

Report No. 482 (57/2.345/1)

Unorganised Service Sector in India 2001-02

Salient Features

**NSS 57th Round
(July 2001 – June 2002)**

**National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India**

August 2003

Preface

The National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised service sector enterprises during July 2001 to June 2002. This was the second independent attempt of NSSO to cover the entire gamut of service sector activities (except trade and finance), the first attempt being made during NSS 34th round (1979-80). The survey included implicitly the non-profit-distributing units. While using the enterprise/establishment level data obtained from the Economic Census 1998 as the frame for sampling of villages/urban blocks, to the extent possible, attempt was also made to capture larger unorganised enterprises in the sample through stratification of the villages and urban blocks.

The present report is the first one of the two reports based on the survey on unorganised service sector enterprises conducted during 2001-02. It contains information on key characteristics like estimated number of enterprises, workers, value added, assets, loans, etc., of the service sector enterprises. The estimates are presented at the all-India level for different industry groups, and at the level of state/UTs for all the industry groups together.

Field Operations Division (FOD) of the organisation conducted the fieldwork of the survey and the data were processed and tabulated by the Data Processing Division (DPD) of the NSSO. Coordination and Publication Division (CPD) coordinated the overall survey activity. The Survey Design and Research Division (SDRD) of the NSSO developed the survey methodology and prepared the report. I am grateful to the members of the Governing Council of the NSSO as well as members of the working group, and editor of the report for their suggestions to improve the quality of the report. I am thankful to the officers of the Ministry of Statistics & P. I. for their contributions in preparing the report.

I hope the report will be useful to the planners and policy makers. Comments and suggestions for improvement will be most welcome.

OAE: own account enterprises, ie enterprises with no hired worker on a fairly regular basis

establishment: enterprises with at least one hired worker on a fairly regular basis

State names and acronyms used: Delhi (DEL), Gujarat (GUJ), Kerala (KER),
Maharashtra (MAH), Uttar Pradesh (UP).

Section One

Introduction

1.1 The importance of the non-agriculture sector, particularly the segment which is unorganised, and the need for statistical information about this sector were realised by the planners and policy makers in the post-independence era. The NSSO, since its inception in 1950, played a major role in catering such data needed for formulation of a vibrant plan. In the initial periods, the household-based non-agricultural activities, irrespective of their scale of operations, were covered in the NSS surveys. In the subsequent periods, the need for segmentation of the non-agriculture sector as organised and unorganised, and also into sectors of economic activity was felt necessary for the collection of meaningful data. The enterprises registered under the Factories Act, 1948 (known as the organised sector) and engaged in manufacturing activity, were then separately covered and surveyed by the Central Statistical Organisation. The non-household based units in the unorganised sector still remained outside the coverage.

1.1.1 Later on, a review of the surveys indicated that a better sampling frame was necessary to generate reasonably useful statistics for the entire unorganised sector. The need for identifying areas with a concentration of enterprises was thus felt for ensuring an efficient sampling design for the future surveys. A countrywide Economic Census (EC), the first of its kind, was undertaken in 1977 under the aegis of the Central Statistical Organisation (CSO) to provide a better frame and background information needed for formulating an efficient sampling design.

1.1.2 The scope of the 1977 EC was limited to non-agricultural enterprises employing at least one hired worker on a fairly regular basis, i.e. for most of the period of its operation. These enterprises are also called 'establishments'. Following this census, small establishments and enterprises not employing any hired worker on a fairly regular basis (called Own Account Enterprises (OAEs)) engaged in manufacturing and repairing activities were surveyed in the 33rd round of the NSS during 1978-79.

1.1.3 The second EC was undertaken in 1980 along with the house-listing operations of the 1981 Population Census. The scope and coverage of the second EC were enlarged to include the OAEs engaged in activities other than crop production and plantation. The establishments were divided into

two categories as (i) Directory Establishments (DEs) and (ii) Non-Directory Establishments (NDEs), the difference being that the former employed a total of six or more workers, while the latter employed a total of at most five workers. Thus in the second EC, three types of enterprises, in all, were identified, viz. (i) OAEs, (ii) NDEs and (iii) DEs. As a follow-up to the second EC, OAEs and NDEs engaged in manufacturing and repairing activities were surveyed in the 40th and 45th rounds of the NSS during the periods July 1984-June 1985 and July 1989-June 1990, respectively. The DMEs were, however, surveyed during October 1984-September 1985 and October 1989-September 1990 by the field staff of the NSSO under the technical guidance of the CSO.

1.1.4 The third EC was conducted in 1990 along with the house listing operations of the 1991 Population Census. As a follow-up to the third EC, the first integrated survey on unorganised manufactures covering Own Account Manufacturing and Repairing Enterprises (OAMEs), Non-Directory Manufacturing and Repairing Establishments (NDMEs) and Directory Manufacturing and Repairing Establishments (DMEs), was undertaken during the NSS 51st round (July 1994-June 1995) under the technical guidance of the NSSO. In the 51st round, all manufacturing and repairing enterprises included under the two-digit codes (called 'divisions') 20 to 39 and 97 of the National Industrial Classification of different economic activities (NIC 1987) were covered in the survey.

1.1.5 The latest EC, the fourth in the series, was conducted by the CSO during 1998. As a follow-up to this EC, survey on unorganised manufacturing was conducted during the 56th round (July 2000-June 2001). In this survey, information from the 1998 EC was used for stratification and the EC list of villages and urban blocks was used as frame for selection of first stage units as far as possible. It may be worth mentioning that a survey on unincorporated proprietary and partnership enterprises, known as forming the 'informal sector', was carried out along with the quinquennial surveys on 'Consumer Expenditure' and 'Employment & Unemployment' during the NSS 55th round (July 1999-June 2000). The list of Population Census villages and UFS blocks was used as frame in that round. The current survey is on the unorganised service sector excluding trading and financial enterprises. The survey was carried out during **July 2001 - June 2002** and the information was collected more or less on the lines of the NSS 55th round. In this survey, the information of EC-`98 has been used for selection of units.

1.2 The Survey in Brief: The NSSO conducted an integrated survey of enterprises and households in its 57th round during the period July 2001 to June 2002. The main focus of the survey was on the unorganised enterprises belonging to the service sector and the information was collected through Schedule 2.345 meant for it. A copy of the schedule is given in Appendix C. In addition, a survey on household consumer expenditure including some key characteristics on employment-unemployment was carried out during this period.

1.2.1 Objective of the Enterprise Survey: The main aim of the survey on unorganised service sector enterprises was to estimate the total number of such enterprises, fixed assets, number of workers, operating expenses, receipts, value added, loans, gross value added per worker, etc. This apart, data on other related characteristics like type of ownership, type of operation, number of months of operation, whether carrying out mixed/multiple activity, whether accounts maintained, etc., were also collected. This report, first in the series of two reports, presents the size, employment and economic features in terms of gross value added, loans, interest payable, etc., cross classified with other correlates of the service sector enterprises. The second report will depict the structure of the enterprises in terms of nature of operations, type of ownership, social group of owner, whether accounts maintained or non-profit institutions, nature of problems faced, etc.

1.2.2 Unorganised Services Sector: The 57th round covered broadly all unorganised service sector enterprises engaged in the activities of hotels and restaurants (Tabulation Category H of NIC 98); transport, storage and communication (I); real estate, renting and business activities (K); education (M); health and social work (N); and other community, social and personal service activities (O).

1.2.2.1 It did not cover the service sector enterprises pursuing the activities of wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods (G); financial intermediation (J); public administration and defence (L); private households with employed persons (P); and extra-territorial organisations and bodies (Q).

1.2.2.2 The different tabulation categories mentioned above were further sub-divided to form relatively uniform groups/sub-groups. Some of the

activities of these tabulation categories were again excluded from the coverage of the survey either because the enterprises engaged in these activities are mostly organised, or because obtaining reliable data from enterprises pursuing these activities is extremely difficult. The coverage of the different activities in the present round has been discussed in detail in Section two of this report.

1.2.3 Geographical Coverage: The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) villages situated beyond 5 kms. of bus route in the state of Nagaland, (iii) inaccessible villages of Andaman and Nicobar Islands, and (iv) some of the villages and blocks (numbering less than 0.1% of the total) where EC 98 could not be conducted. Thus the corresponding State/UT level estimates and the all-India results presented in this report are based on the areas falling under the coverage of the survey.

1.2.4 Sample Design: A stratified sampling design was adopted for selection of the sample first-stage units (FSUs). The FSUs were villages (Panchayat wards in Kerala) in rural areas and UFS blocks in urban areas. The ultimate stage units (USUs) were enterprises for the survey on unorganised service sector enterprises. Within the entire FSU, all big non-agricultural enterprises having 200 or more workers were separately listed (segment 9) and the schedule was canvassed in all the enterprises that were eligible for survey among them. Relatively larger FSUs were sub-divided into smaller parts called hamlet-groups in the rural areas and sub-blocks in the urban. Three hamlet-groups, one with the maximum number of substratum specific enterprises (called 'segment 1') and two more selected at random (together called 'segment 2') were taken for the survey. The USUs were selected independently from each of these segments. A detailed discussion on the sample design and estimation procedure followed in the survey is given in Appendix B of this report.

1.2.5 Sub-round: The entire survey period (1st July 2001 to 30th June 2002) was divided into four sub-rounds of three months' duration each (Sub-round 1: July-September 2001, Sub-round 2: October-December 2001, Sub-round 3: January-March 2002, Sub-round 4: April-June 2002) and an equal number of sample villages and blocks were allocated to each sub-round. Each FSU was surveyed during the sub-round period to which it was allocated. Within a particular sub-round, the fieldwork was spread out uniformly over the different months to the extent possible.

1.2.6 Sample Size: A total of 15,869 first stage units (6,513 census villages and 9,356 blocks of Urban Frame Survey) were selected for this survey. The number of sample villages or blocks allotted for survey and actually surveyed are given in Statement 0, and the number of enterprises surveyed in Statement 1, for different states. The numbers of enterprises surveyed for various tabulation categories are given in Statement 2 for all-India only.

1.2.7 Release of Results: As mentioned earlier, the present report is the first among two reports to be released on the unorganised service sector (excluding Trade and Finance) based on the data collected through Schedule 2.345. It discusses, among other things, the size of the unorganised service sector in India, number of persons employed, yearly gross value added, fixed assets and loans of the enterprises, wages, etc. The relevant concepts and definitions used in this survey are presented in Section Two. The major findings based on the survey data are discussed in Section Three. The detailed statistical tables are presented in Appendix A. Appendix B discusses the sample design and estimation procedure for the survey.

Section Two

Concepts, Definitions and Procedures

2.1 For collection of data on the unorganised service enterprises, several terms involving certain concepts and definitions were used in the survey. These are discussed below.

2.2 **Reference Period:** *Last month* was used as the reference period for collecting most of the data. Information on receipts and expenses as well as employment, emoluments, rent, interest and value added for the enterprise was collected for the last month only. *'Last month'* referred to the last 30 days (preceding the date of the survey) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, *'last month'* referred to the last 30 days (preceding the date of the survey), if they worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which worked for less than 30 days in the current season, *'last month'* referred to an average month in the last working season. If some enterprise was unable to give information for the last 30 days and was able to give information for the last calendar month, the figures for the same were taken. For enterprises which provided information from their books of accounts but were not able to provide information for the last month/last calendar month, average monthly values of the last accounting year were noted. In case of the items "rent payable" and "interest payable", the monthly average of yearly values were noted. For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period was *'as on the date of survey'*. For other items like net additions to fixed assets, number of months operated, number of other economic activities pursued, etc., the reference period was the *'last 365 days preceding the date of survey'*.

2.3 **Enterprise:** An enterprise was an undertaking engaged in the production and/or distribution of some goods and/or services meant mainly for the purpose of sale, whether fully or partly. An enterprise might be owned and operated by a single household, or by several households jointly, or by an institutional body.

2.4 **Non-agricultural Enterprise:** Enterprises covered under Tabulation Categories 'A' and 'B' of NIC 1998 were 'agricultural enterprises' while those

covered under Tabulation Categories 'C' to 'Q' of NIC 1998 were 'non-agricultural enterprises'.

2.5 Own-account Enterprise: An own account enterprise (OAE) is an undertaking run by household labour, usually without any hired worker employed on a 'fairly regular basis'. By 'fairly regular basis' it was meant that the employment was for the major part of the period of operation(s) of the enterprise during the last 365 days.

2.6 Establishment: Enterprises that employed **at least one hired worker** on a 'fairly regular basis' were called 'establishments'. Paid or unpaid apprentices, paid household member /servant /resident worker in an enterprise were considered to be hired workers. Establishments were further sub-divided into two classes: (i) Non-directory establishment and (ii) Directory establishment.

2.7 Non-directory Establishment: An establishment employing **less than six workers** (household and hired workers taken together) was termed as a 'non-directory establishment' (NDE).

2.8 Directory Establishment A 'directory establishment' (DE) was an establishment which employed six or more workers (household and hired workers taken together).

2.9 Perennial Enterprise: Enterprises that were run more or less regularly throughout the year, were called 'perennial enterprises'.

2.10 Seasonal Enterprise: Enterprises that were usually run in a particular season or fixed months of a year, were called 'seasonal enterprises'.

2.11 Casual Enterprise: Enterprises that were run occasionally, for a total of at least 30 days in the last 365 days, were called 'casual enterprises'.

2.12 Household Enterprise: A 'household enterprise' was one which was run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise was located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises were household enterprises.

2.13 Non-household Enterprise: Non-household enterprises were those, which were institutional, i.e. owned and run by the public sector (Central Government or State Governments, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other types of societies, institutions, associations, trusts, etc.

2.14 Unorganised Enterprise: The unorganised sector comprised the following types of enterprises:

(i) All the enterprises except units registered under Section 2m(i) and 2m(ii) of Factories Act, 1948 and Bidi and Cigar Workers (condition of employment) Act 1966.

(ii) All enterprises except those run by Government (Central Government, State Governments, Local bodies) /Public Sector Enterprises.

2.15 Worker: A 'worker' was defined to be one who participated either full time or part time in the activity of the enterprise. The worker might have served the enterprise in any capacity - primary or supervisory. He/she might or might not have received wages/salaries in return for his/her work incidental to or connected with the entrepreneurial activity. The term 'worker' might not mean that the same person was working continuously; it only referred to a position. Persons working for not more than half of the normal working hours of the enterprise on a fairly regular basis were considered to be part-time workers. Full-time workers were those who worked for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise were counted as two workers and not one.

2.16 Working Owner: The owner who personally worked in the proprietary or partnership enterprise on a fairly regular basis was termed as 'working owner'. In fact, in most of the own-account enterprises the owner himself/herself managed all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners worked in the enterprise on a fairly regular basis then he/she or they were considered 'working owners'.

2.17 Hired Worker: A 'hired worker' was a person employed directly or through an agency on payment of regular wage/salary in cash or kind. Apprentices, paid or unpaid, were regarded as hired workers. Paid

household workers, and servants and resident workers of an enterprise were also considered to be hired workers.

2.18 Other Worker/Helper: This category included all persons belonging to the household of the proprietor, or households of the partners, who were working in or for the enterprise without regular salary or wages. Persons working as exchange labourers in the enterprise without salary or wages were also covered in this category. All unpaid household workers/helpers who were associated with the activities of the enterprise during the reference month were included in this category.

2.19 Mixed Activity: There were enterprises which carried out a number of activities simultaneously. If the accounts were not separable then the data pertaining to the enterprise as a whole were collected and the enterprise was classified as having mixed activities, and the activities of such enterprises are mixture of NIC's. The appropriate NIC in such cases was determined on the basis of the **major** activity. 'Major activity' refers to the activity which yielded maximum income/turnover/employment. The above criteria were applied in the given order, i.e. income first, then turnover and then employment, to determine the major activity. The activities might be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activity if its activities were different at the 2-digit level of the NIC 1998 during the last 365 days.

2.20 Fixed Assets: 'Fixed assets' were assets held for the purpose of producing or providing goods or services and they were not held for resale in the normal course of entrepreneurial activities. These covered all goods, new or used, that had a normal economic life of more than one year from the date of purchase.

2.21 Land: 'Land' referred to the land on which the enterprise was situated together with the surrounding area, which was used for the enterprise. This also included improvement to land. However, if only a portion of the land belonging to the residence of a household was utilised for the enterprise, only that portion of the land was considered under capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title was considered to be under this category. Land held on long-term lease, say, for 30 years or more, was also regarded as land owned.

2.22 Building: 'Building' was defined as the structure where activities of an enterprise were undertaken. This also included all other structures, like shed, house, portions of a house or other structure, building under construction and other conveniences, in which the activities of the enterprise were carried on. Besides, this also included other constructions such as passage, wall, water tank, sewerage, tube-well, etc. When the values of land and building could not be computed separately, the combined value was considered for recording against building.

2.23 Plant and Machinery: Generally, 'plant' was the name given to an assembly of machinery/equipment/devices installed for carrying on entrepreneurial activities. 'Machinery' meant an implement(s) or mechanical device(s) used in the entrepreneurial activities. These were assets of a durable nature.

2.24 Transport Equipment: All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by an enterprise in connection with its activity were covered in this category. Animals, if used for drawing vehicles or carrying loads, were treated as part of transport equipment.

2.25 Tools and Other Fixed Assets: 'Tools' referred to small loose implements, generally held in hand for operation and having a normal life of more than one year. 'Other fixed assets' referred to other durable equipment which was used for the entrepreneurial activity either directly or indirectly. These included furniture, fixture, laboratory equipment, office equipment, etc. Livestock used in an oil-mill was also covered under this category.

2.26 Net Additions to the Fixed Assets during last 365 days: Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last 365 days. Addition to the fixed assets could be made through purchase (of the new or used items) or through own construction. Improvements on land, construction of new building, shed, structure, as well as assets produced on own account during last 365 days were considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (going out of use) of an asset, this included loss due to theft, damage, accident, etc.

2.27 Loan: Any borrowing in cash or kind to be repaid in cash or kind was termed as 'loan'. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in an enterprise were excluded.

2.28 Operating Expenses: The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed, and also cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise were considered to be 'operating expenses'.

2.29 Receipts: The value of services rendered to other concerns together with the other receipts incidental to entrepreneurial activities like sale value of items manufactured or goods traded by an enterprise was considered to be 'total receipts'.

2.30 Gross Value Added: 'Value added' was that part of production which was the actual contribution of an enterprise to the economy. Value added has been calculated by deducting 'total operating expenses' from the 'total receipts' during the reference period.

2.31 Hotels: A 'hotel' was an enterprise that provided lodging services with or without arrangements for meals, other prepared food and refreshments. *Dharamshala* type lodging places, private guest/rest houses, hostels, messes, hostels attached to educational institutions, students homes, hostels for working girls, tourist lodges, etc. were also placed in this category.

2.31.1 Hotel activities have been classified under NIC group 551. All hotels were covered in the survey provided they were run by private organisations. Similar facilities provided through workers employed exclusively for these specific activities by organisations like the YMCA, R K Mission, etc., and also by other membership organizations like Lions club, Rotary club, etc., were also placed in this category. However, similar facilities if provided by Govt./PSU/Local body/Statutory bodies (e.g. ISI, IIT, Universities, etc.) were *excluded* from the purview of this survey.

2.32 Restaurants: A 'restaurant' was one which generally provided eating and drinking services where prepared meals, food, refreshments and other snacks are sold for immediate consumption without any provision for lodging. Such establishments are variously known as restaurants, cafes, cafeterias, snack bars, lunch counters, refreshment stands, milk bar canteens, etc. Bars and other drinking places were also treated as restaurants.

2.32.1 Restaurants are classified under NIC group 552. For the purpose of the survey, canteens located in offices, factories, etc., were treated as restaurants if they were operated by private contractors. But departmental canteens run by government were excluded from the purview of this survey.

2.33 Storage & Warehousing The operation of storages and warehouses on hire to the farm producer, dealer or trader, processor and manufacturing enterprises, including the general public, as an independent business was termed as 'storage and warehousing' enterprises. Storage and warehousing services in respect of grains, other food articles, oil-seeds and other agricultural commodities like cotton, jute and tobacco were included. Also included were refrigerated storage facilities on hire to other enterprises for potato, fruits, dairy products, fish and other food products and also refrigerated food locker on rental services chiefly delivered to individual household. Storage of all manufactured products including textiles, machine tools apparatus and equipments were included. But farm produce stored by the owner of a farm in his own godown or commodities stored by a dealer or a manufacturer in his own godown or warehouse were excluded.

2.33.1 Storage and Warehousing activities fall under NIC class 6302. In the present survey, establishments of Central Warehousing Corporation, State Warehousing Corporations, and the warehouses of the Central and State Governments were not included. Lockers in commercial banks and in other type of enterprises for safe storage of precious belongings were also excluded.

2.34 Transport: 'Transport' was defined as an activity that carried passengers and/or goods from one place to another as a business proposition. Supporting services incidental to transport such as packing, freighting, travel agency, etc., were included under transport enterprise.

2.34.1 Mechanised road transport, placed under NIC class 6021 and sub-classes 60221 and 60231, was passenger transport by bus (including tramways), passenger transport by other motor vehicles, freight transport by motor vehicles or any other road transport by mechanised vehicle.

2.34.2 'Other transport and related activities' mean transport of passengers and/or goods inland, *other than by mechanised road transport*. Activities of travel agencies and tour operators, activities of other transport agencies, supporting services incidental to transport such as packing, freighting, travel agency, etc., were also covered under other transport. The following activities were also covered: (i) hackney carriages, carriage by bullock-carts/ekka/tonga, etc. (ii) transport by animals like horses, elephants, mules, camels, etc., (iii) transport by men including rickshaw-pullers, cart-operators, etc., (iv) all kinds of water transport, (v) supporting services to land transport like toll booths, parking lots, traffic on highway bridges, etc., and (vi) supporting services to water transport like operation and maintenance of piers, docks, light houses, loading and discharging vessels, etc. A household renting out transport vehicles to others and not operating directly with hired or household labour to render service to others was not reckoned as conducting a transport activity. *However, transport via pipeline and air transport were beyond the coverage of this survey. Thus, the activities covered in this survey fall under NIC codes 601, 60222, 60232, 61, 6301, 6303, 6304 and 6309.*

2.35 Communication: All enterprises that provided communication services were 'communication' enterprises. These included courier services, ISD/STD/ PCO booths, Voice Mail Services through computer networking, Video/fax services, phone plus services, voiced and non-voiced leased circuits, telex/FAX/data services through computer network, radio paging, audio services and services of cable operators, etc.

2.35.1 Communication, falling under NIC group 64, not owned by government, Public Sector undertakings and local bodies were covered in this survey. However, activities of the cellular service operators were outside the coverage of this survey, although those of their agencies were covered.

2.36 Real estate, Renting and Business Activities: Real estate activities included activities like: (i) purchase, sale, letting and operating of real estate, i.e., residential/non-residential buildings, (ii) developing and

sub-dividing real estate into lots, (iii) lessors of real property and (iv) real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on a contract or fee charging basis. *Letting out of an accommodation was not included except in the case of real estate agents running such a business.* Renting of machinery and equipment was covered. A household hiring out machinery & equipment or household durables was also treated as an enterprise. All business activities classifiable under NIC 1998 codes 70 to 74 were covered in this survey.

2.37 Education: All educational institutions were covered under this category. Research and scientific services rendered by institutions and laboratories were also covered provided they satisfied the above criterion. These might be engaged in research in biological, physical or social sciences. Meteorological institutes and medical research organisations were also included. In addition, management training institutes, computer training centres, nursing schools, schools of music, drama, dance, fine arts, modelling, fashion designing, yoga and physical education and general coaching centres (e.g. for various competitive examinations), etc., were also covered under this activity.

2.37.1 In activities under education included in NIC group 80, all educational institutions *not recognized* by Central/State/Local Govts./autonomous bodies like AICTE, IIT, University, etc., were covered. Similar facilities provided through workers employed exclusively for these specific activities by organisations like YMCA, R.K. Mission, etc., and also by other membership organisations like Lions Club, Rotary Club, etc., were also covered under education.

2.38 Health and Social Work: All enterprises engaged in health and medical services came under this activity, irrespective of the system of medicine. All dispensaries, clinics and consultation chambers run by doctors were included here. The activity also included activities of veterinary hospitals including 'bird hospitals'. For an employed doctor and para-medical person (such as midwife, *dai*, etc.) doing private practice, his/her private practice alone was considered as an enterprise. All kinds of health clubs were included in this activity.

2.38.1 All health and social work activities falling under NIC group 85, other than those owned by government, public sector undertakings, local bodies were within the purview of the present survey. Similar facilities provided

through workers employed exclusively for these specific activities by organisations like the YMCA, R.K. Mission, etc., and also by other membership organizations like Lions Club, Rotary Club, etc., were also covered under health and social work.

2.39 Other Community, Social and Personal Services: This included activities like sewage and refuse disposal, other service activities like washing and cleaning of textile products, hair dressing, beauty parlours, funeral and related services, massage saloons, sauna baths, activities of shoe shiners, porters, car parkers, etc. The activities such as portrait and commercial photographic studios, etc., work of palmists and astrologers were also included here.

2.39.1 Other community, social and personal service activities, covered under NIC groups 90 to 93, excluded the activities of trade unions, religious organisations, political organisations and other membership organisations. It may be noted that individuals serving as housemaids, cooks, gardeners, governesses, baby sitters, *chowkidars*, night watchmen, etc., were, in general, outside the ambit of the present survey. However, if such activities were provided by some agencies against prescribed fees, those agencies were treated as enterprises under respective NIC codes. For example, an agency, which supplied baby sitters or nurses or night watchmen with some profit margin was covered under this activity.

2.40 The different activities of unorganised service sector enterprises covered in the survey along with the corresponding NIC group/class/sub-class, as the case may be, are given in Statement 3. A group has been mentioned if all the activities under that group were covered. In some cases, all activities pertaining to a particular group were not covered. In those cases, the particular classes under survey are mentioned in the statement. If some activities under a class were excluded, only the sub-classes under coverage has been mentioned. In a few cases, where only a part of the activities described in a sub-class were covered, the statement includes that part only.

Statement 3: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity (acronym)
	hotel and restaurant (H)

Statement 3: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity (acronym)
	hotel (H1)
551	hotels, camping sites and other provision of short-stay accommodation. (Restaurant facilities operated in connection with the provision of lodging remain classified in this group. Also included are the operation of sleeping cars when carried on by separate units.)
	restaurant (H2)
552	restaurants, bars and canteens. (Sales through vending machines are not included here)
	transport, storage and communication (I)
	storage and warehousing (I1)
6302	storage and warehousing. (This includes cold storage, general merchandise warehousing and warehousing of furniture, automobiles, gas and oil, chemicals, textiles, etc. Also included is storage of goods in foreign trade zones.)
	mechanised road transport (I2)
6021	scheduled passenger land transport other than transport via railways. (This includes activities providing regular urban, suburban or inter-urban transport of passengers on scheduled routes, other than inter-urban railway transport. They may be carried out with motor buses, tramways, trolley buses, underground and elevated railways. Also included are the operation of school buses, town-to-airport/station lines, sightseeing buses, aerial cableways, etc.)
60221	Other non-scheduled passenger land transport by motor vehicles.
60231	Freight transport by motor vehicles.
	other transport and related activities (I3)
601	non mechanised transport activities related to transport via railways
60222	other non-scheduled passenger land transport, other than by motor vehicles (i.e. by bullock carts, <i>tongas</i> and cycle rickshaws, etc.)
60232	freight transport other than by motor vehicles (i.e. by man- or animal-drawn vehicles such as bullock carts, cycle rickshaws and the like)
61	water transport
6301	cargo handling
6303	other supporting transport activities
6304	activities of travel agencies and tour operators, tourist assistance activities n.e.c. (Includes furnishing travel information, advice and planning, arranging tours, accommodation and transportation for travellers and tourists, and furnishing tickets, etc. Also included are tourist assistance activities such as those carried on by tourist guides)
6309	activities of other transport agencies (Includes forwarding of freight, organisation or arrangement of transport on behalf of the shipper or consignee, receiving and acceptance of freight, transportation document preparation, consolidation and break bulk of freight, freight brokerage, custom house brokerage, bill auditing and freight rate information, brokerage for ship and aircraft space, packing and crating and unpacking

Statement 3: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity (acronym)
	and de-crating, weighing and sampling of freight, etc.)
	communication (I4)
64	posts and telecommunications
	real estate, renting and business activities (K)
70	real estate activities
71	renting of machinery and equipment without operator and of personal and household goods
72	computer and related activities
73	research and development
74	other business activities
	education (M)
80	education
	health and social work (N)
85	health and social work
	other community, social And personal service activities (O)
90	sewage and refuse disposal, sanitation and similar activities
911	activities of business, employers and professional organisations
9191	activities of religious individuals who provide services directly to worshippers
92	recreational, cultural and sporting activities
93	other service activities

*n.e.c. – not elsewhere classified

Section Three

Summary of Findings

3.1 As mentioned in Section One, the estimates of some key parameters of service sector enterprises like number of enterprises, workers, gross value addition, fixed assets and outstanding loans, wages, etc., are dealt with in this report. The main findings at the all-India level and in some cases at the State/UT level, have been summarised in this section. Detailed tables are given in Appendix A, which provide estimates separately for the rural, urban and for the two areas combined at the all-India and State/UT level. In addition, information for the 'Own Account Enterprises (OAEs)' and 'establishments' have been presented separately. The term 'enterprise' is used in general to represent OAEs and establishments together.

3.2.1.1 The results for all the States and Union Territories have been given in the appendix tables as well as in some statements of this section. However, the discussion of the results has mostly been restricted to all-India and the 19 'major States'. The 'major States' have been identified on the basis of the estimated number of enterprises and workers. The names of these States along with their abbreviated forms (acronyms) are:

Andhra Pradesh (AP), Assam (ASM), Bihar (BHR), Chhatisgarh (CTG), Delhi (DEL), Gujarat (GUJ), Haryana (HAR), Jharkhand (JRK), Karnataka (KTK), Kerala (KER), Madhya Pradesh (MP), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Rajasthan (RAJ), Tamil Nadu (TN), Uttar Pradesh (UP), Uttaranchal (UTC) and West Bengal (WB).

The acronyms have been used in the graphs presented in the report.

3.2.1.2 In the statements, the results have been given for 'OAE', 'estt.' and 'all' categories of enterprises. Here, 'estt.' will indicate 'establishments' and 'all' will indicate all the enterprises taken together. Secondly, the statements for the rural and urban areas together are presented under 'combined'. A '-' (dash) has been used in the statements and tables if no enterprise was surveyed in that particular level of disaggregation. On the other hand, the figure '0' has appeared at some levels of disaggregation where the estimated figure is very small and has become 0 due to rounding off. Moreover, the marginal totals and proportions presented in various statements/tables may, in some cases, vary slightly due to rounding off of the figures.

3.2.2 The estimates provided in this report may be used with caution keeping in view the number of sample enterprises surveyed at a particular level of disaggregation. For example, while using the disaggregation

estimates for the States/UTs, NIC '98 division or enterprise type; the corresponding number of enterprises surveyed may also be kept in mind.

3.2.3 The results of the survey have been discussed first at the all-India level for each of the activities covered, separately for the rural and urban areas, and for the OAEs and 'establishments'. Subsequently, the discussions are focussed on the major States/UTs, taking all the service sector activities together, to examine whether the pattern as perceived for the country as a whole is reflected in the State/UT data or not, and also to examine the variability across these 'major States'. The States/UTs have been arranged in decreasing order of the number of workers for all the State-level charts presented in this section.

3.3 At the beginning, it may be noted that in the survey, the information was collected from about 244 thousand enterprises spread over entire India, of which slightly fewer than 93 thousand (38 %) enterprises were located in the rural sector. Moreover, 70 per cent of the enterprises surveyed were OAEs which did not employ any hired workers on a regular basis. This proportion was slightly higher in the rural areas (77 %) as compared to the urban areas (65%).

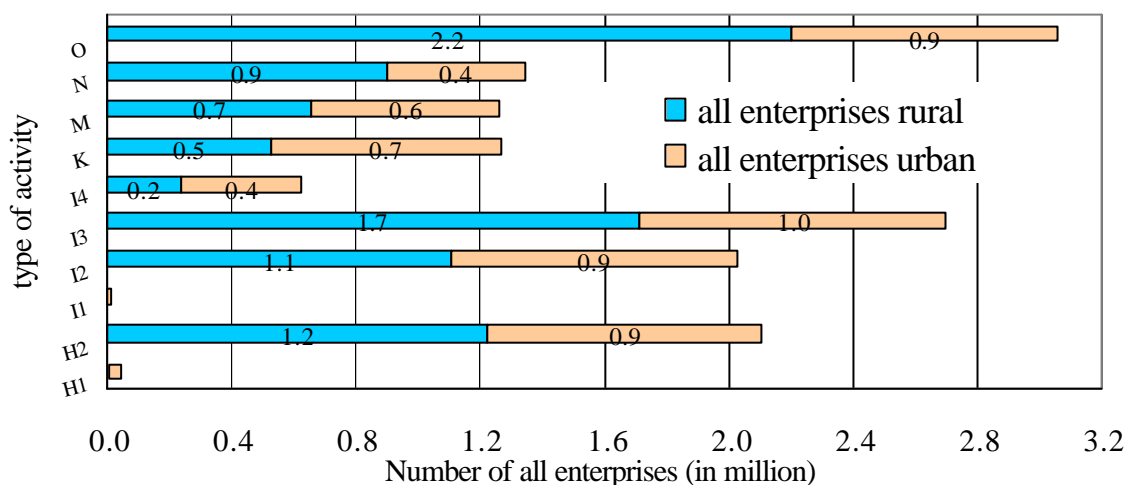

3.3.1 Number of Enterprises: In India, during 2001-02, nearly 14.5 million enterprises were engaged in the activities pertaining to services other than trading and finance, and they belonged to the unorganised segment of the service sector. Of these, about 59 per cent were located in rural areas and 41 per cent in urban areas. It can further be seen from Statements 4 and 5 that a large number of enterprises in India, nearly 84 per cent, were OAEs which were operated without engaging any hired worker on a regular basis. The percentage was a little higher in the rural (88%) than in the urban (77%) areas. The distribution of the enterprises over OAE and 'establishment' is observed to be fairly uneven for all categories of activities except for 'hotels (H1)'. In the case of 'hotels', about 86 per cent were 'establishments' that engaged at least one hired worker on a regular basis in running the enterprises. More precisely, for this category of activity, the percentage had been nearly 88 in the urban and 75 in the rural. The distribution of enterprises over the activities, given in Statement 6, shows that 'transport, storage and communication' enterprises were the maximum in number sharing about 37 per cent of the enterprises and that was followed by 'other community, social and personal service' (21%), 'hotels and restaurants' (15%), etc. The enterprises categorised as 'hotels' or 'storage and warehouse' were very few – whose shares were merely less

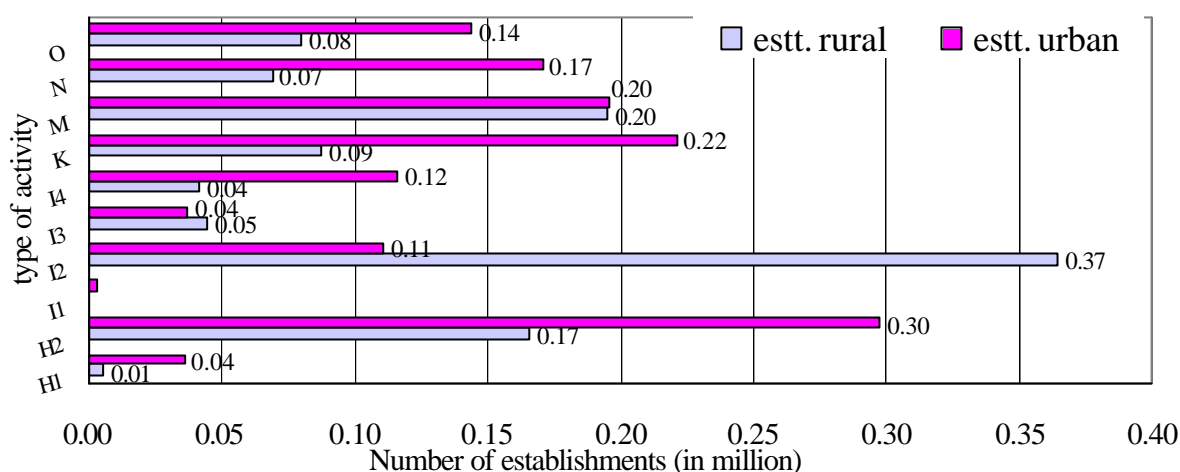

than 1 per cent of the total. The distribution of enterprises over the activities, however, followed a similar pattern in both the rural and urban areas. One may also see Charts 1 to 3 in this regard.

Chart 3: Share (%) of different enterprises by type of activity: all-India

3.3.2 The distribution of enterprises over the States/UTs is given in Statement 7 separately for each enterprise type ('OAEs' and establishments), and for the rural segment, the urban segment and the two combined. The number was highest in Uttar Pradesh (17.19%), followed by West Bengal (10.79%), Andhra Pradesh (9.29%), Maharashtra (8.21%), Bihar (8.17%), Tamil Nadu (7.02%), etc. The first six States together accounted for more than 60 per cent of the enterprises of India belonging to the unorganised service sector. A comparison between 'rural and urban' or

'OAE and establishment' shows that in most of the States and UTs, OAEs outnumber 'establishments' and rural segment exceeded urban. The distribution of the enterprises is also shown in Chart 4 for 19 'major States'. Note that the 19 'major States' together accounted for more than 97.4% of the estimated number of enterprises.

Chart 4: Number of enterprises by enterprise type for each major State

3.3.3 Distribution of Enterprises by Number of Workers: The distribution of enterprises by size (i.e., number of workers), given in Statement 8 for all-India, indicates that around 97 per cent of the enterprises had 1 to 5 workers and the remaining 3 per cent enterprises had 6 to 19 workers. At the activity level, there is a similarity in the distribution for rural and urban segments. Moreover, for certain activities, the distributions are little different from that of other activities. For example, in activities such as 'hotels', 'education' and 'storage and warehousing', the percentage of enterprises with 6 or more workers was higher as compared to other activities of the service sector.

3.6 Distribution of Workers: As mentioned in Section Two, a worker was defined, for the purpose of the survey, as one who participated, on a fairly regular basis, either full-time or part-time in the activity of the enterprise in any capacity - primary or supervisory. It may be noted that 2 part-time workers in an enterprise were counted as 2 in estimating the total number of workers.

3.6.1 The enterprises in the unorganised service sector generated employment for about 26.6 million persons, the rural and urban shares in employment generation being 53 and 47 per cent, respectively. The trend over the rural and urban sectors of India is similar to the one observed for the number of enterprises. Besides, the distribution of workers over the sectors of activity (given in Statement 9) has some resemblance with that of enterprises. Maximum number of workers were engaged in the enterprises in 'transport', 'storage and communication' (27%) followed by 'other community, social and personal services' (20%), 'hotel and restaurants' (19%), etc. The relative positions of the activities with respect to the shares of workers had been the same for both the rural and urban areas.

3.6.2 The labour intensity of the enterprises measured in terms of the number of workers per enterprise is given in Statement 10 for each type of activity. On an average, 1.8 persons were engaged in an enterprise belonging to the service sector. The difference between rural and urban areas was substantial, the corresponding numbers being 1.6 and 2.1, respectively. Further, about 1.3 persons were engaged in an OAE, whereas 4.5 persons were employed in an establishment. The variation in labour intensity of the enterprises over the activities was also pronounced. It is found that, on an average, 6.4 persons (7.0 per establishment and 2.9 per OAE) were employed in a 'hotel' enterprise – the highest among all activities. Contrary to it, only one person was employed in an enterprise of 'non-mechanised road transport' activity –this being lowest among all activities.

3.6.2.1 The state-wise information on number of workers engaged in service sector enterprises is given in Statement 11 for each enterprise type. The 19 'major States' together accounted for about 97.3% of workers. When the number of workers are compared with the number of enterprises given in Statement 7, shows that among the major States, the labour intensity in terms of average number of workers per enterprise varied from 2.4 to 1.4. It was a maximum for Delhi (2.4), followed by Gujarat and Maharashtra – the average in each being around 2.2 workers per enterprise. The lowest labour intensity was observed in Assam, West Bengal, Jharkhand, Bihar, Uttar Pradesh, etc. It may be noted that Uttar Pradesh had the maximum number of enterprises with labour intensity 1.67 – a little below the national level. The distribution of workers by enterprise type and rural/urban is also shown in Chart 6.

Chart 6: Number of workers by enterprise type for each major State

3.6.2.2 Full-time and Part-time Workers: The information whether a person was engaged in the enterprise in a full-time or part-time basis was

collected in the survey for each worker, and these have been used for generating estimates of full-time and part-time workers. The distribution of workers into such categories is given in Statement 12. It reveals that about 88 per cent of the workers were engaged on a full-time basis in the rural enterprises and the figure was higher at 92 per cent in the urban. Moreover, the percentage of full-time workers among males was higher than that among females in both the rural and urban areas. Similar patterns were observed for all the categories of activities in both the rural and urban segments.

Statement 12: Percentage of full-time and part-time workers by type of activity

all-India

tabulation category	percentage					estimated number of workers

3.6.2.3 Hired Workers in Establishments: According to the definition used in the survey, hired workers were engaged on a fairly regular basis only in the 'establishments'. The distribution of workers by type, viz.; 'working owner', 'hired worker' and 'other worker' for 'establishments' is given in Statement 13 for rural and urban India. About 67 per cent of the workers in the rural segment and 71 per cent in the urban were hired workers. Of these hired workers, nearly 71 per cent were 'skilled' in the rural areas. The percentage was a little lower, at 67 per cent, in the urban areas. At the activity level, the percentage of hired workers was relatively higher in the activities relating to 'education', 'hotel', 'health and social work' in both the rural and urban areas. Moreover, the percentage of skilled hired workers was relatively higher in 'education', 'health and social work', and in 'other community, social and personal services' activities.

3.7 Proportion of Female Workers: Gender differential is an important indicator for studying many of the economic variables. In this survey also, the particulars of employment was collected by gender of the workers. Statement 14 gives the proportions of female workers in different activities separately for rural, urban and rural+urban India. Nearly every sixth worker was a female in the service sector enterprise. In certain activities, the incidence of female worker was very rare, e.g. in the case of transport, storage and communication, only 3 per cent of the workers engaged were females. The observation at the enterprise level shows a mixed pattern. In certain service sector enterprises, the percentage of female workers was relatively higher for establishments, e.g. in 'education', 'health and social work', 'hotels', etc. In others, like 'restaurants', 'other community, social and personal services', etc., the percentage of female workers was relatively higher for OAE enterprises. It may be noted that jobs relating to the activities like, 'storage and warehouse', 'transport', etc., require some amount of physical labour. The above feature corroborates the common perception that women are relatively less preferred as employees in those

sectors where certain amount of physical labour is required. Women workers were found more in certain jobs like those in education, health, social work, etc., which involve less physical labour. However, a higher proportion of women were also engaged in the 'restaurant' activity although this activity requires some amount of manual labour. Women may prefer to work in 'restaurants' because by nature they are likely to possess skill required for such activities.

Chart 7: Percentage of workers by gender and area of operation (rural/urban)

3.7.1 In Statement 15, the percentage of female workers to total workers is given for each State and UT. This percentage varies significantly across the States. There were 8 States which indicated a higher proportion of female employment than the national average. Among the ‘major States’, Andhra Pradesh headed the list with 30.6 per cent female workers in its unorganised service sector enterprises. Assam, Bihar and West Bengal, on the other hand, all had less than 10 per cent female workers in this sector.

3.7.2 Statement 16 shows the proportions of female workers for different categories of workers. The percentage of female workers to total workers was lowest among the working owners, it was around 10 per cent only. The rural-urban differences were marginal varying between 9 to 11 per cent. However, the variation was pronounced in the States. In smaller States and UTs like Meghalaya, Mizoram, Arunachal Pradesh as well as in Orissa, the proportion of female workers among working owners was predominantly higher as compared to other States and UTs. It may be noted that the proportion of households where the head was a female was also higher in the North-eastern states. This apart, the proportion of females was more among ‘other workers’. The ‘other workers’ are generally the household members who help in running the enterprises without any remuneration. Chart 8 shows the proportions of females among working owners, hired workers and other workers in the ‘major States’.

Chart 8: Percentage of females in different categories of workers in major States

3.8 Annual Average Gross Value Added per Worker (in Rs.):

Generally, the employment size and the value added by an enterprise or a

sector of activity determine its relative position in the economy. The unorganised service sector enterprises, as mentioned earlier, were 14.4 million in number and engaged 26.6 million people. The annual contribution of a worker in terms of gross value added in this sector of activity was, on an average, about Rs.28,160. It may be noted in this context that data pertaining to derivation of gross value added by an enterprise was collected from the enterprises for the reference month. Gross value added was the total receipts minus the operating expenses of an enterprise. The annual value added was obtained by multiplying the related monthly data by 12 in case of perennial and casual enterprises, and by the 'number of months operated' for seasonal enterprises.

3.8.1 The average gross value added per worker (GVAPW) is given in Statement 17 separately for enterprise type and type of activity. It may be seen that there is a significant variation in GVAPW across the types of activity, as well as types of enterprise. It is pertinent to note in this context that the survey was able to capture more than 2000 enterprises having either more than 100 workers or reporting an annual value addition of more than 1 million rupees. Proportion of such enterprises was relatively high in storage and warehousing (4.7%), hotel (8.3%), education (2.2%), and health (1.2%) activities. This might have resulted in high value added per worker at certain categories of activities. However, it was lowest (Rs.9,642) for rural OAEs engaged in 'other community, social and other personal service' activities and was highest (Rs.157,507) for urban 'establishments' relating to 'storage and warehousing' activities. The variation in GVAPW increases further when these are examined by rural-urban classification. In most cases, the GVAPW for the enterprises belonging to the rural areas was lower than those in the urban areas. On an average, the value added by a worker in rural enterprises (Rs.20,002) was almost half of that by a worker in urban enterprises (Rs.37,361). The corresponding estimates of GVAPW for each State/UT are also given in Statement 18. A wide divergence in the GVAPW is noted across the States and sectors. Charts 9 and 10 present, respectively, the estimated annual average gross value added per worker (in Rs.) for all-India and for the 19 'major States'.

Chart 10: Annual average gross value added per worker (Rs '000) for major States

3.9 Fixed Assets and Rent on Assets: The market value of fixed assets held by an enterprise for the purpose of producing or providing goods or services by the enterprise was collected in the survey. This covered all goods, new or used, owned or hired, that had a normal economic life of more than one year from the date of purchase. For obtaining the value of fixed assets, the market value as on the date of survey was considered. The values of fixed assets, thus collected have been considered together and the average value per enterprise is given in Statement 19, separately for each activity and enterprise type. The average value of fixed assets was Rs. 75,818 in the rural areas; it was Rs. 266,199 in the urban areas, more than three times its rural counterpart. As expected, the differences widened further between the OAE and 'establishment'. The value of fixed assets possessed by an 'establishment' in the rural areas was Rs. 350,844; which was nearly 9.4 times of an OAE (Rs. 37,231). It may be noted that a large part of the assets possessed by the enterprises was owned by them. In fact, about 27 per cent of the assets held by a rural enterprise was hired, for which they had to pay the annual rent at the rate of 7.35 per cent. The corresponding figures for the urban enterprises were 33 and 8.19 per cent, respectively.

3.9.1 The value of fixed assets possessed by an enterprise varied considerably over the different service activities. The value was the highest for 'hotels' (rural: Rs. 1,874,422; urban: Rs. 4,725,237) and the lowest for 'other transport and related activities' (rural: Rs. 16,076; urban: Rs. 55,371).

3.9.2 The corresponding figures for States/UTs are given in Statement 20 separately for each type of enterprise ('OAEs' and establishments) with rural-urban break-up. Similar information is also presented in Chart 12. The value of fixed assets per enterprise varied across the States/UTs and types of enterprise. Among the 'major States', the range of variation in respect of value of fixed assets per enterprise was from Rs. 20,638 (Assam) to Rs. 134,969 (Delhi) for the OAEs, and from Rs. 159,694 (Assam) to Rs. 1,311,922 (Gujarat) for the 'establishments'.

Chart 12: Market value of assets and annual rent payable per enterprise (Rs '000) for major States

3.10 Outstanding Loan: The data on outstanding loan as on the date of survey were collected from the enterprises. The loan included all borrowings in cash or kind, and outstanding interests. The average amount of outstanding loan per enterprise is given in Statement 21 for each activity and enterprise type (OAE and establishment) at the all-India level. It is seen that in the rural areas, the outstanding loan of an enterprise, on an average, amounted to around Rs. 5,900 which was about 11 per cent of the value of fixed assets owned by them. The corresponding figures of an urban enterprise was about Rs 14,500 as outstanding loan, about 8 per cent of the value of fixed assets it owned. This apart, there is a large variation in outstanding loan amount for various service activities and enterprise types – ranging from Rs 12 (urban OAE in storage and warehouse) to Rs. 763,276 (rural OAE in storage and warehouse). The variation in outstanding loan at the State/UT level can be seen in Statement 22 and the accompanying Chart 14.

3.11 Emoluments of Hired Workers: Data on the salary/wages, allowances and other individual/group benefits (cash or kind) were collected in the survey for hired workers. The emoluments included, besides stipulated pay, all allowances like dearness, house-rent, over-time, shift allowances, bonus, etc. Based on the data, average emoluments per hired worker engaged in the 'establishments' have been obtained and given in Statement 23 for rural and urban sectors of India. Similar information is given in Statement 24 for States and UTs separately for rural and urban areas. The average annual emoluments of a hired worker were Rs. 24,631 in the service sector. The corresponding estimates were Rs. 19,265 and Rs. 27,849 respectively, in the rural and urban enterprises. There were significant variation in the average annual emoluments which ranged from Rs. 9,889/- (communication activity in the rural areas) to Rs. 49,140/- (real estate, renting and business activities in the urban areas). The annual emoluments were uniformly higher in urban enterprises than in rural enterprises for all activities.

Statement 23: Annual average emoluments (in Rs.) per hired worker in an establishment by type of activity

3.11.1 The annual values of some key characters like ‘emoluments’, ‘rent’ and ‘interest’ are presented in Appendix A. These three factors of income, together with the ‘net surplus’ earned by the entrepreneur of an enterprise, constitute the ‘gross value added’ of an enterprise by income approach. The value of ‘net surplus’ earned by an enterprise has not been collected separately in the present survey. However, contributions of the other three factors of income, viz., compensation to employees, rent (on all fixed assets) and interest payable, have been compared with the ‘gross value added’ obtained by the product approach in Chart 15 considering enterprises engaged in all the activities separately for the OAEs and establishments in the rural and urban areas. It may be noted that the ‘gross value added’ by the product approach is obtained by deducting the operating expenses from the total receipts.

Chart 15: Ratio of emoluments, rent and interest to annual gross value added by product approach

Appendix A

Notes:

- i) *In the statements and tables presented in this report, '-' has been used if the survey could not net any enterprise in that particular level of disaggregation. On the other hand, the figure '0' has appeared in some levels of disaggregation where the estimated figure is very low and has become '0' because the figures are rounded off.*
- ii) *In a few cases, the estimated number of enterprises has become less than the sample count. In such cases, the estimates presented in the detailed tables have been made equal to the sample count. A '*' has been appended to such figures in order to distinguish them from the other estimates.*
- iii) *The marginal totals and proportions presented in various tables may, in some cases, vary slightly due to figures being rounded off.*
- iv) *Cases of relatively high value added per worker have been observed in some levels of disaggregation. Such cases have come particularly due to capturing of bigger enterprises at that particular level. Some such examples are: in Tripura, big non-mechanised road transport establishment in rural Tripura, big rural hospital in rural Gujarat, mechanised road transport enterprise reporting high value addition in urban Arunachal Pradesh (sample count in this case is only 1), storage and warehousing establishment reporting high value addition in urban Kerala, etc. In general, the survey was able to capture more than*

2000 enterprises having either more than 100 workers or reporting an annual value addition of more than 1 million rupees. Proportion of such enterprises was relatively high in storage and warehousing, hotel, education, and health activities.

Appendix B

Sample Design and Estimation Procedure

1. Introduction

1.1 The National Sample Survey (NSS) started its fifty-seventh round from 1st July 2001, which continued till the end of June 2002. In this round data on economic and operational characteristics of **unorganised** enterprises in service sector (excluding trade and finance), besides data on household consumer expenditure and employment-unemployment, were collected.

2. Subject Coverage

The 57th round of the NSS covered all own-account enterprises (OAEs) and establishments of **unorganised** service sector (excluding trade and finance). For the purpose of this round, the **unorganised sector** comprised the following: (a) all enterprises except units registered under section 2m(i) and 2m(ii) of the Factories Act, 1948 and the Bidi and Cigar Workers (Condition of Employment) Act 1966 and (b) all enterprises except those run by Government (Central, State, Local bodies)/Public Sector Undertakings.

2.1 Further break-up of the coverage is given below in order to facilitate the correspondences with the sub-strata and Broad Activity Groups (BAGs) referred to in the latter part of this appendix:

BAG	activity	NIC'98 code
1	storage & warehousing	6302
2	hotels	551
3	posts & telecommunications	64
4	mechanised road transport	6021, 60221, 60231
5	real estate, renting and business activities	70-74
6	health and social work	85
7	restaurants	552
8	education	80
9	other community, social and personal service activities & other transport	601, 60222, 60232, 61, 6301, 6303, 6304, 6309, 90, 911, 92, 93

In addition, the annual consumer expenditure enquiry, including some key characteristics of employment-unemployment, was also carried out on a sample of four households in each sample FSU.

2.2 Geographical coverage: The survey covered the whole of the Indian Union *except* (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout

NSS Report No 482: Unorganised Service Sector in India, 2001–02: Salient Features

the year and (iv) 202 villages and 11 UFS blocks where EC '98 work could not be conducted.

2.3 Period of survey and work programme: The survey period of this round was divided into four sub-rounds of three months duration each as follows:

sub-round 1:	July-September 2001
sub-round 2:	October-December 2001
sub-round 3:	January-March 2002
sub-round 4:	April-June 2002

As far as possible, equal numbers of sample FSUs were allotted for survey to the four sub-rounds to ensure uniform spread of sample FSUs over the entire round. An attempt was made to cover each such FSU during the sub-round to which it was allotted. *Because of the arduous field conditions, this sub-round restriction may not apply in the case of Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.*

2.4 Schedules of enquiry: The following table lists the schedules of enquiry canvassed in the 57th round:

Schedule 0.0;	List of Households and Non-agricultural Enterprises
Schedule 2.345:	Unorganised Services (excluding trade and finance)
Schedule 1.0:	Household Consumer Expenditure

3. Sample Design

3.1 A stratified multi-stage design was followed for this survey. The first stage units (FSUs) were villages (Panchayat wards for Kerala) / UFS blocks (*wards for 61 towns of Karnataka where UFS blocks were not used during EC '98 work [hereinafter referred to as 61 towns of Karnataka]*) and the ultimate stage units (USUs) were *enterprises* and *households*. For larger FSUs requiring hamlet-group (hg)/sub-block (sb) formation, another stage was the selection of hg's/sb's.

3.2 *Sampling frame:* The list of Economic Census 1998 (EC '98) villages (Panchayat wards for Kerala) / UFS blocks (wards for 61 towns of Karnataka) was taken as the sampling frame for FSUs.

3.3 *Formation of strata:*

- a) **Special stratum:** One *special* stratum for Rural and Urban sector each was formed at the State / UT level consisting of all the FSUs of the State / UT (i) having at least one big unit of an activity under coverage on the basis of its number of workers or (ii) having a large number of workers engaged in the same activity as in (i). The cut-off points for identifying these FSUs are given below:

activity	at least one big unit in an FSU with no. of workers	total number of workers in an FSU
1. storage & warehousing	200	300
2. hotels	200	350
3. posts & telecommunications	200	250
4. mechanized road transport	250	400
5. real estate, renting and business activities	300	750
6. health and social work	500	550
7. restaurants	300	350
8. education	300	550
9. other community, social and personal service activities & other transport	400	700

All the FSUs of the special strata were surveyed. The stratum number for special stratum was given as 9 for each State or UT.

b) **General strata** (hereafter, stratum will refer to **general stratum** unless otherwise mentioned) was formed from the remaining FSUs in the following manner.

Rural: In the rural areas each NSS region was treated as a stratum.

Urban: In the urban areas, strata were formed within an NSS region as under:

- (i) towns with population (P) less than or equal to 10 lakhs forming one stratum and
- (ii) each town with population exceeding 10 lakhs forming a separate stratum.

Here the Population Census figures of 1991 were used.

However, at the selection stage all towns of an NSS region with $P > 10$ lakhs were inadvertently clubbed together to form a single stratum and due to this some cities, viz. Ludhiana, Lucknow, Kanpur, Mumbai and Kalyan, were not treated as separate strata. Further, while classifying the towns, Agra and Madurai were treated as cities with $P > 10$ lakhs, although P was less than 10 lakhs for each of these cities as per the 1991 census.

3.4 Sub-stratification: After the FSUs constituting the special strata at State/UT level were left out, the *remaining* FSUs of a stratum were grouped into a number of sub-strata as follows:

sub-stratum 1: all FSUs having at least one establishment (i.e. enterprise with at least one hired worker) of Storage and Warehousing (i.e. Class 6302 of NIC '98).

sub-stratum 2: all FSUs, excluding those sub-stratum 1, having at least one establishment of Hotel (i.e. Group 551 of NIC '98).

- sub-stratum 3: all FSUs, excluding those in sub-strata 1 and 2, having at least one establishment of Posts and Telecommunications (i.e. Groups 641 and 642 of NIC '98).
- sub-stratum 4: all FSUs, excluding those in sub-strata 1-3, having at least one establishment of Mechanised Road Transport (i.e. Class 6021 of NIC '98) .
- sub-stratum 5: all FSUs, excluding those in sub-strata 1-4, having at least one establishment of Real Estate, Renting & Business Activities (i.e. Tabulation Category K of NIC '98).
- sub-stratum 6: all FSUs, excluding those in sub-strata 1-5, having at least one establishment of Health & Social Work (i.e. Tabulation Category N of NIC '98).
- sub-stratum 7: all FSUs, excluding those in sub-strata 1-6, having at least one establishment of Restaurant (i.e. Group 552 of NIC '98).
- sub-stratum 8: all FSUs, excluding those in sub-strata 1-7, having at least one establishment of Education (i.e. Tabulation Category M of NIC '98).
- sub-stratum 9: all FSUs, excluding those in sub-strata 1-8, having at least one establishment of Other Community, Social and Personal Service Activities (i.e. Tabulation Category O of NIC '98) & other transport.
- sub-stratum 10: all FSUs, excluding those in sub-strata 1-9, having at least one own account enterprise (OAE) i.e. enterprise with no hired worker in any one of the Tabulation Categories H, I, K, M, N, O of NIC '98.
- sub-stratum 11: all remaining of FSUs of the stratum.

Although there was no sub-stratification in case of the special strata, a sub-stratum number (between 1 and 9) was assigned for operational convenience for the FSUs of stratum 9 also.

3.5 Total sample size (FSUs):

A total of 15869 FSUs were allocated for survey for the central sample in this round. The corresponding figure for the state sample was 17291. All states and UTs (except A & N Islands, Dadra & Nagar Haveli and Lakshadweep) participated at least on an equal matching basis. The distribution of FSUs allotted in the central sample, and the number of sample enterprises captured in the survey is given in Statement 0 and 1 of Section One of this report for different States/UTs.

3.6 Allocation of total sample to States and UTs:

The total number of sample FSUs allocated to the States and UTs was broadly in proportion to the number of workers in unorganised sector enterprises engaged in the activities under coverage of NSS 57th round as per EC '98. (Hereafter, "**workers**" will mean **workers in unorganised sector enterprises engaged in the activities under coverage of NSS 57th round as per EC '98.**) This was done according to the availability of investigators ensuring more or less uniform workload.

3.7 Allocation of State/ UT level sample to Rural and Urban sectors:

NSS Report No 482: Unorganised Service Sector in India, 2001 –02: Salient Features

The State/UT level sample size was allocated to rural and urban sectors in proportion to the total number of workers in each sector.

3.8 Allocation of Rural/Urban sector level sample to strata/ sub-strata:

The Rural/Urban sample was further allocated to the various strata in proportion to their total numbers of workers. The allocation among the constituent sub-strata of a stratum was also done in proportion to the respective total numbers of workers with weights 4 for sub-stratum 1; 3 for sub-strata 2, 4, 5, 7 and 9; 2 for sub-strata 3 & 6 and 1 for sub-strata 8, 10 & 11. For sub-stratum 11, the size was taken as 1 for each FSU. (The weights for allocation of sample FSUs among sub-strata in a stratum were taken to be inversely proportional to the total numbers of FSUs in those sub-strata.)

As far as possible, a minimum of 4 FSUs was allocated to a sub-stratum provided there were at least 4 FSUs in the sub-stratum. In case there were fewer than 4 FSUs in a sub-stratum, all the FSUs were allocated and surveyed.

Wherever possible, allocation to sub-strata was adjusted to a multiple of 4 so that it became possible to allocate an equal as well as even number of FSUs to each sub-stratum in a semi-round (six-monthly) to get semi-round wise estimates.

3.9 Selection of FSUs:

FSUs were selected from sub-strata 1 - 10 by circular systematic sampling (CSS) with probability proportional to size (PPS), size of an FSU being the number of workers in the FSU. For sub-stratum 11, FSUs were selected by CSS with equal probability.

The samples were drawn from each sub-stratum in the form of two independent sub-samples of the same size. However, for sub-strata 1-10, a little modification in the usual procedure for CSS PPS scheme was made at the selection stage so that repetition of FSU within a sub-sample or between sub-samples could be avoided. The modification was as follows:

In any cycle of CSS, if the selected FSU was found to be already present in the sample (either in the first or in the second sub-sample), it was skipped and next cycle was executed by adding the sampling interval in order to select a fresh FSU. As a result, all the selected FSUs in the two sub-samples taken together were distinct for the sub-stratum. In some sub-strata where there were some big-sized FSUs, the procedure did not result in selection of required number of distinct FSUs because a situation was encountered where the sample FSUs were repeated again and again even after adding the sampling interval. In a few such cases, where fresh FSU was not found even after 20 cycles, the first unselected FSU obtained by scanning the sub-stratum from the top of the frame was selected. The selection of FSUs for the 1st sub-sample was completed first and then the 2nd sub-sample FSUs were drawn. *It may be noted that in view of the above modification, the two sub-samples are no more independent.*

In case of stratum 9 and also in cases of the sub-strata having a total of 1 or 3 FSUs, all the FSUs were allocated to sub-sample 1 only. Wherever States and UTs participated on equal matching basis, a combined sample of state and central sample at the sub-stratum level was drawn. Odd numbers were assigned

to the central sample and even numbers to the state sample. In case of unequal matching, central and state samples were selected independently although this resulted in repetition of central and state samples in some cases.

3.10 Selection of USUs within the selected FSU:

3.10.1 *Formation of segment 9 within FSU:* After determining the boundaries of the sample FSU, all big non-agricultural enterprises having 200 or more workers in the entire FSU and having operated at least one day during the last 365 days preceding the day of survey (hereinafter to be called as big enterprises for brevity) were listed. All the listed big enterprises constituted segment 9 of the selected FSU. All big enterprises under coverage listed in segment 9 were surveyed separately in addition to the required number of smaller enterprises under coverage in the other segments of the selected FSU as per normal procedure.

3.10.2 *Formation of hamlet-groups/sub-blocks:* Having constituted segment 9 as stated above, hamlet-groups/sub-blocks (hg's/sb's) were formed in large FSUs by considering the approximate population (P) or approximate number of non-agricultural enterprises (E). The number of hg's/sb's formed as per the two criteria is indicated below:

value of P	no. of hg's/sb's to be formed in the FSU as per population criterion	value of E	no. of hg's/sb's to be formed in the FSU as per enterprise criterion
0 - 1200	1 @	0 - 120	1 @
1201 - 1600	4	121 - 160	4
1601 - 2000	5	161 - 200	5
2001 - 2400	6	201 - 240	6
2401 - 2800	7	241 - 280	7
(and so on)		(and so on)	

@ 'no. of hg's/sb's = 1' means the whole FSU is to be considered for listing

For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of Jammu & Kashmir, the number of hg's formed in the village as per population criterion was: 1 for $P \leq 600$, 4 for $601 \leq P \leq 800$, 5 for $801 \leq P \leq 1000$, 6 for $1001 \leq P \leq 1200$ and so on. For enterprise criterion, the procedure was same for the above areas.

The number (D) of hamlet-groups (hg's)/ sub-blocks (sb's) **actually** formed in the sample FSU was equal to the **higher** of the two values as per population and enterprise criteria.

In the case of the 61 towns of Karnataka where the wards were the FSUs, there was a departure from the above procedure. Here D was taken as the number of UFS blocks within the selected ward. Only two out of the D UFS blocks within the sample FSU were to be selected: one satisfying some specific criterion as described in para 3.10.3 and the other by simple random sampling (SRS) from the remaining constituent UFS blocks. The UFS block selected with SRS was, however, divided into a number (D') of sub-blocks if it satisfied the criterion of sub-block formation. Two sub-blocks were selected from these D' sub-blocks. If

NSS Report No 482: Unorganised Service Sector in India, 2001 -02: Salient Features

there were only two blocks, one satisfying some specific criterion was selected and the other automatically. If the latter block satisfied the criterion of sb formation it was divided into a number (say, D) of sub-blocks and two sub-blocks were selected from them. If there was only one block, this was selected automatically.

In case hg's/sb's were formed in the sample FSU, the same was always done by more or less **equalising** the population

3.10.3 *Formation of segments 1 and 2:* After formation of hg / sb in the large FSUs, three hg's/sb's were selected for survey according to the procedure given below:

Case I: For FSUs belonging to sub-strata 1to9: The hg/sb having the highest number of establishments or OAEs belonging to the sub-stratum specific activity (e.g. storage & warehousing activity for sub-stratum 1, hotel activity for sub-stratum 2 and so on) in the FSU was selected with certainty (i.e. with probability 1) and designated as *segment 1*. If in a particular FSU the sub-stratum specific establishments/OAEs were not available, then formation of segment 1 was decided on the basis of the highest number of establishments or OAEs belonging to activities specified in sequential order of the other sub-strata. To begin with, the next highest numbered sub-stratum was considered. If establishments or OAEs belonging to the activity specific for this sub-stratum were available in the FSU under consideration, then segment 1 was formed on the basis of these units. But if establishments/OAEs of that activity were also not available, then those belonging to the specific activity of the next highest numbered sub-stratum were considered, and so on till sub-stratum 9 was reached. If activity specific sub-stratum 9 was also not available, then the exercise was done with sub-stratum 1, sub-stratum 2 and so on. If no establishments/OAEs belonging to any of the activities 1 to 9 under survey coverage was available in the FSU, then hg/sb with the maximum percentage share of population was selected with certainty and marked as segment 1.

Case II: For FSUs belonging to sub-strata 10 and 11: The hg/sb having the maximum number of enterprises was selected with certainty and designated as *segment 1*. If no establishment/OAE belonging to any of the activities under survey coverage was available in the FSU, then the hg/sb with the maximum percentage share of population was selected for survey with certainty and marked as segment 1.

Two more hg's/sb's were to be selected for survey from the remaining ($D - 1$) hg's/sb's of the sample FSU with equal probabilities following the method of circular systematic sampling. These two hg's/sb's together constituted *segment 2*.

For selected wards of the 61 towns of Karnataka, constituent UFS blocks were listed first and then two UFS blocks were selected: one having the maximum number of sub-stratum-specific establishments or OAEs as per the procedure described above was selected with probability 1 and labelled as segment 1. Another UFS block was selected with SRS out of the remaining ($D-1$) blocks and labelled as segment 2 if no sub-block formation was necessary in that block

according to the criteria for sub-block formation. If the UFS block selected with SRS was large, then it was divided into D' sub-blocks as per the procedure of sub-block formation. Then two sub-blocks were selected by circular systematic sampling with equal probabilities. These two together constituted segment 2. If there were only two UFS blocks, the one having the maximum number of sub-stratum-specific establishments or OAEs was selected with probability 1 and labelled as segment 1 and the other was automatically selected and labelled as segment 2. If the latter block satisfied the criterion of sb formation, it was divided into a number (D') of sub-blocks and two sub-blocks were selected therefrom by circular systematic sampling with equal probabilities to form segment 2. If there was only one block, it was selected with probability 1 and that was labelled as segment 1.

FSUs not undergoing hg/sb formation were identified as segment 1 for the purpose of processing.

However, segment 1 excluded enterprises belonging to segment 9. Formation of segment 9 was altogether different from that of segments 1 and 2.

3.10.4 Stratification of enterprises: In each segment of the sample FSU, *eligible enterprises under coverage* (hereinafter to be called enterprises only, for brevity) were divided into nine Broad Activity Groups (BAGs) as under:

- BAG 1: Storage and Warehousing (i.e. Class 6302 of NIC '98).
- BAG 2: Hotel (i.e. Group 551 of NIC '98).
- BAG 3: Posts and Telecommunications (i.e. Division 64 of NIC '98).
- BAG 4: Mechanised Road Transport (i.e. Class 6021, sub-class 60221 and 60231 of NIC '98).
- BAG 5: Real Estate, Renting & Business Activities (i.e. Tabulation Category K of NIC '98)
- BAG 6: Health & Social Work (i.e. Tabulation Category N of NIC '98)
- BAG 7: Restaurant (i.e. Group 552 of NIC '98).
- BAG 8: Education (i.e. Tabulation Category M of NIC '98)
- BAG 9: Other Community, Social and Personal Service Activities (i.e. Tabulation Category O of NIC '98) and other transport (i.e. Division 61, Group 601, class 6301, 6303, 6304, 6309 and sub-class 60222 and 60232 of NIC '98).

Under each BAG, the enterprises were divided again into two types viz. 'OAEs' and 'establishments'. As there were two segments (excluding segment 9 where all enterprises were surveyed), two enterprise types and nine BAGs, there was at most 36 combinations (segment x BAG x enterprise type) in all for FSUs with hg/sb formation. For FSUs without hg/sb formation there was, however, at most 18 combinations (BAG x enterprise type).

3.10.5 Number of enterprises selected: For FSUs with hg/sb formation there were 36 combinations (segment x BAG x enterprise type) and for FSUs without hg/sb formation there were 18 combinations (BAG x enterprise type). One enterprise was allocated to each combination for the FSUs with hg/sb formation and two enterprises were allocated to each combination for the FSUs without hg/sb formation. In a sample FSU, a maximum of 18 OAEs and 18 Establishments (i.e. a maximum of 36 enterprises) were surveyed in the case of

segments 1 and 2 together, subject to the condition that a maximum of 8 enterprises were surveyed from any particular combination. In addition, all enterprises were surveyed in the case of segment 9.

3.10.6 Selection of enterprises: Enterprises were selected from each combination with SRSWOR for detailed enquiry.

4. Estimation Procedure

4.1 Notation:

s = subscript for stratum ($s = 9$ for special stratum and $s \neq 9$ for general strata)

t = subscript for sub-stratum of a general stratum ($t = 1, 2, \dots, 11$)

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for FSU [village (panchayat ward) / block (ward)]

u = subscript for segment ($u = 1, 2$ or 9)

j = subscript for Broad Activity Group (BAG) ($j = 1, 2, \dots, 9$)

k = subscript for enterprise type ($k = 1, 2$)

l = subscript for sample enterprise under a particular BAG \times enterprise type for Schedule 2.345

D = total number of hg's/sb's formed in the sample village (panchayat ward)/block and equal to the number of blocks in the selected ward in the case of 61 towns of Karnataka

D' = total number of sb's formed in the randomly selected block of sample wards belonging to any of the 61 towns of Karnataka

D^* = $(D - 1)$ if the FSU belongs to any of the 61 towns of Karnataka and $D' = 1$,
 = $(D - 1) \times (D' / 2)$ if the FSU belongs to any of the 61 towns of Karnataka and $D' > 1$ and
 = $(D - 1) / 2$ for other cases

N = total number of FSUs in special stratum/stratum/sub-stratum

Z = total size of a general stratum/sub-stratum (= sum of sizes for all the FSUs of a general stratum/sub-stratum)

z = size of sample village/block/ward used for selection.

n' = number of sample villages/blocks allotted to a particular sub-sample.

n = number of surveyed sample villages/blocks/wards (including zero cases but excluding casualty) belonging to a general stratum/sub-stratum for a particular sub-sample.

p = inclusion probability for the sample FSUs of sub-sample 1

p' = inclusion probability for the sample FSUs of sub-sample 2, given sub-sample 1

E = total number of enterprises listed for a particular BAG \times enterprise type in a segment of a sample FSU

e = number of enterprises surveyed for a particular BAG \times enterprise type in a segment of a sample FSU

x, y = observed values of characteristics x, y under estimation

\hat{X}, \hat{Y} = estimates of population totals X, Y for the characteristics x, y

NP: In terms of the above symbols,

$y_{stmiujkl}$ = observed value of the characteristic y for the l -th enterprise of the k -th type in the j -th BAG in the u -th segment ($u = 1, 2$ or 9) of the i -th FSU belonging to the m -th sub-sample for the t -th sub-stratum of the s -th stratum.

However, for ease of understanding, we have suppressed a few symbols in the following paragraphs where they are obvious.

4.2 Formulae for estimation of aggregates for a particular sub-sample and stratum/sub-stratum in rural/urban sector:

Schedule 2.345:

(a) Estimation formula for stratum 9:

For an enterprise selected in a particular BAG \times Enterprise type:

$$\hat{Y} = \sum_{i=1}^N \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

(b) Estimation formulae for general strata:

(i) For sub-strata 1 to 10:

For enterprises selected in a particular BAG \times Enterprise type:

1) for sub-sample 1:

$$\hat{Y}_m = \sum_{i=1}^{n_m} \frac{1}{p_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 1)$$

2) for sub-sample 2:

$$\hat{Y}_m = A + B, \quad (m = 2)$$

where

$$A = \sum_{i=1}^{n_m} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 1)$$

and

$$B = \sum_{i=1}^{n_m} \frac{1}{p'_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 2)$$

(ii) For sub-stratum 11:

For enterprises selected in a particular BAG \times Enterprise type:

$$\hat{Y}_m = \frac{N}{n_m} \sum_{i=1}^{n_m} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

(c) For the s^{th} stratum:

for j^{th} BAG and k^{th} enterprise type:

$$\hat{Y}_{sjk} = \sum_{t=1}^{11} \hat{Y}_{stjk}$$

(d) Estimate for j^{th} BAG for the s^{th} stratum:

$$\hat{Y}_{sj} = \sum_{k=1}^2 \hat{Y}_{sjk}$$

(e) Estimate for k^{th} enterprise type for the s^{th} stratum:

$$\hat{Y}_{sk} = \sum_{j=1}^9 \hat{Y}_{sjk}$$

(f) Estimate for all BAGs and all enterprise type for the s^{th} stratum:

$$\hat{Y}_s = \sum_{j=1}^9 \sum_{k=1}^2 \hat{Y}_{sjk}$$

4.3 Overall estimate for aggregates:

Overall estimate for aggregate for a sub-stratum of a general stratum (denoted by \hat{Y}_{st}), based on two sub-samples, was obtained as

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

and that for a general stratum (denoted by \hat{Y}_s) was

$$\hat{Y}_s = \sum_{t=1}^{11} \hat{Y}_{st}$$

4.4 Overall estimate of aggregates at Region/State/UT/all-India level:

The overall estimate \hat{Y} at the Region level was obtained by summing the stratum estimates \hat{Y}_s over all strata ($s \neq 9$) belonging to the Region and the estimates obtained from the FSUs of the stratum 9 belonging to that region.

The overall estimate \hat{Y} at the State/ UT/ all-India level was obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India, i.e. as

$\hat{Y} = \hat{Y}_9 + \sum_s \hat{Y}_s$, where \hat{Y}_9 was the estimate of the aggregate from stratum 9.

4.5 Estimates of ratios:

Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x, respectively, at the Region/State/UT/all-India level.

Then the combined estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) was obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

4.6 Semi-round estimates: Semi-round estimates of a characteristic may be obtained from allotted FSUs of that semi-round. Since for the sub-strata with $N_s = 1$ FSUs were allotted to semi-round 1 only, estimates for semi-round 2 for these sub-strata were the same as those of semi-round 1.

However, for stratum 9, all FSUs were surveyed and distribution of these FSUs over the two semi-rounds was made keeping in view the workload of the field staff over sub-rounds/semi-rounds. Thus, in neither of the semi-rounds, stratum 9 was surveyed completely. The estimate of the aggregate for stratum 9 for semi-round 1 was, therefore, obtained as $\hat{Y}_9 \times \frac{N}{n}$, where \hat{Y}_9 was the estimate obtained from the FSUs of the semi-round 1, N was the total number of FSUs in the frame of stratum 9 and n was the number of FSUs surveyed in stratum 9 in semi-round 1. At the end of semi-round 2, complete stratum 9 estimates were available and therefore no adjustments were necessary. However, if there were still some FSUs not surveyed, then adjustment was made by multiplying with N/n as in the case of semi-round 1.

[3] selected important operating expenses during the reference month (Rs. in whole number)		
item no.	description	value (Rs.)
(1)	(2)	(3)
hotels and restaurants (NIC-98 groups 551 and 552)		
301.	articles consumed for food & drink preparation	
302.	purchase value of goods traded	
303.	crookery, glassware, bedding and other consumables	
309.	total (items 301 to 303)	
transport (NIC-98 groups 601, 602, 611, 612, class 6301 and 6303 to 6309)		
311.	petrol, diesel, lubricants, etc.	
312.	tyres , tubes, batteries and retreading expenses	
313.	repair and maintenance of transport equipment	
314.	vehicles' taxes, fees, insurance charges, etc.	
315.	charges paid towards storage of goods	
319.	total (items 311 to 315)	
storage (NIC-98 class 6302)		
321.	consumable stores used in the warehouse	
322.	insurance charges, etc.	
329.	total (items 321 to 322)	
communications (NIC-98 groups 641 and 642)		
331.	call charges and rent payable (local call/ STD / ISD, cyber café, radio paging, cellular etc.)	
332.	insurance charges	
339.	total (items 331 to 332)	
real estate, renting and business activities (NIC-98 divisions 70 - 74)		
341.	maintenance of machinery and equipment	
342.	travelling, hospitality, etc.	
349.	total (items 341 to 342)	
education (NIC-98 groups 801, 802, 803 and 809)		
351.	recurring expenses on laboratory and library	
352.	recurring expenses on newspaper, journals, etc.	
353.	expenses on computer consumables	
359.	total (items 351 to 353)	
health and social work (NIC-98 groups 851, 852 and 853)		
361.	diet of patients	
362.	medicine and drugs	
363.	consumables used in operation theatre, sophisticated equipments, pathological, radiological and other diagnostic tests	
364.	syringes, intra veins drip sets, cotton bandages, plastering materials and other disposables	
365.	uniforms, linen and laundry materials	
369.	total (items 361 to 365)	

No separate sub-block has been kept for other community, social and personal services (NIC 98 code 90 to 93). All expenses of these enterprises are to be reported in block 3.1.

[3.1] other operating expenses during the reference month: all activities		
(Rs. in whole number)		
(blocks 3 and 3.1 together will give total expenses of the enterprise. If some of the items have already been covered under specific activities in block 3, they should not be reported here again)		
item no.	description	value (Rs.)
(1)	(2)	(3)
371.	electricity charges	
372.	fuel and lubricant	
373.	raw materials consumed for own construction of building, furniture and fixtures (please check consistency with item 472 of block 4.1)	
374.	repair and maintenance of	building
375.		furniture and fixtures
376.		machinery including professional equipment
377.		transport equipment
378.		other fixed assets
