## प्रस्तावना

राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के अखिल भारत रोजगार एवं बेरोजगारी के सर्वेक्षण राष्ट्रीय तथा राज्य स्तर के श्रम बाजार आंकड़ों के प्रमुख स्रोत हैं। इन सर्वेक्षणों से राष्ट्रीय तथा राज्य स्तर पर श्रमकों संबंधी जनित सांख्यिकी संकेतक विभिन्न सरकारी संगठनों तथा शोधकर्ताओं के लिए योजना बनाने तथा नीति निर्धारण के लिए महत्वपूर्ण इनपुट के तौर पर इस्तेमाल किए जाते हैं। बड़े प्रतिदर्श परिवारों के साथ रोजगार एवं बेरोजगारी पर, राष्ट्रीय प्रतिदर्श सर्वेक्षण द्वारा 27वें दौर के आगे से (अक्टूबर 1972 से सितम्बर 1973) पंचवर्षीय आधार पर सर्वेक्षण आयोजित किया जा रहा है। रोजगार एवं बेरोजगारी पर यह वर्तमान सर्वेक्षण राष्ट्रीय प्रतिदर्श सर्वेक्षण का 68वां दौर है (जुलाई-2011 से जून 2012) और राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय द्वारा रोजगार एवं बेरोजगारी पर अब तक आयोजित सर्वेक्षणों की श्रृंखला में नौवां सर्वेक्षण है। एनएसएस के 68वें दौर में (i) घरेलू उपभोक्ता व्यय और (ii) रोजगार एवं बेरोजगारी के विषयों को प्रतिपादित किया गया है।

एनएसएसओ ने केन्द्रीय प्रतिदर्शों का सर्वेक्षण किया और बहुत से राज्यों ने समान प्रतिदर्शआकार पर सर्वेक्षण में भाग लिया। केन्द्रीय प्रतिदर्शों के आधार पर रोजगार एवं बेरोजगारी के पंचवर्षीय सर्वेक्षणों के परिणाम एनएसएसओ द्वारा उनकी कई रिपोर्टों में प्रकाशित किए गए हैं। एनएसएसओ का यह निरंतर प्रयास रहा है कि सर्वेक्षण निष्कर्ष यथाशीघ्र जारी कर दिए जाए ताकि इसके उपयोगकर्ताओं की सामयिक आवश्यकताओं को पूरा किया जा सके। एनएसएसओ के 68वें दौर के आंकड़ों के आधार पर जून 2013 में भारत में रोजगार और बेरोजगारी के मुख्य संकेतक 2011-12 जारी किए गए थे। मुख्य संकेतकों पर प्रलेखों के अलावा, एनएसएस के 68 वें दौर के आंकड़ों के आधार पर रोजगार एवं बेरोजगारी के विभिन्न मुद्दों पर सात विस्तृत रिपोर्टें जारी करने का प्रस्ताव है। इन सात रिपोर्टों में से भारत में रोजगार एवं बेरोजगारी की स्थिति 2011-12 इस श्रृंखला की पहली रिपोर्ट है। इसमें राष्ट्रीय और राज्य स्तर पर रोजगार एवं बेरोजगारी के विभिन्न पहलुओं से संबंधित अनुमान दिए गए हैं। इस रिपोर्ट में सात अध्याय और पांच परिशिष्ट हैं। इस रिपोर्ट में अनुमानों से संबंधित प्रमुख निष्कर्ष अध्याय तीन से सात में दिए गए हैं। चूंकि यह एक वृहत रिपोर्ट है इसलिए परिशिष्ट सारणियां (परिशिष्ट 'क') इस रिपोर्ट के साथ सीडी में दी गई हैं।

एनएसएसओ के सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण पद्धति, सर्वेक्षण साधन विकसित करने तथा इस रिपोर्ट को तैयार करने का कार्य किया है। एनएसएसओ के क्षेत्रीय संकार्य प्रभाग (एफओडी) ने फील्ड कार्य किया है जबकि आंकड़ा विधायन तथा सारणीयन का कार्य समंक विधायन प्रभाग (डीपीडी) ने किया है। एनएसएसओ के हीसमन्वय एवंप्रकाशन प्रभाग ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया है।

मैं इस रिपोर्ट को निर्धारित समय में निकालने में सावधानीपूर्वक नियोजन तथा इसमें समाहित विभिन्न गतिविधियों के सामयिक निष्पादन के लिए एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किए गए प्रयासों के लिए उनका आभार एवं उनकी प्रशंसा करता हूं। मैं एनएसएस के 68वें दौर के कार्यदल के सदस्यों के प्रति तथा सर्वेक्षण के विभिन्न चरणों में उनके अमूल्य मार्गदर्शन के लिए राष्ट्रीय सांख्यिकीय आयोग (एनएससी) के प्रति अत्यधिक आभारी हूं।

मैं आशा करता हूं कि यह रिपोर्ट योजनाकारों, नीति निर्माताओं तथा शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इसके विषयवस्तु तथा कवरेज में सुधार के लिए सुझावों का स्वागत है।

(ए.के.मेहरा)

महानिदेशक एवं मुख्य कार्यकारी अधिकारी, एनएसएसओ

## PREFACE

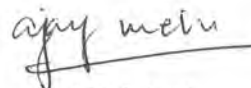

The all India Employment and Unemployment Surveys of National Sample Survey Office (NSSO) are the primary sources of labour market data at the National and State level. The statistical indicators of labour force generated at National and State levels from these surveys are the critical inputs for planning and policy formulation of various Government organisations as well as researchers. NSS surveys on Employment and Unemployment with large sample of households are being conducted quinquennially from 27<sup>th</sup> round (October 1972 - September 1973) onwards. The present employment and unemployment survey of NSS 68<sup>th</sup> round (July 2011 - June 2012), is the ninth survey in the series of such surveys on the employment and unemployment so far conducted by the NSSO. The NSS 68<sup>th</sup> round covered the subjects of (i) Household Consumer Expenditure and (ii) Employment and Unemployment.

NSSO surveyed the central samples and most of the states participated in the survey on matching sample size basis. Based on the central samples, the results of quinquennial surveys of Employment and Unemployment are brought out by NSSO in a number of reports. It is also the endeavour of NSSO to bring out its survey results at the earliest to meet the requirements of its users. Based on the data of NSS 68<sup>th</sup> round, the *Key Indicators of Employment and Unemployment in India, 2011-12* was brought out in June 2013. Apart from the document on key indicators, seven detailed reports are planned to be released on varied aspects of Employment and Unemployment based on NSS 68<sup>th</sup> round data. The present report '*Employment and Unemployment Situation in India, 2011-12*' is the first in the series of seven reports. It presents the estimates pertaining to various facets of employment and unemployment at National and State levels. This report contains seven Chapters and five Appendices. The main findings related to the estimates given in this report are presented in Chapters Three to Seven. Since the report is voluminous, the Appendix Tables (Appendix A) are given in a CD along with the report.

The Survey Design and Research Division (SDRD) of NSSO developed the survey methodology, survey instruments and prepared this report. The field work was carried out by the Field Operations Division (FOD) of NSSO while the data processing and tabulation was undertaken by the Data Processing Division (DPD). The Coordination and Publication Division (CPD) of NSSO coordinated various activities pertaining to the survey.

I acknowledge and appreciate the efforts made by the officials of the different Divisions of NSSO in meticulous planning and timely execution of various activities involved in bringing out this report within the target date. I am highly thankful to the members of the Working Group of NSS 68<sup>th</sup> round and National Statistical Commission (NSC) for their valuable guidance at various stages of the survey.

I hope, this report will be useful to the planners, policy makers and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

(A. K. Mehra)

Director General & Chief Executive Officer, NSSO

New Delhi  
January 2014

## मुख्य बातें

यह रिपोर्ट जुलाई 2011 से जून 2012 के बीच एनएसएस के 68वें दौर में रोजगार एवं बेरोजगारी पर किये गए सर्वेक्षण पर आधारित है। यह सर्वेक्षण 12,737 प्र.च.इ.यों में (7,469 ग्रामों एवं 5,268 नगरीय खंडों) में फैला हुआ था, एवं 1,01,724 परिवारों (59,700 ग्रामीण क्षेत्रों में और 42,024 नगरीय क्षेत्रों में) को इसमें समाविष्ट किया गया, और 4,56,999 व्यक्तियों (2,80,763 ग्रामीण क्षेत्रों में एवं 1,76,236 नगरीय क्षेत्रों) गणना की गई। तीन नजरियों पर आधारित श्रम बल सूचकों के चार विभिन्न प्राक्कलन उपलब्ध हुए हैं (उदाहरणार्थ :- सामान्य स्तर पहुँच, वर्तमान साप्ताहिक स्तर पहुँच, एवं वर्तमान दैनिक स्तर पहुँच) जो कि सर्वेक्षण में क्रियाकलापों के स्तर द्वारा जनसंख्या के वर्गीकरण के लिए अपनाए गए हैं। इन्हें सामान्य स्तर (पीएस) में श्रम बल सूचक (अर्थात् सामान्य स्तर जिसमें केवल मुख्य क्रियाकलाप ही लिया गया है), सामान्य स्तर (पीएस+एसएस) अर्थात्, सामान्य स्तर जिसमें मुख्य एवं गौण क्रियाकलाप एक साथ ली गयी हो), वर्तमान साप्ताहिक स्तर (सीडब्ल्यूएस) एवं वर्तमान दैनिक स्तर (सी.डी.एस)। सामान्य स्तर पहुँच के लिए संदर्भ अवधि 1 वर्ष है, वर्तमान साप्ताहिक स्तर के लिए एक सप्ताह एवं वर्तमान दैनिक स्तर के लिए सर्वेक्षण की तारीख के पहले के प्रत्येक 7 दिन। श्रम बल सूचक जो सामान्य स्तर एवं वर्तमान साप्ताहिक स्तर में मापे गए हैं, व्यक्तियों में एवं, वे जो वर्तमान दैनिक स्तर में हैं व्यक्ति दिनों में हैं। अन्यथा, जैसा कि बताया गया है, कामगार का अर्थ होगा वे कामगार जो सामान्य स्तर (पीएस+एसएस) में हैं। अखिल भारतीय स्तर पर जुलाई 2011-जून 2012 के कुछ मुख्य परिणाम दिए गए हैं, जो एनएसएस के 68वें दौर के रोजगार एवं बेरोजगारी पर हुए सर्वेक्षण से उपलब्ध किए गए हैं :-

**(क) परिवार एवं जनसंख्या :-**

- भारत के करीब 69 प्रतिशत परिवार ग्रामीण भारत के थे एवं उनका लेखा कुल जनसंख्या का करीब 71 प्रतिशत था।
- भारत में औसत परिवार का आकार करीब 4.3 था। ग्रामीण भारत में करीब 4.5 एवं नगरीय भारत में करीब 4.0 था। भारत में लिंग अनुपात (प्रति 1000 पुरुषों पर महिलाओं की संख्या) 946 था। यह ग्रामीण भारत में 957 एवं नगरीय भारत में 922 था।
- दोनों ग्रामीण एवं नगरीय क्षेत्रों में करीब 12 प्रतिशत परिवारों की मुखिया महिलाएँ थीं। महिला प्रधान परिवारों का औसत परिवार आकार ग्रामीण क्षेत्रों में 3.3 एवं नगरीय क्षेत्रों में 3.2 था। महिला प्रधान परिवारों का लिंग अनुपात ग्रामीण क्षेत्रों में 1819 एवं नगरीय क्षेत्रों में 1749 था।
- उन परिवारों में जहाँ कम से कम एक सदस्य जिसकी आयु 15 वर्ष या उससे अधिक है, करीब 5 प्रतिशत ग्रामीण परिवारों एवं 10 प्रतिशत नगरीय परिवारों का कोई भी सामान्य रूप से कार्यरत सदस्य 15 वर्ष या उससे अधिक आयु का नहीं था।
- भारत में करीब 38 प्रतिशत ग्रामीण परिवारों के पास एम.जी. नरेगा जॉब कार्ड था। 18 वर्ष एवं उससे अधिक आयु वाले ग्रामीण व्यक्तियों ने जॉब कार्ड में पंजीकरण करवाया, करीब 51 प्रतिशत

ने कार्य किया एवं करीब 19 प्रतिशत ने चेष्टा की परन्तु एम.जी नरेगा कार्यों में काम नहीं मिला ।

- करीब 60 प्रतिशत ग्रामीण पुरुष, 61 प्रतिशत ग्रामीण महिलाएं एवं, प्रत्येक 66 प्रतिशत नगरीय पुरुष एवं नगरीय महिलाएं आर्थिक रूप से क्रियाशील सक्रिय आयु वर्ग जैसे 15-59 वर्ष के श्रेणी के थे । वे व्यक्ति जिनकी आयु 15-29 वर्ष की थी, और जिन्हें युवा माना गया, का कुल लेखा 26 प्रतिशत प्रत्येक ग्रामीण पुरुष एवं ग्रामीण महिलाओं का था, एवं 29 प्रतिशत नगरीय पुरुष एवं 28 प्रतिशत नगरीय महिलाओं का था ।
- भारत में करीब 72 प्रतिशत ग्रामीण पुरुष, 56 प्रतिशत ग्रामीण महिलाएं, 84 प्रतिशत नगरीय पुरुष एवं 75 प्रतिशत नगरीय महिलाएं साक्षर थे । करीब 21 प्रतिशत ग्रामीण पुरुष, 12 प्रतिशत ग्रामीण महिलाएं, 42 प्रतिशत नगरीय पुरुष एवं 34 प्रतिशत नगरीय महिलाएं शिक्षित थे (शिक्षा स्तर माध्यमिक एवं ऊपर जिसमें डिप्लोमा/प्रमाण-पत्र कोर्स भी शामिल था)।

**(ख) श्रम बल :-**

- सामान्य स्तर (पीएस+एसएस) में करीब 55 प्रतिशत ग्रामीण पुरुष, 25 प्रतिशत ग्रामीण महिलाएं, 56 प्रतिशत नगरीय पुरुष एवं 16 प्रतिशत नगरीय महिलाएं श्रम बल में थे ।
- एनएसएस 66वें दौर (2009-10) एवं 68वें दौर (2011-12) के बीच, सामान्य स्तर (पीएस+एसएस) में ग्रामीण पुरुषों एवं नगरीय पुरुषों के लिए श्रमबल सहभागिता दर (एलएफपीआर) एक समान स्तर का रहा; ग्रामीण महिलाओं के लिए 1 प्रतिशत बिन्दु की कमी हुई, जबकि नगरीय महिलाओं के लिए करीब 1 प्रतिशत बिन्दु की वृद्धि हुई ।
- एनएसएस 50वें दौर (1993-94) एवं 68वें दौर (2011-12) के बीच एलएफपीआर सामान्य स्तर (पीएस+एसएस) में ग्रामीण पुरुषों के लिए 1 प्रतिशत बिन्दु से एवं ग्रामीण महिलाओं के लिए 8 प्रतिशत बिन्दुओं से कमी आई । इस अवधि के दौरान, सामान्य स्तर (पीएस+एसएस) में एलएफपीआर नगरीय पुरुषों के लिए 2 प्रतिशत बिन्दुओं से बढ़ा एवं नगरीय महिलाओं के लिए 1 प्रतिशत बिन्दु से कम हुआ ।

**(ग) कार्य बल :-**

- अखिल-भारतीय स्तर पर सामान्य स्तर (पीएस+एसएस) में कामगार अनुपात जनसंख्या (डब्ल्युपीआर) करीब 39 प्रतिशत था । ग्रामीण क्षेत्रों में यह करीब 40 प्रतिशत एवं नगरीय क्षेत्रों में यह करीब 36 प्रतिशत था । सामान्य स्तर में (पीएस+एसएस) यह डब्ल्यु पी आर ग्रामीण पुरुषों के लिए 54 प्रतिशत, ग्रामीण महिलाओं के लिए 25 प्रतिशत; नगरीय पुरुषों के लिए 55 प्रतिशत एवं नगरीय महिलाओं के लिए 15 प्रतिशत था ।

- भारतीय जनसंख्या का करीब 3 प्रतिशत केवल गौण स्तर में कार्यरत थे । पुरुषों के मुकाबले महिलाओं का अनुपात जो कि केवल गौण क्षमता में कार्यरत थीं, अधिक था । ग्रामीण महिलाओं का करीब 7 प्रतिशत एवं 2 प्रतिशत नगरीय महिलाएँ केवल गौण स्तर में कार्यरत थीं ।
- आखिल-भारतीय स्तर पर डब्ल्युपीआर वर्तमान साप्ताहिक स्तर (सीडब्ल्युएस) में करीब 36 प्रतिशत था, - 37 प्रतिशत ग्रामीण क्षेत्रों में एवं 35 प्रतिशत नगरीय क्षेत्रों में । सीडब्ल्युएस में डब्ल्युपीआर ग्रामीण पुरुषों के लिए 53 प्रतिशत, ग्रामीण महिलाओं के लिए 21 प्रतिशत, 54 प्रतिशत नगरीय पुरुषों के लिए एवं नगरीय महिलाओं के लिए 14 प्रतिशत था ।
- अखिल-भारतीय स्तर पर वर्तमान दैनिक स्तर (सीडीएस) में डब्ल्युपीआर करीब 34 प्रतिशत था । सीडीएस में डब्ल्युपीआर ग्रामीण पुरुषों के लिए करीब 50 प्रतिशत, ग्रामीण महिलाओं के लिए करीब 17 प्रतिशत, नगरीय पुरुषों के लिए करीब 53 प्रतिशत एवं नगरीय महिलाओं के लिए 13 प्रतिशत था ।
- 2009-10 एवं 2011-12 के बीच, सामान्य स्तर (पीएस+एसएस) में डब्ल्युपीआर ग्रामीण महिलाओं के लिए करीब 1 प्रतिशत बिन्दु से कम हुआ, नगरीय महिलाओं के लिए करीब 1 प्रतिशत बिन्दु से बढ़ा एवं पुरुषों में ग्रामीण एवं नगरीय दोनों क्षेत्रों के लिए एक समान स्तर का रहा ।
- एनएसएस 27वें दौर (1972-73) एवं 68वें दौर (2011-12) के बीच, सामान्य स्तर (पीएस+एसएस) में डब्ल्युपीआर ग्रामीण पुरुषों के लिए एक स्तर का रहा, ग्रामीण महिलाओं के लिए करीब 7 प्रतिशत बिन्दुओं से कम हुआ, नगरीय पुरुषों के लिए 5 प्रतिशत बिन्दुओं से बढ़ा एवं नगरीय महिलाओं के लिए 1 प्रतिशत बिन्दु से बढ़ा ।
- सामान्य स्तर (पीएस+एसएस) में कामगारों के बीच, करीब 55 प्रतिशत ग्रामीण पुरुष, 59 प्रतिशत ग्रामीण महिलाएं, 42 प्रतिशत नगरीय पुरुष एवं 43 प्रतिशत नगरीय महिलाएं स्व-कार्यरत थी । कामगारों में, करीब 10 प्रतिशत ग्रामीण पुरुष, 6 प्रतिशत ग्रामीण महिलाएँ एवं 43 प्रतिशत प्रत्येक नगरीय पुरुष एवं नगरीय महिलाएँ नियमित मजदूर/वेतनभोगी कर्मचारी थे । सामान्य स्तर (पीएस+एसएस) के कामगारों में आकस्मिक श्रमिकों का अनुपात ग्रामीण पुरुषों के लिए करीब 36 प्रतिशत, ग्रामीण महिलाओं के लिए 35 प्रतिशत, नगरीय पुरुषों के लिए 15 प्रतिशत एवं नगरीय महिलाओं के लिए 14 प्रतिशत था ।
- सामान्य स्तर (पीएस+एसएस) में 15 वर्ष एवं उससे अधिक आयु वाले कामगारों के बीच, करीब 28 प्रतिशत ग्रामीण पुरुष, 56 प्रतिशत ग्रामीण महिलाएँ, 11 प्रतिशत नगरीय पुरुष एवं 28 प्रतिशत नगरीय महिलाएँ साक्षर नहीं थे ।
- सामान्य स्तर (पीएस+एसएस) में 15 वर्ष एवं उससे अधिक आयु वाले कामगारों के बीच ग्रामीण क्षेत्रों में करीब 26 प्रतिशत पुरुष कामगार एवं 11 प्रतिशत महिला कामगार एवं नगरीय क्षेत्रों में करीब 53 प्रतिशत पुरुष कामगार एवं 40 प्रतिशत महिला कामगार शिक्षित थे (अर्थात्, उनका शैक्षिक स्तर माध्यमिक एवं उससे ऊपर का था, जिसमें डिप्लोमा/प्रमाण पत्र भी शामिल था ।)

- ग्रामीण भारत में सामान्य स्तर (पीएस+एसएस) में कामगारों के बीच, करीब 59 प्रतिशत पुरुष एवं 75 प्रतिशत महिलाएँ कृषि क्षेत्र में कार्यरत थे। कृषि क्रियाकलापों में संलग्न ग्रामीण पुरुषों के लिए कामगारों का अनुपात 1977-78 में 81 प्रतिशत से 2011-12 में 59 प्रतिशत तक और ग्रामीण महिलाओं के लिए कामगारों का अनुपात 1977-78 में 88 प्रतिशत से 2011-12 में 75 प्रतिशत तक क्रमशः गिरा।
- नगरीय भारत में, सामान्य स्तर (पीएस+एसएस) में पुरुष कामगारों में व्यापार, होटल एवं रेस्तरां क्षेत्र ने सबसे अधिक अनुपात में कामगारों को पंजीकृत किया (करीब 26 प्रतिशत) जबकि 'विनिर्माण' एवं 'अन्य सेवाएँ' क्षेत्रों का लेखा-जोखा क्रमशः 22 प्रतिशत एवं 21 प्रतिशत रहा। नगरीय क्षेत्रों के महिला कामगारों के बीच 'अन्य सेवाएँ' क्षेत्र में सबसे अधिक अनुपात में कामगारों को पंजीकृत किया (40 प्रतिशत), तत्पश्चात् आया 'विनिर्माण' (29 प्रतिशत), 'व्यापार, होटल एवं रेस्तरां' (13 प्रतिशत) एवं कृषि (11 प्रतिशत)।
- वर्षों से 'निर्माण' से जुड़े या कार्यरत कामगारों के अनुपात में प्रयाप्त बढ़ोत्तरी पायी गयी है। 1977-78 एवं 2011-12 के बीच निर्माण में कामगारों के अनुपात में ग्रामीण पुरुषों के लिए करीब 11 प्रतिशत बिन्दुओं की वृद्धि हुई, ग्रामीण महिलाओं के लिए 6 प्रतिशत बिन्दुओं से, नगरीय पुरुषों के लिए 7 प्रतिशत बिन्दुओं से एवं नगरीय महिलाओं के लिए 2 प्रतिशत बिन्दुओं से वृद्धि हुई। इस अवधि के दौरान नगरीय क्षेत्रों में, 'व्यापार, होटल एवं रेस्तरां' में कार्यरत पुरुष कामगारों का अनुपात करीब 4 प्रतिशत बिन्दुओं से बढ़ा, एवं 'अन्य सेवाओं' में कार्यरत महिला कामगारों का अनुपात 14 प्रतिशत बिन्दुओं से बढ़ा।
- ग्रामीण क्षेत्रों के कामगारों के बीच, व्यवसाय 'कुशल कृषि एवं मत्स्य पालन कामगारों', ने पुरुष (39 प्रतिशत) एवं महिलाएं (48 प्रतिशत) दोनों में सबसे अधिक अनुपात में कामगारों को पंजीकृत किया। नगरीय क्षेत्रों में, व्यवसाय 'क्राफ्ट एवं उससे जुड़े व्यापार कामगारों' ने सबसे अधिक अनुपात में कामगारों को पंजीकृत किया (पुरुष 19 प्रतिशत) एवं व्यवसाय 'प्राथमिक व्यवसायों', महिलाओं के लिए सबसे अधिक अनुपात में (करीब 23 प्रतिशत) पंजीकरण करवाया।
- 15-59 वर्षीय आयु के नियमित मजदूरी/वेतनभोगी कर्मचारी का दैनिक मजदूरी/वेतनआय ग्रामीण क्षेत्रों में रु. 298.96 एवं नगरीय क्षेत्रों में रु. 449.65 था। यह ग्रामीण पुरुषों के लिए रु. 322.28 था, ग्रामीण महिलाओं के लिए रु. 201.56 था, नगरीय पुरुषों के लिए रु. 469.87 एवं नगरीय महिलाओं के लिए रु. 366.15 था।
- 15-59 वर्षीय आयु के आकस्मिक श्रमिकों में, जो कि एम.जी नरेगा सार्वजनिक कार्यों को छोड़कर सार्वजनिक कार्यों में संलग्न थे, का दैनिक मजदूरी दर ग्रामीण पुरुषों के लिए रु. 127.39 था एवं ग्रामीण महिलाओं के लिए रु. 110.62 था। 15-59 वर्ष के आकस्मिक श्रमिक जो कि एम.जी नरेगा सार्वजनिक कार्यों में कार्यरत थे, का दैनिक मजदूरी दर रु. 112.46 ग्रामीण पुरुषों के लिए

एवं रु. 101.97 ग्रामीण महिलाओं के लिए था। 15-59 वर्ष वाले आकस्मिक श्रमिक का मजदूरी दर जो कि अन्य सार्वजनिक कार्यों में थे, ग्रामीण पुरुषों के लिए रु. 149.32 था, ग्रामीण महिलाओं के लिए रु. 103.28, नगरीय पुरुषों के लिए रु. 182.04 एवं नगरीय महिलाओं के लिए रु. 110.62 था।

**(घ) बेरोजगारी दर :**

- ग्रामीण क्षेत्रों में पुरुषों एवं महिलाओं दोनों के लिए सामान्य स्तर (पीएस+एसएस) में बेरोजगारी दर (यू.आर) करीब 2 प्रतिशत था। यह नगरीय पुरुषों के लिए 3 प्रतिशत एवं नगरीय महिलाओं के लिए 5 प्रतिशत था।
- वर्तमान साप्ताहिक स्तर (सीडब्ल्यूएस) में बेरोजगारी दर ग्रामीण पुरुषों के लिए करीब 3 प्रतिशत, ग्रामीण महिलाओं के लिए 4 प्रतिशत, नगरीय पुरुषों के लिए 4 प्रतिशत एवं नगरीय महिलाओं के लिए 7 प्रतिशत था।
- वर्तमान दैनिक स्तर (सीडीएस) में बेरोजगारी दर ग्रामीण क्षेत्रों में पुरुषों एवं महिलाओं दोनों के लिए करीब 6 प्रतिशत था, नगरीय पुरुषों के लिए 5 प्रतिशत एवं नगरीय महिलाओं के लिए 8 प्रतिशत था।
- 2009-10 एवं 2011-12 के बीच, सामान्य स्तर (पीएस+एसएस) में बेरोजगारी दर ग्रामीण पुरुषों, ग्रामीण महिलाओं एवं नगरीय पुरुषों के लिए अपरिवर्तित रहा, जबकि नगरीय महिलाओं के लिए करीब 1 प्रतिशत बिन्दु से कम हुआ।
- नगरीय पुरुषों के अलावे 15 वर्ष एवं उससे अधिक आयु वाले व्यक्तियों में शिक्षितों (शिक्षा का स्तर:- माध्यमिक एवं उससे ऊपर) के लिए बेरोजगारी दर उन लोगों से अधिक था, जिनका शैक्षिक स्तर माध्यमिक से कम था। सामान्य स्तर (पीएस+एसएस) में शिक्षितों के लिए बेरोजगारी दर ग्रामीण पुरुषों, ग्रामीण महिलाओं, नगरीय पुरुषों एवं नगरीय महिलाओं के लिए क्रमशः करीब 4 प्रतिशत, 10 प्रतिशत, 4 प्रतिशत एवं, 10 प्रतिशत था।
- युवा में बेरोजगारी दर (आयु 15-29 वर्ष) सम्पूर्ण जनसंख्या के मुकाबले काफी अधिक था। सामान्य स्तर (पीएस+एसएस) में युवाओं में बेरोजगारी दर ग्रामीण पुरुषों, ग्रामीण महिलाओं, नगरीय पुरुषों एवं नगरीय महिलाओं के लिए क्रमशः करीब 5 प्रतिशत, 5 प्रतिशत, 8 प्रतिशत एवं 13 प्रतिशत था।
- शिक्षित युवा (आयु : 15-29 वर्ष एवं शिक्षा का स्तर : माध्यमिक एवं ऊपर) में बेरोजगारी दर सामान्य स्तर (पीएस+एसएस) में ग्रामीण पुरुषों, ग्रामीण महिलाओं, नगरीय पुरुषों एवं नगरीय महिलाओं के लिए क्रमशः 8.1 प्रतिशत, 15.5 प्रतिशत, 11.7 प्रतिशत, एवं 19.8 प्रतिशत था।

(इ) अल्प रोजगार

- अल्प रोजगार दर को सामान्य स्तर (पीएस+एसएस) में कामगारों के अनुपात के रूप में परिभाषित किया जाता है, जिसे नियोजित नहीं पाया गया (अर्थात् या तो बेरोजगार अथवा श्रमबल में नहीं में रिपोर्ट किया गया), उस सप्ताह में जो सर्वेक्षण की तारीख से पहले सप्ताह के दौरान था, और यह ग्रामीण पुरुषों के लिए करीब 3 प्रतिशत, ग्रामीण महिलाओं के लिए करीब 17 प्रतिशत, नगरीय पुरुषों के लिए करीब 1 प्रतिशत एवं नगरीय महिलाओं के लिए 6 प्रतिशत था ।
- अल्प रोजगार दर जो कि सामान्य स्तर (पीएस+एसएस) में कामगारों के व्यक्ति- दिनों के अनुपात के रूप में परिभाषित किया गया, जिन्हें व्यवहार में नहीं लाया गया, पुरुषों के मुकाबले महिलाओं में काफी अधिक था । ग्रामीण पुरुषों के लिए यह करीब 7 प्रतिशत, ग्रामीण महिलाओं के लिए करीब 32 प्रतिशत, नगरीय पुरुषों के लिए 3 प्रतिशत एवं नगरीय महिलाओं के लिए 15 प्रतिशत था ।
- अल्प रोजगार दर वर्तमान साप्ताहिक स्तर में कामगारों के व्यक्ति-दिनों के अनुपात के मामले में, जो कार्य के लिए व्यवहार नहीं किए गए, ग्रामीण पुरुषों के लिए करीब 4 प्रतिशत, ग्रामीण महिलाओं के लिए 18 प्रतिशत, नगरीय पुरुषों के लिए 2 प्रतिशत एवं नगरीय महिलाओं के लिए 9 प्रतिशत था ।
- मुख्य स्तर में सामान्यतः नियोजित व्यक्तियों के बीच, दोनों नगरीय एवं ग्रामीण क्षेत्रों में पुरुषों के मुकाबले महिलाओं के एक अधिक अनुपात ने, पिछले 365 दिनों में अधिक या कम नियमित रूप से कार्य नहीं किया - 10 प्रतिशत ग्रामीण पुरुषों के मुकाबले 13 प्रतिशत ग्रामीण महिलाएँ एवं 5 प्रतिशत नगरीय पुरुषों के मुकाबले 7 प्रतिशत नगरीय महिलाएँ ।
- सामान्य मुख्य स्तर के 15 वर्ष एवं उससे अधिक के कामगारों जिन्होंने काम मांगा अथवा अतिरिक्त कार्य के लिए उपलब्ध थे, का अनुपात ग्रामीण पुरुषों के लिए करीब 8 प्रतिशत, ग्रामीण महिलाओं के लिए 5 प्रतिशत, नगरीय पुरुषों के लिए 4 प्रतिशत एवं नगरीय महिलाओं के लिए 3 प्रतिशत का था ।
- सामान्य मुख्य स्तर कामगार जो 15 वर्ष या उससे अधिक आयु के थे एवं जिन्होंने कार्य मांगा अथवा वैकल्पिक कार्य के लिए उपलब्ध थे उनका अनुपात ग्रामीण क्षेत्रों में नगरीय क्षेत्रों के मुकाबले अधिक था - ग्रामीण क्षेत्रों में करीब 6 प्रतिशत एवं नगरीय क्षेत्रों में 4 प्रतिशत । ग्रामीण पुरुषों के लिए तदनुसार अनुपात करीब 7 प्रतिशत, ग्रामीण महिलाओं, नगरीय पुरुषों एवं नगरीय महिलाओं के लिए प्रत्येक 4 प्रतिशत का था ।

## एफ : विभिन्न उपागमों में रोजगार एवं बेरोजगारी संकेतकों की कुंजी

**बेरोजगारी दर (यूआर) :** यूआर श्रमबल (जिसमें नियोजित एवं अनियोजित दोनों सामिल हैं) में प्रति 1000 व्यक्तियों/व्यक्ति-दिनों में श्रमबल में अनियोजित व्यक्तियों/व्यक्ति-दिनों की संख्या के रूप में पारिभाषित किया जाता है ।

## HIGHLIGHTS

This report is based on the employment and unemployment survey conducted in the 68<sup>th</sup> round of NSS during July 2011 to June 2012. The survey was spread over 12,737 FSUs (7,469 villages and 5,268 urban blocks) covering 1, 01,724 households (59,700 in rural areas and 42,024 in urban areas) and enumerating 4,56,999 persons (2, 80,763 in rural areas and 1,76,236 in urban areas). Four different estimates of the labour force indicators have been obtained based on the three approaches (viz. usual status approach, *current weekly status* approach and *current daily status* approach) adopted in the survey for classification of the population by activity statuses. These are termed as labour force indicators in *usual status (ps)* (i.e. usual status taking principal activity only), *usual status (ps+ss)* (i.e. usual status taking principal and subsidiary activities together), *current weekly status (CWS)* and *current daily status (CDS)*. The reference period for usual status approach is 1 year, for *current weekly status* approach is 1 week and that for *current daily status* approach is each of the 7 days preceding the date of survey. The labour force indicators measured in *usual status* and *current weekly status* are in persons and those in *current daily status* are in person-days. Unless otherwise stated, workers will mean workers in the *usual status (ps+ss)*. Some of the key results at the all-India level for the period July 2011 - June 2012 as obtained from the employment and unemployment survey of NSS 68<sup>th</sup> round are stated below.

### A Household and Population

- About 69 per cent of the households in India belonged to rural areas and accounted for about 71 per cent of total population.
- The average household size in India was about 4.3. It was about 4.5 in rural India and about 4.0 in urban India. The sex ratio (number of females per 1000 of males) in India was 946. It was 957 in rural India and 922 in urban India.
- About 12 per cent of the households in both the rural and urban areas were headed by females. The average household size of the female headed households was 3.3 in rural areas and 3.2 in urban areas. The sex ratio in the female headed households was 1819 in rural areas and 1749 in urban areas.
- Among those households having at least one member of age 15 years and above, about 5 per cent of the rural households and 10 per cent of the urban households had no usually employed member of age 15 years and above.
- About 38 per cent of the rural households in India had MGNREG job card. Among rural persons of age 18 years and above registered in MGNREG job card, about 51 per cent worked and about 19 per cent sought but did not get MGNREG works.

- About 60 per cent of the rural males, 61 per cent of rural females, 66 per cent each of the urban males and urban females belonged to the economically active age group viz. 15-59 years. Persons aged 15-29 years, who were considered as the youth, accounted for 26 per cent each of rural males and rural females, 29 per cent of urban males and 28 per cent of urban females.
- About 72 per cent of rural males, 56 per cent of rural females, 84 per cent of urban males and 75 per cent of urban females in India were literate. About 21 per cent of rural males, 12 per cent of rural females, 42 per cent of urban males and 34 per cent of urban females were educated (education level *secondary and above including diploma/ certificate course*).

## **B Labour Force**

- About 55 per cent of the rural males, 25 per cent of the rural females, 56 per cent of the urban males and 16 per cent of the urban females were in the labour force in *usual status (ps+ss)*.
- Between NSS 66<sup>th</sup> round (2009-10) and 68<sup>th</sup> round (2011-12), labour force participation rate (LFPR) in *usual status (ps+ss)* for rural males and urban males remained at the same level, decreased by 1 percentage point for rural females and increased by about 1 percentage point for urban females.
- Between NSS 50<sup>th</sup> round (1993-94) and 68<sup>th</sup> round (2011-12), the LFPR in *usual status (ps+ss)* decreased by 1 percentage point for rural males and by 8 percentage points for rural females. During this period, LFPR in *usual status (ps+ss)* increased by 2 percentage points for urban males and decreased by 1 percentage point for urban females.

## **C Work Force**

- The worker population ratio (WPR) in *usual status (ps+ss)* was about 39 per cent at the all-India level. It was about 40 per cent in rural areas and 36 per cent in urban areas. The WPR in *usual status (ps+ss)* was 54 per cent for rural males, 25 per cent for rural females, 55 per cent for urban males and 15 per cent for urban females.
- About 3 per cent of the Indian population was employed only in the subsidiary status. The proportion of females employed in the subsidiary capacity only, was higher than that of males. About 7 per cent of rural females and about 2 per cent of urban females were employed only in the subsidiary status.

- The WPR in *current weekly status* (CWS) was about 36 per cent at the all-India level - 37 per cent in rural areas and 35 per cent in urban areas. The WPR in CWS was 53 per cent for rural males, 21 per cent for rural females, 54 per cent for urban males and 14 per cent for urban females.
- The WPR in *current daily status* (CDS) was about 34 per cent at the all-India level. The WPR in CDS was about 50 per cent for rural males, 17 per cent for rural females, 53 per cent for urban males and 13 per cent for urban females.
- Between 2009-10 and 2011-12, WPR in *usual status* (*ps+ss*) decreased by about 1 percentage point for rural females, increased by about 1 percentage point for urban females and remained almost at the same level for males of both rural and urban areas.
- Between NSS 27<sup>th</sup> round (1972-73) and 68<sup>th</sup> round (2011-12), WPR in *usual status* (*ps+ss*) remained at the same level for rural males, decreased by about 7 percentage points for rural females, increased by 5 percentage points for urban males and 1 percentage point for urban females.
- Among workers in *usual status* (*ps+ss*), about 55 per cent of the rural males, 59 per cent of rural females, 42 per cent for urban males and 43 per cent for urban females were *self-employed*. Among workers, about 10 per cent of rural males, 6 per cent of rural females and 43 per cent in each of urban males and urban females were *regular wage/ salaried employees*. The proportion of *casual labour* among workers in *usual status* (*ps+ss*) was about 36 per cent for rural males, 35 per cent for rural females, 15 per cent for urban males and 14 per cent for urban females.
- Among workers in *usual status* (*ps+ss*) of age 15 years and above, about 28 per cent of rural males, 56 per cent of rural females, 11 per cent of urban males and 28 per cent of urban females were not literate.
- Among workers in *usual status* (*ps+ss*) of age 15 years and above, about 26 per cent of male workers and 11 per cent of female workers in the rural areas and about 53 per cent for male workers and 40 per cent for female workers in the urban areas were educated (i.e. with educational level secondary and above including diploma/ certificate).
- Among workers in the *usual status* (*ps+ss*) in rural India, about 59 per cent of the males and 75 per cent of the females were engaged in the agriculture sector. The proportion of workers engaged in the agricultural activities gradually fell from 81 per cent in 1977-78 to 59 per cent in 2011-12 for rural males and from 88 per cent in 1977-78 to 75 per cent in 2011-12 for rural females.

- In urban India, among male workers in *usual status (ps+ss)*, the 'trade, hotel and restaurant' sector registered the highest proportion of workers (about 26 per cent) while 'manufacturing' and 'other services' sectors accounted for about 22 per cent and 21 per cent, respectively. Among female workers in the urban areas, 'other services' sector registered the highest proportion of workers (40 per cent), followed by 'manufacturing' (29 per cent), 'trade, hotel and restaurant' (13 per cent) and 'agriculture' (11 per cent).
- Over the years, there has been considerable increase in the proportion of workers engaged in 'construction'. Between 1977-78 and 2011-12, the increase in the proportion of workers in 'construction' was about 11 percentage points for rural males, 6 percentage points for rural females, 7 percentage points for urban males and 2 percentage points for urban females. During this period, in the urban areas, proportion of male workers engaged in 'trade, hotel and restaurant' increased by about 4 percentage points and proportion of female workers engaged in 'other services' sector increased by 14 percentage points.
- Among the workers in the rural areas, the occupation 'skilled agricultural and fishery workers' registered the highest proportion of workers for both males (39 per cent) and females (48 per cent). In the urban areas, the occupation 'craft and related trades workers' registered the highest proportion of workers for males (19 per cent) and the occupation 'elementary occupations' for females (about 23 per cent).
- The daily wage/salary earnings of a regular wage/salaried employee of age 15-59 years was Rs. 298.96 in the rural areas and Rs. 449.65 in the urban areas. This was Rs. 322.28 for rural males, Rs. 201.56 for rural females, Rs. 469.87 for urban males and Rs. 366.15 for urban females.
- The daily wage rate of casual labour of age 15-59 years, engaged in *public works other than MGNREG public works* was Rs. 127.39 for rural males and Rs. 110.62 for rural females. Among the casual labourers of age 15-59 years engaged in *MGNREG public works*, the daily wage rate was Rs. 112.46 for rural males and Rs. 101.97 for rural females. The daily wage rate of casual labour of age 15-59 years engaged in *works other than public works* was Rs. 149.32 for rural males, Rs. 103.28 for rural females, Rs. 182.04 for urban males and Rs. 110.62 for urban females.

## D Unemployment Rate

- The unemployment rate (UR) in *usual status* (ps+ss) was about 2 per cent for both males and females in rural areas, 3 per cent for urban males and 5 per cent for urban females.
- The unemployment rate in *current weekly status* (CWS) was about 3 per cent for rural males, 4 per cent for rural females, 4 per cent for urban males and 7 per cent for urban females.
- The unemployment rate in *current daily status* (CDS) was about 6 per cent for both males and females in rural areas, 5 per cent for urban males and 8 per cent for urban females.
- Between 2009-10 and 2011-12, the unemployment rate in *usual status* (ps+ss) remained invariant for rural males, rural females and urban males while it decreased by about 1 percentage point for urban females.
- Among persons of age 15 years and above, other than urban males, the unemployment rate for the *educated* (level of education: secondary and above) was higher than that among those, whose education level was lower than *secondary*. The unemployment rates for the *educated* in *usual status* (ps+ss) were about 4 per cent, 10 per cent, 4 per cent and 10 per cent for rural males, rural females, urban males and urban females, respectively.
- The unemployment rate among the youth (age: 15-29 years) was much higher as compared to that in the overall population. The unemployment rates among the youth in *usual status* (ps+ss) were about 5 per cent, 5 per cent, 8 per cent and 13 per cent for rural males, rural females, urban males and urban females, respectively.
- The unemployment rates in *usual status* (ps+ss) among the educated youth (age: 15-29 years and level of education: secondary and above) were 8.1 per cent, 15.5 per cent, 11.7 per cent and 19.8 per cent for rural males, rural females, urban males and urban females, respectively.

## E Underemployment

- The underemployment rate defined as the proportion of workers in *usual status* (*ps+ss*) who were found to be *not* employed (i.e. reporting either unemployed or not in labour force) during the week preceding the date of survey, was about 3 per cent for rural males, 17 per cent for rural females, 1 per cent for urban males and 6 per cent for urban females.
- The underemployment rate defined in terms of the proportion of person-days of the workers in *usual status* (*ps+ss*) which were not utilised for work was quite high for females as compared to males. This was about 7 per cent for rural males, 32 per cent for rural females, 3 per cent for urban males and 15 per cent for urban females.
- The underemployment rate defined in terms of the proportion of person-days of the workers in *current weekly status* which were not utilised for work, was about 4 per cent for rural males, 18 per cent for rural females, 2 per cent for urban males and 9 per cent for urban females.
- Among the usually employed persons in the principal status, a higher proportion of females than males, in both rural and urban areas, did not work more or less regularly during last 365 days – 13 per cent for rural females as against 10 per cent for rural males and 7 per cent for urban females as against 5 per cent for urban males.
- The proportion of usual principal status workers of age 15 years and above who sought or were available for additional work was about 8 per cent for rural males, 5 per cent for rural females, 4 per cent for urban males and 3 per cent for urban females.
- The proportion of usual principal status workers of age 15 years and above who sought or were available for alternative work was higher in rural areas than in urban areas - about 6 per cent in rural areas and 4 per cent in urban areas. The corresponding proportions were about 7 per cent for rural males, 4 per cent each for rural females, urban males and urban females.

## F: Key Employment Unemployment Indicators in different approaches

**Table 1: Key employment and unemployment indicators (per 1000) at a glance**

**Labour force participation rate (LFPR):** LFPR is defined as the number of persons/ person-days in the labour force per 1000 persons /person-days.

**Worker Population Ratio (WPR):** WPR is defined as the number of persons/person-days employed per 1000 persons/person-days.

**Proportion Unemployed (PU):** It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.

**Unemployment Rate (UR):** UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force (which includes both the employed and unemployed).

Table (60)	Per 1000 distribution of usual status workers who were without work for at least 1 month by period without work and status of seeking/ available for work during the months without work for each usual activity status and broad industry division	A-670-A-696
Table (61)	Per 1000 distribution of usual status workers (ps+ss) who were without work for at least 1 month and who sought or were available for work on at least some days during those month(s) by nature of efforts made to get work for each usual activity status and broad industry division	A-697-A-705
Table (62)	Per 1000 distribution of usual status workers (15 years and above) who had sought or were available for additional work during the period the person had work by duration and reason for seeking work/ availability for work for each activity status	A-706-A-723
Table (63)	Per 1000 distribution of usual status workers (15 years and above) who had sought or were available for alternative work during the period the person had work by duration and reason for seeking work/ availability for work for each activity status	A-724-A-741
Table (64)	Number per 1000 usual status workers of age 15 years and above i) with mostly full time work and ii) who have worked more or less regularly by activity status and broad industry division	A-742-A-768
Table (65)	Per 1000 distribution of permanent workers (ps+ss) of age 15 years & above by level of education for different activity status and industry	A-769-A-776

# Chapter One

## Introduction

### 1.0 The Report in Perspective

1.0.1 In its 32<sup>nd</sup> Meeting held on 23-24 April 2010, the National Statistical Commission (NSC) considered the use of the 2009-10 NSSO quinquennial survey as the base year for both the price indices as well as revision of the national income estimates and felt that 2009-10 being a non-normal year may pose problems. Hence, it was desirable to repeat the survey once again in respect of consumer expenditure as well as employment-unemployment issues. In its 33<sup>rd</sup> Meeting held on 19-21 May 2010, the NSC decided that the 68<sup>th</sup> Round of NSS would be devoted to repeating the quinquennial survey on consumer expenditure and employment-unemployment with a provision in the employment schedule to measure employment under NREGA.

1.0.2 Pursuant to the above decision of the NSC, the National Sample Survey Office (NSSO), as a part of its 68<sup>th</sup> round survey programme during the period July 2011 - June 2012, carried out an all-India household survey on the situation of employment and unemployment in India. In this survey, a nation-wide household enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment at the national and State/UT levels. Information on various facets of employment and unemployment in India was collected in NSS 68<sup>th</sup> round through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures. Based on the data collected during the entire period of survey, estimates of various characteristics pertaining to employment and unemployment for each State/UT and all-India have been presented in this report.

### 1.1 Objective of the Employment and Unemployment surveys of NSSO

1.1.1 The main objective of the employment and unemployment surveys conducted by NSSO at periodic interval is to get estimates of level parameters of various labour force characteristics at the national and State/UT level. These statistical indicators on labour market are required for planning, policy and decision making at various levels, both within the government and outside. The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of the labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional - it varies with region, age, education, gender, level of living, industry and occupational category. These aspects of the labour force are captured in detail in the employment and unemployment surveys of NSSO and estimates are generated for labour force participation rate, worker population ratio, unemployment rate, extent of underemployment, wages of employees, etc. The indicators of the structural aspects of the workforce such as status in employment, industrial distribution and occupational distribution of the workers are also derived from these surveys. Besides, from the data collected on the

particulars of enterprises and conditions of employment, the aspects of employment in the informal sector and informal employment are reflected through the conceptual framework of the survey.

## **1.2 Genesis of Employment and Unemployment Survey of NSSO**

1.2.1 The quinquennial survey on employment and unemployment is one of the important surveys conducted repeatedly by the NSSO. The first such survey was carried out in the 27<sup>th</sup> round of NSSO during October 1972 - September 1973. The current employment and unemployment survey of NSS 68<sup>th</sup> round is like a quinquennial survey as far as subjects of enquiry, design, questionnaires and sample sizes are concerned. Including the present employment and unemployment survey of NSS 68<sup>th</sup> round (July 2011 - June 2012), nine such comprehensive surveys on the employment and unemployment situation in India have so far been conducted by NSSO.

1.2.2 *Past Quinquennial Surveys:* To assess the volume and structure of employment and unemployment, starting with the 9<sup>th</sup> round (May - September, 1955), NSSO conducted a number of surveys on employment and unemployment. To give a firm conceptual framework for conducting the employment and unemployment surveys, the Planning Commission, in the year 1970, set up an “Expert Committee on Unemployment Estimates” (popularly known as the Dantwala Committee). The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in NSS 27<sup>th</sup> round (October 1972 - September 1973). Since then, seven comprehensive quinquennial surveys on employment and unemployment situation in India have been carried out by NSSO prior to the present survey of the 68<sup>th</sup> round (July 2011 - June 2012). These were carried out during the 32<sup>nd</sup> round (July 1977 - June 1978), 38<sup>th</sup> round (January - December 1983), 43<sup>rd</sup> round (July 1987 - June 1988), 50<sup>th</sup> round (July 1993 - June 1994), 55<sup>th</sup> round (July 1999 - June 2000), 61<sup>st</sup> round (July 2004 - June 2005) and 66<sup>th</sup> round (July 2009 - June 2010), in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee.

1.2.3 *Other surveys on employment-unemployment:* Apart from the quinquennial surveys on employment and unemployment, NSSO has also collected information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45<sup>th</sup> round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). This procedure of collecting data on employment and unemployment in the annual rounds of NSSO continued till NSS 59<sup>th</sup> round (January - December 2003). In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). In the annual rounds, particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected by applying a similar approach as in the quinquennial rounds. In the quinquennial rounds, current daily activities in terms of status and industry are collected for the household members and current weekly activity is derived from the daily activities of the reference week whereas in the

annual rounds, current weekly activity particulars were collected through direct query. In the 60<sup>th</sup> round (January - June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment were collected in the same manner as that of the quinquennial rounds. A separate schedule on employment and unemployment, similar to the one canvassed in the 60<sup>th</sup> round, was also canvassed in the 62<sup>nd</sup> round (July 2005 - June 2006) and 64<sup>th</sup> round (July 2007- June 2008) of NSSO.

### 1.3 Scope of NSS 68<sup>th</sup> round Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. In the employment and unemployment surveys of the quinquennial rounds of NSSO, persons are classified into various activity categories in three approaches on the basis of activities (economic/non-economic) pursued by them during certain specified reference periods. The three approaches are usual status approach, current weekly status approach and the current daily status approach. Three reference periods used in NSS surveys are (i) one year, (ii) one week and (iii) each day of the reference week. In the usual status approach, the activity status of a person is determined on the basis of the reference period of one year. The activity status of a person in current weekly status approach is determined on the basis of the reference period of one week and that in current daily status approach is determined on the basis of the reference period of one day. Based on the classification of the individuals into various activity categories in the three approaches, labour force indicators like, labour force participation rate (LFPR), worker population ratio (WPR), unemployment rate (UR) are derived in usual status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS). As in the past, through the employment and unemployment schedule (Schedule 10) of 68<sup>th</sup> round, NSSO collected data to measure employment and unemployment indicators in terms of usual status (ps), usual status (ps+ss), current weekly status (CWS) and current daily status (CDS).

1.3.2 The major features of data collected in NSS 66<sup>th</sup> round were also collected in NSS 68<sup>th</sup> round. The activity participation of the people is not only dynamic but also multidimensional - it varies over regions, age, education, gender, industry and occupational categories. In order to reveal the multidimensional aspects of the employment and unemployment situation in India, the employment and unemployment schedule (Schedule 10) of NSS 68<sup>th</sup> round captured a range of information on the following aspects:

- i) *Particulars on household characteristics like household size, household type, religion and social group of the household, land owned, possessed and cultivated by the household, etc.* For the rural households, information was collected on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card. For the households with MGNREG job card, information was also collected on (i) number of MGNREG job cards issued to the household and (ii) whether any member has

any bank/ post office account. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment and unemployment characteristics with the level of living of the population.

ii) *Demographic particulars of the household members like age, sex, educational level, status of current attendance, status of registration in placement agency, vocational training received, etc.* For rural households with MGNREG job card, for persons of age 18 years and above, whether the person was registered in any MGNREG job card and if registered, whether he/she worked in MGNREG works during last 365 days.

iii) *Particulars of usual principal activity, usual subsidiary economic activity, current weekly activity and current daily activity for all the members of the sample households.* For persons engaged in economic activities, information on detailed activity status, industry of work, occupation, wage and salary earnings of the employees for the work done during the reference week was also collected. For those who were unemployed on all the 7 days of the reference week, information was collected regarding the duration of the present spell of unemployment.

iv) *Particulars of the enterprise like location of work place, type of enterprises, number of workers in the enterprise etc. for the usual principal status workers and usual subsidiary status workers engaged in industries other than growing of crops, plant propagation and mixed farming.*

v) *Particulars on conditions of employment like type of job contract, eligibility for paid leave, availability of social security benefits and mode of payment for the usual principal status employees and usual subsidiary status employees engaged in industries other than growing of crops, plant propagation and mixed farming.*

vi) *Particulars regarding extent of underutilization of the labour time, nature of employment (permanent/temporary), existence of union/ association in their activity, etc. for persons who were employed either in usual principal status or in usual subsidiary status.*

vii) *Particulars regarding participation in specified activities like (i) maintenance of kitchen garden, (ii) work in household poultry/diary, (iii) free collection of primary goods, husking of paddy, grinding of food grains, making baskets, sewing, tailoring, weaving for household use, tutoring of own children or others' children free of charge, etc. for persons who were classified as engaged in domestic duties in the usual principal status.*

## 1.4 Outline of NSS 68<sup>th</sup> round survey

1.4.1 *Geographical coverage*: The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometers of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year.

1.4.2 *Sub-round*: The fieldwork of the 68<sup>th</sup> round of NSSO was of one year duration starting on 1<sup>st</sup> July, 2011 and ending on 30<sup>th</sup> June, 2012. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1<sup>st</sup> sub-round period ranging from July to September 2011, the 2<sup>nd</sup> sub-round period from October to December 2011 and so on. In each of these four sub-rounds, an equal number of sample villages/blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

## 1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 68th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from these FSUs. For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks (2007-12) constituted the sampling frame. Within each district of a State/UT, two basic strata were formed viz. (i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. Sub-stratification was done within stratum of both rural and urban areas. If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population. If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS 2007-12.

1.5.2 At the all-India level, a total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs

was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/sub-strata in proportion to the population as per census 2001. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4 and equal number of sample FSUs was allocated in each of the four sub-rounds.

1.5.3 For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum/sub-stratum, required number of sample FSUs was selected by Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households. All households listed in the selected village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). A total of 8 households were selected from each sample village/block for canvassing the employment and unemployment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,784 FSUs (7,508 villages and 5,276 urban blocks) allotted for the central sample<sup>1</sup> at the all-India level, 12,737 FSUs (7,469 villages and 5,268 urban blocks) could be surveyed for canvassing the employment and unemployment schedule (Schedule 10). The number of households surveyed was 1,01,724 (59,700 in rural areas and 42,024 in urban areas) and number of persons surveyed was 4,56,999 (2,80,763 in rural areas and 1,76,236 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this report. Field investigators of NSSO collected data for all members of the sample households by interviewing the informants of the selected households.

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in census. The urban frame used in the survey is the latest updated UFS that takes into account the newly declared towns after the last census 2001. Accordingly the rural sector is the one that is not urban.

---

<sup>1</sup> The sample selected for NSS 68<sup>th</sup> round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey. The sample surveyed by State Government officials is termed as "State sample".

## **1.6 Reports on Employment and Unemployment survey of NSS 68<sup>th</sup> round**

1.6.1 The results of the employment and unemployment surveys of NSSO, generated from the central sample data, are released in the form of reports. It has been planned to bring out the results of the employment and unemployment survey of NSS 68<sup>th</sup> round in seven reports. In addition to these seven reports planned to be brought out, a document entitled 'Key Indicators of Employment and Unemployment in India, 2011-12' showing the estimates of some key employment and unemployment characteristics for each State/UT and all-India obtained from NSS 68<sup>th</sup> round has already been brought out in June 2013. Of the seven reports, the present one - first in the series of reports - deals in some detail, with the national and State/UT level estimates of labour force indicators in usual status, current weekly status and current daily status and their patterns in association with their correlates. The present report also covers some aspects of underemployment. It has been planned to bring out the results of the employment and unemployment survey of NSS 68<sup>th</sup> round in seven reports. The tentative titles of the seven reports are:

- (i) *Employment and Unemployment Situation in India,*
- (ii) *Informal Sector and Conditions of Employment in India,*
- (iii) *Participation of Women in Specified Activities along with Domestic Duties,*
- (iv) *Employment and Unemployment situation among Social Groups in India,*
- (v) *Employment and Unemployment situation in Cities and Towns in India,*
- (vi) *Employment and Unemployment situation among Major Religious groups in India,*
- (vii) *Status of Education and Vocational Training in India.*

## **1.7 Contents of this report**

1.7.1 This report contains seven chapters, including the present introductory chapter (Chapter One), and five appendices. Chapter Two describes the concepts and definitions of those terms used in the survey in connection with the various items covered in this report. The summary of findings of NSS 68<sup>th</sup> round are presented and discussed in Chapters Three to Seven. To start with, Chapter Three is on household and population characteristics. Discussions on the labour force, the work force and the unemployed are presented in Chapters Four, Five and Six, respectively. The last chapter, viz. Chapter Seven, deals with various aspects of underemployment. In Chapters Three to Seven, wherever State/UT level tables have been presented, those have been placed at the end of the respective chapters. The detailed tables

forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. The Projected Population as on 1<sup>st</sup> January 2012 obtained by using the census population as on 1.3.2011 and the rate of growth of population between census 2001 and 2011 have been presented in Appendix C. The projections have been given for, male and female, separately, for rural and urban for each State/UT. Appendix D gives a facsimile of the schedule canvassed in the survey. The RSEs of the estimates of worker population ratio (WPR) according to usual status (ps+ss) and current weekly status (CWS) have been presented in Appendix E for the major States.

1.7.2 The estimates presented in this report, in general, refer to the mid-point of the survey period (July 2011 - June 2012) of NSS 68<sup>th</sup> round, i.e., 01.01.2012. In the NSS reports, the estimates of the employment and unemployment characteristics are generally presented as ratios. To estimate the absolute number of any category corresponding to the NSS 68<sup>th</sup> round, the survey estimates of ratios may be applied to the Projected Population as on 1st January 2012 as given in Appendix C. It may also be noted that as the tables are generally presented as 'per 1000 distribution' or rates 'per 1000', the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. The estimates of the employment and unemployment characteristics have been presented in the report for all the States and UTs. While using the State/UT level estimates, it may be noted that the sample sizes for the smaller States/UTs may not be adequate enough for getting sufficiently reliable estimates for some of the employment and unemployment characteristics.

1.7.3 Appendix A contains the detailed tables of the report. The survey estimates of the aggregates are presented in the margin of the detailed tables and these may be used to combine the estimates of the ratios or to get the ratios with more significant digits. The cell-level figures in the detailed tables, when added up, may not exactly be equal to the figure shown against the 'total' column/row due to rounding off and/or presence of non-response cases. If there are no sample households/persons in a particular category, the estimates/estimated proportions of households/persons in that category appear as zero (0) in the detailed tables. Estimated numbers per 1000 are also shown as zero (0), when they are greater than 0 but less than 0.5. Appendix A of the report turns out to be very voluminous and hence, the hard-copy of Appendix A does not form a part of the Report. The soft copy of Appendix A of the report is provided in CD.

## Chapter Two

### Concepts and Definitions

**2.0** The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

**2.1 Household and household size:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household. The same principle was applicable for the residential staff of such establishments. However, if a group of persons among them pooled their income for spending, they were treated as forming a single household. A family living in a hotel was treated as a single household. The size of a household is the total number of persons in the household.

**2.2 Age (years):** The age in completed years, as on the date of survey, of the household members were recorded.

**2.3 Household type:** The household type was decided based on the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities was considered; but the incomes of servants and paying guests were not taken into account.

In **rural** areas, a household belonged to any one of the following six household types:

1. self-employed in agriculture
2. self-employed in non-agriculture
3. regular wage/salary earning
4. casual labour in agriculture
5. casual labour in non-agriculture
6. others

For **urban** areas, the household types are:

1. self-employed
2. regular wage/salary earning
3. casual labour
4. others

**2.4 Land owned by the household as on date of survey:** A piece of land was considered as 'owned by the household' if permanent heritable possession with or without the right to transfer the title was vested in a member or members of the household. Land held in owner-like possession say, under perpetual lease, hereditary tenure, long-term lease for 30 years or more, etc., was also considered as land owned.

**2.5 Land possessed by the household as on date of survey:** The area of land possessed included land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e. encroached) by the household but excluded land 'leased out'. For a piece of land under the possession of the household, if the household did not have the title of ownership and also did not have lease agreement for the use of land transacted, either orally or in writing, such land was considered as 'neither owned nor leased in'. In collecting information regarding land possessed, the actual position as obtained on the date of survey was considered. The 'area of land possessed' did not include the area of land owned, leased-in, etc. by the servants/paying guests who were considered as normal members of the household, as per the definition of household taken up for the survey.

**2.6 Land cultivated (including orchard and plantation) during July 2010-June 2011:** Land cultivated (including orchard and plantation) during the agricultural year 2010-2011, i.e., July 2010 to June 2011 was recorded considering cultivation of land from the land 'owned', 'land leased-in' or from 'land neither owned nor leased-in'. Area with field crops and area under orchards and plantations was counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares upto 3 places of decimals.

**2.7 General educational level:** A person who can both read and write a simple message with understanding in at least one language was considered as literate for the purpose of the survey. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed by him/her. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) not literate, (ii) literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total

*Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above.* The criterion for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category ‘diploma or certificate course’ meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category ‘graduate’. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category ‘post-graduate and above’.

**2.8 Technical educational level:** The highest level of technical education successfully completed by each member of the household was recorded in terms of 12 categories viz. (i) *no technical education, (ii) technical degree in agriculture / engineering / technology / medicine etc. (iii) diploma or certificate below graduate level in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, and (iv) diploma or certificate equivalent to graduate and above level in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects.* Technical diploma or certificate in ‘other subjects’ included diploma or certificate in management, applied arts, etc.

**2.9 Vocational training:** The main objective of vocational education and training is to prepare persons, especially the youth, for the world of work and make them employable for a broad range of occupations in various industries and other economic sectors. It aims at imparting training to persons in very specific fields through providing significant ‘hands on’ experience in acquiring necessary skill in the specific vocation or trade, which make them employable or create for them opportunities of self-employment. A vocational training was broadly defined as a training, which prepared an individual for a specific vocation or occupation.

**2.9.1 Formal vocational training:** The vocational training that took place in educational and training institutions which followed a structured training programme and led to certificates, diplomas or degrees, recognised by State/Central Government, Public Sector and other reputed concerns was considered as formal vocational training. By structured training programme, it was meant that (i) the training programme had a definite title with prescribed syllabus and curriculum and a specified duration of the training, and (ii) the training had some entry level eligibility in terms of education and age.

### 2.9.2 Non-formal vocational training:

(a) *Hereditary*: The expertise in a vocation or trade is sometimes acquired by the succeeding generations from other members of the households, generally the ancestors, through gradual exposures to such works as are involved in carrying out the profession by their ancestors. The expertise gained through significant ‘hands-on’ experience enables the individual to take up activities in self-employment capacity or makes him employable. These were considered as non-formal vocational training acquired through ‘hereditary’ sources.

(b) *Self-learning*: The expertise in a vocation or trade when acquired by a person through his/her own effort, without any training under any person or organisation, was considered as non-formal vocational training acquired through ‘self-learning’.

(c) *Learning on the job*: The expertise acquired by a person while in employment (current and/or past), either through informal training by the employer or organisation or through the exposure to the type of job that he/she was performing, was considered as non-formal vocational training acquired through ‘learning on the job’.

(d) *Other*: ‘Other’ sources included cases where the expertise for a vocation or trade was developed even from the household members or ancestors, provided the said vocation or trade was different from the one relating to their ancestors.

**2.10 Economic activity**: The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included (i) production of all goods and services for market (i.e. for pay or profit) including those of government services, (ii) production of primary commodities for own consumption and (iii) own account production of fixed assets.

**2.10.1** The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition of economic activities adopted for the employment and unemployment survey of NSS 68<sup>th</sup> round. Although production of any good for own consumption is considered as economic activity by UN System of National Accounts, production of only primary goods for own consumption was considered as economic activity by NSSO for the purpose of the survey. While the former considers activities like own account processing of primary products as economic activities, processing of primary products for own consumption was not considered as economic activity in the NSS surveys.

**2.10.2** The term 'economic activity' as defined in the employment and unemployment survey of NSS 68<sup>th</sup> round, therefore, included:

- (i) all the market activities performed for pay or profit which result in production of goods and services for exchange.
- (ii) of the non-market activities,
  - (a) all the activities relating to the agriculture, forestry, fishing, mining and quarrying sector (i.e. industry Divisions 01 to 09 of NIC-2008) which result in production of primary goods for own consumption (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.)

and

- (b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities.

**2.11 Activity status:** It is the activity situation in which a person was found during a specified reference period with regard to the person's participation in economic and non-economic activities. According to this, a person could be in one or a combination of the following three broad activity statuses during the reference period:

- (i) working or being engaged in economic activity (work),
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and
- (iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

**2.11.1** Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained for a person during the reference period. In such an eventuality, unique identification under any one of the three broad activity statuses (viz. employed/ unemployed/not in labour force) was done by adopting either *the major time criterion* or *priority criterion*. The former was used for classification of persons according to the usual status approach and the latter for classification of persons according to the current status approach (i.e., current weekly status and current daily status approaches).

Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity in terms of status and industry was considered as that one corresponding to which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activity.

**2.11.2** The detailed activity statuses under each of the three broad activity statuses (viz. ‘employed’, ‘unemployed’ and ‘not in labour force’) and the corresponding codes used in the survey are given below:

<u>code</u>	<u>description</u>
<b>working (or employed)</b>	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual labour in public works other than MGNREG public works
42	worked as casual labour in Mahatma Gandhi NREG public works
51	worked as casual labour in other types of works
61	did not work owing to sickness though there was work in household enterprise
62	did not work owing to other reasons though there was work in household enterprise
71	did not work owing to sickness but had regular salaried/wage employment
72	did not work owing to other reasons but had regular salaried/wage employment

**not working but seeking/available for work (or unemployed)**

- 81 sought work or did not seek but was available for work (for usual status approach)
- 81 sought work (for current weekly status approach)
- 82 did not seek but was available for work (for current weekly status approach)

**neither working nor available for work (or not in labour force)**

- 91 attended educational institutions
- 92 attended to domestic duties only
- 93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
- 94 rentiers, pensioners, remittance recipients, etc.
- 95 not able to work owing to disability
- 97 others (including beggars, prostitutes, etc.)
- 98 did not work owing to sickness (for casual workers only)
- 99 children of age 0-4 years

It may be noted that codes 42, 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. It may also be noted that activity status code 41 in the usual status is used for casual labour in all types of public works, whereas in the current activity status, code 41 is for casual labour in public works other than MGNREG public works and code 42 is for casual labour in MGNREG public works.

**2.12 Workers (or employed):** Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid household members who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21, 61, 62), *regular wage /salaried employee* (relevant activity status codes: 31, 71, 72), and *casual labour* (relevant activity status codes: 41, 42 and 51).

**2.13 Seeking or available for work (or unemployed):** Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed.

**2.14 Labour force:** Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 – 82 constituted the labour force.

**2.15 Not in labour force:** Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97, 98 and 99 were assigned for persons belonging to category 'not in labour force'.

**2.16 Self-employed:** Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were deemed to be self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise.

**2.16.1 Categories of self-employed persons:** Self-employed persons were further categorised as follows:

- (i) **own-account workers:** Self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour was considered as own-account workers. They could, however, have had unpaid helpers to assist them in the activity of the enterprise.
- (ii) **employers:** Self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour was considered as employers.
- (iii) **helpers in household enterprise:** Self-employed persons who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed was considered as helpers in household enterprise. They did not run the household enterprise on their own but assisted the concerned person living in the same household in running the household enterprise.

**2.17 Regular wage/salaried employee:** These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

**2.18 Casual labour:** A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was considered as a casual labour.

**2.19 Public works:** 'Public works' were those activities which were sponsored by Government or Local Bodies, and which cover local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programmes such as Mahatma Gandhi National Rural Employment Guarantee (MGNREG) works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under 'public works' is restricted to those schemes under poverty alleviation programmes, or relief measures through which the Government generated wage employment. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, digging of irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. There may be some schemes sponsored by the Government and in operation, which were conceived as self-employment generation schemes. Some such schemes of the Government were Swarnjayanti Gram Swarozgar Yojana (schemes under erstwhile IRDP merged with this), Rural Employment Generation Programme (REGP), Prime Minister's Rozgar Yojana (PMRY), Valmiki Ambedkar Awas Yojana (VAMBAY), etc. Employment generated through these schemes was not considered within the purview of 'public works'. Classification of individuals as 'casual labour in *public works*' required that the work in which they participated was '*public works*' as defined above. To distinguish between '*public works*' and works not classifiable as '*public works*', some broad characteristics of '*public works*' were identified, viz. the primary objective was generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that for assigning current weekly and current daily activity status codes for the casual labour working in public works, codes 41 and 42 were used as follows:

- (i) worked as casual labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 41
- (ii) worked as casual labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works – 42

In the usual activity status, code 41 was used for casual labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.

**2.20 Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA):** The Mahatma Gandhi National Rural Employment Guarantee Act, 2005 (MGNREGA) is an important step towards the realization of the right to work and to enhance the livelihood security of the households in the rural areas of the country. According to this Act, Rural Employment Guarantee Schemes (REGS) are formed by the State Governments. The Scheme provides at least 100 days of guaranteed wage employment in every financial year to every household whose adult members volunteer to do unskilled manual work. Adult means a person who has completed his/ her eighteen years of age. Unskilled manual work means any physical work which any adult person is capable of doing without any special skill/ training. The implementing agency of the scheme may be any Department of the Central Government or a State Government, a Zila Parishad, Panchayat/ Gram Panchayat or any local authority or Government undertaking or non-governmental organization authorized by the Central Government or the State Government.

**2.21 Different approaches followed to determine activity status:** The persons surveyed were classified into various activity categories in three approaches on the basis of activities (economic/non-economic) pursued by them during certain specified reference periods. The three approaches are usual status approach, current weekly status approach and the current daily status approach. Three reference periods used in NSS surveys are (i) one year, (ii) one week and (iii) each day of the reference week. In the usual status approach, the activity status of a person is determined on the basis of the reference period of one year. The activity status of a person in current weekly status approach is determined on the basis of the reference period of one week and that in current daily status approach is determined on the basis of the reference period of one day. The procedures adopted to classify the persons into various activity categories according to the usual status approach, current weekly status approach and current daily status approach are elucidated below.

**2.21.1 Usual principal activity status:** The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey was considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous-classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so

determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 and 99 to those 'not in the labour force'. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

**2.21.2 Usual subsidiary economic activity status:** A person whose usual principal activity status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the following two situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively short period (but not simultaneously), which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively short period was considered as his/her subsidiary economic activity.
- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

If a person was categorised as worker according to usual principal status, then the subsidiary economic activity of the person was different from the principal activity either in terms of detailed work activity status or in terms of industry of work at the 2-digit level of NIC-2008.

**2.21.3 Usual activity status considering principal and subsidiary status taken together:** The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the activity status of the person according to usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

**2.21.4 Current weekly activity status:** The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided on the basis of a certain *priority-cum-major time criterion*.

**2.21.4.1** According to the *priority criterion*, the status 'working' gets priority over the status 'not working but seeking or available for work' that, in turn, gets priority over the status 'neither working nor available for work'. A person was considered 'working' (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered 'seeking or available for work' (or unemployed) if, during the reference week, the person was not classified as employed but he/she made efforts to get work/was available for work at least for one hour on any day during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in non-economic activities (or not in labour force).

**2.21.4.2** After deciding the *broad current weekly activity status* of a person on the basis of 'priority' criterion, the *detailed current activity status* was decided on the basis of 'major time' criterion if that person pursued multiple economic activities. The current weekly activity status of a person could be any of the valid codes within 11 to 99. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 99 for persons 'not in the labour force'.

**2.21.5 Current daily activity status:** The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status of a person was determined for each of the 7 days of the reference week. The activity status of a person on a day was determined on the basis of the activities pursued by him/her *using a priority-cum-major time criterion*. For each day of the reference week, time disposition was recorded for every member of the sample households. These involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'.

- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
- iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.
- vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

**2.22** In the employment and unemployment surveys of the quinquennial rounds of NSSO, the current weekly activity status of a person is derived from the intensities assigned for the different activities of a person during 7 days of the reference week.

**2.23 Industry and occupation of the work activity:** For the employed persons, to record the industry of work, 5-digit classification of NIC-2008 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 97 (Activities of households as employers of domestic personnel) of NIC-2008, eight additional codes were used in the survey viz., housemaid /servant (97001), cook (97002), gardener (97003), gatekeeper/chowkidar/watchman (97004), governess/baby-sitter (97005), tutor (97006), driver (97007) and 'others' (97009). Broad structure of NIC-2008 (Sections and Divisions) and description of occupation divisions/sub-divisions of NCO-2004 have been presented at the end of this Chapter in **Annexure I** and **Annexure II**, respectively.

**2.24 Operation:** This was the type of work performed by a person during a reference period. It could be manual or non-manual and could pertain to activities in agricultural or non-agricultural sector. Operation was combined with activity status and industry corresponding to the work performed. Information regarding the type of operation was collected *only for rural areas* and related to *current status only*. The different types of operations came under four categories.

Ploughing, sowing, transplanting, weeding, harvesting and other cultivation activities fell under the category *manual work in cultivation*. Against the category *manual work in other agricultural activities* were the following types: forestry, plantation, animal husbandry, fisheries and other agricultural activities. *Manual work in non-agricultural activities* constituted the third category. The last category viz. *non-manual work* comprised two broad types – (i) in ‘cultivation’ and (ii) in ‘other than cultivation’. It may be noted that for ‘regular salaried/wage employees’ on leave or on holiday, the ‘operation’ related to their respective function in the work or job from which he/she was temporarily off. Similarly, for persons categorised as ‘self-employed’ but not working on a particular day in spite of having work on that day, the operation related to the work that he/she would have done if he/she had not enjoyed leisure on that day.

**2.25 Cultivation:** All activities relating to production of crops and related ancillary activities were considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber, cashew, coconut, pepper, coffee, tea etc.) were not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC-2008 classes 0111, 0112, 0113, 0114, 0116, 0119 and among class 0128 sub classes 01281, 01282, etc. were considered as cultivation.

**2.26 Manual work:** A job essentially involving physical labour was considered as manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education were not to be termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) background were treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., were not considered manual workers even though their jobs involve some amount of physical labour. But peons, chowkidars, watchman, etc. were considered manual workers even though their work might not involve much physical labour. A few examples of manual workers are cooks, waiters, building caretakers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers, hair dressers, barbers, beauticians, watchmen, gate keepers, agricultural labourers, plantation labourers and related workers.

**2.27 Wage-paid manual labour:** A person who did manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) was a wage paid manual labour. Salaries were also counted as wages. A person who was self-employed in manual work was *not treated* as a wage paid manual labour.

**2.28 Nominal work:** Work done by a person **for 1 - 2 hours in a day** during the reference week was said to be a day with nominal work for the person. In the day-to-day labour time disposition of the reference week, such a day's work was considered as half-day work (and it got half intensity while accounting). Therefore, for a person, number of days with nominal work is a subset of the number of days worked with 0.5 intensity.

**2.29 Wage and salary earnings:** Information on wage and salary earnings was collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings referred to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions were followed.

- i) The wages in kind were evaluated at the current retail price.
- ii) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week were also included in earnings.
- iii) Amount receivable as 'over-time' for the additional work done beyond normal working time was excluded.

It may be noted that in the survey, at most two activities could be recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but only one activity or two activities at the most, depending upon the time spent on those activities, was recorded. In that case, the wage/salary income only from that activity(s) was collected and recorded separately, and not the total income of the person from all the activities done for the entire day.

**2.30 Present spell of unemployment:** The present spell of unemployment meant the continuous period for which a person remained unemployed starting from the day the person became unemployed to the survey date. For the new entrants into the labour force, the present spell meant the entire length of unemployment till the date of survey, starting from the day such person joined in the labour force. For those who had any previous employment, the present spell meant the period starting from the day they were seeking or available for work after losing their last employment to the survey date.

**2.31 Approximate number of months without work:** The months without work were not necessarily continuous. The 'approximate number of months without work' included those months in which a person was either unemployed or was not in the labour force. For deciding the number of months without work, each of the 12 months was considered separately and if, in a month the period without work was reported to be 15 days or more, it was considered as a month without work.

**2.32 Existence of union/association in the activity:** Union/association meant any registered/recognised body whose membership is open to a section of those engaged in a specific activity or trade and whose main objective is to look into the interests of its members. Thus, besides the usual trade unions, union/association covered the association of owners, self-employed persons, etc.

**2.33 Procedure for determining Household principal industry and occupation:** To determine the household principal industry and occupation, the general procedure followed was to list all the occupations pertaining to economic activities pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household were considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations were pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of all the occupations listed, the one which fetched the maximum earnings to the household during the last 365 days preceding the date of survey was considered as the principal household occupation. If one or more members of the household pursued the household occupation in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, was considered as the principal industry of the household.

**2.34 Procedure for collecting monthly per capita consumer expenditure (MPCE):** Household consumer expenditure was measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It also included the imputed values of goods and services, which were not purchased but procured otherwise for consumption. In other words, it was the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. The imputed rent of owner-occupied houses was excluded from consumption expenditure. Any expenditure incurred towards the productive enterprises of the households was also excluded from the household consumer expenditure. Monthly per capita expenditure (MPCE) was the household consumer expenditure over a period of 30 days divided by household size. For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 68<sup>th</sup> round. The approximate value of consumer expenditure obtained through the worksheet was used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz. 30 days and 365 days, was used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) food (other than 'cooked meals'), pan, tobacco & intoxicants and fuel & light, (ii) cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess, (iii) clothing and footwear and (iv) durable goods. The procedures followed for defining consumption of the four groups were (i) consumption approach, (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure).

**2.35 Conceptual Framework of Key Employment and Unemployment Indicators:** From the employment and unemployment surveys of the quinquennial rounds of NSSO, the Key employment and unemployment Indicators viz. LFPR, WPR, PU and UR are derived for all the three approaches adopted in the survey. The definitions of these indicators are as follows:

1. **Labour force participation rate (LFPR):** LFPR is defined as the number of persons/person-days in the labour force (which includes both the employed and unemployed) per 1000 persons /person-days
2. **Worker Population Ratio (WPR):** WPR defined as the number of persons/person-days employed per 1000 persons/person-days.
3. **Proportion Unemployed (PU):** It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.
4. **Unemployment Rate (UR):** UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force.

**2.35.1** The architecture of key labour force indicators are given below in tabular form:

activity profile		key indicators
activity status (code)	category of persons	
11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72	workers	<p><b>1. Labour Force Participation Rate (LFPR):</b>  <math display="block">\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000</math></p> <p><b>2. Worker Population Ratio (WPR):</b>  <math display="block">\frac{\text{no. of employed persons}}{\text{total population}} * 1000</math></p>
81, 82	unemployed	<p><b>3. Proportion Unemployed (PU):</b>  <math display="block">\frac{\text{no. of unemployed persons}}{\text{total population}} * 1000</math></p>
91, 92, 93, 94, 95, 97, 98, 99	not in labour force	<p><b>4. Unemployment Rate (UR):</b>  <math display="block">\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000</math></p>
<p>Note: Activity status codes, 42, 61, 62, 71, 72, 82, and 98 are used only in <i>the current status</i> (in <i>CWS</i> and <i>CDS</i>) and the remaining activity status codes are used in both <i>usual</i> and in <i>current status</i></p>		

**BROAD STRUCTURE of NIC -2008  
(SECTIONS AND DIVISIONS)**

**Section A: Agriculture, forestry and fishing**

Division 01: Crop and animal production, hunting and related service activities

Division 02: Forestry and logging

## Chapter Three

### Households and Population

#### 3.0. Introduction

3.0.1 The summary of findings of the employment and unemployment survey of NSS 68<sup>th</sup> round (July 2011-June 2012) are presented and discussed in Chapters Three to Seven. In these chapters, the estimates are given for India and its constituent states and union territories with an effort to present a more detailed picture at the all-India level. The discussions in the summary of findings are mainly centered on the estimates at the all-India level and major states. A comparison with earlier survey results at the all-India level is also done in some cases.

3.0.2 The all-India estimates are based on the data of all the states and union territories. The estimates of the employment and unemployment characteristics have been presented as ratios. To get the estimate of the absolute number of any category, the survey estimates of ratios may be applied to the projected population of that category as on 1<sup>st</sup> January 2012. The projected population for males and females of rural and urban areas as on 1<sup>st</sup> January 2012 for the different states and union territories are given in Appendix C. The State/UT tables providing estimates for all the states and union territories have been placed at the end of the chapters. While using the State/UT level estimates, it may be noted that the sample sizes for some of the smaller States/UTs may not be adequate enough for getting sufficiently reliable estimates for some of the employment and unemployment characteristics.

3.0.3 *Major states:* The major states are those with population 10 million or more as per population census 2001 in respect of rural or urban sector separately. As per this criterion, there are 20 major states in the rural areas and 21 major states in the urban areas. The major states are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttarakhand, Uttar Pradesh, West Bengal and urban Delhi.

3.0.4 *Reference period of the estimates:* The estimates presented in the report, in general, refer to the midpoint of the survey period (July 2011 - June 2012) of NSS 68<sup>th</sup> round i.e. 01.01.12. The estimates for 'land cultivated' have the reference period of the agricultural year 2010-11 i.e. July 2010 –June 2011.

**3.0.5 Households and Population:** To study the employment and unemployment situation of a country, it is necessary to look into the socio-economic structure of the households and the demographic pattern of the population of the country during that period. As such, certain information on socio-economic condition of the sample households and demographic data pertaining to the surveyed individuals were also collected in this survey. In this chapter, estimates relating to some of the socio-economic characteristics of households and demographic particulars of the population are presented.

### 3.1 Estimates of Households and Population

3.1.1 Statement 3.1 gives the estimates of number of households and number of persons along with average household size and sex ratio (number of females per 1000 males) as

Statement 3.1: Estimated number of households, number of persons, average household size and sex ratio during 2011-12			
estimates	rural	urban	all-India rural+urban
(1)	(2)	(3)	(4)
number of households (00)	1721354	782355	2503709
number of persons (00)	7744301	3138256	10882557
average household size (0.0)	4.5	4.0	4.3
sex ratio (females per 1000 males)	957	922	946

obtained from NSS 68<sup>th</sup> round. As per the survey estimates, about 1088 million people stayed in 250 million households in India. About 69 per cent of the households belonged to rural India and accounted for

nearly 71 per cent of total population. During 2011-12, average household size in India was 4.3 and the sex ratio was 946.

3.1.2 Statement 3.2 gives the average household size and sex ratio in India over the years from 1977-78 up to 2011-12. It is seen from statement 3.2 that, during 2011-12, the sex-ratio in India was 957 in rural areas and was 922 in urban areas. The average household size was 4.5 in rural India and 4.0 in urban India. Statement 3.2 shows that between 2009-10 and 2011-12, the average household size in India decreased marginally both in rural and urban areas. Statement 3.2.1, placed at the end of this chapter, gives household size and sex ratio for each state and union territory as obtained from the present survey. In the rural areas, among the major states, average household size was the highest in Uttar Pradesh (5.4) and was the lowest in Andhra Pradesh (3.5). In the urban areas, average household size was the highest in Uttar Pradesh (4.9) and was the lowest in Himachal Pradesh (3.1). During 2011-12, among the major states, Haryana (837) had the lowest sex-ratio in the rural areas and Bihar (810) had the lowest sex-ratio in the urban areas.

Statement 3.2: Average household size (0.0) and sex ratio (number of females per 1000 males) over the different NSS rounds

NSS rounds (survey periods)	all-India			
	rural		urban	
	household size	sex ratio	household size	sex ratio
(1)	(2)	(3)	(4)	(5)
68 <sup>th</sup> (July 2011- June 2012)	4.5	957	4.0	922
66 <sup>th</sup> (July 2009- June 2010)	4.6	947	4.1	909
61 <sup>st</sup> (July 2004- June 2005)	4.8	962	4.3	920
55 <sup>th</sup> (July 1999- June 2000)	5.0	959	4.5	915
50 <sup>th</sup> (July 1993- June 1994)	4.9	944	4.4	905
43 <sup>rd</sup> (July 1987- June 1988)	5.1	948	4.7	912
38 <sup>th</sup> (January – December 1983)	5.1	963	4.7	905
32 <sup>nd</sup> (July 1977- June 1978)	5.2	959	4.9	904

3.1.3 Information on sex of the head of household was collected in the survey. Number of female-headed households per 1000 households along with the sex-ratio and household size obtained for such female-headed households for all-India over the different rounds of NSSO are shown in Statement 3.3. It is observed that during 2011-12, about 12 per cent of households of rural as well as urban India were headed by females. Compared to all households, they had, on an average, a relatively small household size (rural: 3.3, urban: 3.2) and a much higher sex-ratio (rural: 1819, urban: 1749). Statement 3.3 shows that for the female headed households in India, between 2004-05 and 2011-12, the sex-ratio increased considerably and the average household size decreased marginally both in rural and urban areas. Statement 3.2.1, placed at the end of this chapter, gives household size and sex ratio for the female-headed households for each state and union territory as obtained from the present survey. Among the major states, the proportion of female-headed households was the highest in Kerala for both rural and urban areas - 25 per cent in the rural areas and 26 per cent in the urban areas. The all-India feature of smaller household size and higher sex-ratio in female-headed households as compared to all households is also noticed for the major states.

Statement 3.3: Number of female headed households per 1000 households, household size (0.0) and sex-ratio for the female headed households over the different NSS rounds

NSS rounds (survey periods)	all-India					
	rural			urban		
	no. of female headed hhs per 1000 hhs	house- hold size	sex ratio	no. of female headed hhs per 1000 hhs	house- hold size	sex ratio
(1)	(2)	(3)	(4)	(5)	(6)	(7)
68 <sup>th</sup> (July 2011- June 2012)	115	3.3	1819	124	3.2	1749
66 <sup>th</sup> (July 2009- June 2010)	118	3.2	1785	116	3.1	1808
61 <sup>st</sup> (July 2004- June 2005)	113	3.4	1771	111	3.5	1599
55 <sup>th</sup> (July 1999- June 2000)	104	3.5	1820	94	3.5	1721
50 <sup>th</sup> (July 1993- June 1994)	97	3.2	1861	106	3.2	1706

*sex-ratio: number of females per 1000 males*

### 3.2 Household Type

3.2.1 The nature and type of work from which a household derives its major income is an

Statement 3.4: Per 1000 distribution of households and population by household type during 2011-12

all-India	rural	
household type	households	population
(1)	(2)	(3)
self-employed in:		
agriculture	343	376
non-agriculture	155	166
self-employed	498	541
regular wage salary earning	96	93
casual labour in:		
agriculture	210	193
non-agriculture	135	137
casual labour	345	331
others	61	35
all	1000	1000

important indicator of the activity pattern of its members. In this survey, major income of the household was worked out depending on the income from economic/non-economic activities pursued by the members of the households during the 365 days preceding the date of survey. On the basis of the source of major income, sample households were categorised into different *household types*. The distributions of households and population by

*household type* for all-India are given in Statement 3.4.

3.2.2 Statement 3.4 shows that during 2011-12, about 50 per cent of the rural households

Statement 3.4: Per 1000 distribution of households and population by household type during 2011-12

all-India	urban	
household type	households	population
(1)	(2)	(3)
self-employed	353	415
regular wage salary earning	417	400
casual labour	118	126
others	112	59
all	1000	1000

had major source of income from *self-employment*. They constituted nearly 54 per cent of the rural population. Another 10 per cent of the rural households belonged to the household type '*regular wage salary earning*' and they constituted about 9 per cent of the rural population. About 35 per cent of the rural households had major income from '*casual labour*'

employment and another 6 per cent had no income from economic activities. Among urban households, *regular wage/salaried employment* was the mainstay of 42 per cent of households with a share of 40 per cent of urban population. Nearly 35 per cent of the urban households had income mainly from *self-employment* with a share of 42 per cent of urban population. The proportion of households without any income from economic activities was more in urban areas (11 per cent) than the rural areas (6 per cent).

3.2.3 *State level distribution*: The distributions of households and persons by household type for different states and union territories are given in Statements 3.4.1 and 3.4.2 respectively, for both the rural and urban areas. In the rural areas, *self-employment* was the major source of income of the households for many of the major states. Among the major states, the proportion of rural households with major source of income from *self-employment* was the highest in Assam (68 per cent), followed by Rajasthan (61 per cent).

In the rural areas, among the major states, the proportion of households with major source of income from *regular wage salary earning* was the highest for Himachal Pradesh (22 per cent) and that from *casual labour* employment was the highest for Tamil Nadu (50 per cent). In the urban areas, either self-employment or regular wage salary earning was the main source of household income for the major states. Among the major states, *self-employed* households were in higher proportion in Uttar Pradesh (46 per cent), Assam (45 per cent), Bihar (44 per cent), Jammu & Kashmir (44 per cent) and *regular wage salary earning* households were higher in Delhi (57 per cent), Himachal Pradesh (52 per cent), Maharashtra (52 per cent), Gujarat (51 per cent). The proportion of urban households with major source of income from *casual labour* employment was the highest for Chhattisgarh (25 per cent) followed by Kerala (22 per cent) and Tamil Nadu (19 per cent).

### 3.3 Households and Decile Classes of Population by MPCE

3.3.1 In the present survey on employment and unemployment, data on consumption

Statement 3.5: Per 1000 distribution of households by decile classes of population by MPCE during 2011-12

decile classes of population by MPCE	all-India	
	per 1000 distribution of households	
	rural	urban
(1)	(2)	(3)
0-10	77	70
10-20	80	79
20-30	85	83
30-40	93	87
40-50	95	93
50-60	102	99
60-70	106	104
70-80	109	116
80-90	120	127
90-100	134	142
all	1000	1000

expenditure was collected through a separate block of the employment and unemployment schedule. This block is an abridged version of the detailed schedule used in the full-fledged consumer expenditure survey. Based on the data on household monthly per capita consumer expenditure (MPCE) collected in this block, ten (10) decile classes of population by MPCE have been formed in such a way that each class contains 10 per cent of the population and persons of the lower decile classes have lower MPCE as compared to those of the higher decile classes. The decile classes were determined, separately for the rural and urban sectors of each State/UT and all-India. As the average household size is not same over the decile classes, the proportion of households in the decile classes varies from one decile class to the other. Statement 3.5 gives per 1000

distribution of households over decile classes by MPCE. Statement 3.5 shows that about 43% of households in the rural areas and about 41% of households in the urban areas were in one of the 5 lower decile classes. The distributions of households over decile classes of population by MPCE for states and union territories are presented in Statement 3.5.1.

### 3.4 Households and Particulars of Land

3.4.1 In rural India, a majority of the households depend mainly on agricultural activities and thus land is the main source of employment for their members. Hence, it is important to study certain aspects of land viz. the particulars of its ownership, possession and cultivation by the rural households. These aspects are discussed one by one in the following paragraphs.

3.4.2 *Ownership of land:* So far as the ownership of land is concerned, information on size of land owned as on the date of survey was collected in the survey. In Statement 3.6, per thousand distributions of rural households by household type for each size class of land owned has been presented.

3.4.2.1 It is observed from Statement 3.6 that nearly 3 per cent of the rural households were in the highest land owned class (4.01 hectares or more) and 6 per cent of the households were in the lowest land owned class (less than 0.001 hectares including not reported cases of land owned). The land owned class '0.005 - 0.40 hectares' had the highest share of households (nearly 48 per cent). From the distributions of rural households over the household types for the different land owned classes, it is seen that among the households belonging to higher land owned classes, the share of *self-employed* households were prominent. The share of *self-employed* households was about 72 per cent in the land owned class '0.41 - 1.00 hectares', nearly 85 per cent in the class '1.01- 2.00 hectares', 91 per cent in the class '2.01- 4.00 hectares' and nearly 92 per cent in the highest land owned class (4.01 hectares or more).

Statement 3.6: Per thousand distribution of households by household type for each size class of land owned

all-India size class of land owned (hectares)	per 1000 dist. of hhs.	household type							rural	
		self-employed in			regular wage salary earning	casual labour		others	all	all (incl. n.r.)
		agri- culture	non- agri.	all		agri- culture	non- agri.			
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
0.000	60	47	146	193	260	179	138	317	230	1000
0.001 - 0.004	95	38	186	224	97	390	203	593	87	1000
0.005 - 0.40	480	147	209	357	106	282	192	474	64	1000
0.41 - 1.00	167	618	103	721	64	116	71	187	28	1000
1.01 - 2.00	109	783	62	845	54	60	22	82	18	1000
2.01 - 4.00	63	858	53	910	47	16	14	30	13	1000
≥ 4.01	27	870	44	915	49	4	15	19	17	1000
all	1000	343	155	498	96	210	135	345	61	1000

Note: 1. The households with size class of land owned '0.000' hectares comprise households owned land less than 0.001 hectares as well as households which reported no information on land owned.

2. The size class of land owned '0.005 - 0.40 hectares' included households with land owned 0.005 - 0.404 hectares; the size class '0.41 - 1.00 hectares' included households with land owned 0.405 - 1.004 hectares and similarly the other classes.

On the other hand, the shares of *casual labour* households were higher in the lower land owned classes. In the land owned class '0.005 - 0.40 hectares', nearly 47 per cent were *casual labour* households and in the land owned class '0.001 - 0.004 hectares', it was about 59 per cent. In the lowest land owned class, *casual labour* households were about 32 per cent and *regular wage salary earning* households were about 26 per cent.

3.4.2.2 *State level distribution*: The distribution of rural households by size classes of land owned for each state and union territory is given in Statement 3.6.1. The statement shows that among the major states, the proportion of rural households owning land from 0.001 hectares to 1.00 hectare was as high as 91 per cent in Kerala, 90 per cent in West Bengal, 87 per cent in Bihar, 86 per cent Jammu & Kashmir and 84 per cent in Jharkhand as against about 74 per cent at the all-India level. However, in some major states, proportion of households owning land with size exceeding 1.00 hectare was quite substantial – it was about 43 per cent in Rajasthan and about 40 per cent in Madhya Pradesh, about 39 per cent in Chhattisgarh and about 31 per cent in Maharashtra as against about 20 per cent at the all-India level.

3.4.3 *Land possessed*: Statement 3.6.2 gives the average area of land possessed per household and the distribution of the households by size class of land possessed for each State/UT, separately for all households and female headed households. As seen from the statement, in 2011-12, the average area of land possessed by a rural household was 0.65 hectares. The corresponding average for a female-headed household was 0.28 hectares. The average area of land possessed by a rural household was the lowest for Kerala and West Bengal (0.17 hectares each) while it was the highest for Rajasthan (1.53 hectares) followed by Madhya Pradesh (1.23 hectares). At the all-India level, about 20 percent of the rural households possessed land more than 1 hectare. Among the major states, the proportion of rural households possessing land more than 1 hectare was the lowest for Kerala (3 per cent) followed by West Bengal (4 per cent) whereas corresponding proportion was the highest for Rajasthan (42 per cent) followed by Chhattisgarh and Madhya Pradesh (40 per cent each).

3.4.4 *Land cultivated*: Information on land cultivated during the agricultural year (AY) 2010-11 (July 2010 to June 2011) was collected in the employment and unemployment survey of NSS 68<sup>th</sup> round (July 2011- June 12). The distributions of rural households by size class of land cultivated as obtained from the latest five quinquennial rounds of NSSO viz., 68<sup>th</sup> (2011-12), 66<sup>th</sup> (2009-10), 61<sup>st</sup> (2004-05), 55<sup>th</sup> (1999-2000) and 50<sup>th</sup> (1993-94) have been presented in Statement 3.7. The statement shows that proportion of rural households cultivating land more than 0.40 hectares has decreased over the years – it was 43 per cent in the agricultural year 1992-93 which came down to 32 per cent in the agricultural year 2010-11. The distributions of rural households by size class of land cultivated for different states and union territories as obtained from the present survey are presented in Statement 3.7.1. At the all-India level, about 18 percent of the rural households cultivated land more than 1.00 hectare.

Among the major states, the proportion of rural households cultivating land 1 hectare or more was the highest for Rajasthan (38 per cent) followed by Chhattisgarh (36 per cent), Madhya Pradesh (35 per cent), Karnataka (28 per cent) and Maharashtra (27 per cent).

Statement 3.7: Per 1000 distribution of rural households by size class of land cultivated during the agricultural years 1992-93, 1998-99, 2003-04, 2008-09 and 2010-11

all-India size class of land cultivated (hectares)	agricultural year					rural

1.01 – 2.00	135	112	113	95	103	
2.01 – 4.00	76	59	65	61	54	
4.01 & above	43	30	30	25	24	
all classes	1000	1000	1000	1000	1000	

*Note: The households with size class of land cultivated 'up to 0.40 hectares' comprise households cultivated land less than 0.40 hectares as well as household reported no information on land cultivated.*

### 3.5 Households with Usually Employed Persons (PS +SS) of Age 15 Years and Above

3.5.1 The number of persons employed in a household can be considered as a broad indicator of its economic condition. The results giving the distribution of households having at least one member of age 15 years and above by number of usually employed persons of age 15 years and above in those households are presented in Statement 3.8 for both female headed households and all households in India. The corresponding results obtained from the NSS 55<sup>th</sup>, 61<sup>st</sup> and 66<sup>th</sup> rounds have also been presented to observe the changes, if any, over the period 1999-2000 to 2011-12.

3.5.2 It is seen from Statement 3.8 that during 2011-12, among the households having at least one member of age 15 years and above, about 5 per cent of the rural households and 10 per cent of the urban households had no usually employed member of age 15 years and above, while about 54 and 36 per cent of rural and urban households respectively had two or more members employed more or less regularly. In the households where the head was a female, the proportion of households with no usually employed member of age 15 years and above, was considerably higher – nearly 25 per cent in the rural areas and 31 per cent in the urban areas of India. It may be noted that while among all the households only 4 to 5 per cent had 'only 1 female worker', among households headed by females, the proportion with 'only 1 female worker' was much higher - 37 per cent in rural areas and 26 per cent in urban areas. Statement 3.8.1 presents the distributions of households by number of usually employed persons of age 15 years and above for the different states and union territories.

It can be seen from Statement 3.8.1 that among the households of the major states having at least one member of age 15 years and above, proportion of households with no usually employed member of age 15 years and above was the highest for Kerala in the rural areas (12 per cent) and for Himachal Pradesh in the urban areas (19 per cent). Among the major states, the proportion of households with two or more employed members was the highest for Chhattisgarh in both rural and urban areas (77 per cent in rural areas and 46 per cent in urban areas).

3.5.3 *Changes since 1999-2000*: Statement 3.8 shows that during 1999-2000 to 2011-12, the proportion of households with no worker of age 15 years and above maintained more or less the same level in rural India whereas in urban India, this proportion increased from 8 per cent in 1999-2000 to 10 per cent in 2011-12. Between 1999-2000 and 2011-12, among the female-headed households, this proportion increased from 23 per cent to 25 per cent in rural India and from 26 per cent to 31 per cent in urban India.

Statement 3.8: Per 1000 distribution of households having at least one member of age 15 years and above by number of usually employed (ps+ss) persons of age 15 years and above in those households during 55<sup>th</sup> (1999-00), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

### 3.6 Age Distribution of Population

3.6.1 Age and sex are two important demographic characteristics which develop the understanding of the results on employment and unemployment. In Statement 3.9, the distribution of the rural and urban population by 5-year age-groups is presented for males and females separately. Comparable results based on the 50<sup>th</sup> round (1993-94), 55<sup>th</sup> round (1999-2000), 61<sup>st</sup> round (2004-05) and 66<sup>th</sup> round (2009-10) surveys are also presented in this statement. Statement 3.9 shows that during the period 1993-94 to 2011-12, the share of the youngest age-group (0-4 years) as well as of the children aged 5-9 years in the total population declined for both males and females in the rural areas. In the urban areas, for

both males and females, the share of the age-groups 0-4, 5-9, 10-14 and 15-19 declined during this period. The decline in the share of the two age-groups 0-4, 5-9 together, during the period 1993-94 to 2011-12, was from 26 per cent to 20 per cent for rural males and from 25 per cent to 19 per cent for rural females. During this period, the share of the age-groups 0-4, 5-9, 10-14 and 15-19 together declined from 44 per cent to 37 per cent for urban males and from 43 per cent to 34 per cent for urban females. The distribution of population by 5-year age-groups for each state and union territory are given in Statement 3.9.1 for the different categories of persons.

Statement 3.9: Per 1000 distribution of population by five year age groups during 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-00), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

### 3.7 General Educational Level of Population

3.7.1 Literacy, together with educational attainment, determines the quality of population and is highly related to one's employment prospects. Thus, it is important to study the

Statement 3.10: Literacy rate (per 1000 persons) for different categories of persons during 1983 to 2011-12

round (year)	rural		all-India urban	
	male	female	male	female
(1)	(2)	(3)	(4)	(5)
68 <sup>th</sup> (2011 - 12)	716	555	842	747
66 <sup>th</sup> (2009 - 10)	706	533	836	736
61 <sup>st</sup> (2004 - 05)	636	450	805	693
55 <sup>th</sup> (1999 - 00)	588	385	784	657
50 <sup>th</sup> (1993 - 94)	545	321	759	616
43 <sup>rd</sup> (1987 - 88)	484	260	719	556
38 <sup>th</sup> (1983)	449	219	693	515

distribution of population by educational attainment (level) before a comprehensive discussion is attempted on employment and unemployment in the subsequent chapters. There is also a need to examine the changes in the literacy rates over time. Statement 3.10 presents the literacy rates (number of literates per 1000 persons) for males and females of rural and urban India as obtained from the 38<sup>th</sup> (1983), 43<sup>rd</sup> (1987 - 88), 50<sup>th</sup> (1993-

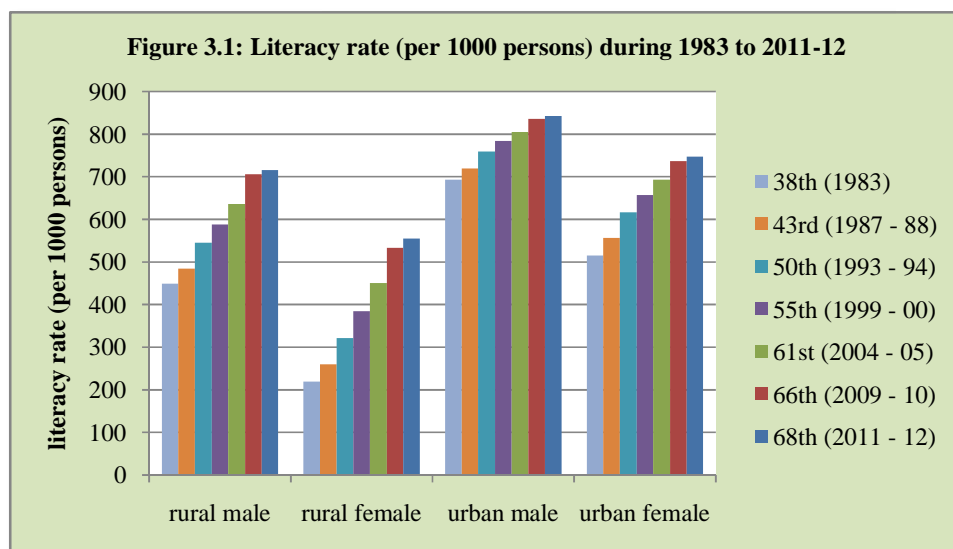

94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) round quinquennial surveys on employment and unemployment. In Statement 3.11, the distribution of persons by broad level of general education attained by them is presented, at the all-India level, for different categories of persons of all ages and of age 15 years or more for the 50<sup>th</sup>, 55<sup>th</sup>, 61<sup>st</sup>, 66<sup>th</sup> and 68<sup>th</sup> rounds of NSSO. The distribution of persons by broad general educational education level for different states and union territories as obtained from NSS 68<sup>th</sup> round is presented in Statement 3.11.1. Figure 3.1 gives a diagrammatic presentation of the change in literacy rates (per 1000 persons) during the period 1983 to 2011-12.

3.7.2 *Literacy Rate:* For the purposes of the current survey, a person who could read and write a simple message in any language with understanding was considered a *literate*. In the quinquennial surveys of NSSO prior to the 50<sup>th</sup> round, a person who could read and write a simple message in any language was considered as literate. From the 50<sup>th</sup> round onwards, another condition viz. 'with understanding' was added for identifying literates. It is seen from Statement 3.10 that the literacy rate has increased considerably over the period 1983 to 2011-12. The increase is more prominent among females than among males - both in rural and urban India. The literacy rates for rural males, rural females, urban males and urban females in India during 1983 were 45 per cent, 22 per cent, 69 per cent and 52 per cent, respectively which have increased to 72 per cent, 56 per cent, 84 per cent and 75 per cent, respectively. Statement 3.10 shows that between 2004-05 and 2011-12, the literacy rate for rural males, rural females, urban males and urban females has increased by about 8 percentage points, 11 percentage points, 4 percentage points and 5 percentage points, respectively during 2011-12. It may be seen from Statement 3.11.1 that during 2011-12, among the major states, the literacy rate was the highest in Kerala (87 per cent) and the lowest in Uttar Pradesh (60 per cent).

3.7.3 *Educated Persons*: Statement 3.11 presents the distribution of persons by broad educational level viz. *not literate, literate & up to primary, middle, secondary & above including diploma/ certificate course*. Persons with general educational level *secondary and above including diploma/ certificate course* are referred to as educated. During 2011-12, about 21 per cent of rural males, 12 per cent of rural females, 42 per cent of urban males and 34 per cent of urban females in India were educated. Among persons of age 15 years or more, about 30 per cent of rural males, 17 per cent of rural females, 57 per cent of urban males and 45 per cent of urban females were educated. Statement 3.11.1 shows that during 2011-12, among the major states, the proportion of educated was the highest in Kerala (33 per cent) and the lowest in Bihar and Odisha (15 per cent each). It is seen from Statement 3.11 that the proportion of *educated* persons has increased considerably for all the categories of persons during the period of 18 years between 1993-94 and 2011-12.

Statement 3.11: Per 1000 distribution of persons by general educational level during 1993-94, 1999-2000, 2004-05, 2009-10 and 2011-12

### 3.8 Participation of Rural Households in MGNREG works

3.8.1 In the employment & unemployment survey of NSS 68<sup>th</sup> round, a few questions were put to the rural households for collection of information related to MGNREG works. These were ‘whether the household had MGNREG job card’ and if the household had MGNREG job card, ‘number of MGNREG job cards issued to the households’ and ‘whether any member of the household had any bank/post office account’. In the present survey, the household having MGNREG job card connoted that at least one member of the household appeared in such a job card. In addition to these, for persons of age 18 years and above of the rural households having MGNREG job cards, information was collected on *whether the person was registered in any MGNREG job card* and if registered, *whether worked in MGNREG works during last 365 days* in terms of the three types of responses viz. ‘worked’, ‘sought but did not get work’ and ‘did not seek work’. A person was considered to have worked in MGNREG works during last 365 days if he/she had worked for at least for one day during last 365 days.

3.8.2 Statement 3.12 presents for each decile class of population by MPCE, the results of NSS 68<sup>th</sup> round on (i) number of households having MGNREG job card per 1000 of rural households, (ii) number of job cards issued per 1000 households reported having MGNREG job card and (iii) number of households having bank/post office accounts per 1000 households reported having MGNREG job card. The State/UT level results on these characteristics have been presented in Statement 3.12.1. Statement 3.13 presents for each decile class, the survey results on (i) proportion of rural persons of age 18 years and above registered in MGNREG job card and (ii) the distribution of these persons by status of getting work in MGNREG works during last 365 days. The State/UT level results on these characteristics have been presented for both males and females in Statement 3.13.1.

3.8.3 Statement 3.12 shows that about 38 per cent of the rural households in India had MGNREG job card. It can also be seen from the Statement that percentage of job card holder households was higher in the lower decile classes as compared to the upper decile classes. Among the rural households in India, about 54 per cent of the bottom decile class and about 20 per cent of the top decile class had MGNREG job cards. It is observed from Statement 3.12 that number of job cards issued per 1000 of job card holder households of

Statement 3.12: Number of households having MGNREG job card per 1000 households and number of job cards, number of households having bank/post office accounts per 1000 households reported having MGNREG job card for each decile class of population by MPCE

all classes	384	1196	861

rural India was about 1196 and about 86 per cent of the job card holder households had bank/post office account.

So far as number of households having MGNREG job card is concerned, among the major states, Chhattisgarh is in the top position with about 72 per cent of rural households reported to have job card. Among the rural households of the major states reported having MGNREG job card, proportion of households with bank/

post office account was the highest in Himachal Pradesh (99 per cent) followed by Haryana (97 per cent) and Rajasthan (96 per cent).

3.8.4 Statement 3.13 shows about 24 per cent of the rural persons of age 18 years and above was registered in MGNREG job card. Among rural persons of age 18 years and above, proportion registered in MGNREG job card was higher for the lower decile classes as compared to the upper decile classes. The proportion was about 33 per cent in the bottom decile class and about 13 per cent in the top decile class. Among the major states in the rural areas, proportion of persons of age 18 years & above registered in MGNREG job card was the highest in Madhya Pradesh (56 per cent) followed by Rajasthan (53 per cent) and Chhattisgarh (51 per cent).

3.8.5 It is seen from Statement 3.13 that at the all-India level, among rural persons of age 18 years and above registered in MGNREG job card, about 51 per cent worked and about 19 per cent sought but did not get MGNREG works. The proportion either worked or sought but did not get work was in general higher for the lower decile classes as compared to the upper decile classes. The proportion was about 73 per cent in the bottom decile class and about 58 per cent in the top decile class.

Among the major states, of the rural persons of age 18 years and above registered in MGNREG job card, the proportion of persons got MGNREG works was the highest in Haryana (78 per cent) followed by Tamil Nadu (75 per cent) and Chhattisgarh (72 per cent). Among persons registered in MGNREG job card, the proportion of persons sought but did not get work was the highest in Maharashtra (45 per cent) followed by Bihar (35 per cent), Karnataka (31 per cent) and Punjab (30 per cent).

Statement 3.13: Number (per 1000 persons of age 18 years and above) registered in MGNREG job card and per 1000 distribution of persons registered in MGNREG job card by status of getting work in MGNREG works during last 365 days for each decile class of population by MPCE

## Chapter Four

### Labour Force

#### 4.0 General

4.0.1 Labour force, or in others words, the ‘economically active’ population, refers to the population which supplies or seeks to supply labour for production and, therefore, includes both ‘employed’ and ‘unemployed’ persons. Four different estimates of the labour force have been obtained based on the three approaches (viz. usual status approach, current weekly status approach and current daily status approach) adopted in the survey for classification of the population by activity statuses. These are:

- (i) number of persons in the labour force according to the *usual status (ps)* i.e. by considering usual principal activity only,
- (ii) number of persons in the labour force according to the *usual status (ps+ss)* i.e. by considering usual principal and subsidiary activity together,
- (iii) number of persons in the labour force according to the *current weekly status*, and
- (iv) number of person-days in the labour force according to the *current daily status*.

4.0.2 The estimate of the labour force in *usual status (ps)* gives the number of persons who either worked or were available for work for a relatively long part of the 365 days preceding the date of survey. The labour force according to the *usual status (ps+ss)* is obtained by considering the *usual principal status* and the *subsidiary status* together. The estimate of the labour force in the *usual status (ps+ss)* includes (a) the persons who either worked or were available for work for a relatively long part of the 365 days preceding the date of survey and (b) also those persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey. The labour force in *current weekly status* gives the average picture of the labour force participation in a short period of one week during the survey period. The estimate of labour force according to the current weekly status approach gives the number of persons who worked for at least 1 hour or was seeking/ available for work for at least 1 hour on any day during the 7 days preceding the date of survey. The labour force in *current daily status* gives the average picture of the number of person-days in the labour force on a day during the survey period. For each person, activity status according to the current daily status approach was recorded for each of the 7 days preceding the date of survey. If a single activity was recorded in a day, 1.0 intensity was assigned against that activity status and if two different activities were recorded in a day, 0.5 intensity was assigned for each of these two activity statuses. Based on the activity statuses and the intensities recorded for the 7 days of the reference week, total number of person-days corresponding to the

different activity statuses was estimated for a period of 7 days. The estimate of the person-days in the labour force during the reference week was obtained by considering the number of person-days which were in work activity or were available for work during the reference week. The number of person-days in the labour force on a day during the survey period is obtained by dividing the estimated number of person-days in the labour force in a week by 7.

#### 4.1 Labour Force Participation Rates (LFPR)

4.1.1 The labour force participation rate (LFPR) is defined as the number of persons/person-days in the labour force per 1000 persons/person-days. In Statement 4.1, the LFPRs based on the different approaches, as estimated from the NSS 68<sup>th</sup> round (July 2011 - June 2012) survey, are presented for persons of all ages at the all-India level. The corresponding rates obtained from the 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2009-10) round surveys are also given in this statement for comparison. The LFPRs based on the various alternative approaches for different states and union territories as estimated from the present survey are presented in Statements 4.1.1 and 4.1.2. Statement 4.1.1 gives LFPRs for persons of all ages and Statement 4.1.2 gives that for persons of age 15 years and above. Figure 4.1 presents LFPRs based on different approaches for the different categories of persons as obtained from NSS 68<sup>th</sup> round. Figure 4.2 gives a diagrammatic presentation of the LFPRs in *usual status (ps+ss)* for the different categories of persons as obtained from NSS 50<sup>th</sup>, 55<sup>th</sup>, 61<sup>st</sup>, 66<sup>th</sup> and 68<sup>th</sup> rounds.

Statement 4.1: Labour force participation rate (LFPR) according to usual, current weekly and current daily statuses in NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

CDS	532	528	561	550	555	132	123	150	129	136	226

4.1.2 *Usual status approach*: Statement 4.1 shows that labour force participation rate is significantly lower for females than for males in both rural and urban areas. During 2011-12, according to *usual status (ps+ss)*, about 55 per cent of the rural males and 25 per cent of the rural females were in the labour force. During this period, about 56 per cent of the urban males and 16 per cent of the urban females were in the labour force according to *usual status (ps+ss)*. According to *usual status (ps)*, about 55 per cent of rural males, about 18 per cent of rural females, about 56 per cent of urban males and about 13 per cent of urban females were in the labour force during 2011-12. Statement 4.1.2 shows that for persons of age 15 years and above, LFPRs in *usual status (ps+ss)* during 2011-12 for rural males, urban males, rural females and urban females were 81 per cent, 76 per cent, 36 per cent and 21 per cent, respectively.

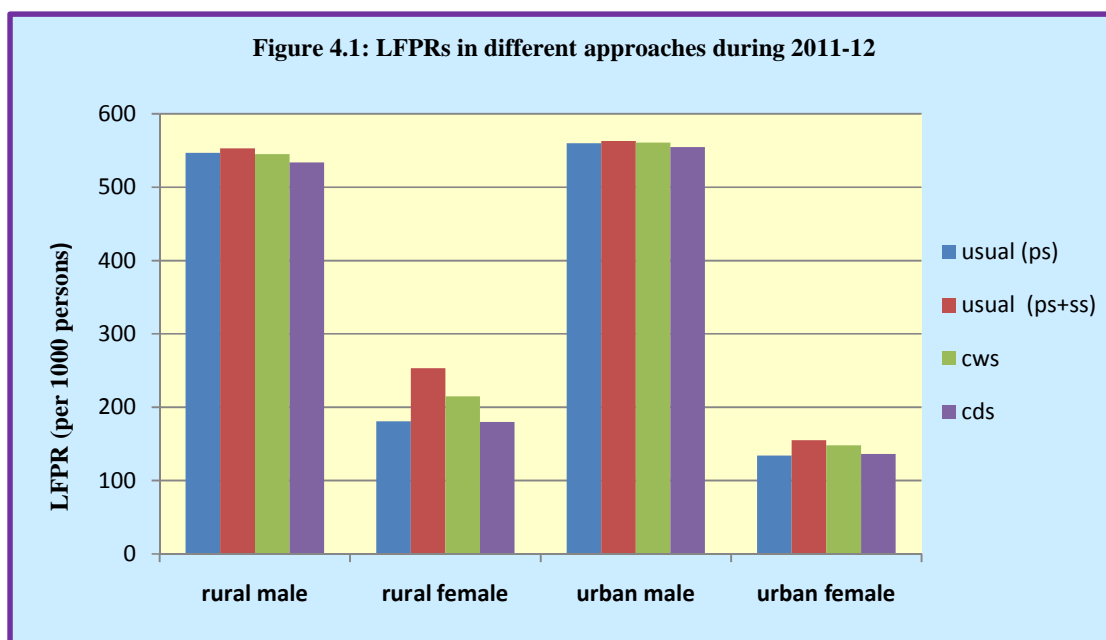

4.1.2.1 Between 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2009-10) rounds, LFPR in *usual status (ps+ss)* for rural males remained at the same level, decreased by about 1 percentage point for urban males, about 7 percentage points for rural females and about 3 percentage points for urban females. Between 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds, LFPR in *usual status (ps+ss)* for rural males and urban males remained at the same level, decreased by about 1 percentage point for rural females and increased by about 1 percentage point for urban females. During the period from 1993-94 to 2011-12, the LFPR in *usual status (ps+ss)* decreased by 1 percentage point for rural males and by 8 percentage points for rural females. In the urban areas, during this period, LFPR in *usual status (ps+ss)* increased by 2 percentage points for males and decreased by 1 percentage point for females. According to the *usual status (ps)*, between 1993-94 and 2011-12, LFPR for rural females decreased by 6 percentage points and increased by 2 percentage points for urban males.

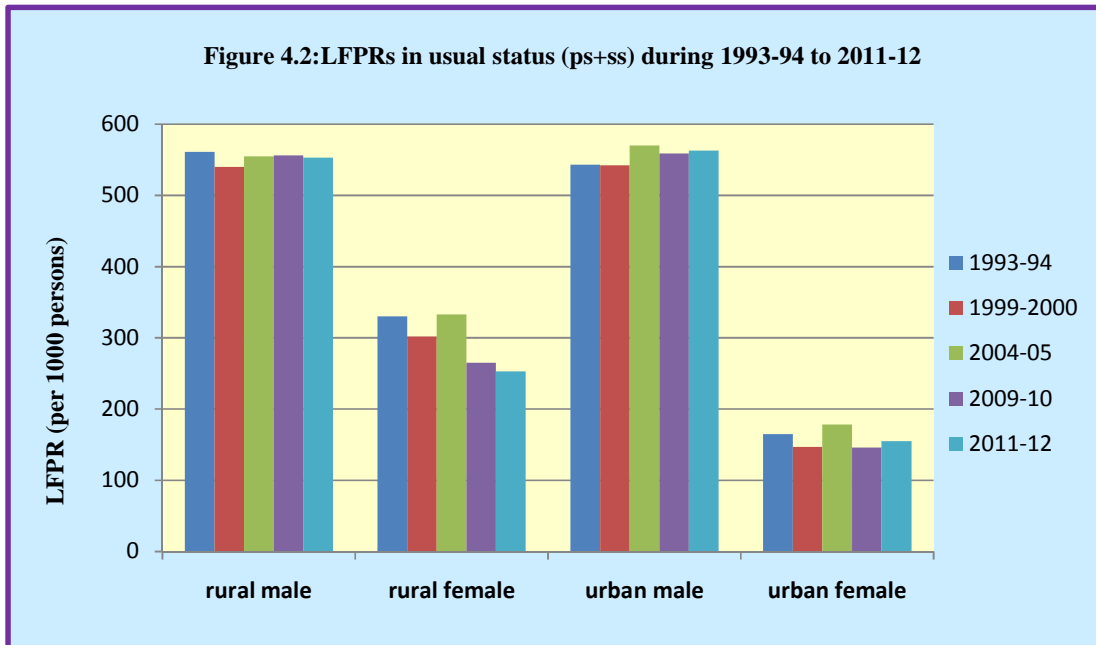

4.1.2.2 Table 4.1.1 shows that, during 2011-12, major states with LFPR for rural males in *usual status (ps+ss)* as 60 per cent or more were Karnataka (62 per cent), Andhra Pradesh (61 per cent), Tamil Nadu, Odisha (61 per cent each), Gujarat (60 per cent) and West Bengal (60 per cent). Among the major states, LFPR for rural females in *usual status (ps+ss)* was the highest for Himachal Pradesh (53 per cent) followed by Andhra Pradesh (45 per cent) and Chhattisgarh (42 per cent). In the urban areas, LFPR for males in *usual status (ps+ss)* was the highest for West Bengal (63 per cent) followed by Himachal Pradesh and Gujarat (61 per cent each). In the *usual status (ps+ss)*, LFPR for urban females was the highest for Chhattisgarh (25 per cent) followed by Himachal Pradesh (24 per cent) and Kerala (22 per cent). Among the major states, the LFPR in *usual status (ps+ss)* was the lowest in Uttarakhand (47 per cent) and Bihar (6 per cent) for rural males and rural females, respectively and in the urban areas, it was the lowest for both males and females in Bihar (44 per cent for males and 5 per cent for females).

4.1.3 *Current status approach*: Statement 4.1 shows that during 2011-12, LFPR according to current weekly status approach was 55 per cent for rural males, 22 per cent for rural females, 56 per cent for urban males and 15 per cent for urban females. Compared to the current weekly status LFPRs, current daily status LFPRs were slightly lower for all

categories of persons. LFPR for rural males according to current daily status approach was nearly 53 per cent compared to 18 per cent for rural females and in urban areas, LFPR for males was nearly 56 per cent compared to 14 per cent for females.

4.1.4 *Gender differentials in the labour force*: Statement 4.1 also presents the sex ratio (i.e. number of females per 1000 males) in the labour force. The statement reveals that whatever be the approach followed, females were far outnumbered by males in the labour force – to a greater extent in urban areas than in rural areas. The sex ratio in the labour force according to *usual status (ps+ss)* is found to be higher due to higher participation of females in subsidiary economic activities as compared to the males. The sex ratio in the labour force was the highest in the *usual status (ps+ss)* in the rural areas (44 per cent).

## 4.2 Age Specific Labour Force Participation Rates (ASLFPR)

4.2.1 As obtained from the present survey, the LFPRs in *usual status (ps)* for different age-groups of rural males, rural females, urban males and urban females are presented in Statement 4.2. In Statement 4.3, the LFPRs in the *usual status (ps+ss)* for different age-groups of each category of persons (rural males, rural females, urban males and urban females) as obtained from the NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) round surveys are presented.

4.2.2 It is seen from Statements 4.2 and 4.3 that the pattern in the LFPRs over the age groups is same for all the

Statement 4.2: Age specific labour force participation rates according to usual principal status in NSS 68<sup>th</sup> round (2011-2012)

categories of persons for both *usual status (ps)* and *usual status (ps+ss)*. Statement 4.2 shows that LFPR is negligible in the age-group 5-9 years. In the age-group 10-14 years, it is 2 per cent for rural males and rural females, 3 per cent for urban males and almost 1 per cent for urban females. Among the persons of ages 25 - 54 years, LFPR is found to be comparatively much higher. Statement 4.3 shows that for persons of this age group, LFPRs in *usual status (ps+ss)*

during 2011-12 varied from 96 per cent to 99 per cent for rural males, 95 per cent to 99 per cent for urban males, 37 per cent to 48 per cent for rural females and 22 per cent to 28 per cent for urban females.

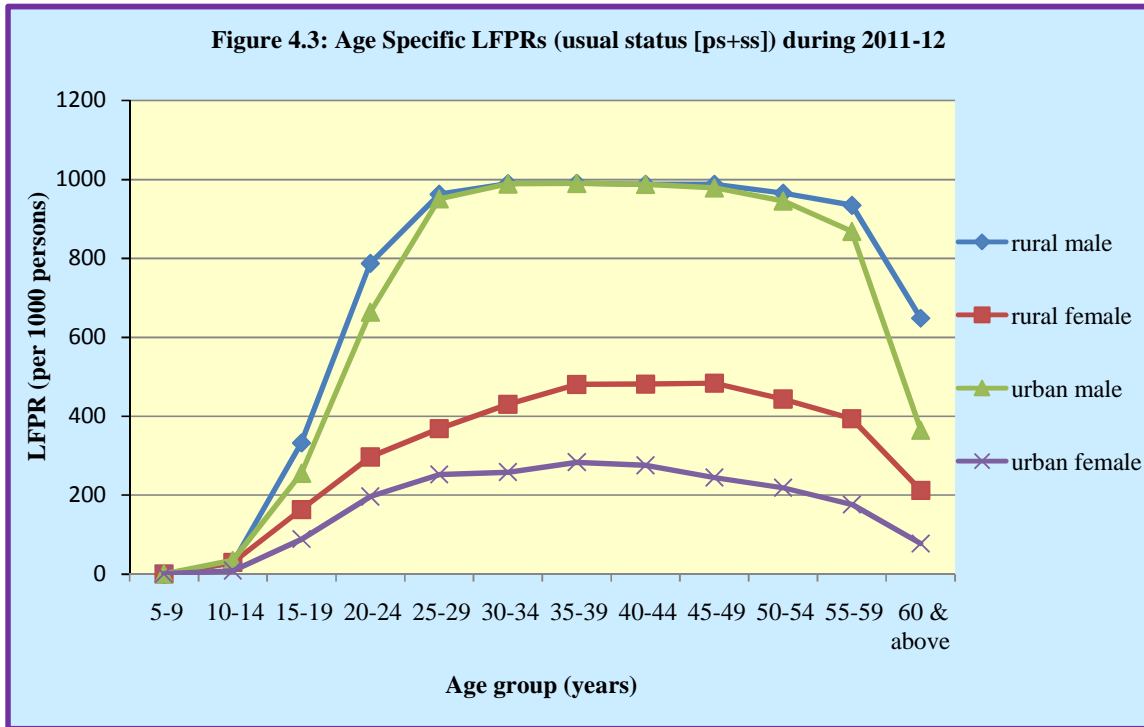

4.2.3 It is observed from Statement 4.3 that among aged males (60 years and above), about 65 per cent in the rural areas and about 37 per cent in the urban areas were in the labour force during 2011-12. The corresponding figure for females was 21 per cent in rural areas and 8 per cent in urban areas. The comparison of the age specific LFPRs measured in the usual status (ps), and usual status (ps+ss) reveals that among males, participation in the labour force in the subsidiary capacity is higher among youths in the age groups 15-19 years and 20-24 years than that among the persons in the other age groups. Among rural females, the participation rate in the labour force in the subsidiary capacity was considerably higher for all the age groups above 14 years. Participation in the labour force in the subsidiary capacity among urban females was comparatively higher for the age group 25 - 49 years. During 2011-12, among females of the age group 20 to 59 years, the participation rate in the labour force in the subsidiary capacity varied from 9 per cent to 13

per cent in rural areas and 2 per cent to 5 per cent in urban areas. The overall participation rate in the labour force in the subsidiary capacity is found to be less than 1 per cent for the males, about 7 per cent for rural females and about 2 per cent for urban females in India.

Statement 4.3: Age specific labour force participation rates according to usual status (ps+ss) in NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

4.2.4 *Change in LFPR since 1993-94:* It is seen from Statement 4.3 that compared to the rates in 1993-94, the LFPRs in *usual status (ps+ss)* in 2011-12 has declined for all age-groups of rural females, for all age groups other than 25-29 years for urban females, for all age groups other than 30-34 years and 45-49 years for rural males and for the age groups other than 30-59 years for urban males. During this period of 18 years, decline in LFPR for males is substantial for the age groups 10-14 years, 15-19 years, 20-24 years and 60 years or more. For rural females of the age group 10-54 years, decline in LFPR between 1993-94 and 2011-12 varied from 10 per cent to 21 per cent and for urban females of the age groups 10-24 years and 30 years or more, it varied from 2 per cent to 7 per cent. Figure 4.3 gives a diagrammatic presentation of the age specific LFPR for the different categories of persons as obtained from NSS 68<sup>th</sup> round.

Statement 4.1.1: LFPR (number of persons/person-days in the labour force per 1000 persons/ person-days) according to usual, current weekly and current daily statuses for each State/UT

## Chapter Five

### Employed (Work Force)

#### 5.0 General

5.0.1 In this chapter, the estimate of the work force (or employed) and its structure are discussed. In order to study the trend, earlier survey estimates are also provided. Four different estimates of the employed have been obtained based on the three approaches (viz. usual status approach, current weekly status approach and current daily status approach) adopted in the survey for classification of the population by activity statuses. These are:

- (i) number of persons employed according to the *usual status (ps)* i.e. by considering usual principal activity only,
- (ii) number of persons employed according to the *usual status (ps+ss)* i.e. by considering usual principal and subsidiary activity together,
- (iii) number of persons employed according to the *current weekly status*, and
- (iv) number of person-days employed according to the *current daily status*.

5.0.2 The estimate of employed (or worker) in the *usual status (ps)* (i.e. *usual principal status*) gives the number of persons who worked for a relatively long part of the 365 days preceding the date of survey. The work force in the *usual status (ps+ss)* is obtained by considering the *usual principal status* and the *subsidiary status* together. The work force in the *usual status (ps+ss)* includes (a) the persons who worked for a relatively long part of the 365 days preceding the date of survey and (b) the persons from among the remaining population who had worked at least for 30 days during the reference period of 365 days preceding the date of survey. The work force measured in *current weekly status* (CWS) gives the average picture of the work force in a short period of one week during the survey period. The estimate of work force in the *current weekly status* provides the number of persons worked for at least 1 hour on any day during the 7 days preceding the date of survey. The work force measured in *current daily status* (CDS) gives the average picture of the person-days worked in a day during the survey period. For each person, activity status according to the current daily status approach was recorded for each of the 7 days preceding the date of survey. If a single activity was recorded in a day, 1.0 intensity was assigned against that activity status and if two different activities were recorded in a day, 0.5 intensity was assigned for each of these two activity statuses. Based on the activity statuses and the intensities recorded for the 7 days of the reference week, total number of person-days corresponding to the different activity statuses was estimated for a period of 7 days. If a person worked for 4 hours or more on a day, 1.0 intensity was assigned against work activity status on that day and if the person worked for at least 1

hour but less than 4 hours on a day, 0.5 intensity was assigned against work activity status on that day. The estimate of the number of person-days employed in the reference week was obtained by considering the number of person-days which were in work activity during the reference week. The number of person-days employed on a day during the survey period is obtained by dividing the estimated number of person-days employed in a week by 7.

## 5.1 Worker Population Ratio (WPR) in different approaches

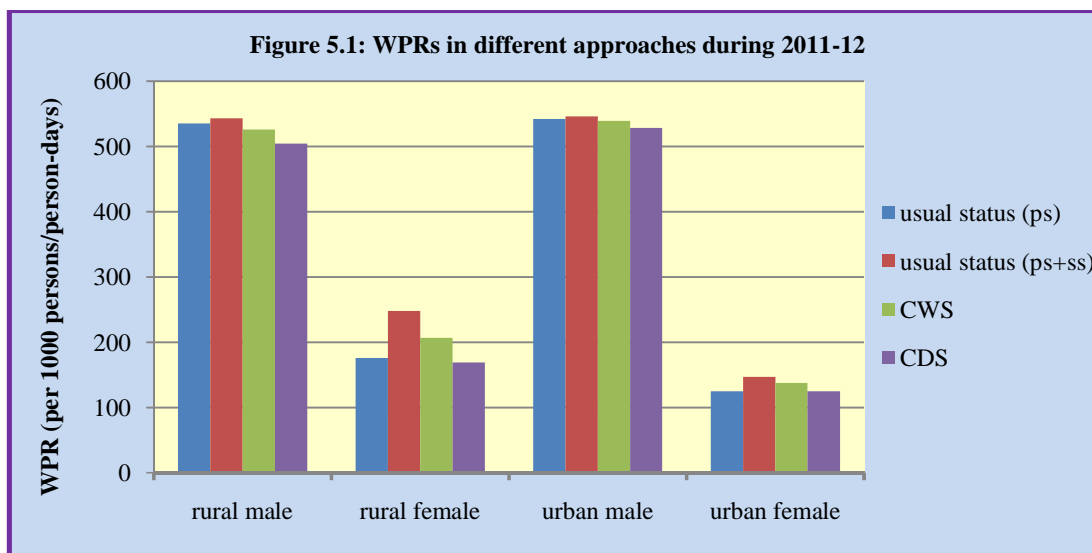

5.1.1 The number of persons/person-days employed per thousand persons/ person-days is

Statement 5.1: WPR (per 1000) according to usual status (ps), usual status (ps+ss), CWS and CDS for different categories of persons during 2011-12

category of persons	all-India			
	WPR in		CWS	CDS
	usual status (ps)	usual status (ps+ss)

referred to as work-force participation rates (WFPR) or worker-population ratio (WPR). In Statement 5.1, the WPRs based on the different approaches, as estimated from the NSS 68<sup>th</sup> round (July 2011 - June 2012) survey, are presented for different categories of persons of all ages at the all-India level. The WPRs based on the various approaches for the different states and union territories as estimated from the present survey are presented in Statements 5.1.1 and 5.1.2 – statement 5.1.1 for usual status and 5.1.2 for CWS and CDS. Figure 5.1 presents WPRs based on different approaches for the different categories of persons as obtained from NSS 68<sup>th</sup> round.

5.1.2 The *usual status* approach, having the long reference period of last 365 days, is unable to capture changes in the activity pattern caused by seasonal fluctuations. But the estimates obtained by adopting the *current weekly* and *current daily status* approaches are expected to reflect the overall effect caused by intermittent changes in the activity pattern during the year. The latter reflects even the changes that take place during a week and enables to account for the person-days which were in work activity during the survey period.

5.1.3 *WPR in usual status (ps)*: The WPR according to *usual status (ps)* was 35 per cent at the all-India level. WPR in the rural areas (36 per cent) was higher than that in urban areas (34 per cent). Both in rural and urban areas, WPRs for males were significantly higher than the corresponding WPR for females - 54 per cent for both rural males and urban males compared to 18 per cent for rural females and 13 per cent for urban females.

5.1.3.1 *WPR in usual status (ps) for States/UTs*: During 2011-12, among the major states, WPR in usual status (ps) for persons was the highest in Himachal Pradesh (49 per cent) followed by Andhra Pradesh (45 per cent), Chhattisgarh (43 per cent), Karnataka and Tamil Nadu (42 per cent each). The WPR for persons was the lowest in Bihar (26 per cent) preceded by Uttar Pradesh (29 per cent). Among males, WPR was the highest in Gujarat and Karnataka (60 per cent each) followed by Tamil Nadu and Odisha (59 per cent each). The WPR for males was the lowest in Uttarakhand and Bihar (46 per cent each) preceded by Uttar Pradesh (48 per cent). Among females, WPR was the highest in Himachal Pradesh (43 per cent) followed by Chhattisgarh and Andhra Pradesh (33 per cent each). The WPR for females was the lowest in Bihar (3 per cent) preceded by Jammu & Kashmir (5 per cent).

5.1.4 *WPR in usual status (ps+ss)*: The WPR according to *usual status (ps+ss)* was 39 per cent at the all-India level. WPR in rural areas was about 40 per cent and that in urban areas was about 36 per cent. In both rural and urban areas, WPR for females were considerably lower than the WPR for males. In the rural areas, WPR for males and females were nearly 54 per cent and 25 per cent, respectively while in the urban areas, WPR for males and females were nearly 55 per cent and 15 per cent, respectively.

5.1.4.1 It may be seen from Statement 5.1 that, during 2011-12, about 3 per cent of Indian population was employed in the subsidiary status only. The statements also shows that the increase in WPR from *usual status (ps)* to *usual status (ps+ss)* was higher for females compared to that of males both in rural and urban areas. This increase was more for rural females compared to urban females implying that higher percentage of females were included in the workforce by their engagement in economic activity in subsidiary status only. For rural females, WPR increased from 18 percent in the *usual status (ps)* to 25 per cent in *usual status (ps+ss)* and for urban females the increase was from 13 per cent in *usual status (ps)* to 15 per cent in *usual status (ps+ss)* which indicates that, during 2011-12, about 7 per cent of rural females and about 2 per cent of urban females were employed in the subsidiary capacity only.

5.1.4.2 *WPR in usual status (ps+ss) for States/UTs:* Table 5.1.1 shows that, during 2011-12, among the major states, WPR in usual status (ps+ss) for persons was the highest in Himachal Pradesh (52 per cent) followed by Andhra Pradesh (47 per cent), Chhattisgarh (46 per cent), Tamil Nadu (44 per cent). The WPR was the lowest in Bihar (27 per cent) preceded by Uttar Pradesh (33 per cent). Among rural males, WPR was the highest in Karnataka (61 per cent) followed by Andhra Pradesh, Gujarat and Tamil Nadu (60 per cent each). The WPR for rural males was the lowest in Uttarakhand (45 per cent) preceded by Bihar (47 per cent). Among rural females, WPR was the highest in Himachal Pradesh (52 per cent) followed by Andhra Pradesh (45 per cent). The WPR for rural females was the lowest in Bihar (5 per cent) preceded by Assam (12 per cent) and Haryana (16 per cent). Among urban males, WPR was higher in Gujarat, West Bengal and Himachal Pradesh (60 per cent each), Tamil Nadu (59 per cent), Odisha and Karnataka (58 per cent each). The WPR for urban males was the lowest in Bihar (42 per cent) preceded by Jharkhand (48 per cent). Among urban females, WPR was the highest in Chhattisgarh (24 per cent) followed by Himachal Pradesh (21 per cent) and Tamil Nadu (20 per cent). The WPR for urban females was the lowest in Bihar (5 per cent) preceded by Jharkhand (7 per cent) and Uttarakhand (9 per cent).

5.1.4.3 It may be seen from Statement 5.1.1 that, during 2011-12, employment among rural males in the subsidiary status only, was highest in Kerala and Jammu & Kashmir (2.2 per cent each) followed by Uttar Pradesh (1.7 per cent). Among rural females, this was the highest in Jammu & Kashmir (21.3 per cent) followed by Punjab (18.6 per cent) and Rajasthan (11.2 per cent). In the urban areas, employment in the subsidiary status only among males was the highest in West Bengal (1.3 per cent) followed by Kerala (1.2 per cent) and Chhattisgarh (1.0 per cent) and among females, this was the highest in West Bengal (5.0 per cent) followed by Rajasthan (4.6 per cent) and Punjab (4.1 per cent)

5.1.5 *WPR in Current Weekly Status:* The WPRs in CWS for persons were lower than the WPRs in usual status (ps+ss). At the all-India level, WPR in CWS was 36 per cent - 37 per cent in rural areas and 35 per cent in urban areas. The WPRs in CWS for males and

females in the rural areas were 53 per cent and 21 per cent, respectively. The corresponding figures for males and females in the urban areas were 54 per cent and 14 per cent, respectively. Gender differential in WPR widened in CWS compared to that observed in usual status (*ps+ss*) – difference in WPRs between males and females in CWS, at the all-India level, was 34 per cent as compared to 33 per cent in usual status (*ps+ss*).

5.1.5.1 *WPR in Current Weekly Status for States/UTs:* Table 5.1.2 shows that, during 2011-12, among the major states, WPR in CWS for persons was the highest in Himachal Pradesh (49 per cent) followed by Andhra Pradesh (44 per cent), Tamil Nadu, Karnataka and Gujarat (42 per cent each). The WPR was the lowest in Bihar (27 per cent) preceded by Uttar Pradesh (31 per cent). Among males, WPR was the highest in Gujarat and Karnataka (60 per cent each) followed by Tamil Nadu (58 per cent), West Bengal and Andhra Pradesh (57 per cent each). The WPR for males was the lowest in Uttarakhand and Bihar (46 per cent each) preceded by Uttar Pradesh (47 per cent). Among females, WPR was the highest in Himachal Pradesh (46 per cent) followed by Andhra Pradesh and Chhattisgarh (31 per cent each). The WPR for females was the lowest in Bihar (4 per cent) preceded by Assam (10 per cent), Haryana, Uttar Pradesh and Jharkhand (13 per cent each).

5.1.6 *WPR in Current Daily Status:* At the all-India level, WPR in CDS for persons was about 34 per cent. This was about 50 per cent, 17 per cent, 53 per cent and 13 per cent for rural males, rural females, urban males and urban females, respectively. The WPRs in CDS were lower than those obtained in CWS for each category of persons. The decrease in WPR in CDS as compared to that in *usual status (ps+ss)* was 4 percentage points for rural males, 8 percentage points for rural females and 2 percentage points for each of urban males and females. Gender differential in WPR further widened in CDS compared to that observed in *usual status (ps+ss)* and CWS – at the all-India level, difference in WPRs between males and females in CDS was 36 per cent as compared to 34 per cent in CWS and 33 per cent in *usual status (ps+ss)*.

5.1.6.1 *WPR in Current Daily Status for States/UTs:* During 2011-12, among the major states, WPR in CDS was the highest in Himachal Pradesh (47 per cent) followed by Andhra Pradesh (42 per cent) and Karnataka (40 per cent). The WPR was the lowest in Bihar (26 per cent) preceded by Uttar Pradesh (28 per cent). Among males, WPR was highest in Gujarat (59 per cent) followed by Karnataka (57 per cent) and Andhra Pradesh (55 per cent). The WPR for males was the lowest in Uttarakhand (44 per cent) preceded by Uttar Pradesh and Bihar (46 per cent each). Among females, WPR was the highest in Himachal Pradesh (41 per cent) followed by Andhra Pradesh (29 per cent) and Chhattisgarh (28 per cent). The WPR for females was the lowest in Bihar (3 per cent) preceded by Assam (8 per cent) and Haryana (9 per cent).

## 5.2 Change in estimates of employed over different NSS rounds

5.2.1 Statement 5.2 presents WPRs according to usual status for different categories of persons as obtained from NSS 27<sup>th</sup> (1972-73), 32<sup>nd</sup> (1977-78), 38<sup>th</sup> (1983), 43<sup>rd</sup> (1987-88), 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-00), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds. Statement 5.2 provides estimates of WPRs for two categories of usual status workers viz. (a) usual principal status workers i.e. workers according to *usual status* (*ps*) and (b) usual subsidiary status workers i.e. persons working only in a subsidiary status (*ss* workers). The two categories together constitute the total usually employed (or 'all' workers) i.e. workers according to the *usual status* (*ps+ss*). Statement 5.3 presents WPRs in *current weekly status* and *current daily status* as obtained from the different NSS rounds. Figure 5.2 presents the WPRs in *usual status* (*ps+ss*) for different categories of persons as obtained from different rounds of NSSO.

Statement 5.2: WPRs in usual status (*ps*) and usual status (*ps+ss*) during 27<sup>th</sup> (1972-73) and 68<sup>th</sup> (2011-2012) rounds of NSSO

round (year)	cate- gory of worker	usually employed									all-India

*ps* = principal status; *ss* = subsidiary status; *ps+ss*: principal and subsidiary status taken together

\*: proportions not derived for NSS 27<sup>th</sup> round

5.2.2 *Changes in WPRs in usual status (ps+ss)*: It may be noted that due to certain procedural differences for the 27<sup>th</sup> round, WPR values pertaining to usual status are comparable only with respect to 'all workers', and hence, are presented for that category only. It is seen from Statement 5.2 that during 2011-12, WPR in *usual status (ps+ss)* for rural males was almost at the same level as that of 1972-73. During 1972-73 to 2011-12, WPR in *usual status (ps+ss)* has decreased by 7 percentage points for rural females and increased by 5 percentage points for urban males and 1 percentage point for urban females. Between 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2009-10) rounds, WPR in *usual status (ps+ss)* for rural males remained at the same level, decreased by about 1 percentage point for urban males, about 7 percentage points for rural females and about 3 percentage points for urban females. Between 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds, WPR in *usual status (ps+ss)* decreased by about 1 percentage point for rural females, increased by about 1 percentage point for urban females and remained almost at the same level for males of both rural and urban areas. During the period 32<sup>nd</sup> round (1977-78) to 68<sup>th</sup> round (2011-12), the proportion of persons considered as workers due to their engagement in *subsidiary economic activity only* was 1 to 2 per cent for rural males, 6 to 9 per cent for rural females, 1 per cent or less for urban males and 2 to 3 per cent for urban females. During this period, reduction in WPR for rural females in *usual status (ps+ss)* was about 8 percentage points of which about 7 percentage points was due to *usual status (ps)*.

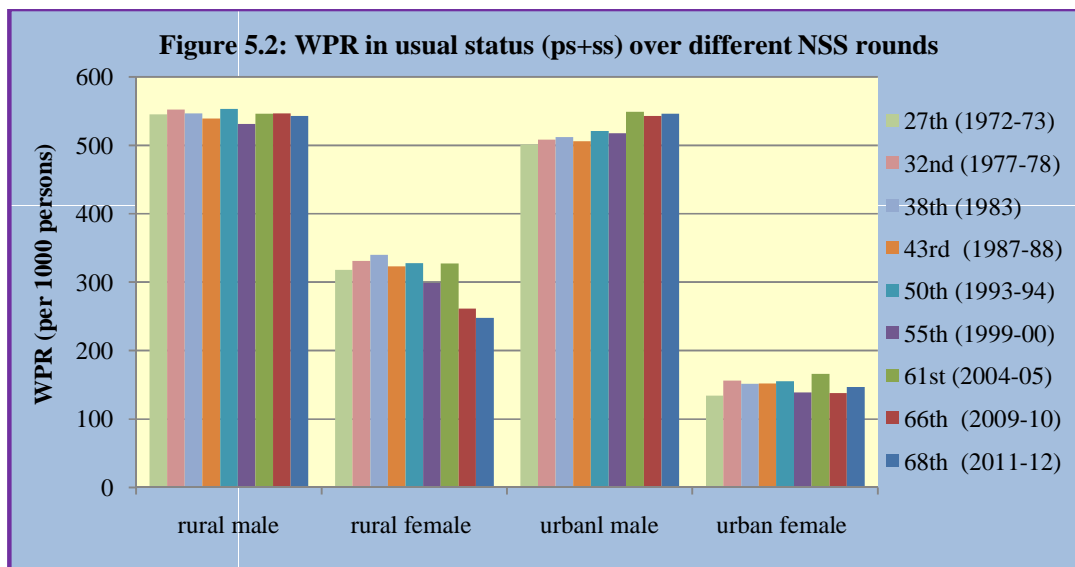

5.2.3 *Changes in WPRs in CWS and CDS*: It is seen from Statement 5.3 that compared to the last quinquennial survey (NSS 66<sup>th</sup> round), WPR in *current weekly status* decreased by about 1 percentage point for both males and females in rural areas whereas it increased by 1 percentage point for urban females and remained almost at the same level for urban males. Between NSS 66<sup>th</sup> round and NSS 68<sup>th</sup> round, WPR in *current daily status*

Statement 5.3: WPRs in current weekly status (CWS) and current daily status (CDS) during 1972-73 to 2011-2012

round (year)		all-India							
		CWS				CDS			
		rural		urban		rural		urban	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	
68 <sup>th</sup>	(2011-12)	526	207	539	138	504	169	528	125
66 <sup>th</sup>	(2009-10)	531	223	536	130	501	182	522	117
61 <sup>st</sup>	(2004-05)	524	275	537	152	488	216	519	133
55 <sup>th</sup>	(1999 - 00)	510	253	509	128	478	204	490	111
50 <sup>th</sup>	(1993-94)	531	267	511	139	504	219	496	120
43 <sup>rd</sup>	(1987-88)	504	220	492	119	501	207	477	110
38 <sup>th</sup>	(1983)	511	227	492	118	482	198	473	106
32 <sup>nd</sup>	(1977-78)	519	232	490	125	488	194	472	109
27 <sup>th</sup>	(1972-73)	530	277	491	123	503	231	477	108

decreased for rural females (1 percentage point) but increased for urban males and urban females (1 percentage point each). Between NSS 27<sup>th</sup> round and NSS 68<sup>th</sup> round, WPR for rural females decreased by 7 percentage points in *current weekly status* and 6 percentage points in *current daily status*. During this period, WPR for urban males increased by about

5 percentage points and that for urban females increased by about 2 percentage points in both *current weekly status* and *current daily status*. It may be noted that the difference between the WPRs according to CWS and CDS is quite substantial in the rural areas, particularly among female workers. This indicates prevalence of *underemployment* in rural areas, particularly among female workers who had some employment in a week.

### 5.3 Age Specific Worker-population Ratio (ASWPR) in usual Status

5.3.1 The number of persons usually employed in a particular age-group per 1000 persons in that age-group is defined as the age specific worker-population ratio (ASWPR). Based on the age recorded for each person, the ASWPRs are estimated from the data of NSS 68<sup>th</sup> round (2011-12) for age groups of five year interval up to the age of 64 years and for the age group 65 years and above. The ASWPRs for different categories of persons, according to *usual status (ps)* and *usual status (ps+ss)*, are presented for all-India in Statement 5.4. The ASWPRs according to *usual status (ps)* for states and union-territories are presented in Statement 5.4.1 and those according to *usual status (ps+ss)* are presented in Statement 5.4.2. Comparable all-India results on ASWPRs based on the 55<sup>th</sup> round (1999-2000), 61<sup>st</sup> round (2004-05) and 66<sup>th</sup> round (2009-10) surveys are also presented in Statement 5.4.

5.3.2 *Changes in ASWPR in usual status (ps+ss) (i.e. all workers) since 1999-2000:* It is seen from Statement 5.4 that between 1999-2000 and 2011-12, the ASWPRs for rural males declined for the younger age groups but for rural females, decline in ASWPRs happened for all the age-groups. During this period, the ASWPRs of urban males decreased for the younger age groups while those for urban females decreased for younger age-groups and for the age-groups 45 years and above. Between 1999-2000 and 2011-12, ASWPR for rural males decreased by about 13 percentage points for the age-group 15-29 years and increased for the higher age-groups. For rural females, ASWPR for the age-groups 15-29 years, 30-34 years and 45-59 years decreased by about 14 percentage points, 11 percentage points and 7 percentage points, respectively. For urban males, the ASWPR decreased by about 4 percentage points for the age-group 15-29 years and increased for the higher age-groups

excepting the age-group 60 years and above. For urban females, ASWPR for the age-group 15-29 years increased by about 1 percentage point and decreased by about 3 percentage points for the age-group 45-59 years.

*5.3.3 Changes in ASWPR in usual status (ps+ss) between 2009-10 and 2011-12:* During 2009-10 to 2011-12, the ASWPRs for both males and females in rural areas declined for almost all the age-groups. For rural males, the ASWPR for the age-group 15-29 years decreased by about 3 percentage points and for rural females, decrease in ASWPR for the age-groups 15-29 years, 30-34 years and 45-59 years was about 3 percentage points, 1 percentage point and 2 percentage points, respectively. In the urban areas, the ASWPR for males for the age-group 15-29 years decreased by about 1 percentage point but for females, it increased by about 1 percentage point for the age-group 15-29 years, 2 percentage points for the age-group 30-34 years and it remained at the same level for the age group 45-59.

## **5.4 Age Composition of the Usually Employed**

5.4.1 Statement 5.5 shows the per 1000 distribution of the usually employed persons by age-group for all-India for both the principal status (ps) workers and all workers (i.e. workers in the usual status (ps+ss)) as obtained from the present survey as also those from the NSS 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2009-10) round surveys.

*5.4.2 Distribution of all workers by age-group:* It is seen from Statement 5.5 that among all workers (i.e. workers in usual status (ps+ss)), during the year 2011-12, more than two-third were in the age-group 15 to 44. The proportion of the usually employed males in this age bracket is 66 per cent in rural areas and 70 per cent in urban areas. For the females, the corresponding percentages are 68 and 74. Further, during this period, more than one-fifth of the usually employed belonged to the age-group 45-59. The oldest group (i.e. age-group 60 and above) accounted for about 5 per cent of the usually employed in urban areas. In rural areas, about 10 per cent of usually employed males and 7 per cent of usually employed females belonged to this group.

*5.4.3 Changes in distribution of all workers since 1999-2000:* Between 1999-2000 and 2011-12, the proportion of all workers in the age-group 15-29 years decreased for all categories of persons. The proportion decreased by about 6 percentage points for rural males, 7 percentage points for rural females, 5 percentage points for urban males and 1 percentage point for urban females. The proportion of usually employed in the age-group 60 years and above increased by 1 percentage point for rural males and 2 percentage points for rural females and remained more or less at the same level for both males and females in the urban areas. During the period from 1999-2000 to 2011-12, the proportion of the usually employed in the age-groups 30-44 years and 45-59 years increased for males and females of both rural and urban areas. For the age-group 30-44 years, the proportion increased by about 2, 4, 4 and 2 percentage points for rural males, rural females, urban males and urban females, respectively. The proportion of all workers in the age-group 45-59 years increased by about 4, 4, 5 and 1 percentage points for rural males, rural females, urban males and urban females, respectively.

Statement 5.4: Age specific usual status worker population ratio (ASWPR) during NSS 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-2010) and 68<sup>th</sup> (2011-2012) rounds

close proxy for household income. Statement 5.6 presents WPR in usual status (ps+ss) for each decile class of population by MPCE separately for males and females of rural and urban areas at the all-India level. It is evident from the statement that the WPR, particularly for the males, is found to increase more or less steadily as we go up the decile classes, in both the rural and urban areas. During 2011-12, WPR for rural males in the bottom decile class was 48 per cent whereas this was 61 per cent in the top decile class. For urban males, WPR in the bottom and top decile classes were 50 per cent and 57 per cent, respectively. For the females, WPR in the top decile class is higher than that of the bottom decile class but no definite pattern is observed in

WPR over the decile classes. For rural females, WPR was about 22 per cent in the bottom decile class and 27 per cent in the top decile class. The corresponding figure for urban females was 15 per cent in the bottom decile class and 17 per cent in the top decile class. From the estimates of the sex-ratios among workers given in Statement 5.6, it may be observed that number of female workers per 1000 male workers in the urban areas was generally higher for lower decile classes and no such specific pattern was there in the rural areas. The worker population ratios for each decile class of population by MPCE for the states and union territories are given in Statement 5.6.1 separately for each sex and sector.

## 5.6 Education Level Specific Usual Status Worker Population Ratio (WPR) for Persons of Age 15 Years and Above

5.6.1 The number of persons who are usually employed per 1000 persons having particular levels of general education is defined as the education level specific usual status worker population ratio. The education level specific usual status worker-population ratios for persons of age 15 years and above, as obtained from the present survey, have been presented in Statement 5.7 for 7 specific levels of general education viz., 'not literate', 'literate and up to primary', 'middle', 'secondary', 'higher secondary', 'diploma/certificate' and 'graduate and above'. From the 61<sup>st</sup> round survey, persons with general education level 'diploma/certificate' which were below graduate level were identified separately and the diploma/certificate courses, which were of graduation level or above, were classified under the respective level of general education. In the earlier surveys, persons with general education level 'diploma/certificate' were not identified separately and they were classified in the equivalent level of general education. Statement 5.7 also presents the worker population ratios obtained from NSS 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2009-10) round surveys for both usual principal status (ps) workers and 'all' workers (i.e. workers according to the *usual status (ps+ss)*). Education level specific usual status worker population ratios for persons of age 15 years and above for states and union territories based on the data of the present survey are presented in Statements 5.7.1 and 5.7.2 – Statement 5.7.1 for workers in *usual status (ps)* and Statement 5.7.2 for workers in *usual status (ps+ss)* i.e. all workers.

5.6.2 Statement 5.7 shows that at the all-India level, WPR in *usual status (ps+ss)* for rural males of age 15 years and above, was the highest for the education level 'literate and up to primary' (89 per cent). This was highest for the education level 'not literate' (42 per cent) among rural females, 'literate and up to primary' (85 per cent) among urban males and 'diploma/certificate' (34 per cent) among urban females. The WPR in *usual status (ps+ss)* for persons of age 15 years and above was the lowest for the educational level 'higher secondary' for all categories of persons. It is seen from Statement 5.7 that during 1999-2000, WPR for persons with general education level secondary or below was the highest for the education level 'not literate' for both males and females of rural and urban areas while during 2011-12, it is the highest for the education level 'literate and up to primary' for males and still remain the highest for the education level 'not literate' for females. It is also seen from Statement 5.7 that for rural males, WPR in *usual status (ps+ss)* in 2011-12 was higher than that of 1999-2000 only for the education level 'literate and up to primary' and for rural females, it was lower in 2011-12 for all the levels of general education. In the urban areas, WPR for males in *usual status (ps+ss)* in 2011-12 was higher than that of 1999-2000 for the education levels 'literate and up to primary' and 'middle' while for females, it was higher in 2011-12 for the education levels 'literate and up to primary', 'middle' and 'graduate and above'.

## 5.7 Distribution of usually Employed of age 15 years and above by General Education Level

5.7.1 Per 1000 distribution of the usually employed persons of age 15 years and above by level of general education as obtained from the current survey is presented at the all-India level in Statement 5.8. The corresponding distributions obtained from NSS 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05) and 66<sup>th</sup> (2004-05) round surveys are also presented in the statement. The discussions are restricted to all workers i.e. workers according to the usual status (ps+ss).

5.7.2 During 2011-12, among the rural males of age 15 years and above employed in *usual status (ps+ss)*, about 28 per cent were *not literate* and about 26 per cent were *educated* (i.e. with educational level *secondary and above including diploma/ certificate*). Among usually employed rural females of age 15 years and above, about 56 per cent were *not literate* while only about 11 per cent were *educated*. In urban India, among persons of age 15 years and above employed in *usual status (ps+ss)*, about 11 per cent of the males and about 28 per cent of the females were *not literate*. The proportion of *educated* among usually employed persons of age 15 years and above was much higher in urban areas – this was about 53 per cent for males and about 40 per cent for females. Between 1999-2000 and 2011-12, the proportion of *educated* among all workers increased by about 9 percentage points for males of both rural and urban areas, 7 percentage points for rural females and 12 percentage points for urban females. Between 2009-10 and 2011-12, the proportion of *educated* among all workers showed a rise of about 1 percentage point for males and about 2 percentage points for females.

Statement 5.7: Education level specific usual status worker population ratio for persons of age 15 years and above during NSS 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-2010) and 68<sup>th</sup> (2011-2012) rounds

## 5.8 Distribution of Usually Employed by Status of Employment

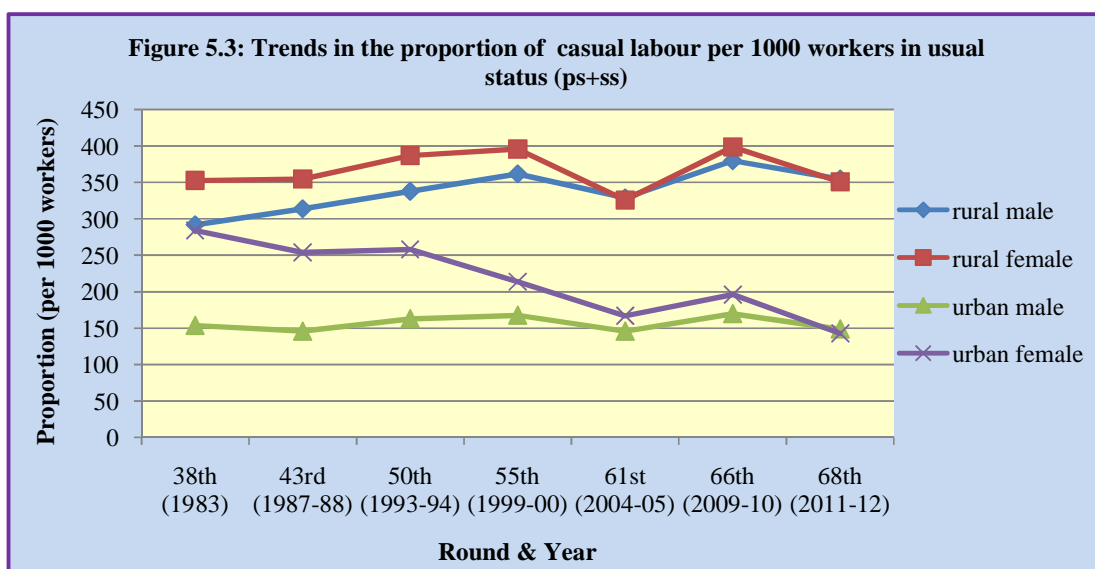

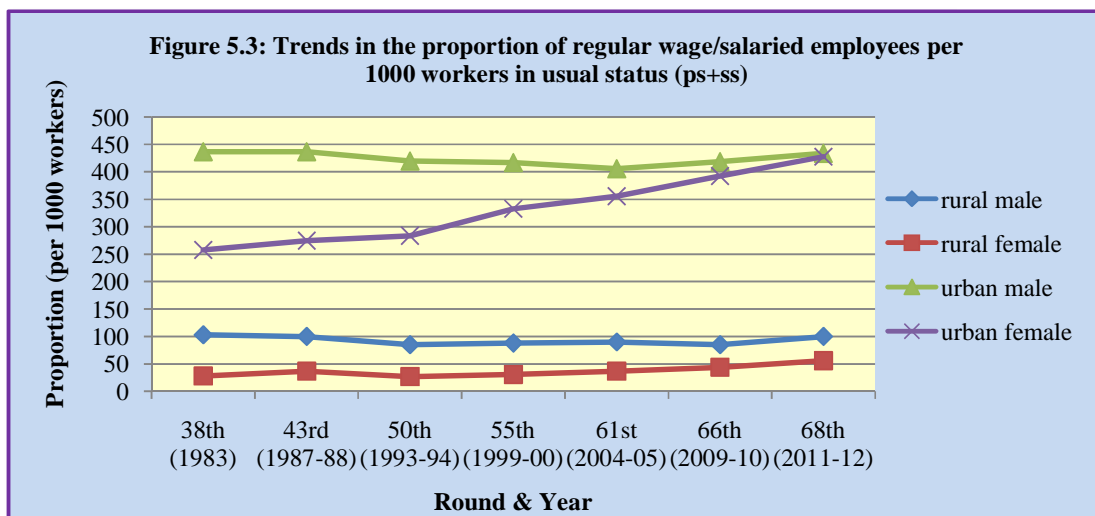

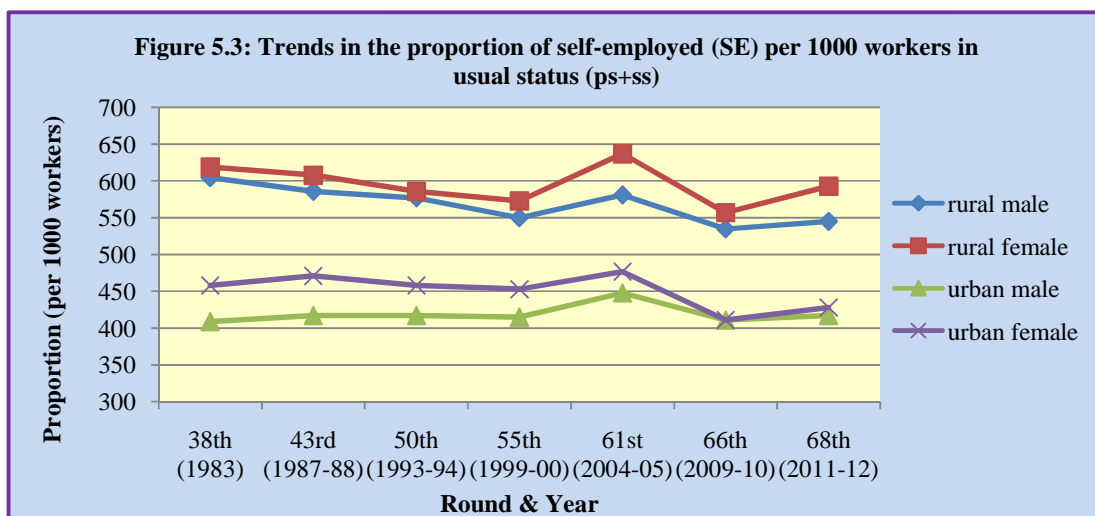

5.8.1 The employed persons are categorised into three broad categories according to their status of employment. These broad categories are: (i) *self-employed*, (ii) *regular wage/salaried employee* and (iii) *casual labour*. Statement 5.9 presents, at the all all-India level, the per 1000 distribution of usually employed by these broad categories of employment for both principal status (ps) and usual status (ps+ss). The Statement 5.9 also gives the results on the corresponding distribution obtained from the earlier quinquennial surveys. Trends in the proportion (per 1000 workers in usual status (ps+ss)) of self-employed (SE), regular wage/salaried employees (RWS) and casual labour (CL) over the different NSS rounds are presented in Figure 5.3, separately for the males and females of rural and urban areas. The distributions of the usually employed by broad categories of employment at the state and union territory levels are presented in Statement 5.9.1. The discussion below pertains to all workers (i.e., workers in *usual status (ps+ss)*).

5.8.2 During 2011-12, in rural India, among the workers in usual status (ps+ss), about 55 per cent of the males and 59 per cent of females were *self-employed*. The corresponding figures in urban India were about 42 per cent for males and 43 per cent for females. For both males and females, the proportion of *regular wage/ salaried employees* among all workers was much lower in rural areas than in urban areas - among workers in the usual status (ps+ss), about 10 per cent of rural males, 6 per cent of rural females and 43 per cent of urban males and urban females were *regular wage/ salaried employee*. The proportion of *casual labour* among all workers was about 36 per cent for rural males, 35 per cent for rural females, 15 per cent for urban males and 14 per cent for urban females.

5.8.3 *Changes over rounds:* Between 1983 and 2011-12, among male workers in the *usual status (ps+ss)* in the rural areas, the proportion of *self-employed* decreased by 6 percentage points while the proportion of *casual labour* increased by 6 percentage points. For rural females, fall in the proportion of *self-employed* (3 percentage points) during this period was accompanied by the rise in the proportion of *regular wage/salaried employment* (3 percentage points). Distribution of the usually employed urban males by categories of employment remained almost the same during the period from 1983 to 2009-10. Among urban females employed in usual status (ps+ss), the proportion of *self-employed* and *casual labour* during this period decreased by 3 percentage points and 14 percentage points, respectively while the proportion of *regular wage/salaried employment* increased by about 17 percentage points. Between 2004-05 and 2009-10, among usually employed males and females of both rural and urban areas, the proportion of *self-employed* declined along with a rise in the proportion of *casual labour*. Between 2009-10 and 2011-12, for all categories of persons, the proportion of *self-employed* increased along with a fall in the proportion of *casual labour*. During the period 2004-05 to 2011-12, among usually employed persons, the proportion of *self-employed* decreased by about 4 percentage points for rural males and rural females, 3 percentage points for urban males and 5 percentage points for urban females. During this period, the proportion of *regular wage/ salaried employee* increased for all categories of persons and the increase was the highest for urban females (about 7 percentage points).

Statement 5.9: Per 1000 distribution of usually employed by broad category of employment during NSS 38<sup>th</sup> round (1983) to 68<sup>th</sup> round (2011-2012)

5.8.4 *Decile classes of population by MPCE and status of employment:* Statement 5.10 presents the distribution of workers in the *usual status (ps+ss)* by broad category of employment for each decile class of population by MPCE at the all-India level. It is seen that in the rural areas, the proportion of casual labourers among all workers is higher in the lower decile classes and lower in the higher decile classes. On the other hand, the proportion of both self-employed and regular salaried employees in the rural areas is found to be lower in the lower decile classes and higher in the higher decile classes. In the urban areas, the pattern is a little different. As in the case of rural areas, for both males and females in the urban areas, the proportion of casual labourers is found to be higher in the lower decile classes, the proportion of regular wage/ salaried employees increases substantially as we go up the decile classes and the proportion of self-employed is lower in the higher decile classes.

Statement 5.10: Per 1000 distribution of usually employed (ps+ss) by category of employment for each decile classes of population by MPCE during 2011-12

## 5.9 Industrial Distribution of the Usually Employed

5.9.1 As in the earlier employment and unemployment surveys of the quinquennial rounds, for the 68<sup>th</sup> round survey also, information relating to the industry of work in which a person was working was collected for the usually employed persons. This information was collected for workers in principal status (ps) as well as subsidiary status (ss). Statement 5.11 shows the distribution of *usually employed* by broad industry division, separately for workers in usual principal status (ps) and all workers (i.e.), as obtained from the different quinquennial rounds of NSSO starting from the NSS 32<sup>nd</sup> round (1977-78). For classification of industry, NIC 2008 was used in NSS 68<sup>th</sup> round, NIC 2004 in 66<sup>th</sup> round, NIC 1998 in 61<sup>st</sup> and 55<sup>th</sup> rounds, NIC 1987 in 50<sup>th</sup> round and NIC 1970 in 43<sup>rd</sup>, 38<sup>th</sup> and 32<sup>nd</sup> rounds. It may be noted that the changes in the activity classification across rounds at one digit level of industry is nominal and thus, comparison can fairly be made over the rounds at the one digit level of industry. This fact may be taken into account in measuring the changes of workforce at one digit level of industry over rounds. Distributions of workers in the usual status (ps+ss) by industry of work (industry section of NIC 2008) are presented at the state and union territory level in Statements 5.11.1. The discussion below pertains to all workers (i.e., workers according to the *usual status* (ps+ss)).

5.9.2 *Rural areas*: The Statement 5.11 shows that, during 2011-12, among all workers in the rural areas, about 59 per cent of the males and 75 per cent of the females were engaged in the agricultural sector. The proportion of rural males engaged in the agricultural activities gradually fell from 81 per cent in 1977-78 to 67 per cent in 2004-05, and then to 63 per cent in 2009-10 and in 2011-12, it further decreased to 59 per cent. On the other hand, in the case of female workers, the proportion engaged in the agricultural activities decreased from 88 per cent in 1977-78 to 83 per cent in 2004-05, to 79 per cent in 2009-10 and to 75 per cent in 2011-12. Over the years, in rural India, there has been considerable increase in the proportion of male and female workers engaged in 'construction' – from 2 per cent in 1977-78 to 13 per cent in 2011-12 for males and from 1 per cent in 1977-78 to 7 per cent in 2011-12 for females. Over the years, an increasing trend is also observed in the proportion of rural males engaged in 'trade, hotel and restaurant', 'transport, storage and communications', 'manufacturing' and 'other services' sectors and for rural females, the increasing trend in the proportion is observed for 'manufacturing', 'other services' and 'trade, hotel and restaurant' sectors.

5.9.3 *Urban areas*: In urban India, during 2011-12, among male workers in usual status (ps+ss), the 'trade, hotel and restaurant' sector engaged about 26 per cent while 'manufacturing' and 'other services' sectors accounted for about 22 per cent and 21 per cent, respectively. Next to these three sectors, 'transport, storage and communications', 'construction' and 'agriculture' sectors provided employment to about 12 per cent, 11 per cent and 6 per cent of the urban male workers. Among all female workers in the urban areas, 'other services' sector registered the highest proportion of workers (40 per cent), followed by 'manufacturing' (29 per cent), 'trade, hotel and restaurant' (13 per cent) and 'agriculture' (11 per cent). Between 1977-78 and 2011-12, proportions of urban males and females employed in agricultural sector decreased by about 5 percentage points and 21

percentage points, respectively. During this period, proportion of urban males employed in 'construction' and 'trade, hotel and restaurant' sectors increased by about 7 percentage points and 4 percentage points, respectively while corresponding proportion in the 'manufacturing' sector decreased by about 5 percentage points. During the period from 1977-78 to 2011-12, proportion of usually employed urban females engaged in 'construction', 'trade, hotel and restaurant' and 'other services' sectors increased by about 2 percentage points, 4 percentage points and 14 percentage points, respectively.

Statement 5.11: Per 1000 distribution of usually employed persons by broad industry division during NSS 32<sup>nd</sup> round (1977-78) to 68<sup>th</sup> round (2011-12)

Note: As per NIC - 2008 which was used in the current survey for recording industry of work for the employed persons, the different industry sections comprised the broad industry divisions mentioned in column 1 of Statement 5.11 are as follows: **agriculture** - section A; **mining & quarrying** - section B; **manufacturing** - section C; **electricity, water, etc.** - sections D & E; **construction** - section F; **trade, hotel & restaurant** - sections G & I; **transport, storage & communications** - sections H & J; **other services** - sections K to U.

## 5.10 Distribution of usual status (ps+ss) workers by Occupation Division

5.10.1 In the survey, information on the type of occupation in which the usually employed persons were engaged was collected at the 3-digit level of National Classification of Occupation (NCO-2004). Statement 5.12 gives the per 1000 distribution of persons employed in usual status (ps+ss) by broad occupation divisions<sup>1</sup> during 2011-12. It is seen from the statement that in the rural areas, among the *usual status (ps+ss)* workers, about 81 per cent of males and 91 per cent of the females were engaged in any of the three occupation divisions 6 (skilled agricultural and fishery workers), 7 (craft and related trades workers) and 9 (elementary occupations). Among male workers in the rural area, occupation of nearly 39 per cent was 'skilled agricultural and fishery workers', nearly 31 per cent was 'elementary occupations', while that of another 11 per cent was 'craft and related trades workers'. For rural female workers in the rural area, occupation of nearly 48 per cent was 'skilled agricultural and fishery workers', nearly 33 per cent was 'elementary occupations', while that of another 10 per cent was 'craft and related trades workers'. Among the *usual status (ps+ss)* workers in the urban areas, each of the occupation divisions 1 (legislators, senior officials and managers), 5 (service workers and shop & market sales workers), 7 (craft and related trades workers) and 9 (elementary occupations) had the share of more than 10 per cent of workers. Among the male workers, the share of division 7 (craft and related trades workers) was the highest (19 per cent) followed by that of division 1 (about 17 per cent). Among the female workers in the urban areas, the share of division 9 (elementary occupations) was the highest (23 per cent) followed by division 7 (about 20 per cent). The occupation divisions 1 (legislators, senior officials and managers), 2 (professionals) and 5 (service workers and shop & market sales workers) each accounted for 10 to 12 per cent share of the *usual status (ps+ss)* female workers.

Statement 5.12: Per 1000 distribution of workers in usual status (ps+ss) by broad occupation division of NCO 2004 during 2011-12

broad occupation division	rural		all-India urban

occupations', while that of another 10 per cent was 'craft and related trades workers'. Among the *usual status (ps+ss)* workers in the urban areas, each of the occupation divisions 1 (legislators, senior officials and managers), 5 (service workers and shop & market sales workers), 7 (craft and related trades workers) and 9 (elementary occupations) had the share of more than 10 per cent of workers. Among the male workers, the share of division 7 (craft and related trades workers) was the highest (19 per cent) followed by that of division 1 (about 17 per cent). Among the female workers in the urban areas, the share of division 9 (elementary occupations) was the highest (23 per cent) followed by

division 7 (about 20 per cent). The occupation divisions 1 (legislators, senior officials and managers), 2 (professionals) and 5 (service workers and shop & market sales workers) each accounted for 10 to 12 per cent share of the *usual status (ps+ss)* female workers.

<sup>1</sup> The occupation divisions of NCO-2004 are: **Division 1:** Legislators, senior officials and managers, **Division 2:** Professionals, **Division 3:** Technicians and associate professionals, **Division 4:** Clerks, **Division 5:** Service workers and shop & market sales workers, **Division 6:** Skilled agricultural and fishery workers, **Division 7:** Craft and related trades workers, **Division 8:** Plant and machine operators and assemblers, **Division 9:** Elementary occupations and **Division X:** Workers not classified by occupations.

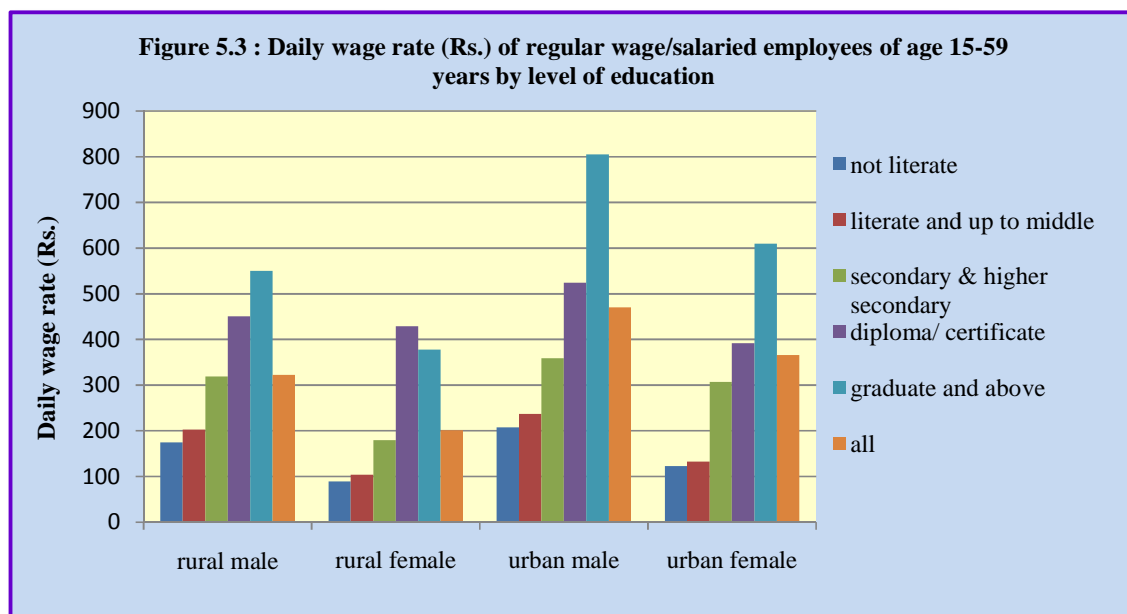

### 5.11 Daily Wage Rates for Regular Wage/Salaried Employees and Casual Labour of age 15-59 years

5.11.1 Data on the average wage earnings per day received by regular wage/salaried employees and casual labour during the reference week were collected in the survey. Statement 5.13 presents, at the all-India level, average wage/ salary earnings per day received by regular wage/ salaried employees (activity status codes: 31, 71, 72) of age 15-59 years for different broad level of general education during 2011-12. Statement 5.13 presents daily wage/ salary earnings of regular wage/ salaried employees of age 15-59 years as obtained from NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds. In Figure 5.3, wage rates for regular wage/ salaried employees of age 15-59 years by broad level of general education during 2011-12 are presented. Statement 5.13.1 presents average daily wage/ salary earnings per day of the regular wage /salaried employees for each of the states and union territories.

5.11.2 *Daily Wage Rates for Regular wage/salaried employees:* It is seen from the statement that at the all-India level, apart from the rural-urban differences, the gender differential is quite pronounced in the daily wage earnings of the regular wage/salaried persons. The difference in the wage rates across education levels of the regular wage earners is distinctly visible - the wage increases sharply with the increase in the level of education and is found to be highest among the regular wage earners with education level *graduates and above*. The statement 5.13 shows that while the daily wage earning of a regular wage/salaried employees in the rural areas was, on an average, Rs. 298.96; it was Rs. 449.65 in the urban areas – more than one-and-a-half times the wage of his/her counterparts in the rural areas. A male regular wage/salaried employee earned nearly 1.6 times that of a female regular wage/salaried employee in the rural areas, which is about 1.3 times in the urban areas. In the rural areas, average earnings on a day of a regular wage/salaried employee with education level ‘graduate and above’ was about Rs. 513.54 whereas it was about Rs. 145.46 for education level ‘not literate’. The average earnings on a day of a regular wage/salaried employee with education level ‘graduate and above’ was about Rs. 760.06 in the urban areas whereas it was about Rs. 175.71 for education level ‘not literate’.

Statement 5.13: Average wage/ salary earnings (Rs. 0.00) per day received by regular wage/ salaried employees (activity status codes: 31, 71, 72) of age 15-59 years for different broad levels of general education during 2011-12

general education level	all-India					
	rural			urban		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
not literate	174.37	89.31	145.46	207.65	123.43	175.71

secondary & higher secondary	319.46	179.98	298.26	358.51	306.96	352.36
diploma/ certificate	450.31	428.66	446.13	524.33	391.43	499.42
graduate and above	550.23	377.85	513.54	805.52	609.69	760.06
all	322.28	201.56	298.96	469.87	366.15	449.65

**5.11.3 Daily Wage Rates for Regular wage/salaried employees for States and Union Territories:** All-India features of the rural-urban differences and gender differential in the daily wage earnings of the regular wage/salaried persons are also observed for the states and union territories. There is a significant divergence in the daily wage rates across the States/UTs. Among the major states in rural areas, Jharkhand reported the highest daily wage rate of Rs. 478.61 and Karnataka reported the lowest wage rate of Rs. 218.17 for the regular wage/salaried employees. Among the major states in the urban areas, Haryana (Rs. 776.85) reported the highest daily wage rate and Gujarat (Rs. 319.71) reported the lowest daily wage rate for the regular wage/salaried employees.

Statement 5.14: Average wage/ salary earnings (Rs. 0.00) per day received by regular wage/ salaried employees (activity status codes: 31, 71, 72) of age 15-59 years for different NSS rounds along with CPI (AL) and CPI (UNME) for those periods

NSS round	rural			CPI (AL) (base year 1986-87)	urban			all-India
	male	female	person		male	female	person	CPI (UNME) (base year 1984-85)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
68 <sup>th</sup> (2011-12)	322.28	201.56	298.96	580	469.87	366.15	449.65	599
66 <sup>th</sup> (2009-10)	249.15	155.87	231.59	494	377.16	308.79	364.95	503
61 <sup>st</sup> (2004-05)	144.93	85.53	133.81	319	203.28	153.19	193.73	338
55 <sup>th</sup> (1999-2000)	127.32	114.01	125.31	271	169.71	140.26	165.05	279
50 <sup>th</sup> (1993-94)	58.48	34.89	55.12	176	78.12	62.31	75.78	173

5.11.4 *Changes in Daily Wage Rates of Regular wage/salaried employees over NSS rounds:* In Statement 5.14, along with the daily wage/ salary earnings of regular wage/ salaried persons of age 15-59 years, CPI (AL) with base year 1986-87 and CPI (UNME) with base year 1984-85 corresponding to different NSS rounds are also given. When the daily wage/salary earnings of regular wage/salaried employees of rural areas are deflated by CPI (AL), it may be observed that, in the rural areas, the daily wage rate of a regular wage/salaried employee in real terms would be Rs. 81.38, Rs. 73.83, Rs. 82.51 and Rs. 90.72 in NSS 55<sup>th</sup>, 61<sup>st</sup>, 66<sup>th</sup> and 68<sup>th</sup> rounds, respectively as compared to Rs. 55.12 in 50<sup>th</sup> round. In the urban areas, if the daily wage/salary earnings of regular wage/salaried employees are deflated by CPI (UNME), the wage rate of a regular wage/salaried employee at constant price would be Rs. 102.38, Rs. 99.16, Rs. 125.52 and Rs. 129.87 in NSS 55<sup>th</sup>, 61<sup>st</sup>, 66<sup>th</sup> and 68<sup>th</sup> rounds, respectively as compared to Rs. 75.78 in 50<sup>th</sup> round.

5.11.5 *Daily Wage Rates of Casual Labourers:* Statement 5.15 presents, at the all-India level, the daily wage rates for the casual labourers of age 15-59 years engaged in *MGNREG public works* (activity status code: 42), *public works other than MGNREG public works* (activity status code: 41), and *in works other than public works* (activity status code: 51) during NSS 68<sup>th</sup> (2011-12) and 66<sup>th</sup> (2009-10) rounds. In this Statement, daily wage rate for persons of age 15-59 years engaged as *casual labour in public works* and *casual labour in works other than public works* are also presented for NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000) and 61<sup>st</sup> (2004-05) rounds. Statement 5.15.1 presents the daily wage rates for casual labourers of age 15-59 years engaged in *public works other than MGNREG public works* for the rural areas of different States/UTs and all-India. As seen from the statement, sample size in terms of person-days worked is rather low in many major states. At the all India level, the average daily wage rate of casual labourers engaged in *public works other than MGNREG public works* was Rs. 127.39 for males and Rs. 110.62 for females. The daily wage rates for casual labourers of age 15-59 years engaged in *MGNREG public works* for different States/UTs and all-India have been presented for rural areas in Statement 5.15.2. In this case also the sample size in terms of person-days worked is low in many of the major states. It can be seen from the statement that at the all India level, the average daily wage rate of casual labourers engaged in *MGNREG public works* was Rs. 112.46 for males and Rs. 101.97 for females.

5.11.5.1 *Daily Wage Rates of Casual Labourers in works other than public works:* The sample size in terms of person-days worked was, however, much more when casual labourers engaged in *works other than public works* were considered. The daily wage rates for casual labour of age 15-59 years engaged in works other than public works for different states and union territories are shown in Statement 5.15.3. In general, the daily wage rates of casual labour engaged in *works other than public works* are higher for males than those for females and higher in the urban areas than those in the rural areas. At the all India level, the average daily wage rate of casual labour engaged in *works other than public works* was Rs. 149.32 for males and Rs. 103.28 for females in the rural areas and Rs. 182.04 for males and Rs. 110.62 for females in the urban areas.

5.11.5.2 *Changes in Daily Wage Rates of Casual Labourers in works other than public works over NSS rounds:* The CPI (AL) and CPI (UNME) corresponding to different NSS rounds are given in Statement 5.14. When the daily wages of casual labourers of rural areas engaged in works other than public works are deflated by CPI (AL), it may be observed that, in the rural areas, the daily wage rate of a casual labour engaged in *works other than public works* at constant price would be Rs. 26.13, Rs. 26.97, Rs. 33.15 and Rs. 42.06 in 55<sup>th</sup> round, 61<sup>st</sup> round, 66<sup>th</sup> round and 68<sup>th</sup> round, respectively as compared to Rs. 20.54 in 50<sup>th</sup> round. If the daily wages of casual labourers of urban areas engaged in *works other than public works* are deflated by CPI (UNME), the rates at constant price in the urban areas would be Rs. 35.95, Rs. 35.15, Rs. 41.90 and Rs. 49.13 in 55<sup>th</sup> round, 61<sup>st</sup> round, 66<sup>th</sup> round and 68<sup>th</sup> round as compared to Rs. 28.77 in 50<sup>th</sup> round.

Statement 5.15: Average wage earnings (Rs. 0.00) per day received by casual wage labour (activity status codes: 41, 42, 51) of age 15-59 years during NSS 50<sup>th</sup> (1993-94), 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-05), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

## Chapter Six

### Unemployed

#### 6.0 General

6.0.1 As in the case of employed, for unemployed also, four kinds of estimates are obtained following the three different approaches for classification of population by activity statuses. These are:

- (i) number of persons unemployed in the *usual status (ps)*,
- (ii) number of persons unemployed in the *usual status (ps+ss)*,
- (iii) number of persons unemployed in the *current weekly status*, and
- (iv) number of person-days unemployed in the *current daily status*.

6.0.2 Of these estimates, the first estimate indicates the magnitude of the persons unemployed for a relatively long period during a reference period of 365 days and approximates to an indicator of the chronically unemployed. However, some of the unemployed on the basis of this criterion might be working in a subsidiary capacity. Therefore, the estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period can also be arrived at. The former is based on the usual principal status and is called as the unemployed in *usual status (ps)* and the latter is based on usual status considering principal and subsidiary statuses together and is called as unemployed in *usual status (ps+ss)* or *usual status (adjusted)*, which would conceptually be lower than the former.

6.0.3 The estimate of unemployed in *current weekly status* gives an average picture of unemployment in a short period of 7 days during the survey period. According to the *current weekly status* approach, a person was considered as unemployed in a week if he/she did not work even for 1 hour during the week but sought or was available for work at least for 1 hour during the week. It includes both chronic unemployment and also the intermittent unemployment of those categorised as usually employed caused by seasonal fluctuations in the labour market.

6.0.4 The estimate of unemployed in *current daily status* gives an average picture of unemployment on a day during the survey year. For measuring unemployment in *current daily status*, activity status for each person according to the current daily status approach was recorded for each of the 7 days preceding the date of survey. If a single activity was recorded

in a day, 1.0 intensity was assigned against that activity status and if two different activities were recorded in a day, 0.5 intensity was assigned for each of these two activity statuses. Based on the activity statuses and the intensities recorded for the 7 days of the reference week, total number of person-days corresponding to the different activity statuses was estimated for a period of 7 days. A person, who did not work even for 1 hour in a day, was assigned 1.0 intensity for the day against unemployment activity if he/ she sought or was available for work for 4 hours or more, and was assigned 0.5 intensity against unemployment activity if he/she sought or was available for work only for 1 to 4 hours. The estimate of the number of person-days unemployed in the reference week was obtained by considering the number of person-days which were in unemployment activity during the reference week. The estimate of person-days unemployed on a day during the survey period is obtained by dividing the person-days unemployed in a week by 7.

The person-days unemployed according to current daily status approach captures three aspects of *unemployment*, viz.:

- (a) the unemployed days of the chronically unemployed,
- (b) the unemployed days of the usually employed who become intermittently unemployed during the reference week, and
- (c) the unemployed days of those classified as employed according to the priority criterion of 'current weekly status'.

Hence, this estimate may be considered as the most inclusive rate of *unemployment*.

## 6.1 Unemployment Rates

6.1.1 *Unemployment rate* (UR) is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the *labour force*. This, in effect, gives the unutilised portion of the labour force. Thus, it is a more refined indicator of the unemployment situation in a population than the *proportion unemployed* (PU), which is merely the number of the unemployed per thousand persons in the population as a whole.

6.1.1.1 It may be noted that the *unemployment rate*, as estimated from the surveys, happens to be very much lower in the population compared to the worker population ratio (WPR). Therefore, the estimates of *unemployment rate* obtained from the surveys are subject to higher margin of sampling fluctuations than those of the WPRs. One may use the estimates of *unemployment rate* cautiously in interpreting them, particularly at the state and union territory level where the estimates are based on a comparatively smaller sample size.

6.1.2 *Unemployment rates during 2011-2012*: Statement 6.1 presents the unemployment rates (UR) according to usual status (ps), usual status (adjusted), current weekly status (CWS) and current daily status (CDS) as obtained from the present survey. The corresponding values of proportion unemployed (PU) in the population are given in parentheses. Some of the important points emerging from this statement are:

- (i) the unemployment rates in urban areas are higher than those in rural areas in all the approaches of measurement except for males in urban areas in CDS, which is lower than the unemployment rates for males in rural areas measured in CDS;
- (ii) the unemployment rates for females are higher than those for males, and highest among urban females;
- (iii) the unemployment rates according to the current daily status (CDS) approach are higher than those obtained according to 'usual status' approach and 'weekly status' approach, thereby indicating a high degree of intermittent unemployment.
- (iv) the unemployment rate, measured through the *usual status (ps)* or through the *usual status (adjusted)* is very low in the rural areas. In the *usual status (adjusted)*, unemployment rate for both males and females in rural areas was about 2 per cent, while in urban areas, unemployment rate for females was 5 per cent compared to 3 per cent for males.
- (v) the unemployment rates obtained in *usual status (ps)* and *usual status (adjusted)* remained almost at the same level for males. For females, unemployment rate in the *usual status (adjusted)* was nearly 1 percentage point lower compared to that obtained in usual status (ps).
- (vi) the unemployment rate in CWS was 7 per cent for urban females and 4 per cent for urban males while it was 4 per cent and 3 per cent, respectively for females and males in the rural areas.
- (vii) the unemployment rate in CDS was the highest for urban females (8 per cent). This was about 6 per cent for both males and females in rural areas and 5 per cent for males in urban areas.

Statement 6.1: Unemployment rates (per 1000 persons/person-days in the *labour force*) according to usual status, current weekly status (CWS) and current daily status (CDS) during 2011 - 2012

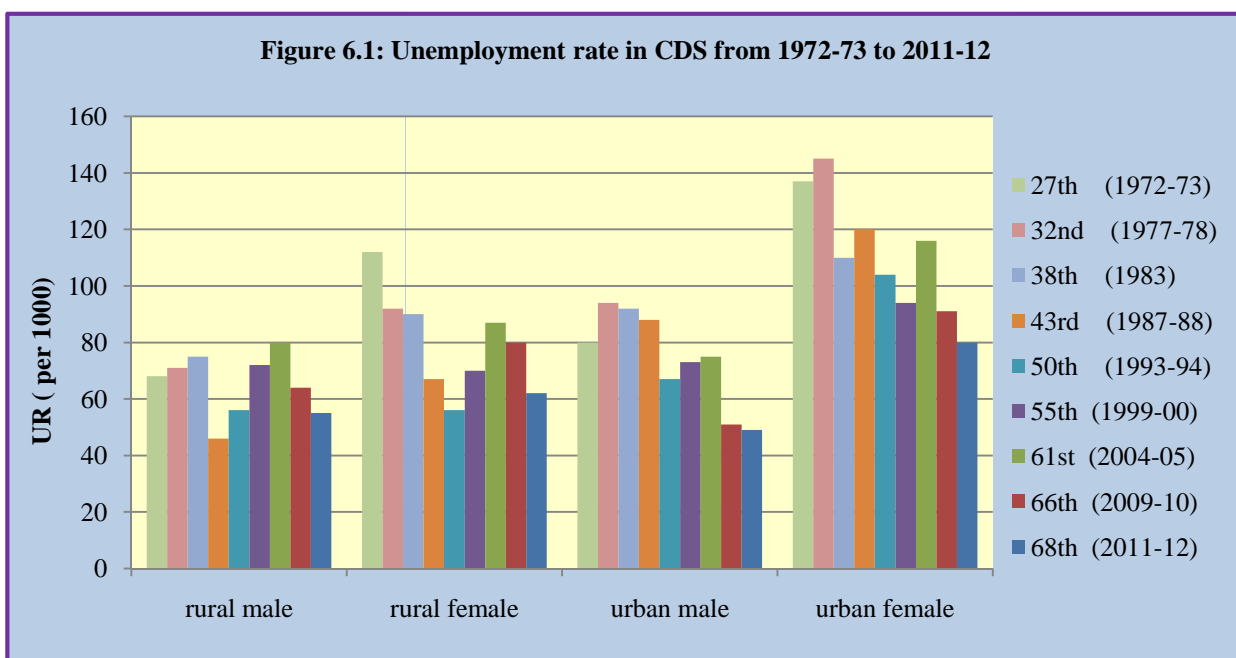

status	unemployment rate					
	rural			urban		
	male	female	person	male	female	person
(1)	(2)	(3)	(4)	(5)	(6)	(7)
usual status (ps)	21 (12)	29 (5)	23 (8)	32 (18)	66 (9)	38 (14)
usual status (adjusted)	17 (10)	17 (4)	17 (7)	30 (17)	52 (8)	34 (13)
CWS	33 (18)	35 (8)	34 (13)	38 (22)	67 (10)	44 (16)
CDS	55 (29)	62 (11)	57 (20)	49 (27)	80 (11)	55 (19)

Note: Figures within bracket indicate the proportion of unemployed per 1000 persons/person-days.

6.1.3 *Unemployment rates over NSS rounds*: Statement 6.2 gives the unemployment rates as obtained from the nine quinquennial surveys of NSSO. In Figure 6.1, the unemployment rates in CDS for the nine quinquennial rounds have been presented. It may be noted that for the 27<sup>th</sup> round survey only the usual status (adjusted) figures were available. The statement shows that compared to 2009-10, in 2011-12, the unemployment rate in usual principal status, remained almost the same for rural males (nearly 2 per cent), urban males (nearly 3 per cent) and urban females (nearly 7 per cent) but increased by about 1 percentage point for rural females (from 2 per cent in 2009-10 to 3 per cent in 2011-12). During this period, the unemployment rate in terms of the usual status (adjusted) remained invariant for rural males (2 per cent), rural females (2 per cent) and urban males (3 per cent) but decreased by 1 percentage point for urban females (from 6 per cent in 2009-10 to 5 per cent in 2011-12). In CWS, during the period 2009-10 and 2011-12, the unemployment rate remained invariant for all categories of persons - rural males (3 per cent), rural females (4 per cent), urban males (4 per cent) and urban females (7 per cent). In CDS, between 2009-10 and 2011-12, unemployment rate remained invariant for urban males and decreased by 2 percentage points for rural females and 1 percentage point each for rural males and urban females. During the period from 1972-73 to 2011-12, the unemployment rate in CDS decreased by 1 percentage point for rural males, 5 percentage points for rural females, 3 percentage points for urban males and 6 percentage points for urban females.

Statement 6.2: Unemployment rates (per 1000 persons in the *labour force*) according to usual status, current weekly status (CWS) and current daily status (CDS) from 1972-73 to 2011-12

6.1.4 *State level variations*: Statements 6.2.1 and 6.2.2, present the *unemployment rates* (UR) during 2011-12 for the states and union territories following the three different approaches stated earlier. While Statement 6.2.1 presents UR based on usual status (ps) and usual status (adjusted) (i.e., usual status (ps+ss)). Statement 6.2.2 presents UR based on based on CWS and CDS approaches, respectively.

6.1.4.1 *Unemployment Rates based on usual status (adjusted)*: To measure chronic unemployment, the usually unemployed excluding those employed in a subsidiary status (which is not less than 30 days) may be considered. The unemployment rates computed after making such adjustment (i.e., usual status adjusted) would, in general, be expected to be smaller in magnitude than the corresponding rates according to the usual status (ps). To have an idea on the dimension of chronic unemployment in India, one would, therefore, like to examine the *unemployment rates* obtained according to usual status taking into consideration of both principal and subsidiary statuses, that is, rate according to *usual status (adjusted)*. From the Statement 6.2.1, it is seen that there is a large variation in the *unemployment rates* across the states and union territories, across the rural-urban sector and gender.

6.1.4.1.1 *Rural males*: Statement 6.2.1 shows that, among the major states, during 2011-12, unemployment rate in usual status (adjusted) was the highest for Assam (4.3 per cent) followed by Kerala (3.1 per cent) and West Bengal (2.8 per cent). The rate was the lowest in Gujarat (0.4 per cent), preceded by Madhya Pradesh (0.6 per cent), Maharashtra and Rajasthan (0.9 per cent each).

6.1.4.1.2 *Rural females*: Among the major states, the unemployment rate was the highest for Kerala (14.2 per cent) followed by Bihar (8.2 per cent) and Assam (5.7 per cent). The rate was the lowest in Gujarat (0.2 per cent), preceded by Maharashtra and Chhattisgarh (0.3 per cent each).

6.1.4.1.3 *Urban males*: Among the major states, highest unemployment rate was reported by Assam (5.4 per cent), followed by Jharkhand (4.6 per cent) and Bihar (4.5 per cent). The unemployment was the lowest for Gujarat (0.6 per cent) preceded by Maharashtra (1.8 per cent) and Himachal Pradesh (1.9 per cent).

6.1.4.1.4 *Urban females*: Among the major states, highest unemployment rate was reported by Uttarakhand (20.0 per cent), followed by Jammu & Kashmir (19.0 per cent) and Bihar (16.5 per cent). The unemployment was the lowest for Gujarat (1.7 per cent) preceded by Odisha (2.0 per cent) and Rajasthan (2.5 per cent).

6.1.4.2 *Unemployment Rates in CWS*: The unemployment rates obtained using the current weekly status was, in general, lower than those obtained using the current daily status (see Statement 6.2.2).

6.1.4.3 *Unemployment Rates in CDS*: The estimates based on the daily status measure the extent of unemployment in terms of person-days rather than unemployed persons. To an extent, the unemployed days of persons who are usually employed are also taken into account in this case. In a situation where large-scale seasonal unemployment exists, the CDS measure gives a better picture of the unemployment situation than the one relating to unemployed persons. The estimates of unemployment rates according to current daily status obtained from the present survey are presented in Statement 6.2.2. It is seen from the statement that there is a large variation in the *unemployment rates* in CDS across the states and union territories, across the rural-urban sector and gender.

6.1.4.3.1 *Rural males*: Statement 6.2.2 shows that, among the major states, highest unemployment rate in CDS was reported by Kerala (12.2 per cent) followed by Tamil Nadu (10.6 per cent) and Odisha (8.8 per cent). The unemployment was the lowest for Gujarat (2.5 per cent) preceded by Jharkhand (2.6 per cent) and Himachal Pradesh (2.7 per cent).

6.1.4.3.2 *Rural females*: Among the major states, highest unemployment rate was reported by Kerala (27.7 per cent) followed by Bihar (13.2 per cent) and Tamil Nadu (12.1 per cent). The unemployment was the lowest for Rajasthan (1.2 per cent) preceded by Himachal Pradesh (1.5 per cent) and Madhya Pradesh (2.1 per cent).

6.1.4.3.3 *Urban males*: Among the major states, highest unemployment rate was reported by Chhattisgarh (9.3 per cent) followed by Kerala (8.7 per cent), Odisha and West Bengal (6.4 per cent each). The unemployment was the lowest for Gujarat (1.4 per cent) preceded by Himachal Pradesh (2.3 per cent) and Maharashtra (3.0 per cent).

6.1.4.3.4 *Urban females*: Among the major states, the unemployment rate was the highest for Bihar (27.1 per cent) followed by Uttarakhand (24.3 per cent) and Jammu & Kashmir (24.2 per cent). The rate was the lowest in Gujarat (2.4 per cent), preceded by Odisha (2.8 per cent) and Rajasthan (4.2 per cent).

## 6.2 Unemployment Rates among the Educated

6.2.1 As mentioned earlier, the *educated* are those persons who have attained an educational level of *secondary and above including those completed diploma/ certificate courses*. Normally, one can attain this educational level at the age of 15 years or above. Thus, the study among the *educated* is restricted to persons of age 15 years and above. In Statement 6.3, the unemployment rates based on various approaches are given for different educational attainments at the all-India level - for the present and for the last three quinquennial surveys. In Figure 6.2, the unemployment rates according to usual status (adjusted) are presented for different educational attainments during 2011-12.

6.2.2 The Statement 6.3 shows the following broad features for the period 2011-12:

- (i) In both rural and urban areas, unemployment rate among the *educated* was higher than that among those whose educational level was lower than *secondary*.
- (ii) In both rural and urban areas, among the *educated*, the unemployment rate was much higher for females than for males. This disparity was even more prominent among those whose educational level was *higher secondary or graduate and above*.

6.2.3 *Comparison of unemployment rates since 1999-2000*: It is seen from Statement 6.3 that, for each category of persons, the unemployment rates among the *educated* have declined in 2011-12 as compared to 1999-2000. The decline was more for the females than for the males. In the usual status (adjusted), the unemployment rate for *educated* rural males was 5.6 per cent during 1999-2000 which came down to 3.6 per cent during 2011-12. For *educated* rural females, the decrease in the unemployment rate was from 14.6 per cent in 1999-2000 to 9.7 per cent in 2011-12. For *educated* males, the unemployment rate in the urban areas came down to 4.0 per cent in 2011-12 from 6.2 per cent in 1999-2000. For the *educated* females in the urban areas, the unemployment rate dropped from 14.3 per cent in 1999-2000 to 10.3 per cent in 2011-12.

6.2.4 *Unemployment rates for the educated at the State/UT level:* The unemployment rates among the *educated* for different states and union territories are given in Statements 6.3.1 to 6.3.3. Statement 6.3.1 is based on *usual status (ps)*, Statement 6.3.2 on *usual status (adjusted)* and Statement 6.3.3 on *CWS*.

6.2.4.1 *Unemployment rates in usual status (ps):* It is seen from Statement 6.3.1 that in rural areas among the major states, the unemployment rate for educated males in usual status (ps) was the highest in Assam (11.6 per cent) followed by Odisha (8.5 per cent) and Kerala (8.0 per cent). For rural females, the rate was the highest in Jharkhand (40.0 per cent) followed by Assam (36.9 per cent) and Kerala (35.8 per cent). In urban areas, the unemployment rate for educated males was the highest in Uttar Pradesh (8.4 per cent) followed by Jammu & Kashmir (7.6 per cent), Assam and Chhattisgarh (7.4 per cent each). For urban females, the rate was the highest in Bihar (35.5 per cent) followed by Uttarakhand (35.4 per cent) and Jammu & Kashmir (30.4 per cent).

6.2.4.2 *Unemployment rates in usual status (adjusted):* It is seen from Statements 6.3.2 that in rural areas among the major states, the unemployment rate for educated males in usual status (ps+ss) was the highest in Assam (11.0 per cent) followed by Odisha (6.8 per cent) and Kerala (6.5 per cent). For rural females, the rate was the highest in Jharkhand (26.8 per cent) followed by Assam (26.1 per cent) and Kerala (25.8 per cent). For urban males, the rate was the highest in Uttar Pradesh (8.0 per cent) followed by Assam (7.4 per cent) and Jammu & Kashmir (6.8 per cent). For urban females, the rate was the highest in Bihar (31.3 per cent) followed by Jammu & Kashmir (28.8 per cent) and Uttarakhand (28.2 per cent).

6.2.4.3 *Unemployment rates in CWS:* It is seen from Statements 6.3.3 that in rural areas among the major states, the unemployment rate for educated males in CWS was the highest in Assam (11.5 per cent) followed by Kerala (10.1 per cent) and Odisha (8.6 per cent). For rural females, the rate was the highest in Kerala (31.3 per cent) followed by Jharkhand (31.1 per cent) and Assam (28.2 per cent). In urban areas, the unemployment rate for males was the highest in Uttar Pradesh (8.6 per cent) followed by Chhattisgarh (8.5 per cent) and Assam (7.4 per cent). For urban females, the rate was the highest in Bihar (34.1 per cent) followed by Jammu & Kashmir (30.6 per cent) and Uttarakhand (26.6 per cent).

Statement 6.3: Unemployment rate (per 1000 persons in the *labour force*) for the persons of age 15 years and above with different educational attainments during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds

### 6.3 Unemployment Rates of the Youth

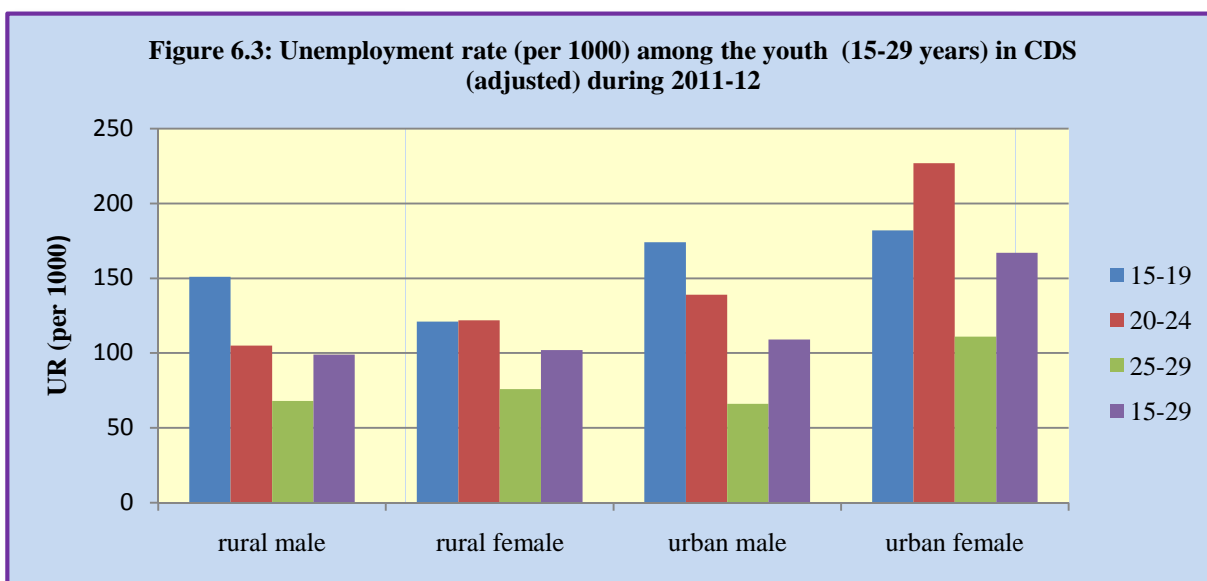

6.3.1 In India, persons aged 15-29 years, who were considered as the *youth*, accounted for 26 to 29 per cent of the total population (refer Statement 3.9 of Chapter Three). A substantial proportion of them attain some level of education and enter into the labour market while they are in the age group of 15-29 years, while some of them may be *chronically unemployed* - remaining unemployed for a longer period of the year. Some others, though usually employed, become intermittently unemployed during some weeks or days of the year due to seasonal fluctuations in the labour market. Statement 6.4 gives the unemployment rates among the *youth* at the all-India level. In Figure 6.3, the unemployment rates among the youth (age 15-29 years) according to current daily status approach are presented for different age groups of the *youth* as obtained from the present survey.

6.3.2 It is seen that during 2011-12, the unemployment rate among the youth was much higher as compared to that in the overall population (given in Statement 6.1). Secondly, the rate was higher for the urban youth than that for the rural youth. Further, compared to the female youth, the unemployment rate for the male youth was lower in general and was substantially lower in urban India.

Statement 6.4: Unemployment rate among the youth (15 –29 years) according to usual status (US), current weekly status (CWS) and current daily status (CDS) during 1999-2000, 2004-2005, 2009-2010 and 2011-12

6.3.3 *Change since 1999-2000*: During the period from 1999-2000 to 2011-12, the unemployment rates among the youth have decreased in urban areas in all the approaches of measurements. In the rural areas, during this period, the unemployment rates among the youth have decreased in CDS but increased in usual status. Between 2009-10 and 2011-12, among the youth in rural areas, the unemployment rates in *usual status (adjusted)* and CWS remained almost at the same level for both males and females while the rates in CDS have decreased by 1 percentage point for males and 2 percentage points for females. During this period, among the youth in urban areas, the unemployment rates for males have increased by about 1 percentage point in *usual status (adjusted)* and CWS, while it remained almost at the same level in CDS. Among the females in urban areas, the unemployment rates for the *youth* during this period have decreased in all the approaches of measurements - it decreased by 1 percentage point in *usual status (adjusted)* and 2 percentage points in *usual status (ps)*, CWS and CDS each.

**6.3.4 Unemployment rates of youth in states:** The unemployment rates for the youth in different approaches for the states and union territories are given in Statements 6.4.1 to 6.4.4. Among major states in the rural areas, the unemployment rate for the youth in the *usual status (ps)* was the highest in Kerala (25.9 per cent) followed by Assam (16.2 per cent) and Uttarakhand (16.0 per cent) while in the urban areas, the rate was the highest in Jammu & Kashmir (21.6 per cent) followed by Kerala (21.0 per cent) and Assam (19.3 per cent). In the rural areas, the unemployment rate for the youth in the *usual status (adjusted)* was the highest in Kerala (21.7 per cent) followed by Assam (14.6 per cent) and Uttarakhand (10.6 per cent) while in the urban areas, the rate was the highest in Jammu & Kashmir (18.7 per cent) followed by Assam (18.6 per cent) and Kerala (18.0 per cent). In CWS approach, the highest unemployment rate for the youth in the rural areas was in Kerala (28.3 per cent) followed by Assam (15.2 per cent) and Bihar (11.0 per cent) while in the urban areas, the rate was the highest in Kerala (22.9 per cent) followed by Jammu & Kashmir (20.6 per cent) and Assam (18.8 per cent). In CDS approach, the unemployment rate for the youth in rural areas was the highest in Kerala (34.8 per cent) followed by Assam (16.5 per cent) and Odisha (15.2 per cent) while in the urban areas, the rate was the highest in Kerala (26.6 per cent) followed by Jammu & Kashmir (22.6 per cent) and Chhattisgarh (19.8 per cent).

6.3.5 *Unemployment Rates of the educated youth and educational level*: It may be important to see how the unemployment rates among the *youth* are related with their educational level

Statement 6.5: Education-level specific *usual status (adjusted)* unemployment rate for persons of age 15-29 years and 15-59 years during 2011-12

females, respectively. The corresponding rates for rural males, rural females, urban males and urban females for persons in the age-group 15-59 years were 3.8 per cent, 10.1 per cent, 4.2 per cent and 10.4 per cent, respectively.

and are different from that of the economically active population (i.e. population in the age group 15-59 years). Statement 6.5 presents the unemployment rates according to *usual status (adjusted)* for the youth (15-29 years) as well as for persons of age 15-59 years for different levels of general education. The general feature was that the unemployment rate increases with the level of education for persons in the age group 15-29 years as well as for persons in the age group 15-59. Moreover, for every educational level, the rates are higher among the youths than those among persons of age 15-59 years. Among educated youth, the unemployment rates were 8.1 per cent, 15.5 per cent, 11.7 per cent and 19.8 per cent for rural males, rural females, urban males and urban

## 6.4 Unemployed on All the Seven Days of the Reference Week

6.4.1 In the survey, it was ascertained from those who were unemployed in any of the half-days of the reference week, whether they were unemployed on all the 7 days of the reference week.

Statement 6.6: Proportion unemployed on all the 7 days of the reference week per 100 persons of age 15-59 years unemployed in CWS and the distribution of such persons by duration of present spell of unemployment

category of persons	percentage unemployed on all the 7 days of the reference week	all-India		
		duration of present spell of unemployment		
		upto 1 month	more than 1 month & up to 6 months	more than 6 months
(1)	(2)	(3)	(4)	(5)
<b>rural</b>				
male	96	390	183	365
female	90	317	218	425
person	95	370	193	381
<b>urban</b>				
male	97	177	193	590
female	95	123	187	667
person	97	161	192	613

Information on the duration of the present spell of unemployment was also collected from those who were unemployed on all the 7 days of the reference week. The Statement 6.6 presents, among those persons of age 15-59 years who were unemployed in current weekly status, the proportion unemployed on all the 7 days of the reference week and the distribution of those unemployed on all the 7 days of the reference week by duration of present spell of unemployment. Among the unemployed of age 15-59 years in CWS, in the rural areas, about 95 per cent were unemployed on all the 7 days of the reference

week. The corresponding proportion in the urban areas was about 97 per cent. Among those who were unemployed on all the 7 days of the reference week, 38 per cent in rural areas and about 61 per cent in urban areas had duration of present spell of unemployment more than 6 months.

Statement 6.2.1: Unemployment rates (per 1000) according to usual status (ps) and usual status (adjusted) for each State/UT

## Chapter Seven

### Underemployment

#### 7.0 General

7.0.1 Underemployment is commonly defined as the under-utilisation of labour time of the workers. Some of the persons categorised as usually employed, may not have work throughout the year due to seasonality in work or otherwise and their labour time is not fully utilised - they are, therefore, underemployed. In the same way, persons categorised as employed in current weekly status may not have work for all the days of the reference week. Underemployment of such employed persons is termed as *visible underemployment* if they report themselves to be not employed with respect to a shorter reference period. Three measures of *visible underemployment* are derived by NSSO by classifying (a) usually employed persons by their current weekly status, (b) usually employed persons by their current daily statuses and (c) persons employed in current weekly status by their current daily statuses. Three rates of *visible underemployment* are obtained from these three types of classifications in terms of (i) proportion of usually employed persons who did not have work during the reference week, (ii) proportion of person-days of the usually employed persons which were not used for work, and (iii) proportion of person-days of the persons employed in current weekly status which were not used for work.

7.0.2 Some persons categorised as employed as per the framework adopted in the employment and unemployment surveys of NSSO, may not have enough work or may feel that their labour potential is not fully utilised or the work they pursue may not fully fulfil their requirements and therefore, they may want additional and/or alternative work. Such underemployment is termed as *invisible underemployment* and therefore, not directly measurable. To estimate the indicators of *invisible underemployment*, a set of probing questions were put to the usually employed persons on their availability for additional/alternative work, reason for seeking such additional/alternative work and whether they worked more or less regularly during last 365 days, etc. The proportion of the usually employed who reported their availability for additional/alternative work, gives an overall share of the employed who did not have enough work, or at least felt the need for additional/alternative work, and, in that sense, were underemployed. The proportion of the usually employed who did not work more or less regularly during last 365 days also gives an estimate of *invisible underemployment*.

#### 7.1 Underemployment Among the Usually Employed

7.1.1 As mentioned earlier, some persons categorised as usually employed might not have work throughout the year. They might remain without work during some weeks of the year or go without work on some days of the different weeks of the year.

The first dimension is brought out by the distribution of the usually employed by their current weekly status. Statement 7.1 gives per 1000 distribution of usually employed (principal and subsidiary status taken together) by their broad current weekly statuses during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO. It is seen from Statement 7.1 that during 2011-12, the *underemployment rate* defined as the proportion of usually employed who were found to be *not* employed (i.e. reporting either unemployed or not in labour force) during the week preceding the date of survey, was about 3 per cent for rural males, 1 per cent for urban males, 17 per cent for rural females and 6 per cent for urban females at the all-India level. Thus, the problem of underemployment was more severe among usually employed females than among usually employed males, and more in rural than in urban areas. It is, moreover, seen that most of the usually employed females who were currently not working had withdrawn themselves from the labour force. The distributions of usually employed (principal and subsidiary status taken together) by their broad current weekly statuses for the different states and union territories as obtained from the present survey are given in Statement 7.1.1. Between 2009-10 and 2011-12, the underemployment rate had been stable for rural males, urban males and urban females but it increased by 2 percentage points for rural females. Between 1999-2000 and 2011-12, the underemployment rate for males decreased by 1 percentage point in both rural and urban areas and it decreased by 4 percentage points for females in urban areas. For rural females, the underemployment rate was about 17 per cent during 1999-2000, 2004-2005 and 2011-12 while it was about 15 per cent for 2009-10.

Statement 7.1: Per 1000 distribution of usually employed (principal and subsidiary status taken together) by their broad current weekly status during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO

current weekly status	all-India							
	male				female			
	1999	2004	2009	2011	1999	2004	2009	2011
	2000	2005	2010	2012	2000	2005	2010	2012
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
	<b>rural</b>							
employed	956	958	968	968	832	833	847	828
unemployed	22	22	15	16	21	20	15	14
not in labour force	22	21	17	17	148	147	138	158
all	1000	1000	1000	1000	1000	1000	1000	1000
	<b>urban</b>							
employed	977	977	987	986	900	914	939	939
unemployed	11	14	8	8	9	15	11	10
not in labour force	12	9	6	6	91	71	50	50
all	1000	1000	1000	1000	1000	1000	1000	1000

7.1.2 The activity pattern of the usually employed during different days within the reference week is indicated by the distribution of the person-days associated with them by current daily statuses. Statement 7.2 gives per 1000 distribution of person-days of usually employed (principal and subsidiary status taken together) by their broad current daily statuses during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO. It is observed from Statement 7.2 that the *underemployment rate*, defined in terms of the proportion of person-days of the usually employed not utilised for work, was quite high for females compared to males in all the four periods for which results are presented. During 2011-12, this proportion was about 32 per cent and 15 per cent for females in rural and urban India, respectively while these were about 7 per cent and 3 per cent for males in rural and urban India, respectively. It is also observed that when work is not available, a large proportion of usually employed females - about 30 per cent in rural areas and 13 per cent in the urban areas - withdrew themselves from the labour force. Between 1999-2000 and 2011-12, the underemployment rate for males decreased by about 3 percentage points and 2 percentage points in rural and urban areas, respectively and it decreased by 6 percentage points for females in urban areas. For rural females, the underemployment rate was about 32 per cent in 1999-2000, 34 per cent in 2004-2005, 31 per cent in 2009-10 and again 32 per cent in 2011-12. The distributions of person-days of usually employed (principal and subsidiary status taken together) by their broad current daily statuses for different states and union territories as obtained from the present survey are presented in Statement 7.2.1.

Statement 7.2: Per 1000 distribution of person-days of usually employed (principal and subsidiary status taken together) by their broad current daily status during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO

## 7.2 Underemployment of Persons employed in Current Weekly Status

7.2.1 Some persons classified as working during a week might not have had work for the entire week. The distribution of the person-days of the persons employed in current weekly status by their current daily statuses indicates the proportion of person-days on which such employed persons remained without work on an average in a week. Statement 7.3 presents per 1000 distribution of person-days of the persons employed in current weekly status by their broad current daily statuses during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO. It is observed from Statement 7.3 that the *underemployment rate*, defined in terms of the proportion of person-days on which persons categorised as employed in current weekly status were without work, was quite high for females compared to males in all the four periods for which results are presented. During 2011-12, this rate was about 18 per cent and 9 per cent for females in rural and urban India, respectively while these were about 4 per cent and 2 per cent for males in rural and urban India, respectively. It is also observed from Statement 7.3 that when work is not available, most of the females withdrew themselves from the labour force rather than reporting themselves as unemployed. Between 1999-2000 and 2011-12, the underemployment rate for males decreased by about 2 percentage points in both rural and urban areas and it decreased by about 3 percentage points for females in urban areas. For rural females, the underemployment rate increased by about 2 percentage points between 1999-2000 and 2004-2005, decreased by about 3 percentage points between 2004-2005 and 2009-2010 and remained at the same level between 2009-2010 and 2011-2012. The distribution of person-days of the persons employed in current weekly status by their broad current daily statuses for different states and union territories as obtained from the present survey are presented in Statement 7.3.1.

Statement 7.3: Per 1000 distribution of person-days of the persons employed in current weekly status by their broad current daily status during 55<sup>th</sup> (1999-2000), 61<sup>st</sup> (2004-2005), 66<sup>th</sup> (2009-10) and 68<sup>th</sup> (2011-12) rounds of NSSO

### 7.3 Invisible Underemployment – Some Indicators

7.3.1 *Usual Status (ps) Workers who did not Work Regularly throughout the year:* In the present survey, information on “whether the usually employed persons worked more or less regularly during last 365 days” was collected. Among the usually employed persons, those who did not work more or less regularly during last 365 days give an indication of the extent of underemployment. Statement 7.4 presents, at the all-India level, the estimated number of

Statement 7.4: Number of persons who did not work more or less regularly throughout the year per 1000 persons of age 15 years and above employed in usual status (ps)

broad usual principal status (1)	all-India			
	rural		urban	
	male (2)	female (3)	male (4)	female (5)
<i>self-employed in:</i>				
agriculture	79	89	63	67
non-agriculture	48	56	42	66
<i>regular wage/salaried in:</i>				
agriculture	51	51	66	54
non-agriculture	37	27	33	42
<i>casual labour in:</i>				
agriculture	170	222	159	199
non-agriculture	143	190	143	156
all	98	130	54	69

persons who did not work more or less regularly throughout the year per 1000 persons of age 15 years and above employed in usual status (ps). It is observed from the statement that higher proportion of females than males, in both rural and urban areas, did not work more or less regularly – 13 per cent for rural females as against 10 per cent for rural males and 7 per cent for urban females as against 5 per cent for urban males. Further, among the various categories of the employed in the usual status (ps), the proportion was the highest for *casual labourers*. About 22 per

cent and 20 per cent of female *casual labourers* engaged in the agriculture sector, in rural and urban India respectively, did not work regularly throughout the year and in the non-agriculture sector, the corresponding proportions were 19 per cent and 16 per cent respectively. On the other hand, the proportion of usually employed persons of age 15 years and above who did not work more or less regularly throughout the year was the lowest among the *regular wage/salaried employees*, especially for those engaged in non-agriculture sector. Among those engaged in non-agricultural sector as regular wage/salaried employees, nearly 4 per cent of the rural males, 3 per cent of rural females, 3 per cent of urban males and 4 per cent of urban females did not work regularly throughout the year. Statement 7.4.1 presents the estimates of number of persons who did not work more or less regularly throughout the year per 1000 persons of age 15 years and above employed in usual status (ps) for each State/UT as obtained from the present survey.

### 7.3.2 Usual Status (ps) Workers who Sought/ were Available for Additional/Alternative Work:

In the present survey, information on whether the usually employed persons sought or were available for (i) additional work and (ii) alternative work was collected. The proportions of usually employed who reported themselves as available for additional work or alternative work give an idea about under-utilisation of available labour time and therefore, provide two separate indicators of underemployment.

*7.3.3 Seeking or Available for Additional Work:* Statement 7.5 gives the number of persons who sought or were available for additional work per 1000 persons of age 15 years and above employed in the usual status (ps) and their distribution by reason for seeking or being available for additional work. The statement shows that, during 2011-12, among the usually employed of age 15 years and above, for both males and females, percentage of workers seeking or available for additional work was higher in the rural areas than in urban areas - about 8 per cent of rural male workers, 5 per cent of rural female workers, 4 per cent of urban male workers and 3 per cent of urban female workers had sought or were available for additional work. The statement also shows that the main reason for seeking or being available for additional work was *to supplement income*. Among those who sought or were available for additional work, nearly 58 per cent of rural males, 65 per cent of rural females, 63 per cent of urban males and 58 per cent of urban females reported this reason for seeking or available for additional work. Among those who sought or were available for additional work, about 14 per cent of rural males, 17 per cent of rural females, 11 per cent of urban males and 13 per cent of urban females reported *lack of enough work* as the reason for seeking or available for additional work. The proportion reporting the reason for seeking or available for additional work as “not enough work and to supplement income” was about 24 per cent of rural males, 15 per cent of rural females, 20 per cent of urban males and 23 per cent of urban females. The corresponding estimates at the State/UT level are given in Statement 7.5.1.

Statement 7.5: Number of persons who sought or were available for additional work per 1000 persons of age 15 years & above employed in the usual status (ps) and their per 1000 distribution by reason for seeking or availability for additional work

category of persons	no. per 1000 workers who sought or were available for additional work	per 1000 distribution of workers who sought or were available for additional work by reason					all-India
		to supplement income	not enough work	not enough work and to supplement income	others	all (incl. n. r.)	
		(3)	(4)	(5)	(6)	(7)	
		<b>rural</b>

		<b>urban</b>					
male	40	630	112	203	48	1000	
female	34	582	128	232	51	1000	
person	39	622	115	208	49	1000	

7.3.4 *Seeking or Available for Alternative Work*: Statement 7.6 gives the number of persons who sought or were available for alternative work per 1000 persons of age 15 years and above employed in the usual status (ps) and their distribution by reason for seeking or being available for alternative work. The statement shows that, during 2011-12, among the usually employed of age 15 years and above, percentage of workers seeking or available for alternative work was higher in rural areas than in urban areas - about 6 per cent in rural areas and 4 per cent in urban areas. The statement also shows that the main reason for seeking or being available for alternative work was that their *present work was not remunerative enough*. Among those who sought or were available for alternative work, nearly 56 per cent of rural males, 68 per cent of rural females, 59 per cent of urban males and 63 per cent of urban females reported this reason for seeking or available for alternative work. Among those who sought or were available for alternative work, about 20 per cent in rural areas and 24 per cent in urban areas reported the reason 'no job satisfaction' or 'lack of job security'. The corresponding estimates at the State/UT level are given in Statement 7.6.1.

Statement 7.6: Number of persons who sought or were available for alternative work per 1000 usually employed persons of age 15 years & above employed in the usual status (ps) and their per 1000 distribution by reason for seeking or availability for alternative work

## **Appendix B**

### **Sample Design and Estimation Procedure**

## Appendix - B

### Sample Design and Estimation Procedure

#### 1. Introduction

1.1 The 68<sup>th</sup> round (July 2011-June 2012) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. The period of survey was of one year duration starting on 1<sup>st</sup> July 2011 and ending on 30<sup>th</sup> June 2012. The survey period of this round was divided into four sub-rounds of three months' duration each - 1<sup>st</sup> sub-round: July to September 2009; 2<sup>nd</sup> sub-round: October to December 2009; and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period.

#### 2 Sample Design

2.1 A stratified multi-stage design was adopted for the 68<sup>th</sup> round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from these FSUs.

2.2 *Selection of the first-stage units:* The sampling frame and the sampling technique used for selection of the FSUs are stated in the following paragraphs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks (2007-12) constituted the sampling frame.

2.2.2 *Stratification of the first stage units:* Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising all rural areas of the district and
- (ii) urban stratum comprising all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification*: Procedure followed for sub-stratification in each of rural and urban sectors are stated below.

2.2.3.1 *Rural sector*: If 'r' was the sample size allocated for a rural stratum, 'r/4' sub-strata were formed in that stratum. The villages within a district as per frame were first arranged in ascending order of population and then sub-strata 1 to 'r/4' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

2.2.3.2 *Urban sector*: If 'u' was the sample size for an urban stratum, 'u/4' sub-strata were formed in that stratum. In case u/4 was more than 1, implying formation of 2 or more sub-strata, this was done by first arranging the towns in ascending order of total number of households in the town as per UFS phase 2007-12 and then arranging the IV units of each town and blocks within each IV unit in ascending order of their numbers. From this arranged frame of UFS blocks of all the towns/million plus cities of a stratum, 'u/4' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of households as per UFS 2007-12.

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs (7,508 villages and 5,276 urban blocks) were allocated for survey in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of field investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between rural and urban sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 for each of rural and urban sector) was allocated to each state/ UT. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds. Allocations at stratum level were adjusted to multiples of 4 with a minimum sample size of 4. Allocation for each sub-stratum was 4. Equal number of samples was allocated in each of the four sub-rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/ sub-stratum, required number of sample villages was selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. From each stratum of the urban sector, FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The procedures followed for selection of USUs within an FSU are stated in the remaining paragraphs of this sub-section.

2.3.1 *Formation and Selection of hamlet-groups/sub-blocks:* Sample FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed was as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hgs)/ sub-blocks (sbs) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and was termed as hg/ sb 1; one more hg/sb was selected from the remaining hamlet-groups/ sub-blocks by simple random sampling (SRS) and was termed as hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. For the FSUs where no hg/sb formation was done, the hg/sb number was assigned as 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Formation of second stage strata (SSS) and allocation of households in different SSS:* For employment and unemployment survey of NSS 68<sup>th</sup> round, all households listed in the selected FSU/hamlet groups/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in each of rural and urban areas and the number of households surveyed from each of the three SSS are specified below:

SSS	composition of SSS	No. of households surveyed	
		FSU without hg/sb formation	for each hg/sb for FSUs with hg/sb formation
<b>Rural</b>			
SSS 1	relatively affluent households	2	1
SSS 2	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3	other households	2	1
<b>Urban</b>			
SSS 1	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	households having MPCE of middle 60% of urban population ( $A \leq MPCE \leq B$ )	4	2
SSS 3	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

2.3.4 In the rural areas, identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of 10 or more cattle, buffaloes and camels. In the urban areas, two cut-off points 'A' and 'B' (in Rs.) were determined from NSS 66<sup>th</sup> round data for each NSS region in such a way that top 10% of the population had MPCE more than 'B' and bottom 30% of the population had MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey, a total of 8 households were selected from each FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 68<sup>th</sup> round along with the number of villages/blocks actually surveyed and number of persons enumerated in employment and unemployment survey are given for different states and union territories in Table B1 at the end of Appendix-B.

### 3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs are briefly indicated below:

#### 3.1 Notations:

$s$  = subscript for  $s$ -th stratum

$t$  = subscript for  $t$ -th sub-stratum (only for rural sector)

$m$  = subscript for sub-sample ( $m = 1, 2$ )

$i$  = subscript for  $i$ -th FSU [village (panchayat ward)/ block/ non-UFS town]

$d$  = subscript for a hamlet-group/ sub-block ( $d = 1, 2$ )

$j$  = subscript for  $j$ -th second stage stratum in an FSU/ hg/sb [ $j = 1, 2$  or  $3$ ]

$k$  = subscript for  $k$ -th sample household under a particular second stage stratum within an FSU/ hg/sb

$D$  = total number of hgs/ sbs formed in the sample FSU

$D^* = 0$  if  $D = 1$ ; and

$= (D - 1)$  for FSUs with  $D > 1$

$N$  = total number of FSUs in any urban sub-stratum

$Z$  = total size of a rural sub-stratum (= sum of sizes for all the FSUs of a sub-stratum)

$z$  = size of sample village used for selection

$n$  = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and sub-stratum

$H$  = total number of households listed in a second-stage stratum of an FSU/ hamlet-group/ sub-block of sample FSU

$h$  = number of households surveyed in a second-stage stratum of an FSU/ hamlet-group or sub-block of sample FSU

$x, y$  = observed value of characteristics  $x, y$  under estimation

$\hat{X}, \hat{Y}$  = estimates of population total  $X, Y$  for the characteristics  $x, y$

Under the above symbols,

$y_{stmidjk}$  = observed value of the characteristic  $y$  for the  $k$ -th household in the  $j$ -th second stage stratum of the  $d$ -th hg/sb ( $d = 1, 2$ ) of the  $i$ -th FSU belonging to the  $m$ -th sub-sample for the  $t$ -th sub-stratum of  $s$ -th stratum.

For ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) of a stratum (s):

3.2.1 rural areas:

Estimate of population total (Y) of the characteristic y for the j-th SSS of a sub-stratum within a stratum denoted by  $\hat{Y}_j$  is obtained as

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t-th sub-stratum of s-th stratum denoted by  $\hat{Y}_{st}$  is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum ( $\hat{Y}_{sm}$ ) is obtained by adding sub-sample wise estimates of all the sub-strata ( $\hat{Y}_{st}$ ) of the stratum.

3.2.2 urban areas:

Estimate of aggregates for j-th second stage stratum of a stratum ( $\hat{Y}_j$ ) is obtained as

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

Estimate of aggregates for t-th sub-stratum of s-th stratum denoted by  $\hat{Y}_{st}$  is obtained as

$$\hat{Y}_{st} = \sum_j \hat{Y}_j$$

Sub-sample estimate for a stratum ( $\hat{Y}_{sm}$ ) is obtained by adding sub-sample wise estimates of all the sub-strata ( $\hat{Y}_{st}$ ) of the stratum.

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum ( $\hat{Y}_s$ ) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

### 3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

3.5 *Estimates of Ratios:*  $\hat{Y}$  and  $\hat{X}$  being the overall estimates of the aggregates Y and X for two characteristics y and x, respectively at the State/ UT/ all-India level, the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) is obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

3.6 *Estimates of Error:* The estimated variances of the above estimates are obtained as follows:

3.6.1 *For aggregate  $\hat{Y}$ :*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$  where  $V\hat{a}r(\hat{Y}_s)$  is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ , where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6.2 *For ratio  $\hat{R}$ :*

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

3.6.3 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

Note: 1. Census population as on 1<sup>st</sup> March 2011 and percentage decadal change in population between census 2001 and 2011 are from Primary Census Abstract of RGI.

2. For any category of persons of any State/UT/all-India, Projected population as on 1<sup>st</sup> January 2012 has been derived using the formula,  $A = A1 * [1 + \frac{R}{100}]^{10/120}$ , where A1 is the census population as on 1<sup>st</sup> March 2011, R is the percentage decadal change in population between census 2001 and 2011 and A is the projected population as on 1<sup>st</sup> January 2012.

## Appendix – C

Table C1: Census population as on 1<sup>st</sup> March 2011, percentage decadal change in population between census 2001 and 2011 and projected population as on 1<sup>st</sup> January 2012 for each State/UT and all-India

*Note: 1 acre = 0.4047 hectare, 1 hectare=10,000 sq. metre*

*#: Including accounts held in bank/post offices for payment of wages earned in MGNREG work.*

### **Codes for Block 3**

*item 4: household type:*

*for rural areas: self-employed in: agriculture-1, non-agriculture -2; regular wage/salary earning-3, casual labour in: agriculture-4, non-agriculture -5; others -9.*

*for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.*

*item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.*

*item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.*

**Codes for Block 4****col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

**col. (6): marital status:**

never married -1, currently married -2, widowed -3, divorced/separated -4.

**col. (7): educational level - general:**

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

**col. (8): educational level - technical:**

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

**col. (9): status of current attendance:**

currently not attending:  
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;  
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;  
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kindergarten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): **type of institution:** government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (11): **whether currently registered with any placement agency:** registered: only in government employment exchanges-1, only in private placement agencies-2, in both government employment exchanges and private placement agencies-3; not registered -4.

**col. (12): whether receiving/received any vocational training:**

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

**col. (13): field of training:**

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.

**col. (15): whether worked in MGNREG works during last 365 days:**

worked-1, sought but did not get work-2, did not seek work-3.

**Codes for Block 5.1**

col. (3): **status:**

worked in h.h. enterprise (self-employed): own account worker -11, employer-12, worked as helper in h.h. enterprise (unpaid family worker) -21; worked as regular salaried/ wage employee -31, worked as casual wage labour: in public works -41, in other types of work -51; did not work but was seeking and/or available for work -81, attended educational institution -91, attended domestic duties only -92, attended domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use -93, rentiers, pensioners, remittance recipients, etc. -94, not able to work due to disability -95, others (including begging, prostitution, etc.) -97.

col. (5): **industry:** 5-digit code as per NIC -2008.

col. (6): **occupation:** 3-digit code as per NCO -2004.

col. (8): **location of workplace:**

workplace in rural areas and located in: own dwelling unit-10, structure attached to own dwelling unit-11, open area adjacent to own dwelling unit-12, detached structure adjacent to own dwelling unit- 13, own enterprise/unit/office/shop but away from own dwelling-14, employer's dwelling unit -15, employer's enterprise/unit/office/shop but outside employer's dwelling -16, street with fixed location-17, construction site-18, others -19; workplace in urban areas and located in: own dwelling unit-20, structure attached to own dwelling unit-21, open area adjacent to own dwelling unit-22, detached structure adjacent to own dwelling unit- 23, own enterprise/unit/office/shop but away from own dwelling-24, employer's dwelling unit -25, employer's enterprise/unit/office/shop but outside employer's dwelling -26, street with fixed location-27, construction site-28, others -29; no fixed workplace -99.

col. (9): **enterprise type:** proprietary: male -1, female -2; partnership: with members from same hh. -3, with members from different hh. -4; Government/public sector-5, Public/Private limited company-6, Co-operative societies/trust/other non profit institutions -7, employer's households(i.e., private households employing maid servant, watchman, cook, etc.) -8, others -9.

col. (11): **number of workers in the enterprise:** less than 6 -1, 6 & above but less than 10 -2, 10 & above but less than 20 -3, 20 & above -4, not known -9.

col. (12): **type of job contract:** no written job contract -1; written job contract: for 1 year or less -2, more than 1 year to 3 years -3, more than 3 years -4.

col. (14): **availability of social security benefits:**

eligible for: only PF/pension (i.e., GPF, CPF, PPF, pension, etc.) -1, only gratuity -2, only health care & maternity benefits -3, only PF/pension and gratuity -4, only PF/pension and health care & maternity benefits -5, only gratuity and health care & maternity benefits -6, PF/pension, gratuity, health care & maternity benefits -7; not eligible for any of above social security benefits -8, not known-9.

col. (15): **method of payment:** regular monthly salary -1, regular weekly payment -2, daily payment -3, piece rate payment -4, others -5.

col. (16): **period of seeking/available for work during last 365 days:** sought/available for: less than 1 month -1, 1 month & above but less than 3 months -2, 3 months & above but less than 7 months -3, 7 months & above but less than 10 months -4, 10 months to 12 months -5; did not seek/ not available -6.

**Codes for Block 5.2**

col. (3): **status:** codes as in col. 3, block 5.1. (only codes 11 to 51 are applicable here).

col. (5): **industry :** 5-digit code as per NIC-2008.

col. (6): **occupation :** 3-digit code as per NCO-2004.

col. (7): **location of workplace:** codes as in col. 8, block 5.1.

col. (8): **enterprise type:** codes as in col. 9, block 5.1.

col. (10): **number of workers in the enterprise:** codes as in col. 11, block 5.1.

col. (11): **type of job contract:** codes as in col. 12, block 5.1.

col. (13): **availability of social security benefits:** codes as in col. 14, block 5.1.

col. (14): **method of payment :** codes as in col. 15, block 5.1.

**Codes for Block 5.3**

col. (4) and (20): **status:** codes 11, 12, 21, 31, 51 and 91-95, 97 of col. (3), block-5.1 and also the following codes: worked as casual wage labour in public works other than NREG works – 41, worked as casual wage labour in NREG works – 42, had work in household enterprise (self-employed) but did not work due to: sickness -61, other reasons -62; had regular salaried/wage employment but did not work due to: sickness -71, other reasons - 72; sought work -81, did not seek but was available for work -82, did not work due to temporary sickness (for casual workers only) -98.

col. (5): **industry division:** 2- digit division codes as per NIC-2008.

col. (6): **operation (for rural areas only):** manual work in cultivation: ploughing -01, sowing -02, transplanting -03, weeding -04, harvesting -05, other cultivation activities -06; manual work in other agricultural activities: forestry -07, plantation -08, animal husbandry -10, fisheries -11, other agricultural activities -12; manual work in non-agricultural activities -13, non-manual work in: cultivation -14, activities other than cultivation -15.

col. (18): **mode of payment:**

- piece rate in cash:** daily -01, weekly -02, fortnightly -03, monthly -04, other -05;
- piece rate in kind:** daily -06, weekly -07, fortnightly -08, monthly -09, other -10;
- piece rate in both cash and kind:** daily -11, weekly -12, fortnightly -13, monthly -14, other -15;
- other (non-piece) rate in cash:** daily -16, weekly -17, fortnightly -18, monthly -19, other -20;
- other (non-piece) rate in kind:** daily -21, weekly -22, fortnightly -23, monthly -24, other -25;
- other (non-piece) rate in both cash and kind:** daily -26, weekly -27, fortnightly -28, monthly -29, other -30.

col. (21): **industry:** 5-digit code as per NIC-2008.

col. (22): **occupation:** 3-digit code as per NCO-2004.

col. (24): **duration of present spell of unemployment:** only one week -1, more than one week to two weeks -2, more than two weeks to one month -3, more than one month to two months -4, more than two months to three months -5, more than three months to six months -6, more than six months to twelve months -7, more than twelve months -8.

<b>[7] follow-up questions for persons with usual principal activity status code 92 or 93 in col. 3 of bl. 5.1</b>							
1.	srl. no. as in col. 1, bl. 5.1						
2.	age (yrs.) as in col. 2, bl. 5.1						
3.	were you required to spend most of your time on domestic duties almost throughout the last 365 days? (yes-1, no-2)						
4.	<i>if code 1 in item 3</i> , reason thereof (no other member to carry out the domestic duties -1, cannot afford hired help -2, for social and/or religious constraints -3, others -9)						
5.	<i>if code 2 in item 3</i> , reason for still pursuing domestic duties (non-availability of work-1, by preference-2, others-9)						
<b><i>for items 6 to 19</i></b> <b><i>along with your domestic duties did you more or less regularly carry out during the last 365 days:</i></b>							
6.	maintenance of kitchen gardens, orchards, etc.? (yes-1, no-2)						
7.	work in household poultry, dairy, etc.? (yes-1, no-2)						
8.	free collection of fish, small game, wild fruits, vegetables, etc. for household consumption? (yes-1, no-2)						
9.	free collection of firewood, cow-dung, cattle feed, etc. for household consumption? (yes-1, no-2)						
10.	husking of paddy for household consumption? (code)						
11.	grinding of foodgrains for household consumption? (code)						
12.	preparation of gur for household consumption? (code)						
13.	preservation of meat and fish for household consumption? (code)						
14.	making baskets and mats for household use? (code)
