.15.

4.10.5 Statement 4.13.1 shows inter-state variation in proportion of students receiving these incentives. In Gujarat, Uttar Pradesh, and Chhattisgarh, more than 30% of students in general

education got scholarships. In respect of providing free books or stationery, Tamil Nadu, Chhattisgarh, were noticeably ahead of the other major states. Mid-day meals from government were provided to more than 50% of students in Tamil Nadu, Karnataka, Orissa, Chhattisgarh, Madhya Pradesh, Jharkhand, and Gujarat, but to only 14% in Punjab and 24% in Haryana. In Kerala, more than 25% of general education students received concession in public transport fares.

Statement 4.14: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education, separately for MPCE decile classes										
Type of incentive	% students receiving incentives in MPCE decile class* (%)									
	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90	90-100

Ref: Table 25 in Appendix-A

*MPCE decile classes were obtained separately for rural and urban sector

4.10.6 When students are classified by MPCE decile group, the proportion of beneficiary students is seen to drop steadily from the lowest to the highest decile class in respect of almost all the incentives (Statement 4.14). In case of public transport use, the proportion rises with increase in MPCE level.

Statement 4.15: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education at different levels					
Type of incentive	All-India				
	% students receiving incentives at level				
	primary	middle	sec./HS	above HS	all
(1)	(2)	(3)	(4)	(5)	(6)
Scholarship	14.2	15.8	13.0	11.4	14.2

Mid-day meals -by others	1.1	0.6	0.4	0.0	0.8
Mid-day meals (total)	67.7	29.3	6.1	0.0	42.5
Concession in public transport fare	0.6	3.5	11.1	24.4	4.6

Ref: Table 26 in Appendix-A

4.10.7 In Statement 4.15 the proportions of beneficiaries are obtained separately for different levels of education. The percentage of students receiving free or subsidised books was 66% at primary level, 54% at middle level, but only 22% at secondary/ HS level. The percentage receiving free mid-day meals was as high as 68% at primary level but only 29% at middle level and 6% at secondary/ HS level. The percentage receiving scholarships varied very little across educational levels. Only the use of public transport, and the percentage availing themselves of fare concessions in public transport, increased with increase in educational level.

4.10.8 If the students are classified by the type of educational institution attended, it is seen that those in institutions run by government or local bodies received more incentives compared to those in private institutions. Thus, about 60% of students in government and local-body-run institutions got mid-day meals compared to 16% in aided private institutions and 2% in unaided private only. Note that this category included all institutions even at higher levels of education.

Statement 4.16: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education by type of institution				
Type of incentive	Type of Institution			
	Govt.	Local body	Private aided	Private unaided
(1)	(2)	(3)	(4)	(5)
Scholarship	19	10.9	8.7	2.8
Free/subsidised books	68.8	75.6	22.1	3.9
Free/subsidised stationery	9.1	10.2	2.8	1.1
Mid-day meals -by govt.	57.6	59.4	14.8	1.6
Mid-day meals -by others	0.7	0.9	1.4	0.6
Mid-day meals (total)	58.3	60.3	16.2	2.1
Concession in public transport fare	3.6	3.0	10.6	4.6

Ref: Table 27 in Appendix-A

4.10.9 Differentials across institution types were equally marked in case of free/ subsidised books, with 69% of students in government-run schools receiving such books compared to 22% in aided private and only 4% in unaided private institutions. Differentials were less marked in case of concessional fares in public transport.

C. Private Expenditure On Education

4.11.0 Education has all along remained an important development priority, necessitating intervention by government for its easy access and reach to different sections of society. As a result, it has involved subsidisation, mainly in the form of establishment of a large number of schools operated by government and local bodies for affordable availability of education.

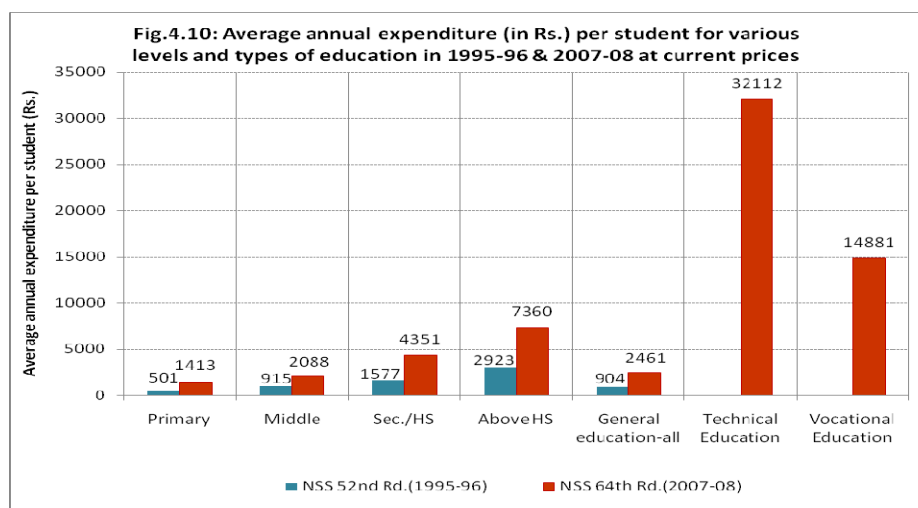

4.11.1 Nevertheless, individuals attending educational institutions incur expenditure in the form of payment of fees of different kinds (tuition fee, examination fee, other fees, etc.), purchase of books, stationery and uniforms, expenses on conveyance, private coaching, etc. This is referred to as private expenditure on education. In the current survey information on this has been obtained from all the persons in the age-group 5-29 years currently attending at primary level and above. For all the courses attended, related information on private expenditure on education incurred by the 'students' was collected in the survey and is summarised in the third part of the chapter.

4.12 Average expenditure on education

4.12.1 The average annual private expenditure in general, technical and vocational education and again, for general education by level of current attendance, is presented in Statement 4.17 separately for each sex and sector.

Statement 4.17: Average annual expenditure (Rs.) per student of age 5-29 years by type and level of education									
Type & level of education	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
NSS 64th Round (2007-08)									
Primary	741	897	826	3458	3764	3626	1308	1501	1413

Ref: Tables 28, 36 & 39 in Appendix-A									
NSS 52nd Round (1995-96)									
Primary	286	305	297	1092	1197	1149	494	507	501
Middle	641	640	640	1456	1590	1529	933	904	915
Sec./Higher Sec.	1156	1192	1180	2136	2288	2219	1619	1552	1577
Above HS (General)	2323	2283	2294	3260	3338	3304	2995	2879	2923
General education-all	516	605	570	1609	1750	1686	882	919	904

4.12.2 At primary level the average annual expenditure worked out to Rs. 1413 with the urban average (Rs.3626) more than 4 times the rural average (Rs. 826). For students in level middle, secondary/ higher secondary, and above higher secondary, the average expenditure in a year was found to be Rs. 2088, Rs. 4351 and Rs. 7360 respectively. The rural-urban differentiation narrows down at the higher levels of general education, being least for the above-HS level.

Note: For NSS 52nd round, average expenditure for technical and vocational education was not available.

4.12.3 Average expenditure on vocational education was, in both rural and urban sectors, around double the average expenditure at above-HS level of general education and expenditure on technical/ professional education, in turn, was double that on vocational education. In technical education the average annual expenditure was estimated to be as high as Rs. 32112 while for vocational education it was Rs. 14881. It is interesting to note that expenditure on vocational education for females was more than that for males in both rural and urban sectors.

4.12.4 Compared to the 52nd round, where only average expenditure on *general* education was tabulated, there has been close to a three-fold increase at nearly all levels of education, when the average expenditures for both the rounds are taken at current prices.

4.12.5 From Statement 4.17.1 it can be observed that average annual private expenditure on education at primary level varied from around Rs. 600-800 in states like Bihar, Chhattisgarh, Jharkhand and Orissa to more than Rs. 3500 in states like Punjab and Haryana. With increase in level of education the expenditure is seen to increase while the inter-state differentials diminish. For general education as a whole, the ranking of states remained more or less similar to that in case of primary education.

Statement 4.18: Average annual expenditure (Rs.) per student of age 5-29 years by level of education and type of institution

* govt. and local body taken together

4.12.6 Statement 4.18 shows differences between types of institutions in average expenditure on education at different levels. For technical and vocational education, institutions run by government and local bodies are clubbed together for obtaining average expenditure.

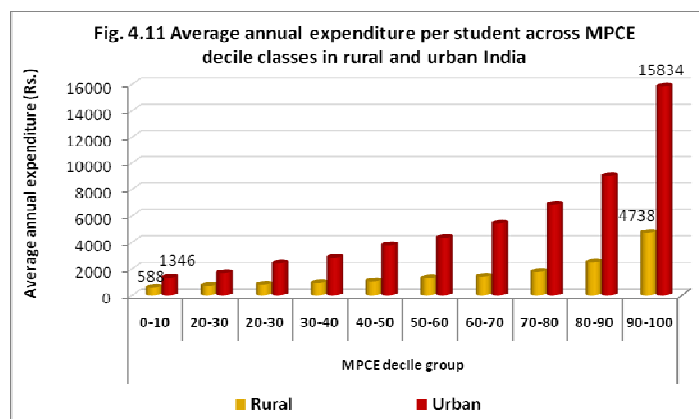

4.12.7 A huge difference is found in average educational expenditure between the schools run by government or local bodies and the private ones. Moreover the rate of increase in average expenditure from one level to another differs between the two kinds of school. In government /local body run institutions average expenditure more than doubled from each level of general education to the next higher level and ranged between Rs. 473 in primary to Rs. 6293 at above higher secondary level. For private institutions on the other hand, even at primary level the average expenditure was more than Rs. 3000 but the subsequent rise with increase in level was less steep.

4.12.8 Also, average expenditure on technical as well as vocational education in govt./ local-body run institutions was about half that in private institutions. Moreover, for such education, average expenditure in private institutions was very close to the overall average, which indicated a strong presence of private institutions in technical and vocational education.

Statement 4.19: Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education by level of education and by MPCE percentile group

Ref: Table 29 in Appendix-A

4.12.9 The average educational expenditure incurred per student belonging to each MPCE decile class, derived separately for rural and urban sector, is given in Statement 4.19. For different levels of general education, average expenditure varied widely from the lowest to the highest MPCE decile class in both the sectors. For primary education, students in the poorest category in the rural sector incurred an average expenditure of Rs. 352, compared to Rs.3516 for the richest class. In the urban sector the disparity in average educational expenditure was greater still, from Rs. 1035 in the lowest decile class to Rs.13474 in the highest decile class of MPCE. For general education as a whole average annual expenditure per student across MPCE decile classes in the rural and urban sectors is presented in Fig. 4.11.

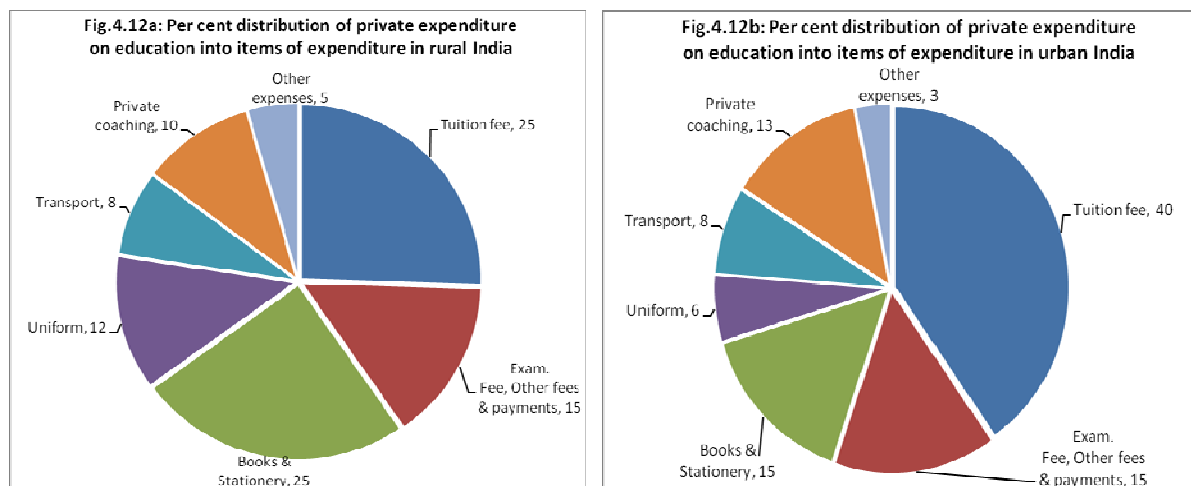

4.13 Components of private expenditure on education

4.13.1 The private education expenditure is composed of different items of educational expenditure, viz. tuition fees, examination fees, other fees and payments, and expenditures on books, stationery, uniform, conveyance, private coaching, etc. For different categories of population – formed by sex and sector, the average expenditure for each of the above components has been presented in Statement 4.20 below. All the types and levels of education in major course are taken into account for estimating the average expenditure on different items.

4.13.2 For the country as a whole average expenditure on tuition fees (Rs. 1034), examination fee, other fees and payments (Rs. 459) together contributed about half of total expenditure (Rs. 3058) on education. Books and stationery (Rs. 586) was reported to be the next major component of expenditure followed by private coaching (Rs. 354), the latter being more important in the urban areas. Further, there is a huge difference in average amount spent on tuition fee, examination fee and other fees, between rural and urban sectors.

Statement 4.20: Average annual expenditure (Rs.) per student of age 5-29 years pursuing any education by item of expenditure									
All-India									
Item of expenditure	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Total	1531	2032	1813	6164	6900	6565	2780	3279	3058

Ref: Table 32 in Appendix-A

4.13.3 Fig. 4.12a & 4.12b depict the share of the individual items in the private expenditure on education in the rural and the urban sector. In rural India, tuition fee, together with examination fee and other fees and payments, contributed 40% of total expenditure while another 25% was spent on books and stationery.

4.13.4 In the urban sector tuition fee alone contributed 40% of total expenditure. Examination fee, together with other fees & payments, had 15% share with another 15% claimed by books & stationery. Private coaching commanded 10% of total expenditure in the rural and 13% in the urban sector.

4.13.5 The break-up of total private expenditure on education in each state/UT by item of expenditure has been shown in statement 4.20.1. This has been done considering all types and all levels of education covering all categories of population (i.e. rural or urban, female or male). Average tuition fee was found to be lowest among major states in Assam and Chhattisgarh, and highest in Punjab. The overall average expenditure on education varied from around Rs.1200 in Chhattisgarh and Bihar to more than Rs.5000 in Punjab and Haryana.

4.13.6 In Statement 4.20, the average annual expenditure was worked out over all the attending students in a particular population category. However, not all of them incur expenditure on each item of education. Statement 4.21 below indicates the proportion of students reporting expenditure on different items. For example only a third of the students reported payment of tuition fee, although tuition fee was seen (Statement 4.20) to be largest single component of total educational expenditure. While 82% students had paid examination or other fees, more than 98% students had incurred some expenditure on books and stationery. There was wide variation between rural and urban sectors in the proportion of students incurring expenditure on items like tuition fee, transport and private coaching. Thus, nearly 60% of urban students but only 25% of rural students reported having paid tuition fees, while transport expenditure was incurred by about 30% of urban students and only 15% of rural students, and the same was also true for private coaching.

Statement 4.21: Percentage of students pursuing any education reporting expenditure on specific items of expenditure									
All-India									
Item of expenditure	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

Other expenses	51	52	52	53	55	54	51	53	52

Ref: Table 32 in Appendix-A

4.13.7 Statement 4.22 shows the shares of individual components in the average expenditure of students for each type of education and level of current attendance. It can be seen that in technical as well as in vocational education, tuition fee, examination fee and other fees together claimed a much larger share in the total expenditure, than they did in general education.

Statement 4.22: Average annual expenditure* (Rs.) per student of age 5-29 years by item of expenditure for each type and level of education						
All-India						
Item of expenditure	General education				Technical education	Vocational education
	Primary	Middle	Sec./ Higher Sec.	Above Higher Sec.		
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Tuition fee	430	519	1053	2438	18568	7297

Total	1413	2088	4351	7355	32112	14881

*Only major course considered here, as data on break-up of expenditure was collected for major course only

Ref: Tables 34, 36 & 39 in Appendix-A

4.13.8 It is of interest to examine average expenditure per reporting student by item of expenditure for different types and levels of education (Statement 4.23). This differs from average expenditure per student shown above because it is the average of the non-zero expenditures only. This makes the figures in Statement 4.23 much higher than the corresponding figures in Statement 4.22, especially for items such as tuition fee, transport and private coaching, where only a small fraction of students incurred expenditure. Thus, average tuition fee paid at primary level was Rs. 1658 for students who incurred some expenditure on tuition fees, compared to Rs. 430 averaged over all students. Again those at primary level incurring transport expenditure spent on the average Rs. 1560 on transport, compared to the much lower average of Rs. 127 obtained by considering all primary level students.

Statement 4.23: Average annual expenditure (Rs.) per reporting student* of age 5-29 years by item of expenditure for each type and level of education						
All-India						
Item of expenditure	General education				Technical education	Vocational education

*average for each item is based on the number of students reporting expenditure on that particular item

4.13.9 The synthesis of rural-urban differentiation in the expenditure per student is further elaborated in Statement 4.24, in respect of levels of general education. At primary level, expenditure per student in urban areas was Rs. 3626, more than four times that in rural areas. This disparity was largely accounted by tuition fee, which in case of urban students was almost 40% of their total expenditure, but only about 21% in case of rural. This is also in consonance with higher propensity of schooling in government/ local body schools in rural areas.

Statement 4.24: Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education for different levels of education												
All-India												
item of expenditure	level of education											
	Primary			Middle			Secondary/ HS			All		
	Rural	Urban	R+U	Rural	Urban	R+U	Rural	Urban	R+U	Rural	Urban	R+U
Tuition fee	173	1399	430	206	1466	519	514	2211	1053	303	1767	675
Exam fee, other fee & payment	104	529	193	157	518	246	440	859	573	217	698	340

Ref: Table 34 in Appendix-A

4.13.10 The transport, private coaching and examination fee per urban student was also 5 to 6 times higher than that of rural students. However, the rural-urban expenditure difference reduces, as one move up to higher levels of education. This was also due to steeper hike by more than two-fold in expenditure per rural student, from middle (Rs. 1370) to secondary/higher secondary (Rs. 3019). In urban areas the corresponding increase in expenditure per student was about 1.7 times, from Rs. 4264 to Rs.7212. The major contributors to the increase

in rural expenditure per student at these higher levels were tuition fee, examination fee, transport and private coaching.

4.13.11 One other aspect would be to find the average amount spent on different items of expenditure by those who reported expenditure on the items by type of institution attended. But this exercise is restricted to general education only. From Statement 4.25 it is found that those who have paid tuition fee have spent Rs. 904 on an average in institutions run by government and local body, Rs. 2133 in private aided and Rs. 2597 in private unaided institutions. However on private coaching, students in these three types of institutions have spent on an average Rs. 1456, Rs. 2773 and Rs. 2349 respectively. The other cost intensive components were transport and books and stationery, on which students have incurred high expenditure.

Statement 4.25: Average annual expenditure (Rs.) per reporting student* of age 5-29 years pursuing general education by item of expenditure and by type of institution			
All-India			
Item of expenditure	Type of Institution		
	Govt. & local	Private aided	Private unaided
(1)	(2)	(3)	(4)
Tuition fee	904	2133	2597
Exam. Fee, Other fees & payments	203	662	909

Chapter V

Non-enrolment and Discontinuance of Education

5.0.1 In this chapter, the discussion will focus on persons of age 5 to 29 years who were not currently attending any educational institution according to the current survey. Such persons had varying status of participation in the education system in the past. A section of them had never been enrolled in any educational institution and in that sense had not entered the education system of the country. Others had been enrolled at some point in the past, but were not currently attending any institution, either because they had completed their desired level of education or because they could not complete education for some reason.

5.0.2 In the survey, accordingly, all persons in the age-group 5-29 currently not attending were first asked whether they had ever been enrolled in any institution. If the answer was in the negative, it was considered a case of non-enrolment and information was obtained on the reasons thereof as well as on the current activity status of such persons. Those who answered in the affirmative were further asked about the level of last enrolment and whether they had completed the level successfully or not.¹ Information was obtained from them about level and type of education at last enrolment, age when discontinued/dropped out, type of institution last attended, etc., besides their reason for discontinuance/dropping out and current activity status.

5.0.3 Non-enrolment and dropping out are two critical issues plaguing the education system of our country. Their dimension can be gauged from the following statement.

Statement 5.1: Percentage of persons of age 5-29 years who were never enrolled or had been enrolled in the past but were currently not attending									
									All-India
Enrolment / attendance status	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Never enrolled	21.0	11.0	15.8	10.0	6.3	8.0	18.2	9.8	13.8
Enrolled in the past but currently not attending	31.7	33.4	32.6	38.2	39.6	39.0	33.5	35.0	34.3

Ref.: Tables 10, 51 and 55 in Appendix-A

¹ This last question enables one to distinguish 'dropping out' from what may be called 'discontinuance'. If the answer to the question is 'no', the person may be regarded as a case of 'drop-out' at that particular level of education. If, on the other hand, a person found to have completed the last level of enrolment but not got enrolled at the next (higher) level might be considered a case of discontinuance. But it should be noted that such differentiation has certain limitations. By this criterion, a person who completed primary but did not get enrolled for middle is classified as discontinued, while a person who successfully completed graduation level and got enrolled in post-graduate classes but could not complete it becomes a drop-out. In analyzing the results of this survey, the distinction between dropping out and discontinuance was not made, all those who were currently not attending but had been enrolled at some time in the past being clubbed together as 'dropped out or discontinued'.

5.0.4 Statement 5.1 indicates that about 14% of population in the age-group 5-29 years had not entered the education system at all, while another 34% were found to have been enrolled at some time but currently not attending any educational institution. In rural areas, the proportion of never enrolled was 15.8%, while in urban areas it was much lower – 8%. Again, about 18% of females and 10% of males of age 5-29 years were never enrolled.

5.0.5 Note that the proportion not enrolled included persons in the lower age-group who were yet to join school and might be joining educational institutions late. Again, the percentage of ever enrolled persons (enrolled at some time in the past but currently not attending) includes persons at the upper age-group of the target population who might have already completed education. Therefore these two phenomena are separately elaborated upon.

A. Non-enrolment

5.1 Non-enrolment in different age-groups

5.1.1 The percentage of never enrolled persons in different age-groups between 5 and 29 years is summarised as below:

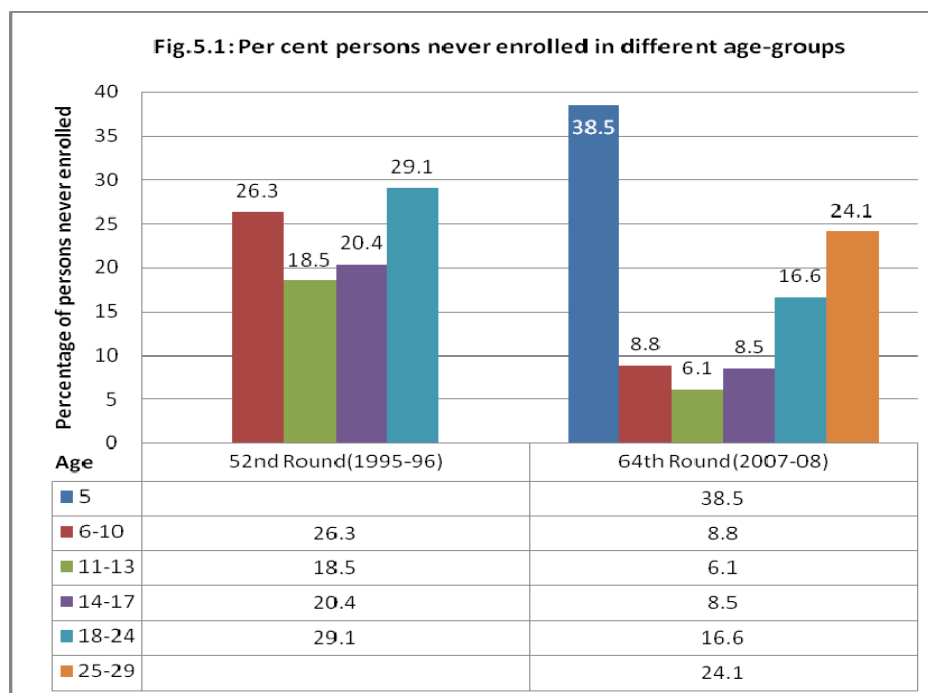

Statement 5.2: Percentage of never enrolled persons of age 5-29 years in different age-groups									
All-India									
Age-group (years)	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
5	42.5	42.3	42.4	27.9	22.6	25.0	39.3	37.8	38.5
6 – 10	11.2	8.3	9.6	6.0	5.7	5.8	10.1	7.7	8.8
11 – 13	8.6	4.8	6.6	5.6	3.4	4.4	7.9	4.5	6.1
14 – 17	12.7	7.1	9.7	6.0	4.5	5.2	11.0	6.4	8.5
18 – 24	28.4	11.9	20.1	11.0	6.3	8.5	23.5	10.1	16.6
25 – 29	39.4	18.2	29.1	16.3	8.2	12.2	32.7	15.1	24.1
Total	21.0	11.0	15.8	10.0	6.3	8.0	18.2	9.8	13.8

Ref.: Table 58 in Appendix-A

5.1.2 Statement 5.2 provides segregation of never enrolled persons in different age-groups with gender and sector specific details. Now, the variation in this percentage across the age-groups provides illuminating insights into the changing scenario. Among persons in the age-group 25-29 years, 29% in rural areas and 12% in urban areas – were found to have never been enrolled. In both sectors the percentage drops steadily as one move along the age-groups 18-24, 14-17, 10-13, etc. This is an encouraging pattern because it indicates a positive development – diminishing phenomenon of non-enrolment. Clearly, the percentage of never-enrolled persons in the age-group 10-13, 14-17, or 18-24, must be shrinking over time. Thus a significant improvement in the enrolment status of population over the last 2 to 3 decades is discernible. The higher percentages of never-enrolled children at ages 10 and lower do not affect this conclusion, being obviously due to late entry of many children into the educational system, particularly in rural India.

Nearly 94% of persons in the age-group 10-13 were found to have been enrolled in educational institutions. The enrolment percentage remained reasonably stable for the next age-group (14-17), modestly declining to 91.5 percentages.

5.1.3 When the age-group-wise proportions of non-enrolment found by the 1995-96 and 2007-08 are compared, the picture that emerges is undoubtedly heartening. Fig.5.1 clearly indicates a sharp fall in the proportion of never-enrolled in various age-groups of school- and college-going population in the 2007-08 compared to that obtained from the 52nd round.

Note: Age 25-29 was out of coverage of 52nd round while estimates for age 5 were not tabulated

5.1.4 Across states, there was wide variation in the proportion of never enrolled persons in the age-group 5-29 as a whole as well as in the narrower age classes (Statement 5.2.1). In Kerala, except for children of age 5, about a quarter of whom had never been enrolled, every other age class had less than 1% persons who had never been enrolled in any educational institution. In Tamil Nadu, Himachal Pradesh, and a few small north-eastern states, too, the proportion was admirably low. At the other extreme, the figures for Bihar reveal that even in the prime school-going age-groups, about 20% or more were never enrolled, with the result that in the age-group 5-29 as a whole, the never-enrolled percentage exceeded 30%.

5.2 Non-enrolment and MPCE level

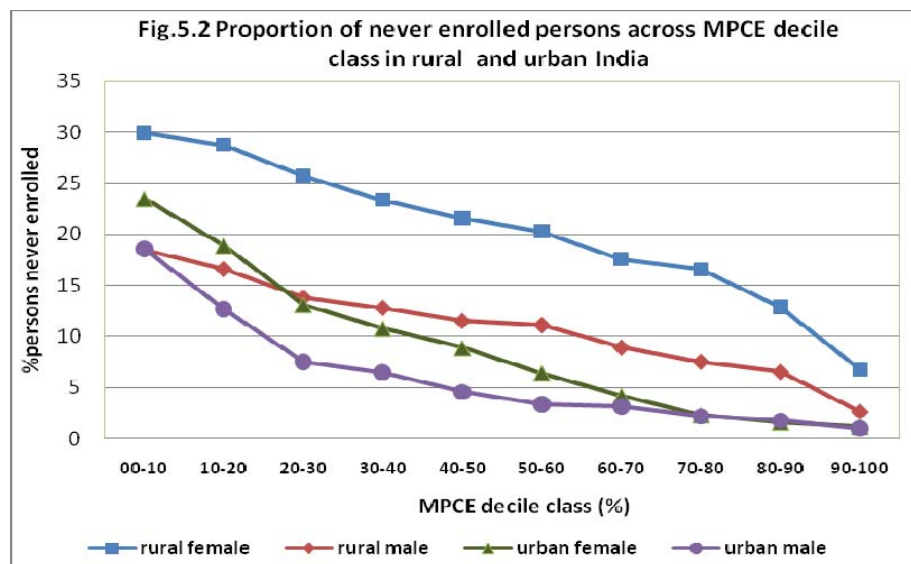

5.2.1 It would also be interesting to find out how the proportion of never-enrolled changed with change in household living standards as measured by household monthly consumption expenditure (MPCE). From Statement 5.3 it can be observed that the proportion of never-enrolled persons, considering all ages between 5 and 29, fell steeply from over 24% in the poorest decile class to only 4.4% in the richest decile class in rural

India. In urban India too, the percentage dropped from 21% to 1% from the bottom to the top decile class of MPCE.

Statement 5.3 : Percentage of never enrolled persons of age 5-29 years in each MPCE decile class						
MPCE decile class (%)	Rural			Urban		
	Female	Male	Person	Female	Male	Person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
00-10	30.0	18.5	24.3	23.5	18.6	21.1
10-20	28.8	16.6	22.6	18.9	12.7	15.7
20-30	25.8	13.8	19.6	13.1	7.5	10.2

90-100	6.8	2.6	4.4	1.2	1.0	1.1

Ref.: Table 59 in Appendix-A

5.2.2 The gender differentials in rural and urban India with the fall in the percentage of never-enrolled across MPCE decile classes is explicit in Fig.5.2.

5.2.3 The fall in the proportion of population never enrolled was steepest for rural females – from 30% in poorest decile class to less than 7% in the richest. The incidence of never enrolment in respect of rural females was more than 20% up to sixth decile class of MPCE. For urban males the drop was rapid over the lowest three decile classes and then much more gradual. The male-female differential was less marked in the urban sector than in the rural and narrowed in both rural and urban sector as one moved up

along the MPCE range. In the top three decile classes of urban India, the male-female gap practically disappeared.

5.3 Reason for non-enrolment

5.3.1 The break-up of the proportion of never-enrolled by reason for non-enrolment for different categories of persons (i.e. rural female, rural male, urban female, urban male) is given in Statement 5.4. Only one reason, considered to be most important, was recorded for each never-enrolled person from a specified list of reasons. Therefore, the reasons might not be mutually exclusive. The three most frequently given reasons for non-enrolment were a) parents not interested in education of their children (33.2%), b) financial constraints (21%) and c) education not considered necessary (21.8%). For urban males 'financial constraints' was most commonly given as the reason for non-enrolment (37.7%) while for both urban females and rural males, 'financial constraints' was the second most commonly reported reason. Among rural females, only 16.2% reported that they did not enroll for financial reasons. For all population categories except urban males, 'parents not interested' was the most common reason. This reason was recorded for as many as 37% of the never-enrolled rural females and 33% of the urban females. Clearly, for females in both rural and urban India, it was the attitude of the parents towards the need for education of their girl children, which had in the majority of cases denied them their education.

Statement 5.4: Percentage distribution of never-enrolled persons of age 5-29 years by major reason for non-enrolment					
Major reason for non-enrolment	Rural		Urban		All-India
	Female	Male	Female	Male	Rural+Urban All persons
(1)	(2)	(3)	(4)	(5)	(6)
Parents not interested in studies	36.7	29.5	32.8	22.5	33.2
Education not considered necessary	23.2	20.3	21.0	17.2	21.8
Financial constraints	16.2	24.7	25.3	37.7	21.0
No tradition in the community	6.1	3.1	4.5	2.8	4.8
To attend other domestic chores	3.0	0.8	2.0	0.4	2.0
School is far off	2.2	1.6	1.1	0.9	1.8
For participating in other economic activities	0.7	2.8	0.7	3.5	1.6

All	100.0	100.0	100.0	100.0	100.0

Ref.: Table 59 in Appendix-A

B. The education-discontinued population aged 5-29

5.4.0 As mentioned at the start of this chapter, the term 'discontinued (education)' is used in this report to refer to a person who was enrolled at some time in the past but was currently not attending any educational institution at the time of survey. Note that persons temporarily not attending due to illness, vacation, etc., as well as those awaiting their

results after completing a particular course, were also considered as ‘currently attending’ by the survey. Thus the **education-discontinued** category consists of those whose education had started and also come to a stop before the date of survey (in the sense that it was not expected to be resumed in the normal course).

5.5 The education-discontinued (ED) population: highest level completed

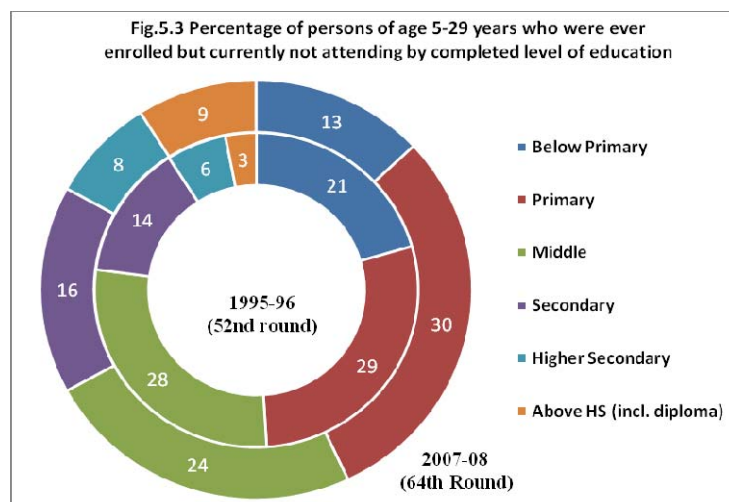

5.5.1 Statement 5.5 shows the distribution of education-discontinued persons aged 5-29 by their completed level of education. It can be observed that 13% of such persons did not complete even the primary level of education. Another 30% completed only the primary level while 24% completed the middle level. Only 34% of those discontinuing could complete secondary or higher levels; this included 16% who completed the secondary and another 8% who cleared the higher secondary level.

5.5.2 The rural-urban divide in this regard was quite prominent, with only 27% of such students in rural areas compared to nearly 50% in urban areas completing secondary education. The gender differences were not very pronounced, with 31% among females and 34% among males dropping out after completing secondary or higher level.

Statement 5.5: Percentage of ever enrolled but currently not attending persons by completed level of education										
										All-India
Level of completed education	Rural		Urban		Female		Male		All	
	Percent-age	Cumulative %	Percent-age	Cumulative %	Percent-age	Cumulative %	Percent-age	Cumulative %	Percent-age	Cumulative %
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
Below Primary	15	15	9	9	14	14	12	12	13	13
Primary	33	48	23	32	32	46	29	41	30	43
Middle	25	73	22	53	23	69	25	66	24	67

Above HS (incl. diploma)	5	100	18	100	8	100	9	100	9	100
All	100	-	100	-	100	-	100	-	100	-

Ref.: Table 51 in Appendix-A

5.5.3 The chart (Fig. 5.3) shows a shift between 1995-96 and 2007-08 towards higher levels of education in the distribution of educational attainment of those having discontinued education. For example, about 17% of ED population had completed HS or higher level in 2007-08 compared to only 9% in 1995-96. Again, discontinuation before attaining primary level was more common (21%) among the ED population in 1995-96 than in 2007-08 (13%).

5.5.4 Note that the above discussion does not indicate the drop-out rate, measured as the rate at which children of a cohort drop out at different levels education during the entire cycle of school or college or university education.

5.6 The education-discontinued population: highest level of enrolment

5.6.1 Statement 5.6 gives the percentage distribution of all education-discontinued persons in the age-group 5-29 years by their level of last enrolment. Out of 1000 such students, 242 dropped out when they were enrolled at primary level, 283 at the middle level, 250 at secondary level, 112 at higher secondary level, and 66 when they were enrolled at graduation level. Also, while there was little difference in the male and female distributions for the urban sector, the percentage of females in the rural sector who discontinued at primary level was appreciably higher than the percentage among rural males. Among rural males, proportionately more discontinued at the secondary, higher secondary, and graduation levels than among rural females.

Statement 5.6 : Percentage distribution by level of last enrolment of persons aged 5-29 enrolled in the past but currently not attending									
All-India									
Level of last enrolment	Rural			Urban			Rural+Urban		
	Female	Male	Total	Female	Male	Total	Female	Male	Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Below Primary	1.7	1.6	1.6	1.1	1.3	1.2	1.5	1.5	1.5
Primary	30.2	24.7	27.3	16.4	17.2	16.8	26.2	22.4	24.2
Middle	30.9	30.2	30.6	22.9	23.0	23.0	28.6	28.1	28.3
Secondary	22.9	25.6	24.4	26.0	26.8	26.4	23.8	26.0	25.0
Higher Secondary	9.2	11.3	10.3	13.8	13.1	13.4	10.6	11.8	11.2
Diploma	0.7	1.3	1.0	1.4	3.0	2.2	0.9	1.8	1.4

Post graduation & above	0.8	0.9	0.9	4.8	3.4	4.1	2.0	1.7	1.8
Total (incl. n.r.)	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Ref.: Table 45 in Appendix-A

5.6.2 To judge the incidence of ‘dropping out’ or discontinuing before completing the last (highest) level of enrolment, all the education-discontinued persons were also asked whether they had completed the level of last enrolment before discontinuing. A further item of information obtained was whether they had discontinued because they had completed the desired level or class.

5.7 The education-discontinued population: desire for further education

5.7.1 Among those enrolled at a particular level of education which they stopped attending subsequently, some did so as they had completed the level of education, or the class, that they desired to complete. Others, who did not report that they had completed desired level/ class, had either completed or did not complete the last level of enrolment. For each of seven levels of education, the number of persons aged 5-29 who reported that they were last enrolled in that level when they discontinued education were broadly classified into three categories: a) who completed desired level of education, and among the rest, b) those who completed the last level of enrolment, and c) those who did not complete the last level and had to leave mid-course.

5.7.2 Among those (of age 5-29 years) who were enrolled in the past but were not attending at the time of the survey, 10% discontinued at various levels as they had completed their desired class/level of education. Out of the rest, 41% completed their level of last enrolment while 49% could not.

Statement 5.7: Percentage of ever enrolled but currently not attending persons a) who reported having completed desired level/class and others b) who completed the last level and c) who did not complete the last level, for each level of last enrolment				
All-India				
Level of last enrolment	percentage of ever enrolled but currently not attending persons of age 5-29 years			
	who completed desired level/ class	others		all
who completed their level of last enrolment		who did not complete their level of last enrolment		
(1)	(2)	(3)	(4)	(5)
Primary	2	50	48	100
Middle	4	35	61	100
Secondary	8	39	53	100
HS	15	48	37	100
Diploma	45	47	8	100
Graduation	45	39	16	100
PG & above	66	28	6	100
all (incl. n.r.)	10	41	49	100

Ref.: Ref.: Table 45 in Appendix-A

5.7.3 Even at primary level, 2% discontinued as they had achieved their desired educational level/class, 50% completed the level but discontinued thereafter and 48% could not complete the level. The percentage of those (considering rural and urban, female and male together) who had achieved their desired education increased from 4% for middle level, 8% for secondary level, and 15% for HS level to 45% for graduation level and 66% for post-graduation-and-above level. On the other hand the percentage of students dropping out mid-course reduces gradually from 61% at middle level, 53% at

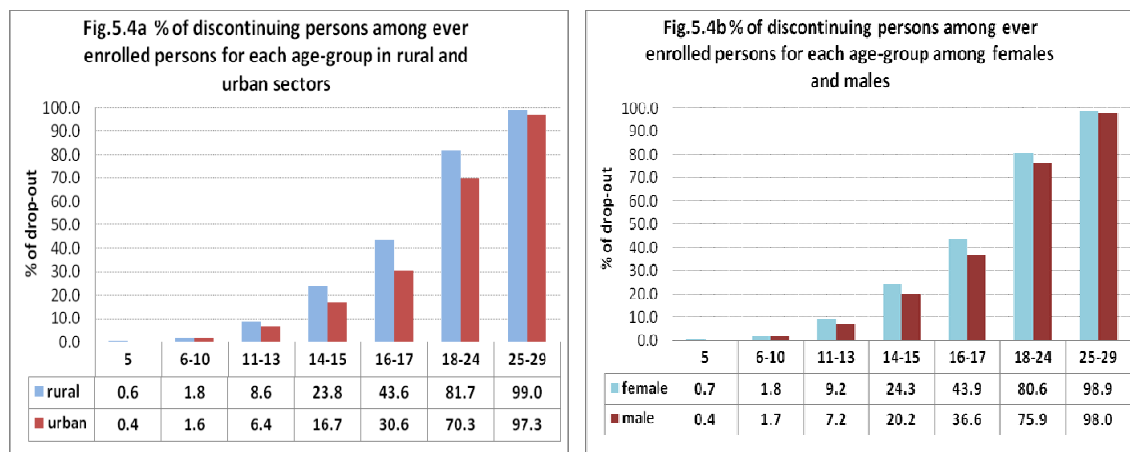

secondary, 37% at HS level to 16% at graduation level and 6% at post graduation and above level.

5.7.4 Thus the vast majority of those who stepped out of the education system at these levels are seen to have done so in spite of a desire for higher educational attainment.

5.7.5 The corresponding proportions in the states are given in Statement 5.7.1. In respect of the proportion not completing their level of last enrolment, inter-state variation was least for those last enrolled at primary level (38-62% for the major states) and greatest for those last enrolled at HS level (11-67% for the major states).

5.8 The education-discontinued population: age at discontinuance

5.8.1 Another interesting aspect would be the percentage of drop-outs among persons of various age-groups within the broad age-group of 5-29 years who had ever been enrolled. It is evident from Figs 5.4a and 5.4b that after age-group 14-15 the proportion of drop-outs increases rapidly with age. This is as might be expected. In the age-group 25-29 years, newly included in the current round, more than 97% of persons who had ever been enrolled were found to have discontinued studies.

5.9 The education-discontinued population - reasons for discontinuance or dropping out

5.9.1 For each person of age 5-29 years who had ever been enrolled but was currently not attending, the major reason for discontinuance was obtained.

5.9.2 For each of the four categories of population, financial constraints had been the most common reason for dropping out (21.4%). For 17% of the rural females and 24% of the rural males, the major reason was 'child not interested in studies.' Another 15.5% rural females had to discontinue as their parents were not interested in their studies. Among urban females, the second most frequently given reason was that they had already completed their desired level of education. 20.3% of urban males and 15% of urban females who had ever been enrolled but were not currently attending dropped out because

they were not interested in studies. For 13% of the urban males, the need to work for wage/ salary was the major reason for discontinuing education.

Statement 5.8: Percentage distribution of persons of age 5-29 years enrolled in the past but currently not attending by major reason for discontinuance					
Major reason for discontinuance	Rural		Urban		All-India
	Female	Male	Female	Male	Rural+Urban
(1)	(2)	(3)	(4)	(5)	(6)
Financial constraints	18.0	24.0	18.1	24.8	21.4
Child not interested in studies	17.0	24.0	15.0	20.3	19.9
Unable to cope up or failure in studies	10.1	12.3	7.7	8.5	10.3
Completed desired level or class	9.5	6.5	18.8	12.4	10.1
Parents not interested in studies	15.5	4.8	12.1	2.2	8.9
For participating in other economic activities	1.6	10.0	1.7	10.3	6.2
To work for wage/ salary	1.4	7.1	2.7	13.5	5.7
To attend other domestic chores	10.1	1.7	10.2	0.6	5.4
For helping in household enterprises	1.1	5.3	0.8	4.1	3.1
Other reasons (including marriage, etc.)	15.7	4.3	12.9	3.3	9.0
All	100.0	100.0	100.0	100.0	100.0

Ref.: Table 54 and 54/1 in Appendix-A

5.9.3 Thus, it can be concluded that although education is highly subsidised, our education system has been characterised by a high rate of drop-outs. Moreover, there is a sizeable portion of population who are not entering the education system at all. For both the phenomena, it was economic reasons – financial constraints, or the need to join the labour force early – that were found to be responsible. One may therefore expect that financial compensations and other incentives like mid-day meals etc. should go a long way in reducing the incidence of educational wastage measured in terms of the population withdrawn prematurely from the education system.

Statement 5.2.1: Proportion of never enrolled persons of age 5-29 years in different age-groups for each state/UT							
State/UT	All-India

* ever enrolled persons aged 5-29 years

In Tables 54-56 the following codes are used as reasons for dropping-out / discontinuance

<i>parent not interested in studies</i>	...01	<i>to attend other domestic chores</i>	...07	<i>unable to cope up or failure in studies</i>	...16
<i>inadequate number of teachers</i>	...02	<i>financial constraints</i>	...08	<i>unfriendly atmosphere at school</i>	...17
<i>school is far off</i>	...03	<i>timings of educational institution not suitable</i>	...10	<i>completed desired level/class</i>	...18
<i>to work for wage/salary</i>	...04	<i>for helping in household enterprises</i>	...11	<i>non-availability of lady teacher</i>	...20
<i>for participating in other economic activities</i>	...05	<i>Language/medium of instruction used unfamiliar</i>	..12	<i>non-availability of ladies toilet</i>	...21
<i>to look after younger siblings</i>	...06	<i>child not interested in studies</i>	...15	<i>others</i>	...29

Appendix-B

Sample Design and Estimation Procedure

Appendix B

Sample Design and Estimation Procedure

1.1 Outline of Survey Programme

1.1.1 Geographical coverage: The survey will cover the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir (for central sample), (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.1.2 Period of survey and work programme: The period of survey is of one year duration starting on 1st July 2007 and ending on 30th June 2008. The survey period of this round are divided into four sub-rounds of three months' duration each as follows:

sub-round 1 :	July - September 2007
sub-round 2 :	October - December 2007
sub-round 3 :	January - March 2008
sub-round 4 :	April - June 2008

In each of these four sub-rounds, equal number of sample villages/ blocks (FSUs) have been allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempt has been made to survey each of the FSUs during the sub-round to which it is allotted. *Because of the arduous field conditions, this restriction need not be strictly enforced in Andaman and Nicobar Islands, Lakshadweep and rural areas of Arunachal Pradesh and Nagaland.*

1.1.3 Schedules of enquiry: During this round, the following schedules of enquiry are being canvassed:

Schedule 0.0	: list of households
Schedule 10.2	: employment & unemployment and migration particulars
Schedule 25.2	: participation and expenditure in education
Schedule 1.0	: household consumer expenditure

1.1.4 Participation of States: In this round all the States and Union Territories except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep are participating. The following is the matching pattern of the participating States/ UTs.

Nagaland (U)	: triple
J & K , Manipur & Delhi	: double
Kerala, Maharashtra (U)	: one and half
Gujarat	: less than equal
Remaining States/ UTs	: equal

2. Sample Design

2.1 Outline of sample design: A stratified multi-stage design has been adopted for the 64th round survey. The first stage units (FSU) are the 2001 census villages (Panchayat wards in

case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. However, for the newly declared towns and out growths (OGs) in census 2001 for which UFS has not yet been done (i.e. non-UFS towns), each individual town/ OG is considered as an FSU. The ultimate stage units (USU) are households in both the sectors. In case of large FSUs i.e. villages/ towns/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage is the selection of two hgs/ sbs from each FSU.

2.2 Sampling Frame for First Stage Units: *For the rural sector*, the list of 2001 census villages (Panchayat wards for Kerala) constitutes the sampling frame. *For the urban sector*, the list of latest available Urban Frame Survey (UFS) blocks and for non-UFS towns list of such towns/ OGs has been considered as the sampling frame.

2.3 Stratification: Within each district of a State/ UT, generally speaking, two basic strata have been formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them have been formed a separate basic stratum and the remaining urban areas of the district is considered as another basic stratum. For a few districts, particularly in case of Tamil Nadu, if total number of non-UFS towns in the district exceeded certain number, all such towns taken together have been formed another basic stratum. Otherwise, they have been merged with the UFS towns for stratification.

2.4 Sub-stratification:

2.4.1 Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/4'. The villages within a district as per frame have been first arranged in ascending order of population. Then sub-strata 1 to 'r/4' have been demarcated in such a way that each sub-stratum comprises a group of villages of the arranged frame and has more or less equal population.

2.4.2 Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata have been formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, have been first arranged in ascending order of population. Next, UFS blocks of each town have been arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata has been formed in such a way that each sub-stratum has more or less equal number of FSUs.

2.4.2.1 For towns with population 10 lakhs or more, the urban blocks have been first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata has been formed in such a way that each sub-stratum has more or less equal number of blocks.

2.4.2.2 All non-UFS towns, if available in a district and exceeded a certain minimum number, formed one separate stratum within the district. Hence, there are separate stratum numbers for UFS towns and non-UFS within a district. No sub-stratification has been done for non-UFS towns. However, sub-stratum number for all sample non-UFS towns has been given as 1 for uniformity.

2.5 Total sample size (FSUs): 12688 FSUs for central sample and 13600 FSUs for state sample have been allocated at all-India level.

2.6 Allocation of total sample to States and UTs: The total number of sample FSUs is allocated to the States and UTs in proportion to population as per census 2001 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators has been kept in view.

2.7 Allocation of State/ UT level sample to rural and urban sectors: State/ UT level sample is allocated between two sectors in proportion to population as per *census 2001* with 1.5 weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. has not exceeded the rural sample size. A minimum of 8 FSUs has been allocated to each state/ UT separately for rural and urban areas. Further the State level allocation for both rural and urban has been adjusted marginally in a few cases to ensure that each stratum gets a minimum allocation of 4 FSUs.

2.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size is allocated to the different strata in proportion to the stratum population as per census 2001. Allocations at stratum level have been adjusted to a multiple of 4 with a minimum sample size of 4.

2.9 Selection of FSUs: From each sub-stratum of a district of rural sector, four FSUs have been selected with Probability Proportional to Size With Replacement (PPSWR), size being the population as per census 2001. For urban sector, from each sub-stratum four FSUs have been selected by using Simple Random Sampling Without Replacement (SRSWOR) for UFS towns and by PPSWR in case of non-UFS towns with size being the population as per Census 2001. Within each sub-stratum, samples have been drawn in the form of two independent sub-samples in both the rural and urban sectors.

2.10 Selection of hamlet-groups/ sub-blocks/ households

2.10.1 Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block	no. of hgs/sbs to be formed (D)
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

2.10.2 For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed is as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

2.10.3 Two hamlet-groups (hg)/ sub-blocks (sb) are selected from a large FSU wherever hamlet-groups/ sub-blocks have been formed, by SRSWOR. Listing and selection of the households are done independently in the two selected hamlet-groups/ sub-blocks to be described as sample hg/ sb 1 and 2. The FSUs without hg/ sb formation will be treated as sample hg/ sb no. 1.

2.11 Formation of Second Stage Strata and allocation of households

Schedule 25.2 (participation and expenditure in education)

The listed households has been stratified into two SSS as under:

SSS 1:	households having any member of age 5 – 29 years enrolled at primary and above level
SSS 2:	other households

2.11.1 Compositions of second-stage strata (SSS) with number of households to be surveyed from different SSS for various schedules of enquiry are as follows:

SSS	composition of SSS within a sample FSU	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	households having any member of age 5-29 years enrolled at primary and above level	4	2
SSS 2:	other households	4	2

2.12 **Selection of households:** From each SSS the sample households for each of the schedules is selected by SRSWOR. If a household is selected for more than one schedule only one schedule is canvassed in that household in the priority order of Schedule 10.2, Schedule 25.2 and Schedule 1.0 and in that case the household is replaced for the other schedule. If a household is selected for Schedule 10.2 it is not selected for Schedule 25.2 or

Schedule 1.0. Similarly, if a household is not selected for Schedule 10.2 but selected for Schedule 25.2 it is not selected for Schedule 1.0.

3. Estimation Procedure

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town or OG]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = (1, 2 or 3 for schedule 10.2),

(1 or 2 for schedules 25.2 and 1.0)]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample village (panchayat ward) / block/ non-UFS town

or OG

$D^* = 1$ if $D = 1$

$= D/ 2$ for FSUs with $D > 1$

N = total number of FSUs in any urban (UFS) sub-stratum

Z = total size of a rural sub-stratum or urban sub-stratum of non-UFS towns or OGs (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village/ non-UFS town or OG used for selection.

n = number of sample village/ block/ non-UFS town or OG surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/ block/ non-UFS town or OG/ hamlet-group/ sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of a village/ block/ non-UFS town or OG/ hamlet-group/ sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum in Rural / Urban sector:

3.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For households selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Urban:

Estimation formula for a sub-stratum:

(i) For households selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] \text{ for UFS sub-stratum,}$$

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] \text{ for non-UFS sub-stratum}$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

3.2.4 Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.2.5 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.3 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.4 **Estimates of Error:** The estimated variances of the above estimates will be as follows:

3.4.1 For aggregate \hat{Y} :

$$V \hat{a} r(\hat{Y}) = \sum_s V \hat{a} r(\hat{Y}_s)$$

where $V \hat{a} r(\hat{Y}_s)$ are as given below.

3.4.1.1 For strata with PPSWR selection at first stage:

$$V \hat{a} r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti} \hat{Y}_{sti}}{Z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where
$$\hat{Y}_{sti} = \sum_j Y_{stij},$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

3.4.1.2 For strata with SRSWOR selection at first stage:

$$\text{Var}_{\hat{Y}_s}^{\text{srswor}}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2 ,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.4.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

3.4.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{Z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij} , \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij} ,$$

$$\hat{Y}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] ,$$

$$\hat{X}_{stij} = D_{sti}^* \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} x_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} x_{i2jk} \right]$$

3.4.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[(\hat{Y}_{s't1} - \hat{Y}_{s't2})^2 + \hat{R}^2 (\hat{X}_{s't1} - \hat{X}_{s't2})^2 - 2\hat{R}(\hat{Y}_{s't1} - \hat{Y}_{s't2})(\hat{X}_{s't1} - \hat{X}_{s't2}) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.4.3 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{\text{Var}(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

4. Multipliers:

The formulae for multipliers for a sub-sample and schedule type are given below:

sch type	sub-stratum	formula for multipliers	
		hg / sb 1	hg / sb 2
0.0	rural	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$
	Urban (UFS)	$\frac{N_{st}}{n_{stm}} D_{stmi}^*$	$\frac{N_{st}}{n_{stm}} D_{stmi}^*$
	Urban (non-UFS)	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D_{stmi}^*$
10.2 / 25.2/ 1.0	rural	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$
	Urban (UFS)	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$,	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$,
	Urban (non-UFS)	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$

j = 1, 2, 3 for sch. 10.2
= 1, 2 for sch. 1.0/25.2

- Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
- (iii) For estimating number of villages possessing a characteristics, $D_{stmi}^* = 1$ in the relevant multipliers and there will be only one multiplier for the village.

Appendix-C

SCHEDULE 25.2: PARTICIPATION AND EXPENDITURE IN EDUCATION

*

RURAL	
URBAN	

*

CENTRAL	
STATE	

**GOVERNMENT OF INDIA
NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY
SIXTY-FOURTH ROUND: JULY, 2007-JUNE, 2008
SCHEDULE 25.2: PARTICIPATION AND EXPENDITURE IN EDUCATION**

[0] descriptive identification of sample household			
1. state/u.t.		5. hamlet name	
2. district		6. ward/ inv. unit/ block**	
3. tehsil/town		7. name of head of household	
4. village name		8. name of the informant	

[1] identification of sample household							
item no.	item	code			Item no.	item	code
1.	serial no. of sample village/block				11.	sub-sample	
2.	round number	6		4	12.	FOD sub-region	
3.	schedule number	2	5	2	13.	sample hamlet-group/ sub-block number	
4.	sample (central-1, state-2)				14.	second-stage stratum number	
5.	sector (rural-1, urban-2)				15.	sample household number	
6.	state-region				16.	sl. no. of informant (as in col.1, block 4)	
7.	district code				17.	response code	
8.	stratum number				18.	survey code	
9.	sub-stratum number						
10.	sub-round				19.	reason for substitution of original household (code)	

CODES FOR BLOCK 1

item 17: **response code:** informant co-operative and capable – 1, informant co-operative but not capable – 2, informant busy – 3, informant reluctant – 4, others – 9.

item 18: **survey code:** original h.h. surveyed – 1, substituted h.h. surveyed – 2, casualty – 3

item 19: **reason for substitution of original household :** informant busy – 1, members away from home – 2, informant non-cooperative – 3, others – 9

* tick mark (✓) may be put in the appropriate place

** strike out whichever is not applicable

[2] particulars of field operations												
sl. no.	item	investigator/ senior investigator			superintendent / senior superintendent			other supervisory officer				
(1)	(2)	(3)			(4)			(5)				
1.	i) name (block letters)											
	ii) code											
2.	date(s) of :	DD	MM	YY	DD	MM	YY	DD	MM	YY		
	(i) survey/inspection											
	(ii) receipt											
	(iii) scrutiny											
	(iv) despatch											
3.	number of additional sheets attached											
4.	total time taken to canvass schedule 25.2 (in minutes)											
5.	signature											

[8] remarks by investigator/senior investigator												

[9] remarks by superintendent / senior superintendent												

[10] remarks by other supervisory officer												

[3] household characteristics											
1.	household size					11.	distance to nearest school having primary level classes(code)				
2.	principal industry (NIC – 2004)	description					12.	distance to nearest school having upper primary level classes(code)			
		code (5-digit)						13.	distance to nearest school having secondary level classes(code)		
3.	principal occupation (NCO-2004)	description					Household consumption expenditure (Rs.) during last 30 days out of:				
		code (3-digit)									
4.	household type (code)					14.	purchase				
5.	religion (code)					15.	home produced stock				
6.	social group (code)					16.	receipts in exchange of goods and services				
7.	land possessed as on the date of survey (code)					17.	gifts and loans				
8.	is the household incurring any expenditure during current academic session/year on dependants aged 5-29years studying away from home? (yes-1, no-2)					18.	free collection				
If 'yes' in item 8	9.	no. of such dependants				19.	total (items 14 to 18)				
	10.	total amount sent/ to be sent (Rs.)									

CODES FOR BLOCK 3

item 4: household type : for rural areas: self-employed in non-agriculture-1, agricultural labour-2, other labour-3, self-employed in agriculture-4, others-9
for urban areas: self-employed-1, regular wage/salary earning-2, casual labour-3, others-9

item 5: religion : Hinduism-1, Islam-2, Christianity –3, Sikhism-4, Jainism-5, Buddhism-6, Zoroastrianism-7, others-9

item 6: social group : scheduled tribe-1, scheduled caste-2, other backward class-3, others-9

item 7: land possessed (class intervals in hectares):

<i>less than 0.005.....</i>	<i>01</i>	<i>2.01 – 3.00.....</i>	<i>07</i>
<i>0.005 - 0.01.....</i>	<i>02</i>	<i>3.01 - 4.00</i>	<i>08</i>
<i>0.02 - 0.20</i>	<i>03</i>	<i>4.01 – 6.00.....</i>	<i>10</i>
<i>0.21 - 0.40</i>	<i>04</i>	<i>6.01 - 8.00</i>	<i>11</i>
<i>0.41 - 1.00.....</i>	<i>05</i>	<i>greater than 8.00</i>	<i>12</i>
<i>1.01 - 2.00</i>	<i>06</i>		

item 11/12/13: distance(d) to nearest school having primary/upper primary//secondary level classes :

$d < 1\text{km}$: 1
$1\text{km} \leq d < 2\text{kms}$: 2
$2\text{kms} \leq d < 3\text{kms}$: 3
$3\text{kms} \leq d < 5\text{kms}$: 4
$d \geq 5\text{kms}$: 5

CODES FOR BLOCK 5

Item 6: type of current education: general-1, professional/technical-2, vocational-3

item. 7: course: general course (upto class X) -01, arts/humanities -02, science-03, commerce -04, medicine -05, engineering-06, agriculture 07, law-08, management-10, education-11, chartered accountancy and similar courses-12, IT/computer courses: at basic level -13, IT/computer courses : With minimum entry requirement secondary/higher secondary -14, IT/computer courses : With minimum entry requirement graduation-15, IT/computer courses : With minimum entry requirement post graduation-16, IT/computer courses, others-17, vocational-18; others-19

item 8 : level of current attendance : primary (class I to IV/ V)-07, upper primary/middle-08, secondary-10, higher secondary-11; diploma or certificate (below graduate level) in: agriculture -21, engineering/ technology-22, medicine -23, crafts -24, other subjects-29; diploma or certificate (graduate and above level) in: agriculture-31, engineering/ technology-32, medicine-33, crafts-34, other subjects -39; Graduation level degree courses in: agriculture-41, engineering/ technology-42, medicine-43, crafts-44, other subjects -49; Post-graduation and above degree courses in: agriculture-51, engineering/ technology-52, medicine-53, crafts-54, other subjects -59;

items 9 & 10: present class/grade/year of study(class/grade/year of study in the previous year/academic session): class-I-X: 01-10; beyond X: 10+ no. of years of study

item 11: type of institution: government-1, local body-2, private aided-3, private un-aided-4, not known-5

item 12: nature of institution: recognised -1; unrecognised-2, not known-3

item 13: medium of instruction: Hindi -01, English-02, Assamese-03, Bengali -04, Bodo -05, Dogri -06, Gujarati -07, Kannada -08, Kashmiri -10, Konkani -11, Maithili -12, Malayalam -13, Manipuri -14, Marathi -15, Nepali -16, Oriya -17, Punjabi -18, Sanskrit -20, Santhali -21, Sindhi -22, Tamil -23, Telugu -24, Urdu -25, , others-29

item 14: type of course: part time-1, full time-2, distance learning-3

item 16: whether tuition fee waived : yes: fully -1, partly-2 ; no-3

item 18 : reason for waiver: ST-1, SC-2, OBC-3, handicapped-4, merit-5, financially weak-6, others -9

item 21: reason for receiving benefits: ST-1, SC-2, OBC-3, handicapped-4, merit-5, financially weak-6, others -9

items 22 & 23: received text-books / stationery: all free-1, some free-2, all subsidised-3, some subsidised-4, some free and some subsidised -5; no-6

item 26: distance(d) of the institution from the place of residence: $d < 1\text{km}$:1; $1\text{km} \leq d < 2\text{ kms}$:2; $2\text{km} \leq d < 3\text{ kms}$:3; $3\text{km} \leq d < 5\text{ kms}$:4; $d \geq 5\text{ kms}$:5

item 27: mode of transport: on foot-1, school/institution bus-2, public transport-3, bicycle-4, others-9

item 29: changed educational institution during last one year? no-1, yes: govt. to private-2, private to govt -3, govt to govt-4, private to private-5

[6] particulars of private expenditure for those aged 5-29 years who are currently attending at primary level and above		(1)	(2)	(3)	(4)	(5)
1.	serial no. [as in col.1,block 4]					
2.	age (years) [as in col. 5,block 4]					
For course no. 1 in item 5, bl. 5						
3.	tuition fee					
4.	examination fee					
5.	other fees & payments					
6.	books					
7.	stationery					
8.	uniform					
9.	transport					
10.	private coaching					
11.	other expenditure					
12.	total expenditure on course no. 1[items 3 to 11] (in Rs.)					
13.	total expenditure on course no. 2 in item 5, bl. 5 (in Rs.)					
14.	total expenditure on all other courses (in Rs.)					
15.	grand total [item 12+13+14] (in Rs.)					
16.	whether given any donation (yes-1, no-2)					
<i>If code 1 in item 16</i>	17.	amount paid (Rs.)				
	18.	agency to whom paid (code)				

CODES FOR BLOCK 6

item.18 : agency to whom paid: institution/management-1, other organisation-2, individuals-3

[7] particulars of currently not attending persons aged 5-29 years						(1)	(2)	(3)	(4)	(5)	
1.	serial no. [as in col.1,block 4]										
2.	age (years) [as in col. 5, block 4]										
3.	whether ever enrolled(<i>yes-1, no-2</i>)										
<i>If '1' in item 3, details of last enrolment</i>	4.	age at first enrolment in school (years)									
	5.	level (code)									
	6.	type of education (code)									
	7.	whether completed? (<i>yes-1, no-2</i>)									
		for class X and below	8.	grade/class completed before dropping/ discontinuance							
	9.	age when discontinued/dropped									
	10.	type of institution last attended (code)									
11.	reason for never enrolling/ discontinuing/ dropping out (code)										
12.	usual principal activity status (code)										

CODES FOR BLOCK 7

item 5: level: enrolled in :NFEC/ AIEP-03, TLC/AEC-04, other non-formal -05; formal schooling including EGS: below primary -06, primary -07, upper primary/middle -08, secondary -10, higher secondary -11, diploma/certificate course -12, graduate -13, postgraduate and above -14

item 6: type of education: general-1, professional/technical-2, vocational-3

item 10: type of institution last attended : Govt-1, local body-2, private aided-3, private unaided -4, not known-5

item 11: reason for never enrolling / discontinuing / dropping out:

<i>parent not interested in studies</i>	...01	applicable for "never enrolled" cases only	<i>No tradition in the community</i>	...13
<i>inadequate number of teachers</i>	...02		<i>education not considered necessary</i>	...14
<i>school is far off</i>	...03	applicable for "ever enrolled" cases only		
<i>to work for wage/salary</i>	...04		<i>child not interested in studies</i>	...15
<i>for participating in other economic activities</i>	...05		<i>unable to cope up or failure in studies</i>	...16
<i>to look after younger siblings</i>	...06		<i>unfriendly atmosphere at school</i>	...17
<i>to attend other domestic chores</i>	...07		<i>completed desired level/class</i>	...18
<i>financial constraints</i>	...08	applicable for female students only		
<i>timings of educational institution not suitable</i>	...10		<i>non-availability of lady teacher</i>	...20
<i>for helping in household enterprises</i>	...11		<i>non-availability of ladies toilet</i>	...21
<i>Language/medium of instruction used unfamiliar</i>	...12		<i>others</i>	...29

item 12: usual principal activity status:

worked in h.h. enterprise (self-employed):own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, rentiers, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97
